I _Public

EXTRACT from the REPORT of the COMMITTEE.

AMONG the most important matters brought under the review of the Committee, in the Public or Miscellaneous Branch of the Inquiry, will be found the following:

The Constitution, Powers, Expense, Practical Efficiency, and Defects, of the different branches of the Indian Government, both at home and abroad

The Appointment and Nomination of European Servants for the Civil Administration of India, their Character, Education, Qualifications, and Oriental Acquirements:

The policy of employing Natives more extensively in Indian Administration; their Feelings and Opinions regarding our Government; and their Condition in reference to Education:

The introduction of the English Language into the proceedings in the Company's Courts of Justice:

The Laws under which our Indian Empire is governed, and their Administration, and the degree in which they are applicable to European Settlers or Residents, or are capable of being made applicable to them:

The Condition and Character of such Settlers, and the Policy of encouraging them:

The State of the Press in India:

The Church Establishment, with reference to the Actual State of Christianity in India: and
The Powers and Practical Effect of the Kine's Courts at the different

Presidencies.

In reporting the result of their inquiry on these points, the Committee field anxious to abstain, as far as possible, from the expression of any options: they prefer submitting to The House a general Summary of the Evidence. They would, bowever, strongly recommend an attentive persual and consideration of that Evidence.

There will be found in the Appendix to the Evideous, heridac a whather the Digger of the Evideous them before the Committee of the Drive in 1800, and before proceeding Committees of the Committee of the Order in 1800, and before proceeding Committees of the Commons, an interesting Messol of the keep taken for the purpose of Edwarding the Norieva in India, a selection regard to the Eugheyment of Natives in the Crift Departments; the best mode of qualifying the European Crift Servants for their official delair in India; and the Numbers and Salaries of the Ecclesiation! Foundations;

REPORT FROM SELECT COMMITTEE

L-Hour Government.

THE Authorities composing the Home Government are (1.) The

PUBLIC.

The Authorities compoung the Home Government are (1.) The Court of Proprietors; (2.) The Court of Directors; (3.) The Board of Courtol.

 In the Evidence, the Constitution and Qualifications of the Proprietors; the Functions of that Court; and their Fitness to choose the Directors; are severally brought under review.

As the qualification for a single vote, a Proprietor must possess, and have beld for 18 months, 1,000, stock; no minor may vote, nor can a Proprietor vote by proxy. The number emitled to vote, at the present time, is 1,576; of which 54 have four votes, 50 have three votes, 570 have two, and 1,500 one

of which 54 have four vates, 50 have three votes, 570 have two, and 1,500 one vote.

Exclusive of the profitable investment of Capital which India Stock has hitherto afforded, individuals have become Proprietors, from connexion

with that country, and previous residence there; from a desire to take part in the discussion of Indian affairs at the General Courts; and for the purpose of promoting the election of their friends, and participating in the patronage.

The Court of Proprietors elect the Directors, and declare the Dirichloud, which, since 1795, has always been declared at the maximum of 190 per cent, allowed by the Act of that year. They have no general courted over the Court of Directors, but they make Bys-low, which are binding upon the Company, when m Act of Parliament exists in the contrary. All Proceed-More relower 6000, may be submitted in them in the no Great allows 6000. More allows 6000, may be submitted in them in the no Great allows 6000.

Money above 6004, most be submitted in them; but no Grant above 6004, mode by them is wild, unless conferred by the Board of Control. Their powers were materially limited by the Acts of 1784 and 1793; they can neither revelos, suppend, nor vary, any order of the Court of Durecton which has been sanctisored by the Board of Couttol; and though there appears to be no criterization on their discussing any messare of the Directon, they are, in fact, virtually precluded from all substantial interference in the affairs of India.

27. 2. The Court of Directors consists of 24 Proprietors, who conduct the whole sifting of India, both at home and abread, subject, on most points, to the Beard of Control.

Thisteen for a Court, six of the 31 Directors on any assuable to activity.

and such has been the law since 1773; but they are re-eligible at the expiration
of a year, and are generally re-elected.

53. 169. The election of the Chairman and Deputy Chairman takes place annually by 04-1600, the Directors; nor does any fixed rule regulate their choice.

in the Directors, subject to the approval of the Crown. The Court can recal a Governor, or any set their servants, independently of the Board of Control.

Subject to the power and supervision of the same Board, most of the Despatches connected with the Government of India are prepared by the Directors. In

connected with the Government of indus are prepared by the Directors. In
case of collision between the Court and the Board, an appeal lies to the King in
Council, as an ultimate resort.

Every Director has no has nower to laws, full cognizance of all the affairs

Every Director bas, or has power to laws, full cognizance of all the affairs of the Company, and has, when in Court, the power of interference; but every Director has not the opportunity of sitting and deliberating in the Committee of Correspondence, which is filled up on the principle of succession by seniority alone.

ON THE AFFAIRS OF THE EAST INDIA COMPANY.

For the depasted of business, the Court of Directors is divided into three principal Committees: the Committee of Correspondence the Committee or the Committee of the Committee of Correspondence the Committee of Correspondence the Countries of the Court of the Cour

filled in India, or chewhere.

All that relates to the preparation of Despatches for India, generally, belongs to the Committee of Correspondence; particularly all the more important Political Businesses.

It appears from the Evidence that all the Despatches, not of a secret nature, have enjiginated with the Court of Directors, and that, during the last 17, years the Board have directed the preparation of 40 or 50, out of a total number amounting to easily 5,000. They have continually made important alterations, but the Liev has precladed them from any other property of the court in the court of the court in property of the court in preparate It.

1257

All Communications addressed to the Court of Directors, of whotever nature, and whether received from abroad or from parties in this country, go, in the first instance to the Secretary's Office, and are laid by the Chairman before the first Court that meets after their receipt. Descatches of importance are generally read to the Court at length. The Desputches, when read or laid before the Court, are considered under reference to the Committee of Correspondence, and the officers whose duty it is to prepare Answers, take the directions of the Chairs upon points connected with them; the Draft of an Answer is framed upon an examination of all the documents to which the subject has reference, and submitted to the Chairs; it is then brought before the Committee of Correspondence, to he revised by them, and is afterwards laid before the Court of Directors. for their approval or alteration. When it has passed the Court, it goes to the Board of Control, who are empowered to make any alterations, but are required to return it within a limited time, and with reasons assigned for the alterations made. Previously, however, to the Draft being laid before the Committee of Correspondence by the Chairs, experience has suggested the convenience of submitting it to the President of the Board, in the shape of what is called a Previous Communication. In this starre alterations are made by the President, without the formality of assigning reasons for them. The Previous Communication being returned to the Chairman, is kild by him before the Committee of Correspondence, either with or without the alterations made by the President, or with a modification of them, as he may see fit. Against the formal alterations made by the to the Board, who have not unfrequently modified the alterations on such representation; but if the Board decline to do so, they state the same to the Court, and desire that the Draft may be framed into a Despatch, and sent out to India, agreeably to the terms of the Act of Parliament. In the event of a refusal, the Court may be compelled by Mandamus to comply with the order, but if they doubt the competeocy of the Board, they may appeal to the King in Council, who decides whether the Board is acting within its power.

20.. By the Charter Act of 1813, the Rules and Regulations for the good government of the College at Helliptory, and the Millery Sentinary at Addiscondes, are subject to revision and approval by the Board, and no Order for the establishment of any office, or the appointenest of any person to fill the situation of Principal at the College, or Head Master of the Seminary, is valid, until approved by the Board.

5. The Warrane for nominating a Bibboy of Caloutta, or for perparing Letters Patter relating that the Sep, is counterligated by the Predictat, in which he acid independently of the Court of Director. The President also counterigon the Warrane of the King approving of the appointment by the Court of Directors of the Governors, and Communders-in-Chief; as well as the wirting on Instrument under the Sign Manual by which the King may recover or recall my person from office or employment in India, and vacate and make wold Appointments and Commissions there.

The mode in which separation is made between the Political and Cummercial Fanness of the Company, is, in the terms of the Act of 1813, under the absolute control of the Board.

They have also the power of directing permission to be given to any individual to proceed to India, if the Court have previously refused such permission; and the Board are not required in this case to state their reason.

The mode in which the business is transacted between the Board and the

The mode in which the business is transacted between the Board and the Court has been already described.

Considering the multifurious nature of the Company's relations and

transactions, it is to be expected that the Correspondence should be voluminous and complicated, competending, as it does, not only all that originates in Diaghad, and is transmitted to India, but also the record the Proceedings and Correspondence of the Officers at the reveal Presidencies, necessary to got the Authorities at home in complete possession of all their circumstances. The Correspondence comes home in Disputches, and the Explanatory of the Correspondence comes home in Disputches, and the Explanatory of 13 years, from 1793 to 1816, was 45,004; and from 1814 to 1803, a period of 16 years, the comber vor 18,416.

From the cutalishment of the Board in 1984, to 1884, the number of Letters of the State of Letters and Letters

It is represented that the Home Government is overloaded with details: and that there is nothing so great, and nothing so small, that does not funder the present system) require the sanction of the Supreme Authority. While it is maintained, as a principle, that the Councils of India must be made to confide in the Government at Home, (which salutary purpose can alone be secured by the transactions being duly recorded, and punctually transmitted home by every opportunity), it does not seem possible that the overwhelming mass of business should be diminished: the only obvious principle of remedy is stated to he a division of labour and responsibility.

In describing the mode in which business is transacted by the Court and the Board collectively, allusions have been made to differences of opinion, which have occasionally arisen; to a power of Remoustrance on the one hand, and an obligation to give reasons at large on the other; and it is held that differences of this nature must operate unfavourably on the Company's interests, in two ways, from the weakness and vacillation which disunion betrays, and from the delay that must take place before the intended measures are adouted. The Act of Parliament prescribes, that the Despatch, when prepared, should be only two months from the time of its leaving the Court of Directors to its being returned thither; and an Answer has been prepared by the Court, and sent up to the Board, within ten days of the receipt of the Despatch from India; but it has of India to the consideration of the Home Authorities, have, from neculiar events, not been answered for a period of two or three years, circumstances in the Evidence: while it is also affirmed that the desire of avoiding collision bes-

led, in many instances, to the continued and renewed postponement of Instructions upon important subjects. Hence, although the degree of incou- 277, 186, 201, 1868 venience resulting from such collision may be regarded as a matter of mere enimion, and thus he variously estimated, yet it must have it origin in the consti- so, so, too, too, tution of the Home Authorities, and the existence of co-ordinate powers. It has powers of the two authorities, impediment is thrown in the way of commu-

A remedy suggested for the evils just alluded to, is, a change of the present system, by vesting the Government in all its branches in one body, or in two bodies, having a very different relation to each other from that which now exists between the Court and the Board, and remodelling the Local Government on the same principles. But, independently of any great change in the system, the Evidence affords various hints respecting modifications which might be heneficially

The possibility of conducting the business with fewer Directors, and the expediency of reducing their number, have been considered. It is allowed that a as morally, an additional degree of responsibility: but it is maintained that no real ment, with which a large proportion of the business of the Court originates. requires the superintendence of a separate Committee; and though there is a plan suggested for introducing a more marked distinction between the Political

and Commercial character of the Company, it is contended that there is a necessity for an interference an the part of the Court as active and extensive as that which at present exists.

The advantages and disadvantages of the Change of Directors by rotation have also been considered: it is allowed that, by the existing rule, the Court is frequently deprived of the advice of competent and able men; but if the Directors were to be chosen for 169, there would remain on check upon their incapacity or

The mode is which the Committee of Correspondence is filled up is lable to a similar dejection, because thom Mandres who come late in fiftee fine fine and who telests and experience precliarly quitify them for taking, a part in the Administration, one were the plotted to that Committee. The present Law, is said to have its afternance; because, by means of it, a Director Law, is said to have its afternance; because, by means of it, a Director becomes perceitably exquainted who very Intensi of the Company's affairs, while he is not precluded, by being stateded to a subsediant Committee.

It is considered that the reduction recently made in the Salary of the President of the Beard, in conceptence of which that situation offers a remomeration for talent and shillity inferior to that afforded by many other appointments of the same class, is, upon public grounds, most objectionable.

LOCAL GOVE

In reporting the Evidence relating to the Local Government, the Committee propose to give an outline, 1st, of its Constitution and Functions; 2st, its Operation, comprising its Efficiency and alleged Defects; 3st, Proposed Alterations and Improvements relating thereto.

There are three Presidencies, Bough, Madras, and Borshay. In Bengal the Government consists of a Gerenter General and three Conocalillers; and at Madras and Boeslay of a Governor and the same number of Conocillors. The Court of Directors, they are fit is appoint the Communicate-Circle at each of the Presidencies so a sent in the Council of the Presidency to which he is attached, in a which event, bethe such as the settle with the mine and the contraction of the invariance of the Council of the Presidency to which he as attached, the classifiers. The Crill Members of Council most have resided ten years in India, in the Company's service.

ON THE AFFAIRS OF THE EAST INDIA COMPANY.

The Governor General has a supreme controlling power over the Governors of Madras and Bombay, who, under certain circumstances, may be suspended for disobedience of orders. He has also the nower, if he thinks fit, of proceeding to the subordinate Presidencies, and assuming the chief authority

According to the terms of the Act of 1798, the Governor brings forward in Council any husiness he thinks fit. The discussion upon it may be

adjourned twice for 48 hours, but not longer, and then a decisioo must be proposaced; if the Members of Cosocil accord with the views of the Governor, the decision becomes a measure of Government; if the Members of Council dissent from the Governor, they are to exchange opioions in writing, which are entered upon record. If the Governor still adjectes to his own views, he is vested with the power of acting oo his own responsibility, placing upon record his reasons for so doing, which are transmitted to this country, 810, 814, 1685 with Conies of all the Proceedines. From the operation of this independent power, legislation, and matters judicially before the Council, are the only

To the powers of Governor General, those of Captain Geotral have, on one occasion, beec superadded. This is an appointment from the King, and con-

firs the complete control over all Military Affairs, The power therefore of making or enforcing Laws for the government of the respective Presidencies rests in four individuals, viz. the Governor General (the Governor to the cases of Madras and Bombay) and the three Members of Couo cil, subject immediately, in some instances, to the consent of the Supreme Court of Judicature to register their Decree, and more remotely, to the approval

and sanction of the King in Council, the Board of Control, and the Court of The general Administration of Public Affairs is carried on by the means of Boards, the object of which is to relieve the Government from the

burtheo of details. At Calcutta, there are the Boards of Revenue, Salt and Opium, and Trade; and the Military, Marioe, and Medical Boards; At Madras, Medical, Military, and Revenue Boards: At Bombay no Reveoue Board ever existed, and the Military Board was abolished by Sir John

Concerning the system of Administration by Boards in general, it has heen stated, that however plausible they may be in theory, and however asseful Boards might be made, yet that practically they are inefficient; that they operate as clogs upon business, and that all that is professed to be accomplished by them, might be better attained by the agency of a single individual, is the uniform tenor of the Evidence adduced before the Committee.

With respect to Councils, it is argued, on the one hand, that as they are on check upon the Governor, in any case when he chooses to exercise his independent power, and as the Secretaries of Government and Heads of Departments might probably give him the assistance which Councillors now afford, they might be altogether dispensed with, and the Public at the same time lose no efficient check. Oo the other hand, it is contended, that they are extremely useful to arranging for the Governor the most material points of Correspondence, and that they relieve him from a load of detail, and matters upon their own responsibility; that, in short, as the Governor is, for I.

1450.

the most part, totally unacquainted with Indian Affairs, the assistance of Councillors, of local experience and knowledge, is indispensably requisite to enable him to discharge bis duties.

The duties of the Governor General are those which appertain specially to the Presidency of Beneal, and those which relate to the supervision and control of every functionary in India; and if it be true that the Local Administration of Beneal, more immediately confided to the Governor General, is sufficient to engage his whole time and attention, it must necessarily follow, that the still more important business of general Legislation, and general Control is ill performed and from this source, it is alleged, arises one class of the evils which pervade the Administration in India. Another class is alleged to have ita origin in the nature of the Administration at Home, a system of checks, which operate as clogs on business, and occasion a disussion of authority, under which officers, brying the same duties to perform, and the same objects in view, are

split into distinct departments, often acting on opposite principles, and coming into perpetual collision with each other, It has been said, that one of the most important considerations for Parliament is the Improvement of the Government of India in India itself; with this 260.331. view, and in order to meet the evils already adverted to, it has been proposed, to entrust increased powers to a Local authority by the establishment of one Supreme Government for all India, without the charge of any Local Admini-[Any, Vol lisport stration, and by the appointment of Lieutenant Governors at the several of 1851.]

Precidencies with substitution of Lieutenant Governors at the several of 1851.

Presidencies, with subordinate powers. Under this arrangement it would not be necessary to disturb existing boundaries, although it might be advisable to divide into two the extensive Presidency of Bengul. Against the adoption of these alterations, it has been unred, that the Local Government of Calcutta, as at present constituted, though it has some defects, is yet fully equal to the task of levislating for the Native Population; that the number of the Regulations passed by the Local Governments, since the renewal 1340, 1350, 1351; of the Charter, is small when compared with that of the Laws passed in England during the same period; that it would be dangerous to remove the salutary

checks which bave bitherto existed in the control exercised by the Home 1541, 1544, 1004. Authorities a and that the business which, on the adoption of the New System, would unavoidably devolve upon the Supreme Government, would, from its extent, be unmanageable. In contemplating the probable effect on the minds of the Natives, of any extensive change in the present Administration of India, it has been denied that it would be productive of any unfavourable result, or that it would make

and their feelings of respect attaching entirely to the Executive power.

THAT the British sway has conferred very considerable benefit on India can

hardly be doubted, since under our Government the people enjoy advantages tection from external invasion, and the security of life and property. If these on ages of anarchy and misrule, has rendered them insensible to the blessines

are sure to become reasons for disaffection on the part of the governed, because they annihilate their hopes of individual aggrandizement and independence-Hence, with the exception of Bengal Proper, where a general feeling of pro-

tection is stated to prevail, the British tenure of India is, for the most part, a tenure of the sword, resting chiefly on the persuasion of our national power, and military strength and discipline. At the same time, it may be matter for attentive investigation, how far the exclusion of the Natives from places of treet and emplument, operates as a cause of discontent, and also how far the influence of the British Name in the Native States is converted by rapacious rulers into an engine of oppression.

The subject of the Levislative Power in India has already, in a great measure, been anticipated in the Summary of the Evidence respecting the Constitution and Powers of the Civil Government, and the proposed Reform of the present \$15.512, \$15.842, system, by the establishment of a Supreme Authority, embracing Executive, Judicial, and Legislative Functions. It therefore only remains to pass under review the existing State of Jurisdiction and of the Courts of Law, the Modifications and Changes which might be beneficially in-

1451, 1453,

troduced, and the principles which ought to regulate any new Legislative There exist in India at the present time two concurrent, and in some instances. conflicting, systems of Judiesture 1-the Company's Courts, and the King's or

Supreme Courts. In the Company's Courts there are three grades of European Judges; the District, the Provincial, and the Judges of the Sudder Court. Of the Native Judges there are two classes: Moonselfs, of whom there are several stationed in the interior of every district; and Sudder Ameens, established at the same station with the European Dutrict Judge. There are also Magistrates, who exercise Civil Jurisdiction under special appointment,

Judge.

Thomas Munro.

The jurisdiction of the Supreme Court extends to Europeans generally, and, within a certain limit around the soveral Presidencies, to Natives also: but constructively. Natives not so circumstanced bave, on many occasions, been brought within its jurisdiction. The jury system is confined entirely within the limits of the Supreme Court. It is made ground of complaint, that the Criminal Law is more severe than that administered beyond this boundary, while the Civil Law also is attended with an expense which has ruined most of the native families of distinction, and home heavily upon

No Regulation made by the Local Government, and affecting individuals within the jurisdiction of the Court, is valid, unless registered by the Court : a power which has in recent instances been freely exercised, and much beyond nrison between the Local Authorities and the Functionaries of the King's Courts, Government; nevertheless, objections exist to the abolition of the courts; while the remedies necessary to correct the evils attached to the operation of the present system are said to be abundantly obvious: 1st, by accurately and strictly defining the jurisdiction of the Supreme Court, or, fidly, by the establishment of a general Legislative Council, or, Sdly, by the appoint-

ment of Local Agents with the control of districts, as suggested by Sir

I.	xiv	REPORT	FROM	SELECT	COMMITTEE

cerning which it has become a question whether it might not be suppressed or modified by the introduction of Trial by Jury, without danger to the State.

There is also important Evidence with regard to the Code of Criminal Law in force in the Provincial Courts; the reciprocal circumstances of Europeans and Natives with respect to the Administration of Justice; the effects and tendency of the Judicial System actually in operation, as to the security of the persons and property of the Natives; and the ex-

pediency of subjecting Englishmen to the jurisdiction of the Provincial

On a large view of the state of Indian Legislation, and of the improvements of which it is ausceptible, it is recognised as an indisputable principle, that the interests of the Native Subjects are to be consulted in preference to those of Europeans, whenever the two come in competition; and that therefore the Laws ought to be adapted rather to the feelings and bahits of the Natives than to those of Europeans. It is also asserted, that though

the Native Law might beneficially be assimilated to British Law in certain points, yet that the principle of British Law could never be made the basis of an Indian Code; and finally, that the rights of the Natives can never be effectually secured otherwise than by such amalgamation; by the appointment of an European Judge to every Zillah Court, with Native Judges as his assistants and assessors: and by the substitution of individual

for collective agency. The provisions for the promulestion of Ordinances and Regulations are described to be effective

INTIMATELY connected with every plan for the good government of India, and for the introduction of ameliorating changes into the present system. is all that relates to the babits, character, and capacity of the Native 619, 691, Population. It appears that at present they are only employed in subordinate situations to the Revenue, Judicial, and Military Departments.

They are said to be sufficiently observant of the practical merits and defects of our system; and to be alive to the grievance of being excluded from considered as compensated by the increased security enjoyed under British protection, compared with the precariousness of all tenure under former 450. 50t. 510. Governments: it is amply borne out by the Evidence that such exclusion 691.

is not warranted on the score of incapacity for husiness, or the want of ambigation, or trustworthiness; while it is contended that their admission, 1873, 1882, 1872, under European control, into the higher offices, would have a beneficial effect in correction the moral obliquities of their general character; would 1733. strengthen their attachment to British dominion; would conduce to the better Administration of Justice; and would be productive of a great saving

in the Expenses of the Indian Government, With a view to the more owneral identification of the Natives with the Government of India, the encouragement and cultivation of the English

Language, to the overtest possible extent, is deemed by one Witcoss to be bigble A desire for the knowledge of European Science and Literature has, it is declared, been awakened in the Natives by the more recent extension

and encouragement of Education among them; and it is urged that

Morel and Religious Instruction is, in consequence, of imperious necessity

ON THE AFFAIRS OF THE EAST INDIA COMPANY. TO FRIELD THE AFFAIRS OF THE EAST INDIA COMPANY. TO FRIELD THE PRINCE. The proportion of the Hindeo Population to the Mahomentan is stated at eight to one. The proportion of the Hindeo Population to the Mahomentan is stated at eight to one. The expediency of fixming a Law for defining and regulating the Criel Rights of Existent, in the case of a change of Richigen, is suggested. It is the case of a change of the regular portect toleration to the Nature.

Christians, and to remove, as far as possible, any disability that cam be shown still to exist to their prejudice.

An interesting Sketch has been given of the State of Christianity in India in the early apen, and also of the Syrian Christians, who have received the great assistance and advantage from a College for the instruction of their Priestness than the Conference of the Conference

the early ages, and also of the Syrian Christians, who have received the greatest assistance and deventage from a College for the instruction of their Princihood, founded by Coltonel Munno, long readont at Travancers, the Students of which are statis, by a elergymen who examined than, to have made greatprogress in the Latin and Syriac Languages, and in other branches of Literature.

The Roman Syrians have a College at Verspoly, for the advantation of about

50 Students.

The Roman Syrians and the pure Syrian Churches of Travancore are about

equal in numbers, and amount each to between 60,000 and 70,000 souls.

The Failure of Roman-catholic Missionaries is acknowledged by themselves, and attested by other Witnesses; while the procress of the Protestants assesses.

to be daily becoming more successful. Their judicious plan is to establish Schools, which they have effected both in the North and South of India. The number of Scholars in Bengal alone, ascounts to be about 00,000.

This general diffusion of Instruction is producing the best and most salutary

effect, not only on the children educated, but on the minds of their parents and neighbours. Femile Schools have also been escessibily established; at the different Missionary Stations there were, in 1843, nearly 1,800 female children, and that number has gradually increased to 8,000.

The proficiency of the Native Catachists is also attested.

Pass -----

It is stated, that the number of Chaplains at prevent in actual survice is not sufficient for the wants of the people committed to their charge; and while, in several stations in the interior of India, the duties of a Chaplain do not employ the whole of his time, there are larger stations, such as Military Contonnessens, where there is duty for two, if not for three, Chaplains. The want of additional Bishops is also cointed out.

While an efficient Clurch Establishment is recommended, co-extensive with the wants of the European subjects who may be members of that Chards, and of such Navies Christian subjects as hall be willing and naviso to statch there salvas to it, perfect toleration, on the part of Government, to the lubour of the Ministonine, in not less strongly recommended, care being lad, at the same time, not to afford, on the part of the Government, any direct encouragement to the convenion of the Navies.

73.81. EAST INDIA Patronage is vested partly in the Crown, partly in the Directors, and partly in the Governors and Council of the soveral Presidencies.

The Board of Control has legally no share in the distribution of Indian
Patronage; though, practically, the President of the Board, by an arrangement
with the Court of Directors, line a share equal to that of one of the Chairs, or
double that of a Director.

coulde that of a Durector.

The Patrousge exercised in India amounts to a very large share of the whole;

1846.

1846.

The Durbustion of it is recorded on the proceedings sent home, and it is

liable to be vigilantly scrutinized by the Court, and by the Board.

1.500. Promotion is regulated on the principle of seniority as the general rule, and
by selection, according to individual merit, as particular exigencies may require;

but in the several Presidencies it is, generally speaking, confined to individuals within the Presidency.

No public responsibility attaches to the Patromage of the Directors; nor do the tests prescribed operate upon the exercise of it any more than the desirable-

the tests prescribed operate upon the exercise of it any more than the desirableness of obtaining competent persons operates upon the disposal of the Patrouage 661.622. in Government offices in this country: Public Opinion is said to have as little influence in the one case as in the other.

107.
108. The amount of Patronage is necessarily fluctuating, being regulated by the demand for Public Servants, arising from casualties or other causes. The number of Civil Servants at the three Presidencies is calculated at 1,100 or 1,800.

802.685.

To the present mode of Nomination, it is objected, that it gives to India only
84.88.495.485.

an average amount of talent, or one but a little above mediocity. Though
104.105.

there does not appear in the Evidence any impotation upon the purity with

20. 422. 20.54% same time agreed, that the nonination by individual Directors is not the best best of the first property of the property of th

bave hitherto possessed adequate abilities and qualifications. If a system of

competition were acted upon, and if the Natives were more extensively appointed to Civil Offices, the amount of patronage, it is stated, would be 1896.

1896. https://doi.org/10.1006/19.1006

might be given to Public Schools and Universities, as the reward of talent and acquirement. What system of competition could be adopted so as to prevent all favouritism in the selection, is admitted to be deserving of serious consideration. An argument, brought forward by one Witness, against any plan

1546. 1540. different from the present, is, that checks could not be to effectually established to meet the abuses to which the exercise of such extensive Patronage, at home 1697. 1598. 1815. and in India, is liable. In the event of the Patronage being taken away from the Court of Directors, a secondary compensation has been successful.

ON THE AFFAIRS OF THE EAST INDIA COMPANY, Avil

The Committee have inquired into the state of Education in the Civil Service. and among the Natives of India.

1.—Ennearment Crem Superce.

pointment, the Evidence is not very specific; they are fixed by Regulations on all ser. framed by the Court of Directors and the Board of Commissioners. On an average young mee proceed to India at the age of 18: 22 is recommended as 611.764.773.503.

It is stated by the Principal, whose Evidence is very full and detailed, that the design of the East India College at Haileybury, which was established in 1806, was, to supply the great body of Civil Servants with an amount of qualification commensurate with the extent and importance of their functions in India, which qualification could not, at the time that the College was founded, have been otherwise procured. The nature of the combined Course of Study, the impracticability of acquiring it without a special Institution, more particularly for Oriental Literature, and the tests required of the parties nominated, all form subjects of Evidence. It is considered that it would be advisable to increase the age of Students, by admitting them between the ages of 18 and 22. The Act of 1826 is believed not to have answered the expectations of its authors, and to have shaken and mutilated [7 G. 4. c. 56.] the whole Collegiate System. The College, it is stated by the Principal, has bad various difficulties to contend with, but has, in a great measure, fairly answered what could reasonably have been expected from it on its original foundation; and it is held that, with revised tests, and some modifications in its present machinery, it would be connectent to stand even against the Universities of England, in so far as relates to the due Qualification of Civil Servants for India. The proficiency of the Scholars is well attested by those who have experienced its benefits and watched its precress. The capabilities are pointed out which the College possesses. of admitting alterations, so as to reuder the Education more efficient and satisfactory; and other modes of Qualification for the Civil Service are suggested. It is maintained that the Civil Servants have been better educated since the establishment of the College than they were before; and the fact, that the most important posts have been filled in India by those in proof of this opinion; while the tenor of other parts of the Evidence 475, 698, 898, 913 would show, that where the operation of the system has not been absolutely prejudicial to the habits and views of the Students, every object contemplated by the College might have been more effectually obtained by other

at Calcutta, with the view of perfecting themselves in Languagea, the elements of which have been acquired at Haileybury, where the education is of a more general nature. While at the College at Calcutts, they are maintained at the Company's expense. Of this Institution (which was from the commencement strongly objected to by the Court of Directors, on the 485. score of expense) it is remarked, that " it has been a source of more debt than knowledge in the Civil Service, and an expensive establishment for the 287.642.644.133s end proposed." It was not uncommon in former times for young men to leave the College with a debt of from 50,000 to a lac of rupees; but this evil 402,012,014,100 may in part be attributed to the mode of appointment. The Institution has lately undersome a revision. It has been useful in providing books, by which the acquisition of the Native Languages has been greatly facilitated, but beyond this it is considered that the Institution is disadvantageous

On this head of Native Education, the Evidence is full and circumstan-

Testimony has been adduced concerning the Acquirements and Abilities of the Angui-Indian Population, concluding with a recommendation for the removal, in their case, of all invidious distinction, and exclusion from Office.

Tur Pas

This Evidence is detailed and circumstantial respecting the state of the European and Bedan Press | the Regulations relative theoretics | and 800, 207, and the subjects of Discussions, Correspondents, Circulation, Frice, Transmussion, 878, 1103,

Press there, but its operation is not very extensive. At Bombay it is perfectly free.

The present classics on the Press lie in the withdrawal of the Government

Licence, which is revocable at pleasure, with or without inquiry or notice, and in the power of Arbitrary Deportation. How fir the existence of this power is necessary, in the present state of Indis, is amply discussed; and, with reference to the Offences of the Press, the possibility of obtaining a fair and impartial Trial by Jury is confidently assertly.

On the one part, it is argued, that the free discussion of Government measures, by the Press, or otherwise, must be productive of good, both in maturing Legislative Enactments, and in controlling the conduct of Public Functionaries.

On the other part, it is maintained, that the Freedom of the Press is inconsistent with the condition of the People, and incompatible with the nature of the Gaussian.

Since the Evidence was taken, intelligence has been received of the remov-

Terroconner with Lener van Sommenwer of Europeans

Mucsi valuable Evidence has been received upon this important subject in the Revenue, Judicisi, and Commercial Departments of the Inquiry, as well

As early as 1700 the Court of Directors prohibited British-born Subjects from holding Lands, the prohibition being chiefly directed against their own Servents, who, substitute their own Servents, who, substitute their own Servents, but has the substitute of the Holting Ording Public Lands and Farras. In 1788-84 it was stated, in a Report of the Communities of the Holtins of Common, that the Regulation was chiefly applicable to the Company's Servants, who, it was considered, might convert their influence and power to improper purposes, and that it ought on the equal prophilate borns not in

The Evidence shows, that as far na holding Lands in Farm, to a great extent the prohibition is merely nominal; Europeans bold them in the names of Natives, and in their names also they see and are sued in the Courts.

These Lands are principally held for the cultivation of Indigo, which has improved of late years in Behar and Bengal, where the Eschories are (450,000 prince dupleted by the 1 mg years) of Sentimproce forces by Dance Opposition of the Company of

chiefly established. There are also a few in North and South Arcot, which are two of the principal Indigo Districts.

649, 1659. 566, 570.

The introduction of Capital into these Districts, and the Employment of a great number of People, have been beneficial; but most of the of British-born Subjects into our Indian Possessions. It is not doubted that the skill, enterprize, and capital of Europeans might be made to confer

1001, 1007.

resources. The chief difficulty opposed to their free admission appears to be considered to arise out of the defective state of the Judicial Establishments, civil and crimical. Pacifities of intercourse have of late years been greatly increased. Licease to proceed to India is said never to be withheld if the Applicant can show any reason for wishing to proceed to India other than mere speculation. Many instances have occurred in which a refusal on the part of the Court of Directors has been suncreeded by the

The Report of the Committee of 1813 shows that serious apprehensions were then entertained by some distinguished individuals, who had hold high stations in India, that the opening of the Trade would lead to a dangerous influx of Europeans. But the Returns from 1815 to Subjects in India, not in the service of the East India Company,

does not exceed 515, and that these reside principally at the three Presidencies, or are employed on board the ships belonging to the respective norts. The Committee, conceiving that the question of the deep consideration of the Indian Government, and of the ruling authorities alterations of system which are recommended in the Evidence. In these

Papers the opinions of the Local Government will be found to be fally recorded.

MINUTES OF EVIDENCE.

Mortis, 14º die Februarii, 18

Peter Auber, Esq., called in; and Examined.

the situation of secretary.

1. DURING how many years have you been in the Civil Service of the Com- Pater Ander, Eng peny at the India House, and what situations have you filled there?-- I have 14 Petruary 1839.

2. You are also the author of a work called an Analysis of Indian Govern-S. You are therefore conversant with the constitution of the different branches

of the Indian Government, both at home and abroad?-I have, I believe, a general knowledge with regard to the constitution of the present system of

government.—The Court of Proprietors, the Court of Directors, and the Board of Commissioners for the Affairs of India.

himself recommended a perotiation for an agreement to unite the two. In the an award was made by Lord Godolphin. Amongst the property which was transwhich the East India Company possess in fee-simple in their own right; such was the islands of Bombay and St. Helena, and various factories and forts ; settle-Act, for punishing mutiny and desertion in the Company's troops. At the close of a very considerable extent. It led to Parliament passing a legislative provision, limiting the dividends to a certain rate. In the year 1773, Parliament itself instituted an inquiry into the Affairs of the East India Company. They empidered

MISCHLEARIOUS. anterior to the Act of 18 Geo. 3, each individual possessing 500% stock (1 believe no could be called. Such was the state with reference to the proprietors of East damed by the charter of William, each director was required to possess 2,000f. stock. As they were then elected annually, it was considered that a liability to the 18 Geo, 8, for the first time, to put His Majesty's Ministers in possession of the restoration of servants who had been guilty of malversation or oppression, Supreme Court, or of any courts, nor were they permitted to restore any servant without the consent of three parts in four of the Court of Directors; and the same with regard to the proprietors. Various other provisions were contained in the Act. Such was the situation in which the Court of Directors stood in the year 1773. In the year 1781 the Court were required to send copies of all the government and revenues, were to be transmitted to the Board, who had the within 14 days, the Board might send to the Directors a despatch to that effect, matter required secrecy, such as relating to the levying of war ne making of peace. and Deputy Chairman of the East India Company by the Secretary of State.

vacuury : and they might revoke the same. No salary was to be received by the on the snot was to be called in. It was provided, that after the passing of the Act, all parties employed by them were likewise to be sworn. In that year there was India. In 1788 an Act was passed, on a point of right disputed by the Court of action was to be stayed by the Court of Directors without the sanction of the Board. The application of the surplus revenues in India, and of home profits, was prescribed under that Act. No grant of salary above 2004, made by the Court of the territorial and commercial branches of the Company's affairs. No duties imposed in India were valid until approved by the Board of Commissioners. All the first instance, to the Court of Directors; and if refused by the Court, they of the Board. It was likewise ordained that the college and seminary should be majorsined during the prescot term of the Company's exclusive privileges. One cial purposes, was to be seot to India until approved by the Board. The Board,

Governors in Council of the several presidencies.

73. Will you deline what patronage is vested in the Crown, what patronage is vested in the Directors, and what in the Governors and Council of the different pencidencies in India 8—The patronage that may be coolidered immediately vested in the Crown is the appointment of officers to the staff, and all officers councited with the King's force, and all the includes of the King's counts thereon.

but I am not aware that the Crown pother class of office except the bishop.

74. In whom is the appointment of the Governor General and the Governor of the subscribinte predictates "—The Governor General are appointed in the first instance by the Court of Directors, subject to the approval of His Majesty, and the Commander-in-Chief the same; but Members of Council the Court of Directors any appoint themselves, without any control whatever,

75. Practically, is it not the case that the offices of Governor General and of

appointed distinctly by the Court of Directors.

76. But it and, in truth, been the practice that those appointments have been made as the suggestion of the Ministers of the Crows, subject to be required control exercised on the Minister of the Court 1—I apprehend that upon selecting a person for the bady office of Governer Germanic Geoverner of either of the press of the table office of Governer Germanic Geoverner of either of the presidencies, it would seem to have been sineast as accessary part of the constitution that the Court and the hand should he seem ensures their communication of the constitution that the Court and the hand should he seem ensures their communication of the constitution of the

77. Lift not practically the case that the Court of Directors exercise a cort of verien extreme eases, but no criticary cases the nonnistant of those great officers really resides in the King's Government for the time being?—Without mentioning my sames, because on record has been made in insistances where matters have come under discussion, names have been proposed by the Chairs, and they have been rejected most decidedly, atthough the insist/undeal proposed to the Court

stands in the most high and distinguished situation in this country.

78. Have not those cases rather been exceptions to the general rule than the rule as it has practically existed fur the last many years?—I apprehend the exceptions ould hardly be expected to be many, because there would be grant heistation on the part of the Ministers in maning

79. The patronage of the Directors then would appear to be confined mainly to the appearance of writers in the civil service, cadets in the military service, and assistant surgeons?—Certainly, with the exception of the masters attendant, the advecate-general, and cluplain.

80. Would it be possible to form any estimate of the value of such patronage?

—I apprehend it would be quite impracticable; what might be valuable to one.

 Their patronage, however, must be small in comparison to that which is excreised in India, and in which neither the Government or the Court of Directors interface; interfere 2... Decidedly. There is no civil natronage this year in the Court of MUSCHLANDON

Directors. The Governors in India have the whole of the natronage in India. 82. Is there any military patronage this year?—Three cadets to each 14 February 1812 83. The reductions now proceeding in India, both in the civil and military

India.

84. There have been periods in which these subjects of natronage have been

85. How long since has such practice ceased ?- The last case was in the year 1827, when the Court of Directors considered that a sale of natronage had occurred, and took measures for discovering the fact, and brought before the public sardless of any individual, be he who he might, that was supposed to be concerned been used; that gentleman was brought to trial with other parties; he was 86. Was there at that period a known market price attached to the purchase

87. Have you any doubt in your own mind that that practice has of late years

been discontinued?-My own impression is, that it decidedly has, 88. Has it been the practice at any period for the Directors to sell their patronage?-Certainly not the avowed practice, neither was it the known practice. That patronage has been sold there can be no doubt, because the records of the

public courts and the inquiries of Parliament establish the fact; but every Director was entirely acquitted of being a participator io any way. One Director, who was supposed to have been more or less concerned, was thrown out of the 80. Is the Committee to understand that no person having a sum of money to

going into the market and procuring that patronage for his money?-Clearly not. 90. Then upon your evidence the Committee are not to understand that it has

in order to put a stop to it; I may say that they have denounced it entirely

any rate some suspicion, attached to two Directors; subsequently to that time has there not been an oath administered to each Director, that he will not.

18 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

ter Jules, E

96. Then the Court have taken cognizance of that practice in their records? Certainly.

Certainly.

37. If it has been proved that two writers sent out to India have obtained their uppointments by means of paying money to some person to whom the Director had

regard to appointments. The friends of each individual enter into a penalty bond of 3,000%, rendering himself liable, in the event of it ever appearing that it has been purchased, and the appointment, on the discovery, is null and void.

98. Notwithstanding it heling found out that those situations were gained by improper persons, were the writers allowed to remain in India or recalled?— Recalled; they were dismissed the service.

99. What are the qualifications that are required for a writer previous to his appointment?—I cannot immediately state to the Committee what the exact qualifications are, but they are defined by the Regulations, that can be laid

100. It is only from that class that appointments can be made in India to any civil office?—Clearly; the Act prescribes that the appointments in India shall

he made from the list of civil servants there.

101. In the event of the Legislature deeming it desirable to remove the patronage

do you concluse that any dischousing soul, where to the sort we from million and appointments the subjects of open competition in this country we to the qualification of the person?—I am not tware that there could be any difficulty in fading period individuals qualified if the purrosage was removed from the Court of Directors, but the direction of the whole must next somewhere, that is, if I understand rightly, it has the country of the

100. I nat the governing power module sixteey young melon or cross situations upon one competition for that purpose. —If I amberstand the question in applies to getting individually properly qualified, observable than by the Court of DF and the property of purified as they prove he to well, and then that body would, more or kes, have in all otherson even them for the property of lightly and they are the parton of the

103. Does it not luppen, as it must according to the course of human nature, that the Directors, in the exercise of that patronage, are very frequently governed by a prediction for their own relatives and families?—Most naturally; but the individuals whom they appoint are subject to the like examination as every other individual is, he stands no better of pairer for the ultimate completion of the

appointment, unuess he is qualined, than any other party.

104. What is the nature of the qualification that they have to undergo?—If
they are educated at the East India College, they are not appointed without the
College Council reporting as to their qualification; the College Council rank

163. Mont it not happen that, when idelividuals are no appointed from flower and effection, but their multifection set not equal to those which they would be likely to be, if they were the rewards of ment and togetiment less the loberer, under no rearrange of the properties of the loberer, and the rearrange of the loberer is a relative of a Director, as such 1. conceive that you must have a general standard of qualification, to a lock every individual must come up. If the does not have the loberer is the loberer in the loberer in the loberer is the loberer in the loberer is the loberer in this is, as the appointment of the loberer is the loberer in this, as to the appointment of the loberer is the loberer in this, as to the appointment of the loberer is the loberer in the loberer in the loberer in the loberer.

10.3. Those gentlemes so rent out, not having been level to any profusion, they should be unable to obtain civil advancement in India, are left without the means of providing for themselves 7—No one, as I have before observed, goes on without lawing answered the test. After a writer readers India, he is now, believe, sent into the Modrail; that is, into the interior of the country, when he is placed under a coflector; and he must, is a certain time, pouses a certain time.

qualification in regard to the languages; io the event of his not attaining that auscusanaucroproficiency, he is sent home, and a disqualified for service.

107. Does not this mode of sending out writers aurrow the sphere of talent out. It is belonger there

of which the Governors of India have to make their choice?—In the first place the number sent out is according to the number required. All parties, when they are sent out, as I have helder stated, are supposed to possess certain qualifications. It has, I believe, here needloon found that, amongst the number sent out, the Governor General has been at a loss to select servants for particular duties; some have evenced fix greater relatist than others; but in the fluts of

institution of the College. I have never heard of any complaint, as to the qualifications of the servants generally, on their reaching India.

108. Do you believe that there are in India more than sufficient actually to fill the admiring officers in that country? — Whether at this more than sufficient actually.

to fill the calsing offices in that country I—Whether at this moment there may be more or not I do not know, but a very few years since the Bengal government made a requisition to the Court of Directors for 80 writers; the Court of Southern Southern

103. The limited number of writers sent out must prepentallo.

104. The limited number of writers sent out must preportionally limit the selection and range for office?—Unquestionably, the fewer the instruments the

110. Do you know whether, in point of fact, the Governor General and Governors and Presidents have felt great inconvenience from the very narrow choice that was left with them in filling very high and responsible situations?—If they have felt it, they have not stated it upon record generally.

111, You have used the expression "standard of qualification:" will you state what you consider the standard of qualification for a writer going out to India. — Leacost state what it is; but the regulations of the College will detail it. The regulations with regard to the College are approved by the Board of Com-

measurem.

112. The supply being so limited of writers soot out, is it not essential they should be persons of the highest qualification?—The Board of Commissioners and the Court of Directors have framed general regulations, and the professors of the College have stated what they considered to be not write the professors of the

13. If you could get better, would it not be desirable, there being so few?—
No doubt the best would be the most desirable.

116. Then the question is, whether you could not get a hetter class of servants by public examination, or public competition, than you do now in the way in which the patronage is exercised?—I should doubt very much whether it would be so.

115. You have referred to the London Board; is there not in the London Board a classification of first, second, and third servants?—Yes.

116. Are you aware how many of these who have been sent out through that ordest have obtained the first read 2.—No. I was not sent out this D.

ordeal have obtained the first rank?—No, I am not aware; but the Return can be given. 117. Does it appear to you that any of the evils of divided responsibility

and deby have arisin from the present constitution of the boson power-level.

So the a relative to the Court of Directives and Beand of Commissions. — It is really difficult to accover that question altogether. Instances may possibly have concurred, supposing you take the limit proceedings of the properties of the proceedings of the business coaglet to be does, that is, that the despatch, whose prepared, should be easily two mounts from the time of its interview the Court of Directives to its being retained tither; that finite has in some cases been exceeded.

138. From the late of the arrival of the despatch from India usual a fails.

118. From the date of the arrival of the depatch from India until a final reply is non to it, what my be the average period of time that may chapter.—I cannot take the average period of times: the amover I meant to give was as to the emploity of them within which a depatch has ing been prepared was, in face, next to India. It had no reference to the period when depatches might have been received from India, and the soover seem that to India.

119. The question now goes to that?—Most unquestionably I think there we been delays, but I do not think that any average can be well drawn.

(415.—I.) B 3 Whenever

Secretary's office?—I do not think I have got any exact amount under that

head; if could be easily prepared.

189. What reductions have of late been made in the salaries and establishments. 14 February 1835of the Sceretary's-follies, and when were such reductions made 2—Some reductions, in point of numbers, have been made in the last two years; but I may

of the Necretary Isolites, and when were such reductions made I—Some reductions, in point of numbers, have been made in the last two years, but Irany state, that Mr. Astell, when Chairman of the Court of Directors in 1849, had before the Court a paper which outered very fully into the state of the bone department; and if the Committee choose to have that paper, they will find in it

140. Can you say whether the annual expenditure of the Secretary's office is larger or smaller than it was in 1814?—In 1814 fees existed. It was a different

principle upon which the establishment was paid in 1816 from that which exists at the present time.

141. When was the alteration made?—It was subsequent to the last Charter Act; about 1815. The Court of Directors bad lone felt that the mode and so.

Act; about 1815. The Court of Directors bad long felt that the mode and system under which the establishment was paid was a bad core; it was by fees, in a very great degree; the allowances were not apportioned then upon a regulated scale. The Court came to a determination to abolish all fees, and place the establishment on one footing with regard to abairs and allowances.

142. Have you any paper that will give the Committee the total number of

officers, derks, and other persons employed by the Company T.—There were two preprieted taken in the paper which Mr. Acad Inil and brother Locarity and IT state the grows results, perhaps that will answer the question of the Committee and the Committee of the C

133. When was the office of examiner, on its present flouting and constitution, created, and value decimations again rise to be receiped no—The Examiner's office was created as easily as somewhere in the year 1780, shortly after the east, office was created as easily as somewhere in the year 1780, shortly after the east called for a Return of all the exhibitments alread and at home, as the Act discrete, for the purpose of retreenhemen; and it was found that the labour that or increased, with regard to the despetches, that the Examiner's office was separated to increased, with a time Laminer's office was separated.

the head was, first, Mr. Wilks, and afterwards Mr. Johnstone.

146. It is now, in truth, a secretarial office?—Yes, it is a secretarial office.

145. Will you have the goodness to state the amount of the salaries and

establishments of the Examiner of Indian correspondence?—It is between 21,000. and 32,000. 140. Has either reduction or increase been made in the salaries or establish-

ments of the Examiner's-office since 1827?—I'do not believe that the present examiner receives as much as his predecessor received.

189. Lam you state the difference?—He receives the salary attached to the office, 1,800d, a year; his predecessor received 8,300d, a year; the salary received by the present examiner being that attached to the office.

188. The late examiner was summercental 2. 12. a.c.

130. After what period of service did he retire?—He became a most valuable and efficient officer almost immediately on his introduction in 1809; he was then between 30 and 40 years of age, and he served 21 years.
151. The amount of the expense of the Examine?*-office at the India, House

is pretty nearly equal to that of the Commissioners of the India Board?— Within 5,000 I should think.

152. There is also an office in the India House called the Office of Military

Secretary?—Yes.

163. Can you state the annual expenditure of that office, including its establishment?—I should think between 6,000% and 7,000% a year.

n 4 the

MISCELLANZOUS, the examiner, and the military secretary, amounts to 48,1187, 2-Yes, I believe it

135. Are those who are denominated in the Return extra clerks, entitled to su-

to the amounts given in Government offices, the Court have generally awarded sense of what they have been pleased to consider meritorious services. 156. The Indian correspondence is immensely voluminous 2.—I can state that

the Indian correspondence has increased most enormously. The correspondence comes home in despatches, and the explanatory matter in books or volumes, as the whole of the proceedings of the Indian government are required to be recorded and sent home to the Court of Directors. There is a department at the India total number received (and they are folio volumes) from 1793 to 1813, comprising sultations, the Judicial Consultations, the Financial Consultations, the Commercial Board of Customs, Salt and Opium, Marine Board's Proceedings, Foreign Law every day; and perhaps whilst I am stating the extent of the duties, the Comshow, in some measure, the extent of the duties. Independent of the despatches which are prepared for approval by the Board of Commissioners, there is a great Court of Directors. From the period the Board was established, in 1784, to the the various matters connected with drafts, and other subjects under consideration, 3.958, and from 1814 to 1830, 7,907, making an increase of 4,005 in the drafts. Connected with the duties that come under the Committee of Correspondence, which committee has been particularly adverted to, besides the preparation of connected with their servants, civil and military, and others in this country; also departments. From the year 1814 to 1830 there were 30,146 references. The of duty arises out of Parliamentary Orders. From the year 1813 to the present sime the number of orders served on the Court was 725; within the last two

populationents of the native governments, was allowed to remain on the same footing. Jones ASE, Ene

368. The British misject baving, as you have justly observed, a right to full security in the event of a suppression of those King's Courts, in what way do

ments. It would sound hearly to English ears to be told that an Englishmen could

all the correspondence connected with it, what is your minion, resemby muchproperly sifted, understood, and justice done. The grand defect appears to

natives and others of Calcutto, an apprehension is expressed lost in the creat of

the country of Envishmen not appearable to the provincial tribumis; does it

373. In the event therefore of my legislative relaxation of these how, are you

874. On the other hand, is it not your opinion that the total suppression of the the interior?- By no means; I think the same motives which carry them into the interior sow, in as far as their objects are itonest and justifiable, would carry them still. As far as they have the means of making hourst profits now, they will have the means of making honest profits in the case I suppose, and if they go there for the gain of misconduct and oppression, it is very much to be desired 875. Do you think that the security afforded to them by the administration

of the local tribusals, would be doesned by Englishmen an adequate security for

their person and property?-I have no doubt of it 876. In reference to what you have shready said of the evils that the natives suffer from the Europeans, do not the Europeans who are settled in India, also suffer evils from the natives refusing to perform their contracts with them, which they, through the medium of the Molussil Courts, have no means of remedying? -I believe that the indigo planters have often great room for complaint on account of the non-fulfilment of their contracts by the ryots, and such evils

377. Are you conversant with the establishments at home, instituted for the education of the civil servants of the Company?-I have but a general know-878. Are you aware how far the institution at Hayleybury has been found

leave of them; and can only speak as to generals

by no means toyograble; I conceive that there is very little done in the way of study, except by a small number of the best disposed of the pupils, who would study any where a and that the tendency which is inseparable from assemblages of 879. Does it hannen to come within your knowledge that the young men who

so from thence, upon their arrival in India are placed in what is called the College, at Calcutta ?-The Bengal part of them are placed in the College at Calcultar those who go to Madras are partly placed in a seminary there, and partly sent into the interior, to be placed immediately under judges or collectors; and at Bombay they are sent into the interior immediately; I speak however from recollection, which may be imperfect. 880. When at Hayleybury, are the writers there maintained at the expense of

the Company?-Portly, and partly at the expense of their friends.

881. What is the amount of qualification required of them at the college at

Havleybury, before they are appointed writers, and proceed to India?-They undergo an examination before admission; they requive their appointment before point. They are examined as to their proficiency in Grook, Latin, and withmetic, I think before they are admitted into the College, and after they have passed the regular time, they undergo another examination, which ascertains their progress in general knowledge, and in the knowledge of certain of the Oriental lunguages. There is a professor of political comony, and a professor of law, but for the most important of all hunches of education for young men who are to be employed in the administration of justice, there is no appropriate organ. Nothing is more to be ismented than this, that young men should be sent to act as judges in India, without having received, I believe I may my with truth, one word of instruction on the pocular nature of the unspeakably important, most peculiar, and difficult duties they will have to discharge.

882. Do you know whether it very frequently happens that in consequence of a deficiency exhibited on such examinations, they are deprived of the writerships to which they have looked forward?-There are cases in which from not naminar they are sent back, and that, if my recollection serves me, more than onee; and if they continue below the requisite degree of profesiency they will, of course, not be

sent out, but I have not in my repollection may instance of the kind 353. On their strival at Calcutta, what conhidentions are required of them in the College there?-The only qualification now required to be uttained there, is a knowledge of certain languages, two of the languages of husiness in the country; the Person and either the Hindostance or some other. 384. Can you state what is the annual expense to the Government of each of

ON THE AFFAIRS OF THE EAST INDIA COMPANY.

Governor in Council as amounting to filtil a year for each of them?-A small proportion of them, and only those who are the most backward or the most no- James ANN, Esc. affirent, ever remain so long as a year. Some of them quit in a few months, 21 Pobrager 1832. especially if they have carried out with them any considerable knowledge of the native languages. After a certain period, if they do not fit themselves for employment, they are, by a recent direction from home, not allowed to have employment, and if they do not qualify themselves within a certain period, they

S86. Are not the regulations you allude to, recent regulations, in conseque of the extreme disorder into which that institution had got?-I believe so.

387. Had it not been found that the young men had indulged in such great hobits of expense, that there were few of them who were not more or less involved in debt previous to obtaining any appointment in India 2-Upon an inquiry which took place some years ago, it was found that the junior part of the service were involved in debts to a depletable degree, and also it was found that

their residence in Calcutta had been one great cause of this. SSS. Is not the sole find from whence the government of India can draw for civil servants to supply all the important diplomatic, political, revenue and sub-

ordinate judicial stations in that country, the writers nominated by the individual directors at home ?- Entirely so.

S89. Has it occurred to you that any mode might be devised of obtaining a supply of writers more advantageous to the public service than by the nomination of any individuals whatever?-It has always occurred to me that the selection ought to be from a wider field than it now is; that the proper principle of selecting would not be education at a particular college, but a certain amount of qualification adapted to the trusts which are to be conferred, and ascertained by a well-constituted organ of examination. In what meaner the appointment should take place with the best advantage, is a nice question, and one to which

I have not particularly turned my attention 590. Would not great advantage result from the opening those appointments

the test applied of superior proficiency was an efficient one-

391. Have you may doubt that one of the most important considerations for the Legislature must be the improvement of the government of India in India itself?-I think so, entirely.

300. In that point of view should you not think it of express importance that great attention should be paid to the education of the natives, and to the introduction of the English language among them 2-On every account I consider the improvement of the antiver in education as an object of paramount importance; and that it ought to be forwarded by every possible means. I am of opinion, however, that the progress of education among them, so as to produce any very perceptible effect, will be exceedingly slow. With respect to the English language making its way among a people so numerous, dispensed over so great a country, the number of Englishmen mixing with them so small, and the occasions of their feeling strongly the need of the English language so few a under these circumstances any very general diffusion of the English language

among the antives of India, I think, is to be despaired of, 895. Do you not understand that there exists a disposition on the part of the natives to sequire the English language?-All these that me coming frequently in contact with Englishmen, of whom, chiefly, we hear, do manifest a desire to acquire the English language; but with regard to the great mass of the people distributed over the country and in the fields, many of whom never saw an Englishmen, I conceive that no occasion for a knowledge of the English kmguage is felt by them, and that they are rarely excited to a wish for its

804. You are not aware that any representations have been made by teachers in some of the existing schools, of complaints being made by those sent there, that they are not trugget the English language rather than the Samorit or the Persian?-I should not be surprised if that complaint was made, because I should suppose that the parents who send their children to those schools are such as being in common intercourse with Englishmen, find the benefit of

knowing the English language. 595. What

PUBLIC RISCRLÄNKBOUE James MW, Esq.

13. 395. What is the amount of fands set apart by the Company for the object of educating the natives?—I cannot speak to that particularly; these are large

Farets MB, Est. funds both of a local and a general nature. I nonever three are oritions accounts.
 February 1883, almosby presented to the Committee upon that subject.
 S96. By the Act of 1813, a fund was set apart from the territorial revenues.

to say. The period of the Chatter perhaps was hall run.

S57. Was not the surplus territorial revenue of India charged with this by the

397. Was not the samples territorial revenue of Judia clarifyed with time by the Act—There was pretty mainter is used distribution exhibited to be sampline recurse, but I believe the sum that was directed to be applied for this object, was not considered a part of the surplus revenue, but without of the expenditure in India. A sum applied to promote native citizens in indic. A sum applied to promote native citizensin in the country, wends appear, I suppose, more the generating consenses of governments, remiering the sample so much less.

88. It that your convencion of the term of the Act of Berliamont, or is it becomes that the formula you turn that Act by the legal authorities to whom the Cours of Directors may have referred the question 2—I express my own opinion, from a next of recolorion that the sum alleded to made not incus in the distribution of the surplus revenue; and #1 am not incorrect in this, it must send aroung the express of the government.

600. It is been stood in a position to Pullisance by sectain authors of the halm of Bondays as suggestion whicher solves to be enforced, that at the and of it yours every solves appointed to an office under the British rule is the property of the proposition of the contract of the property of the language. From your impairs, and the extensimization to which you office has led you, one you state to be Committee my opinion with respect to the practice contract of 12 years, there might be extensimed to reduce the the international contracts of the property of the property of the property of the contract of 12 years, there might be contacted the complete of natives to fill large distributions of the property of the property of the thorous of all the efficient with the native term expense. I am officient multiple of natives to fill all the efficient with the native term expense.

400. In it year of pines that it would be conclinate to the numberators of the site of the control of the co

601. If none cathod introduction of the natives be a deviable object, was not detected as described to a legisla integrate year. In city to present had not detected the contraction of the Light's integrate year. In city to present the great part of the employments in which we should place them, by hardy great part of the employments in which we should place them, by hardy find the light of the light of the state of the light place of the light place of the light place of the inflamental place of the light place of the light place of the inflamental place of the light p

people with their governors 2—If you could spread the English imageure so as to make it the language of the propie, as well as of their governors, it wouldbe important in mean respects; though community of language has not much identified the

Irish people with their governors. In itself it would be a most desirable thing MISCHLARBOUS that the people of feels should speak the language of England, locates it would introduce them fully to the field of Emoplem intelligence. This, however, I Janu Mit, Englander them fully to the field of Emoplem intelligence. This, however, I Janu Mit, Englander them fully impossible and which we aim in 21 February 1802. 40%. Is it not the case that natives of rank and property are averse to taking

offices under the English Government at present?—I know no instance of their aversion to hold office. I believe that the families who held make and power under the native governments, and who might hope again to hold them if our government were dispossessed, would be glid, from the hopes they might entertain, to see it dispossessed; but I believe there is no aversion to the English Government among any other class of natives.

404. Does not their aversion proceed from there being no situation sufficiently high for them to take?—That I consider a different question. That there would be an aversion in passons of rank in the country to take such offices as we admit

605. But you apprehend there would be no indisposition on the part of natives of rank and presently to take offices of distinction if they were offered to them?____

406. Do not you think it would be desirable, for the purpose of the natives inguage intimately. I should consider that a knowledge of the English language would be an independently requirite in any notive forming a part of the legislative council. In others of the highest offices, it would be desirable for them to know the English language; but in most of the judicial, and most of the revenue situations. I should not think it up indispensable condition or a qualification of much importance. Even to be a number of the board of sevenue, I should consider a well qualified native nearly as fit without as with a knowledge of the

407. Should you not consider at important in judicial attuations, when cases norms and natives were concerned, it would be important that the indee should know both languages, but there are so many languages in India, that the judges being acquainted with all the languages of all the witnesses and parties that are likely to come before him in all cases, must be rare. At present everything is done through interpreters, and in the most langling way possible, because the judicial

proceedings are not recorded, either in the impurge of the people or of the indee, which undoubtedly is a very great absurdity, 408. Is not the Persian language as foreign to the natives as the English?-

400. If, therefore, there is to be some intermediate median of communication,

would it not be us easy smelnally to substitute English as Persian?-There is no doubt that might be done, but I should consider it searly as great an impropriety us the other. It amounts to me, that not only ought the proceedings themselves to be in that language. The judge ought never, unless it be a case of absolute necessity, to trust to translation for the sense of the evidence. 410. Are the higher classes of untives in general ignorant of the English

improses ?-With the execution of those at Calcutta and the other presidencies,

411. You have stated, that all despetches are ordinarily submitted by the Chairs to the Court of Directors, with the exception of those specially addressed to the secret committee, and with the exemption also of those, which though not so specially addressed, may upon examination by the proper officers, to whom in the first classes of despatches, what has been the general character and importance of such socret despatches?-Their climacter and importance will perhaps best appear, fined. It relates, almost exclusively, to the transactions which take place between ment, in seatters relating to the maintenance of order and accounty among the subjects, is considered secret. These points only are thought to need secrety

James Mill. Est.

MISCHELLEROUS, which concern questions of peoce or war; or questions relative to our connexions 21 Petrusy 1832. a much more general nature than in the other great branches of the correspond-

them, and have called for measures to be taken upon the instant, when almost all that remains for the secret desputches is to make remarks upon what has been very vegue, because the particular circumstances which shall determine the nature or quality of the measures required, can be so little foreseen, that they never can be the subject of precise instructions, but must be left to the discretion the other great branches of the correspondence, embracing the whole governthe Indian governments, like most other secrets, are in general good for very the overet despatches which have been sent from England to India, instead of

419. Will you state more fully to the Committee your view of the importance of the secret despatches in the months of April and May 1803, at the commencement of the European war in which this country was involved?-To that parfor the purpose probably of conveying to the government in India a knowledge

413. Has not the Board of Commissioners the power of sending out despatches of its own authority to India through the secret committee, in sending which

the secret examittee is simply ministerial?-Such in the practice; the Act of Parliament, in relation to the matters called political, the sort of subjects I mentioned before, gives to the Board of Commissioners the power of originating instructions when necessary, and sending them to the secret committee for transmission; and the power of doing this when necessary, they have converted, whether according to the intention of Parliament or not I do not know, into the practice of doing it always, for they have never allowed my other destratches to go. There have been no secret despatches (I speak generally) but those pre-414. In respect of the general administration of India, what proportion of that

administration rests upon the Board of Commissioners for the Affairs of India, and what proportion with the East India Company, its court, and its officers?-From what I have just now said, it appears, that in regard to the more important done by the Board of Commissioners; and whatever be the importance of that porticular branch of the correspondence which relates to these subjects, the whole of it rests with the Board. With regard to all the other branches, the case is materially different. The desputches on these subjects are prepared at the India House. The original concoction is there; only after they are so prepared, be made; they make alterations, sometimes more, sometimes less extensively; but I may say, and with confidence, that of all the reflections, suggestions, and instructions, which can affect the policy of the Indian governments contained in the public despatches, nine-tentlis, I believe a much larger proportion, originates

415. Do they not all technically originate with the India House, except the secret despatches?-They do; and I do not say that there may not have been instances of despotches, not upon secret subjects, prepared at the India Board, but these instruces have been rare; and it is not teclinically, but literally, that I say nine tenths

416. Would it not be in egular for the despatches to originate otherwise than at the India House?....Unless in the case of recusance on the part of the Court. this draft is sent to the Board, they have the power of altering, and their alteration may go to the length of substantially cancelling the Court's draft, and substituting another upon the subject.

of originating a dewatch, and sending it down to the Court of Directors, and requiring them to transmit it?-Not except in the mode I have now mentioned, James Mill, Eq. concelling the Court's dust, and substituting their own, 418. Does not it appear detrimental to the efficiency of the Court of Directors.

and generally to the public service, that those members who come late in His from India, and therefore are the best qualified to take a part in the covernment of the country, should not be placed upon the committee of correspondence till they come to it in seniority, and does not it amount incongruous that they should he at the same time eligible to the situation of cluirman and denate eligible to the It appears so a always to compose the committee of correspondence of the syrice members, does appear to me exceptionable on several accounts; but it has its advantages also, and I have not sufficiently meditated on the subject, to be able to say which preponderate.

419. How would you propose that the relection, if deemed preferable, should he made?-There could be no other mode but an arrangement among the directors themselves, in the same way as the chairs are now filled.

490. It being necessary that the chairman and deputy chairman should reseastively be members of every committee, is it not expedient that they should have an concernity in the ordinary course of rotation of being consigned with the afficient transacted before each of such committees, and is not that an advantage derived from the existing system, by which the highest officer in the Indian service returning to England and becoming a director, becomes in succession acquainted with all I have no doubt that in the clampe of mode alluded to, something would be lost, in the number suggested in the question; but the very inconvenience which is referred to is incurred in the most important of all instances a because it not unfremently hannens that directors come to the chair who have never been in the committee of correspondence, in which the most important business is performed, 421. Is it not the daily practice in the Court of Directors that even intior

members of the Court take an active part in the management of those concerns?-When the desantches which have proved the committee of correspondence are carried into the Court of Directors, all the directors have there an concertanity of reading them, and the documents upon which they are founded; and it is then once to the vocarrest member of the Court to take any part he pleases in discussing the subjects, and to make any observations that occur to him.

429. Are there in the existing Board of Directors, any, and what proportion of gentlemen who have been in India, and in what capacities?-A great proportion have been in India, some to contains of ships, some as military officers, some who have been in the highest stations of the government, others who have been members of the sudder miswlet and boards of revenue, and gentlemen who have long officiated as judges, as collectors of the revenue, and residents at

463. Supposing an extreme case, might it not happen that the committee of correspondence might be consensed entirely of crotains of vessels, merchants, and persons lavying filled no important situations in India, and that those other memmight consist of persons who have filled the horhest situations in the council, and care, and there have been occasions in which I think the fact has approximated to the supposition.

426. Is it obligatory on the Court of Directors to appoint the committee of correspondence by seasonity?-It is a practice rather than a rule, and not at all obligatory. One committee is formed of the junior members, from this they rise to another, and then to another, and so on to the committee of correspondonce: but all this is only matter of pressycment.

Martis, 98° dia Februarii, 1839. STR. JAMES MACDONALD, BART, IN 1912 CHAIL

John Sallines, Eng.

John Sullisson, Esquire, called in a and Examined.

405. DOES your experience in India enable you to form any judgment of the

426. Do you apply that observation both to England and to India 2-Both to

627. Within your observation have the young men, generally spenking who have to be qualified to take part in the civil administration of the affilias of the Company? in India possessed of a sufficient acquaintance with the language to enable him to take a share in the administration of the country.

408. Is it at present required of the young men to be entered, upon their arrival in India, at the college established either at Calcutta or Madras, and what is the line of instruction prescribed at either of those colleges ?—At Calcutta, the system of education embraces separal literature; but I think the attention of the young men is almost exclusively given to the orquisition of the Oriental languages;

at Madias the education is exclusively confined to those languages. 493. What is the nature of the evils you unorehend to result from the concre-

gating of these young men in the college at home, previous to their departure for India ?- The great evil I conceive to arise out of the college at Hertford is this. that all the students there are nearly of the same age, they are all youtles, and consists of young men and of persons of maturer age; moreover, I conceive that they lose the opportunity at Hertford of forming those connexions and friendships at home; such connexious are so many links to society in this country, and they are, I think, of great importance to saw man who is destined for India, and who is to be

480. Has it assessed to you that for the most part when somigated to writersnips, they have considered their fortunes to be made, and imbibe accordingly notions of extravagance and expense ?-Such a notion is very molecule imbilied at the colleges. The extravogance both at Marious and Calcutts, particularly at

431. Should you conceive the same effect likely to be produced in the event of of general public competition?-I conceive the present effects to arise entirely from the congregating of a number of young men together in the same college,

482. My question was, whether you conceive this offset to be in any degree attributable to the present mode of their appointment ?- I could hardly say it arises out of the present mode of their appointment, but I have no doubt, at the same

time, that the effect will be most wholesome if appointments of this kind were the result of competition. 463. Is not the present mode of appointment an individual nomination, without

434. Is such mode of nonination, in your opinion, liable to appointments being mode, not from the qualification of individuals, but from individual favour upon the nomination of individuals to writerships; they originate, I imagine, usually in motives of personal favour and affection.

435. Which made of appointment do you consider the hest calculated for the appendianeous efficiency of the service, the mode of appointment through competition, or the mode by the nomination of any individual or hodies of individuals ?- By compe- solva Sullege Fac-486. Do not difficulties present themselves to your mind, as likely to arise from

opening such appointments to public competition in this country, provided the Legislature thought it politie so to do?-I have not given the selicutary particular attention, but I should imagine there would not be any difficulty whatever, 437. Are we to understand you to say, that the writers so appointed are the only source from whence the patronage in India can be filled up?-That is the

case under the present system 488. Is that patronage, in all its various branches, of very great amount, as well

as of very great importance?-It is of immense amount and of vast importance. 433. Could you give us a rough notion of the annual amount of the civil service in India ?-- I cannot pretend to speak with unything like occuracy; there is a Return published of the number of offices, and I think I have leard that the civil servants on the establishment now are from 1,100 to 1,200, that is of the

640. What do you think it annually costs 2-1 rather think about 9,000,000

441. Do you know upon what principle the supply of writers to meet the demand is regulated ?—I should suppose it is upon information derived from the

44%. For instance, at this time do you happen to know whether there are not at the several presidencies many servants who have been sent out unemployed?-There are at Bombay, I believe, now about 25 civil servants out of employ, and the number at Madnas I think is 17; I do not know what it is at Calcutta, but according to the extent of the establishment, I should think two-thirds more than at Madras.

443. Has that arises from the reduction of the establishment that has taken place in India?-The number out of employ is owing probably to new anangements for the administration, but I am not prepared to say to what extent they

444. Are you aware whether, notwithstanding the large number unemployed at mine, who sailed for India a short time see,

440. What is the fite of those civil servants, who after having passed the college, continue unemployed in India?-They receive the allowance of servants

out of employ, when not notuelly in office. 446. Do you mean that every writer sent out to India, who does not receive employment, is paid by the East India Company?-He has a certain allowance

paid to him, a small stressed till be gets into office a I think the maximum of allowance is under 800 rapees a month to the senior servant, and lower in comparison to the junior grades. 447. Were you yourself at a college at Calcutta 2-I was for a short time. 448. Does it appear to you that my mode might be adopted in India, to prevent

the evil you have mentioned, of the congregating of these young men for a considerable period of time together at a codege at Calcutta?-By resorting to the and by attaching them to some public office, I think the evil would be completely removed, and in my opinion greater facilities afforded them of acquiring practical knowledge of the venacular language, than they now enjoy in the 449. Do you mean that you would have them act as our young men are accus-

tomed to do in England, previous to their employment in the service?- Exactly were appointed to some public office, and that is the case at Bombay at this moment; they are, upon their first arrival in India, sent up the country and attached to some public office.

400. What are the languages that they learn in the college at Calcutta?-Hindostance, Bengulce and Persian, those are the three principal languages at Calcutta. (445,---I,) 451. Then

451. Then you conceive, by their dispersion over the different provinces, they would acquire that which might be very essential hereafter, some knowledge of the vernacular language of the country?-Yes; they would have much greater more communication with the people, business and language go hand in hand,

they learn both at the same time 402. You have stated as one of your objections to the callege near Hertford,

that the young men are rather of tender ago; just inform the Committee at what I should call a young man of 17 or 18 of tender ago; at the maivenities there 453. Then am I to undentand that you consider 17 or 18 to be a tenderage?

454. Are you aware, till lately, the Act of Purlament repealed the Statute by

tinction I meant to make between the college at Hayleybury and the national universities is this, that at the college of Hayleybury all the students are about the same ago, from 17 to 60, but at the national universities usen go at 16, and may thry take orders, or embask in the active duties of their profession; there is, a society naturally oversites as a check upon the young men; the society at the

college of Hayloybury is confined to the students themselves, and to the masters. 455. Are you gware that when they come to Haylerbury that there are two have an opportunity of visiting their families and friends?-Yes; just as they do when at the universities.

456. If that be the case, how can they lose their family or national character?--that they have not at Bertland the same opportunities of forming friendships and country, as they would have at the national universities.

Are you not name that at college these young men who are destined to reason for giving them an opportunity of forming separate articlements, if I may

458. You have referred to many young men being accounted from their home. indeed, but I think I may stone, that young men who have formed in youth strong riveted to persons and things in this country, then persons who go out without

469. Your answer appears to show the expediency of making a community of interest and feeling between the servants of the East India Company in India, and those who may have been left at home; can you state what proportion of the young home and refinquish all hope and desire of returning to their mative band?-I am for his country, but the feelings of a man who goes to that country, having formed strong connexions during his youth in England, and a mun who goes to India without having formed such connexions, may be very different when they both return to England; the one may find himself a perfect stranger in this country, the he may have formed during a residence of two or three years at the national

universities. It is a common complaint amongst Indians, that they are strangers amount among

in their own country, and a very irksome feeling it is, 460. The last answer has referred rather to the moral effect of sending nersons. Join Softens, Esc.

at that age to India ; are there not physical reasons which render it extremely de- 20 Petrony 1832 simble that the parties destined to reside for a great part of their life in such a climate us that of India should be accustomed curiy to the climate, before their constitution to formed by residence in a climate so different to that of Eagland ?-My answer had reference to the communitive advantures of the college at Hayleybury and the national universities; and I have no hesitation in mying, from my

own feelings and my own experience, that I should give a decided preference to the education at the national universities, as calculated to make home more comfortable on his return to a man who is destined to reside for many years ig so distant a scene as India , but if the question is whether a man should go at the age of 16 or 17 or 20 to India, I should certainly choose the earlier age. 461. It was with reference to the playical effect of a protrected residence in

Iudia that the question was put?-I should say decidedly the earlier the better, 462. Have you my doubt that the prevailing feeling among the young men educated at Hayleybury has been that of a provision having been already made for them, and they are to look at India principally with a view that they may be able to accumulate wealth there to remit to England?-I think a action of that kind

is very fikely to be engendered at Hayleybury 468. Are you aware that the practical result of the extravaguat actions imhibed at these colleges led, some few years ago, into an inquiry of the amount of debts contracted by the civil servants at Bengul ?-I have a perfect recollection

of that inquiry having been set on foot 464. Did the amount of debt, as stated by themselves on that occasion amount to several millions sterling?-As far as my recollection serves mo, it was reported

that the debts amounted to nearly three millions sterling ; I know the amount was very large, but it may have been mostle exaggrented by report 465. The principal qualification at either of those seminaries is confined principully, as I understand, to the acquisition of the Oriental languages?-That is the

case of the colleges in India; at Hayleybury the education is of a general entere-40%. Do you consider the acquisition of scientific knowledge, with a view to the situation which they are destined to fill in India, would be quite as essential is the aequisition in this country of the elements of the Oriental Insertings?-I should think it of your great importance to young men, in their college education here, that they should study the seience of political reonomy, anthonaties, civil

467. Do you consider that the public service has suffered an injury from the absence of such requisite qualification?-I think the qualifications of the public

468. Have the salaries of the young mea, on their arrival at Modras, been augmented within the last 20 or 30 years f—I believe that they are now double what they were 28 years ago, when I first went to Maches

469. Does that appear to have produced among them a further disposition to expensive habits, or on the contrary ?-I should say that it has produced a further

disposition to expensive liables. 470. What evidence have you to give to the Committee of extravagnace ex-

mine who was about to embark for India two months ago, and who was arrested in his progress to the ship for debt; bills to a large amount were brought to his supply of segan for this young man.

471. Are you oware that the parents of young men sign their names to a young men are only hable to those bills which come under the view of the

(445.-L)

PUBLICO PELLANEO IN Stallings, I

g. 478. Will you favour us with your opinion how far the extravagance can be checked by any sules which the college may by down, to which the pureous to themselves are pattles Y—It is a subject I have not given my attention to, I am a not side to device any inter.

and the street of a plant of the street of t

extravagunt habits do not probably prevail.

474. You have stated that you are not aware of this regulation at Hayleybury;
are you aware of any segulation at Oxford or Cambridge !—I have no knowledge.

are you aware of any equilation at Oxford or Cambridge 1—1 have no knowledge of any regulation.

475. Gun you state generally, whether upon the whole the institution at Havles-

bury is or not considered generally by mist conversant with India; affiling, asliainer—I before it is generally considered that every object that was in contemplation when the establishment of the Haylvary college was formed, implications of the contemplation of the Mountains Uphilations before the Homes of the enter to the evidence of Mr. Mountains Uphilations before the Homes of London, that in his opinion young man who came to India from Haylvelpury ententiated a great projection against India and its concerns. I do not pretend to use the

exact words of Mr. Elphinstone, but that is the purport of them.

476. I think you stated that there was no responsible character stached to the amointment of the writers?—I am not aware of any resecutibility.

477. Are you not aware, with relation to that observation, that no responsibility attacked to the appointment of a writer, that every writer, prior to the admission into the college, must undergo the examination of the college contrib, according to theorder stade by the Court of Directors and susttioned by the Board of Control of the affirs of Inital 7—1 was quite aware that a certain degree of education.

tion was requisite, but that did not come under my idea of responsibility.

478. Will you have the goodness to explain what you mean by no responsibility attaching?—I merely meant that the Directors were left to select any person they might think proper for the appointment, provided he was able to pass this

sort of examination.

479. You have stated that it is your common that a preferable made of appoint-

ing to the service would be open competition?—That is my decided opinion, 480. Will you have the goodness to state whether you know that that practice presult in any other service, in the King's service, or may other public service, as the means of appointing to my situation?—I believe that in the military colleges at Wachington of 4.4% months.

at woowen and Addresombe commissions are given by competition.

481. Are you not sware that after young men shall have been four terms in
Hayleybury, that the place assigned to them is the reward of merit by competition?

—Yes; I believe it is.
480. Are you aware that the young men are classed one, two, three or four, according to their ments?—Yes.
483. And are you aware that no writer our go to India, unless he takes with

him a character for talent and good combinet from the college council?—The young individual to whom I alladed, who went to India the other day, and who had contracted a debt of above 100 guiness for six months acquirs, lad of course the usual tackmonials.

484. Are we not except that it has been approximately a proper of the property of the county tackmonials.

484. Are you not aware that it has inappened constantly that young men who have been at Hayleybury, have been rejected by the decree of the college council, in whom above rests the nutbority, independent of the Board of Directors?—I

am aware that instances of that kind have occurred.

483. You have commented upon the Calcutta college as a very objectionable

is althoulon; are you a wante, upon its first establishment in 1800, that it was strongly objected to by the Court of Directors?—I have understood it was strongly objected to by the Court of Directors, on account of the expresse which the eathlishment would occasion.

450. Are you mayer that it has undergone great revision of late?—I have

and the year source that it has undergone great version of the ?—I have understood it has undergone some revision, but I am not aware of the nature of that revision.
487. By what mode does it appear to you that a diminution of the present large

effected?—As a general answer I should say, that by bringing all the departments of

PEREIO July Suffered Etq.

boards, and substituting individual for collective agencies, the expense might be 488. Are you of opinion that a great reduction might be offerted by a general

and systematic introduction of native ogracies in the piace of European F....Up. 28 February 1822 doubtedly it might, to a very large extent indeed.

489. I believe you have but much intercourse with the natives in that part of India in which it has fallen to your lot to reside?-Yes; I had free intercourse

490. From your knowledge of their talents and capacity, have you say doubt

administration of the affairs of that country !-- I have no doubt whatever upon

the subject, that their introduction to office would be attended with great advantage to themselves and to the state. 491. With a view to that object, does it appear to you that the education of the antives on a sufficiently extensive scale has yet been considered by the government of that country?-I believe it has not. In the Madres territories, about six years ago, the subject was considered by Sir Thomas Mungo, and at was determined that a certain number of schools should be established in each province, at the expense of the government; that plan has been partly acted unon; if fully followed up, it would have, to a certain extent, furnished the

means of giving a common education to the natives of India. 492. Could you state in detail what was Sir Thomas Manro's plan as regards the Madrus territories?.....The outline of Sir Thomas Muuro's plan as regards should be a netive school established at every telesidary, or subdivision of a province, and that the master should be used partly by a stineed from the

government, and north by fees from the scholars; that was the outline of

463. You had to provide a school at Coimbatons on Sir Thomas Museu's plan?-I had. 494. Were there any schools established in that province?--- Under the place I have detailed, two schools were established in two of the tehnildaries; the

province consists of 14. 495. Was the system in progress when Sir Thomas Munro died?-It had

just began to be curried into effort when he died. 496. Will you state what was the amount of the cost of each of the two schools

established?-I think the stinends of the two school nusters might have amounted to shout 150 rupees each a year, exclusive of what the scholars paid 497. Do you think the expense of these two schools exceeded 400 rupees

a year?-No: not more than that, 408. And of that province what is the revenue, and what is the population?

The monulation of the whole province is about 850,000 souls, and the revenue nearly 27 lacs of rupors.

499. Have the natives any schools of their own?-There is a schoolmaster and village schools in almost every village in India, but the education that they are enabled to give is of a very confined kind.

500. In the schools established by our Government, is the English longuage tenght?-Not at all.

501. Does it appear that there is any indisposition on the part of the natives to from the English language, or otherwise?-On the contrary, I should say they

show a very marked partiality to the English isnausge, and a great wish to learn it. 502. Should you not consider, with a view to incorporate the natives more

gradual extension of the Roelish language would be highly desirable ?- I should think the spread of the Knelish lenguage a point of the highest importance, and to means should be left untried to accomplish it.

503. What are the disadvantages under which the natives at present feel thouselves to labour with respect to the British Government?-Their exclusion from all offices of trust and ensulument, and from that position in the administration of the country, civil sad military, which they occupied under their own princes.

504. If the cureer of the whole civil administration were open to them, although Europeans entirely might not for a long period be dispensed with, is it your opinion (445,-L)

MINISTER MANAGER they would feel solicitous to perfect their education, and acquire the English

505. You have stated in your last mower, that the untives are excluded from all offices of treat and emplument; it has been stated by other witnesses, among 28 February 1872, the discussions that have taken place the last two Sessions of Parliament, that have resided?-That is not the case at Madeus or in Bengal; I believe it to be

confined to Bombey.

506. Are the Committee to understand, that the system varies at present in the various presidencies ?-Very much so indeed. In Bombay they are, made recent Under the present regulations of the Madras government, the highest subsry no the head mitive officer of a province for 20 years; be must be an old man territories there is not more than one native who really draws that allowance. 507. Are you not aware of the multitude of the different nations occupying

508. Is there not such difference between the natives of each territory respectively as may account for the impossibility of giving to some natives of some of more easy to find natives enpuble of administering the office than the presidency of Bonkay !-- I believe it is universally admitted, by those who are conversant with the notives, that they are throughout India qualified by talents, nequirements, and industry, for all offices in the civil administration of the country , there is not the same unanimity as to their moral fitness. I am not aware under the Beagal government, that there is a greater range for selection than in the territories of the

509. You have referred to the salary of 700 rupees per month, as the largest salary received by any native under the presidency of Modras, and you have stated generally, that the natives are no longer in possession of those offices to the system which the natives have always enjoyed under the British Government, compensate to them, in a very large degree, if not entirely for their loss of the exclusive possession of offices, to which, under the native government, they considered themselves entitled ?-I should say, that nothing can compensate

510. Is there any instance, under the original government, of parties holding offices for as many years as many of those whom in your experience you have known so to hold them?-I should say for quite us many years. The tenure of office under the native governments was very procarious. Every functionary was lishle to be dismissed at the mese pleasure of the ruling notherity; at the same time, it is but fair to say, that the natives under the British Government

hold their offices by a tenure almost as uncertain. 511. Is there not a moral certainty that persons helding offices under the British Government will continue to bold them, whether native or European, as long as their conduct shall appear to deserve it?-By no means.

519. Can you give instances of natives having been recently dismissed from office of trust and profit under the British Government ?-A multitude. 513. Without cause alleged or proof ?-Without proof certainly, not without esusc alleged.

514. Does that answer apply to the reduction of the establishment generally. or to the dismissal of individuals generally without cause?-To the dismissal of individuals without such cause 515. Do you know a single instance of a native being dismissed from con-

ployment under the British Government, from any motive which you believe to have been corrupt?-Not from any corrupt motive on the part of the Government. 516. Or on the part of the agent ?- Not from corrupt motives. 517. Are you sware of instances of such removal and of such motives, namely,

28 February 1802.

518. Has Nir Thomas Manro's plan of education been proceeded with since of those provinces, but it was by no means adequate to the wants of the natives. 519. Would say difficulty, in your opinion, arise in the endowment of the the elements of European science neight be taught?- No difficulty whatever:

should think that the establishment in the principal town of each province of a school of that description, and at the same time of schools in each of the subdivisions of the province, upon the plan proposed by Sir Thomas Manro, would 590. And if in such schools prizes were given, such for instance as the public

employment hereafter of those who obtained them, would not that, in your opinion, he an essential stimulus to the natives?-I think such a nim would operate most heneficially in every respect, and in every way,

521. What is the present condition of the native Christians in India with regard office; I am not aware of the existence of any restriction upon their employment in other departments. I had in my own office several Christians filling resongible offices; one of them was a tehslidar, or native collector of a subdivision of

522. Are they not excluded from the offices which other notives are authorized to fill?-In the indicial department entirely excluded.

523. Can you state what is the cause of such exclusion?-I am rather inclined to think it was from the want of distinctness in the wording of the regulations in the indicial department a fit was intended, I believe, to exclude from judicial offices Christians descended from Europeans, not, I think, native Christians born such,

or becoming such by empersion. I resolved Christians, in common with other most able and efficient on my establishment, 524. So that the natives who are converted are in a worse situation than the

other notives not converted?-Decidedly in a worse situation, 525. Have the conversions to Christianity in any part of the Madras territories

been numerous?-In Timevelly they have lately been very numerous, embracing sometimes whole villages. 520. Were the converts principally Hindoos or Massulmans?-Almost entirely

Hindoos; there is secreely an instance on record of the conversion of a Mussulman. 527. What order of possic were they, of the most part bigher or lower?-528. Does the Christian convert, by either the Hindoo or the Mussulman law,

forfeit his claim to bereibtzey property ?- I have heard it stated that under the present law he does furfeit his claim, that he is in fact considered to have lost 529. Do you consider that the existence of such a law has operated as a har

530. Are you aware whether any attempts have been made by the British I helieve a very delicate subject to meddle with; but I rather think the attention of the local government has lately been drawn to the subject, with a view to in-531. So as to give the Hindoo convert the privilege which the convert to the

532. Can modifications be introduced into the Mussulman's criminal law at

the instigution of our Government?-Very considerable modification has of late years been introduced into the Makomedan criminal law. 533. Is it your uninion therefore that, by temperate means, it might be possi-

should imagine there would be no particular difficulty. 534. In the Government procuring a declaratory regulation, allowing the Christian convert to share any hereditary property as he would have done if he had remained a Hindoo, is that not interferring in a most delicate question with the (445.-L)

John Salbrers. Esq.

AMERICAN AND AND ASSESSED AS A COUNTY F. I do not consider it to be a question which affects the religion of the country. 525. What would the natives consider it ?- Under the Mussulman government,

converts to Islamism were always exempt from penal consequences; additional 28 February 1822. privileges were indeed conferred upon such converts. In passing, therefore, a law declaring that a change of religion should not deprive a man of his hereditary 535. Does it not, reverticless, follow, that in order to maintain our right in India, we are bound in honour and good faith not to interfere with their religion in any way whatever?-Not to interfere with their religion; but I do not consider

that such a declaration would be an interference with their religion. It seems to be a disputed point, whether the conversion of a Hindoo to another religion does, by the Hindoo law, deprive him of his right to inherit ancestral property. So there were disputes as to the suttee being enjoined by the Shasters; we have do not conceive that we are pledged to sanction the infliction of penaltics upon such of our native subjects as may choose to embrace Christianity. 537. Do you conceive that the British Government mucht pass a declaratory

law, relieving the native converts to Christianity from such dischilities as those which now attach to them as such converts ?- Not in those express terms, but in wited his right to ancestral property because he had violated the laws of casts, ared and infants to be murder, and as Lord William Bentinck has passed a

558. I would ask you whether the practice of the suttees was or was not an thorized by the Hindoo law !-- A variety of opinions were entertained upon the

sphiect; the respondenting opinion seemed to be that it was not ordained by the Shasters: in the same magner it is doubtful now whether, by the Hindoo law, a Hindeo hecoming a Christian is liable to be disinherited; and therefore I concoive it would be no violation of their religion if, in communication with the natives themselves, the British Government were to pass such a declaratory law. 559. Does it not generally hoppen that the Hindoos who embrace the Christian religion do lose their possessions?-I believe wherever the point has been litigated, that has been the opinion of the judicial authorities; but I cannot at the

same time call to mind any particular instance of this 540. Does it happen that the description of persons of whom these converts

consist, are not persons possessed of property?—Yes.

541. Having stated that whole villages have been converted in the Tinnevelly country, does not that imply that some at least of them must have possessed property?---Certainly, but if all the members of a community at once become converts, there is no room for bigation; all these persons (however small it may

be) have an interest in the land of the village in which they live 542. Have you observed whether the Christian converts have been afterwards treated by their fellow-countrymen with contempt or derision, or does there not exist any very strong feeling upon the subject?—My opinion is, that there does

not exist any strong feeling on the subject 543. The Hindoos and the Mussulmans sit together very friendly, without reference to each other's religion?-Without any reference whatever to religion,

there is a feeling of perfect equality; they live in social habits. 544. By sombility you do not mean those babits of intercourse which are understood by the term in England; you do not meen that the Hindoos will ent with the Mussalmans, or the Mussulmans with the Hindoos?-No; decidedly not. 545. Is it your opinion that the existing Church establishment in the presi-

therefore, that the establishment was quite insdequate. In my opinion there should be a chapkin at every station. I officiated as chapkin myself during 546. In the Madras presidency are there at present any Christian churches? -Yes; there are churches I think at all the principal stations; there are several

churches at Madras, there is one at Trichmopoly, one at Bangulore, one at Masulipatam, one at Arcot, and one at Casamore. I think those are the principal.

John Shillman 548. Tell the Committee what you mean by provinces: in how many provinces is it divided ?- There are 20 provinces, or xillahs, in the Masins territory.

549. Some as large as Yorkshire !- Yes; some of there.

by agency, generally under the superintendence of the engineers; if they were hallt by contract, they would be much more contonical. 551. Are you name of any instance in which great almor has been found to exist as to the cost in the building of churches? - I have no recollection of any

such abuse; I remember that the Soutch church at Madran cost a much larger sum than the estimate 552. Is it your opinion that the superintending care of one bishen is smally sufficient to the extent of the establishment in Ludin ?- I should think decidedly not sufficient; at the same time I conceive it to be of greater importance to in-

crease the number of chaplains before another bishop is appointed. Of two 553. Are you not aware that a considerable increase has of late years been

the Madras side. When I left India I recollect that there was only one chap-554. Are you sware that the expense of the Church establishment has very

555. Are you aware that correspondence has taken place between the Society for the Propagation of the Gospel in Foreign Parts, and also the Directors and Board of Commissioners upon the subject of two or three new bisbops being appointed, and that there was every disposition on the part of the authorities to add to the existing number of one histop which was made, and that the means of paying the salary has alone prevented it?-I have heard that such a cor-

556. You have stated that when you lest India there was but one chaplain in the southern provinces of Madras; please to state to the Committee the lineal extent of the district which you describe as the southern province of Madras ?-I should think the other five of the southern provinces were nearly count in extent to that, and I think you may take the population of the seven southern provinces at about five millions and a belf.

507. Do the chaplains employed in India go out from England, or are they appointed in the East Indies?-I believe they are all sent from England, 558. There would be no difficulty in petting chankins 2-I suppose there would be no difficulty at all.

559. You have no notive chaplains?-No.

560. What are the obstacles which, in your opinion, stand in the way of a more unrestricted intercounc from Eugland to India?-Provided the means are afforded to the natives of obtaining prompt redress for any injury that they may receive from a European. I am not aware of any objection to the free introduction of British skill and capital into India.

561. At present a pative, except to a very limited extent, is incapable of obtaining redress for injuries done to him by Europeans, otherwise than by proceedings at the pressurers?—The jurisdiction of the justices of the peace in the province is limited to petty cases of assunt, and to debts of a small amount, hetween natives and Europeans, and the punishment is limited to a fire of 500 rupoes; that is the extent of their jurisdiction at this moment; I can not aware that there are any powers of imprisonment. There is some indistinctness in the wording of the Act of Parliament, and in consequence doubts have arisen which the magistrate of the zillsh, or the criminal judge of the zillsh. It was decided by the Madras government that the criminal judge alone should exercise the jurisdiction, which confined the chance the astive had of obtaining redress for (445.-L)

John Saltines,

Europeans, insured a received from Europeans, insusuch as he can now resort only to one maristrate, whereas if both the magistrates and the criminal judge exercised the 562. Is the criminal judge of the zillsh a native or an European?-An

563. In what way might the English settler be rendered amenable in the procriminal law was to be administered in all eases where an Englishmon might be a party, it would be necessary to have a professional lawyer usen the beach of the provincial court; I conceive that the provincial court, by some enlargement of its jurisdiction, unight be usule a competent tribunal to take ecquistrance used afford polesas for injuries committed by Europeans upon the natives, and that

564. Does it appear to you there exists in the minds of the natives any other have always observed that Englishmen, whose pursuits in India are purely of a who are clothed with public authority, because it is the interest of all men who are engaged in such pursuits, to conciliate the natives as much as possible a it is through the natives alone that they can expect to carry on their speculations with

505. Have you observed my attempt on the part of English scittlers to treat the natives, or their religion, with scorn or contempt ?- No such instances have

560. Is it were oninion that the natural resources of India can be fully developed without a free access to India by Englishmen of skill, science, and capital? material decree the full development of those resources.

567. Do you think the more agricultural cultivation of the land could ever be a sufficient inducement to British subjects establishing themselves in India? -I should think decidedly not; any attempt of Englishmen to emigrate to India. for the purpose of the cultivation of the soil, would inevitably fail, and bring

568. If, therefore, a free access to India were permitted, is it your opinion that the result would be that a greater extent of persons possessing more or less capital would go to India, with a view to commercial speculations?-I think generally that would be the case; persons of a different character might in the first instance go out, but I should suppose that one or two attempts of that kind diliculty of persons of that kind going to such a distance as India, and the expense attending the voyage, is almost a sufficient har to any but persons of some

capital proceeding to India. 560. Is there not evidence as to the part of the country of which you have heen speaking, of the existence of sources as yet unexplored .- There are very few but I consider there is a wide field for their further development by Englishmen

570. You state that some of those sources have been partly explored by the natives; are you aware of any great public works that have been established in any part of India since the British power obtained there?-Almost all the great works of India are works constructed under the native government, by the government itself, not as in this country by joint-stock capital. In the province with which I am most conversant, I think there is a very wide field for new works, and for improvement of works which were commenced under the untive government. I allude particularly to canals of irrigation, and for internal navi-gation, the creation of which would nost materially improve the public revenue and the commerce of the country. 871. As the law now stands, was not every individual embarked in commercial

transactions in India linkle to deportation upon alleged charges, without trial?-

I helieve the government have the power of sending any man out of the country, macratic strong

572. Do you consider such a power essential to the good government of that country ?- The exercise of such a power is generally attended with the absolute rain of the individual, and therefore, although I am not prepared to say decidedly 18 February 1832 that the government should not possess such a power, that is, I am not prepared he exercised in the most flarmat cases, and where the safety of the state was endoneured by the actual residence of the individual in India

573. Most not the existence of such a nower, so monulified, act to some extent as a discouragement to persons embarking their capital in a country so circumstanced ?-It must cortainly operate as a discouragement; but if Euroreass are well accommend before they emback for India that a rower of this power is exercised against them; that it should be only exercised, in short, under

the sentence of a competent court.

574. Can you imagine any case, except it be the one you have described, of imminent danger to the state, in which it might not be sufficient to succeed the individual in some way or other, until the accusation and the defence could be remitted home ?- Suspension presupposes the filling of some office a be might be remitted to a particular station in the provinces, or he might be placed under some surveillance, until a reference could be made on the subject, to the authorities at home; but I should think the least objectionable mode would be to give him a regular trial upon the spot, and that if it should appear that he had been quilty of any act at veriance with his duties as a good subject, that then the sentance might be carried into effect against him.

575. Do you wish to be understood as saying, that when these cases have occurred, no previous inquiry into the misconduct of the party has taken place? -There must, I suppose, have been some previous inquiry, but how for such inquiry may have been ar worte or otherwise. I am not premued to say,

576. Are you able to inform the Committee how many instances have occurred in the last 30 years, of the deportation of any individual from India?-They are very rare indeed, I do not think there have been above half a dozen instances

for the last 30 years 577. Have there been as many as half a dozen?-I impains not so many, I do not recollect above three or four for the last 30 years.

578. I think you have stated that the resort of Europeans to the East Indies, possessing skill, science, and capital, ought to be encouraged?-Yes.

579. Are you not aware there is not only no innediment but every excountrement given to persons so qualified, to go to India ?-I helieve they are now obliged to get a licence . I am not aware of any other restriction.

580. Are you aware that the resurt of persons of that character has been greatly increased of late years?-Very greatly-581. Have facilities to their going to India been offered?—I believe that the

facility has been greatly increased of late years. 582. Are you aware in various instances that the refusal to permit individuals

to proceed to India, on the part of the Court of Directors, has been superseded hy the direction of the Board of Commissioners for India ?-I have seen instances of that kind mentioned in the public papers, where the Board of Commissioners have interfered, and have compelled the issue of the licence.

583. Are you aware what is the practice when a person wishes to go to India? -I imagine he applies for permission to the Court of Directors, and if they refuse permission he can apply to the Board of Commissioners, and they have the power of ordering that permission to be granted.

584. Are you aware of the number of instances in which the Board of Commissioners have taken a different view to the Court of Directors ?- I have no 585. You have observed, that in order to render succour to the native against

ill-treatment by an European, that means of prompt reduces should be afferded to him, and that prompt redress could only be had by European judges heing appointed to every sillah court? - I think I stated, in answer to that question, that if it was considered a sine que non that English law should be administered to the

scours native, that it would be processary there should be an English lawyer as a profes-

586. Are you not aware that would entail a heavy expense on the revenues of India?-Ou the contrary, I think that an arrangement might be unde which

23 February 1832, would accusion a very great saving of expense.

587. Point out to the Committee how that arrangement is to be made?--By degree, of the powers in the same authority, and by the substitution of individual

588. By which we see to understand a total alteration of the present system of government in India?-That is not my meaning; it is a remodelling of the the Judges of the Supreme Court of Calcutta, and by the present Governor

589. Explain to the Committee what they are to understand by the term, of two, three, and four judges or members. Lord William Bentinck has letely abolished some of the courts and boards, and has lodged the duties ionmerly

entrusted with two or three members of courts or hourds, in a single individual. 50s. Her the constitution of the usess in India varied considerably at different times since your sequintance with that country ?-It has varied considerably at Calcutta and at Bombay. It was originally placed in Calcutta and Bombay under the consensity of the chief socretary; that was removed I believe under as free as the press of this country. At Madras it remains under the most rigid few years native papers have also sprong up in Calcutta; there or four papers in the native language are, I believe, published weekly.

501. Is the Committee to understand that the law respecting the press differs

materially at Madras to what it is at Calcatta or Bombay ?---It is under a completely different system at Madran. At Calcutta the editors of newspapers are ficensed, and therefore publish what they please upon their personal responsibility, under a regulation which is registered in the Supreme Court. At Bombay the Governor in Conneil passed a similar regulation, but upon application to the Supreme Court for registry, it was refused; and therefore I insegine the governnewspapers, except the power of resulting them to England. At Madros the papers are submitted to the chief accretary before publication, and he runs his pen through whatever paragraph may appear to him to be objectionable.

592. Are you aware of the grounds upon which the distinction is made in this particular, between the freedom of the press at Modras, and of the other

593. Does the difference depend solely upon the will and pleasure of the existing governor :- Not of the governor individually, the government must be concurring parties with him in the set, except when orders may have been received from the authorities in this country.

594. When you say the government, you mean the Governor in Council?

595. When you say that the papers in Bombay and Bengal are perfectly free, you mean that it is subject always to that peremptory deportation of the indito have his licence withdrawn.

595. And the conscenence of his licence being withdrawn would be but expalsion from the country?-I mean not his licence to reside, but his licence

to print would be withdrawn. 597. Would it not rest with the pleasure of the local povernment whether his -I believe that would be the case, the according might deserve him of his licence to reside.

PUBLIC.

508. Does the state of society at Calcutta permit, in your opinion, of the pos-

2000 M. units it common on the macrous or a first inspertial jury. 39. Would be possible to extend that system also to the other presidencies; 38 Estrary 1882 — Cartainly, to both the other presidencies; the notice of all the presidencies, particularly the noticety at Madras and Bombay, is compused, for the greatest part, of others of the government, civil and military, who of course have a

parts, of oliters of the government, civil and military, who of course have a leaving towards the government. They would, I imagine, be always ready to visible to the authority of government in any question of the press which might be brought before them as a jury.

he brought before them as a jury.

600. In the case of unive editors, might it not be possible to impared a
sixed jury of Europeans and natives?—I should think there would be no

difficulty whatever in impanieding such a jury.

(iii) Under these circumstances, is it convocation that the continuous of this

summary power in the Governor General is essential to the scenity of our personsions in the Butt P—I should think if it was mule a matter of expess emement, that the publishing of offensive uttacks upon the government were to be considered in libets, and as noth tried by a jury, there would be no necessity for government retaining that power.

602. Does there not exist a regulation prohibiting the sevants of the Company from taking any share in any political publication at the several pensidescies P-Orders to that effect, I think, were sent out to India some years ago.

693. Although the object of such an order night have been intelligible, to leave as it was thought expolent to keep down the press in fund, so by see conserve that the armse ground weard exist for such a regulation after the press in lands should have honcem more or less free "1—1 think the cord in question is stateded with this very great disadvantage, that government are now delivered from making or of the ground very large than the contractions of the contraction of the contractio

60.4. So that as the regulation now stands, the government, however severely attracted by the press, is interpuble of defaulting itself through the avistance of its public sevenus on the spat?—I think, under the existing orders, that so public sevenus until be warranted in writing in the public journals, even in thebrow of the revorances.

On. You saided in our generate the you were and prepared to shory that the same of the saided in the

606. You have stated that the mass of society in India is compared of the revenues of the Company, do you know what properties of the European inhabitants of Calciums are servants of the Company ?—I should suppose that, taking civil and military together, a very considerable unjustly of the society at the prosidencies consists of public servants of the government.

28 February 1882.

608. As offences might be committed by persons not mixing in what he the last the temper and disposition of a juny of European inhabitants, he so great as by state that the jury would, on any occasion, he composed exclusively of public officers, but that the majority would probably be men whose minds, from habit and from interest also, are prope towards the support of the government

609. Have you had any experience sufficient to enable you to state whether in say trails in which the interests of the government might be involved, the servants of the Company were, as such, challenged by the other party ?-- 1 can recollect several trials which took place more than 90 years ago, in which a jury was composed of European inhabitants of Madras not in the service ; a new trial was moved for, and a special jury imponeelled, consisting chiefly of Company's servants; not one of these individuals was, I believe, challenged by the parties

610. I presume there are many individuals of a cluss competent to serve as a jury on such trial who do not move in what you call the society of the presidencies?-Yes, at the presidencies there are a considerable number of that rank of life; but in the provinces of Madres, and in Hombay, the numbers are small; in 611. In whom resides at present the power of making laws for the local govern-

ment of India?- Under the present system the power is not, I imagine, very exactly defined; nominally the Governor General in Council for the territories under the Bengal presidency, the Governor in Council for the territories of the Madras presihave the power of making regulations, which are binding upon all the native inhabitants of India; but if such regulations offeet persons living within the jurisdiction indispensable preliminary to their validity; and it has occurred that the Supreme Court has refused to make that registry, as in the case of the press regulation of Bombay, and therefore the regulation within those limits has no force

612. The regulations affecting only individuals who are without the limits of the presidencies, require no registration ?- They require no registration provided they do not affect serrors subject to the jurisdiction of the Court; but present that jurisdiction, by the construction put upon the Acts of Parliment by the judicial authorities; so that, in point of fact, the power, not of making laws, but in the Supreme Court; and this power may be exercised by the cuert, to the great presidice of the government itself

613. The power therefore of making or enforcing laws for the government of the whole native population of India rests in four individuals, subject in the emiral and the Governors are appointed by the Court of Directors, with the consent of the Cowa, signified by his sign manual. The Members of the Council are

Aspended by the Court of Directors.

615. Does my mode appear to you by which it might he possible to effect my improvement of the constitution of so important a looky as this legislative council? App. V. Report of -I have lately led an opportunity of reading a correspondence between the Supreme Government of Bengal and the Judges of the Supreme Court, relative to the formation of a logislative council, and in that correspondence I find a plan plensty powers were vested in some one authority, that our power in India would never test apon a stable foundation : I formed that opinion from the bequent governments on the other; and it appears to me that the only preventive for those disputes is to make one dominant authority. I should concurve, therefore, that the nim which the Judges have suggested, and which appears to be, to a certain

of the Judges is, to admit the Judges of the Supreme Courts to participate with the Governor General in Council, as a legislative council, over a certain portion authority of the Governor General in Council; that preposition has been objected to by the Governor General, upon grounds that appear to be irresistible. I should think that a legislative council, composed of the Governor General and Council, with the ministerial officers, secretaries, and heads of departments, attached to him, and with such an admixture of professional lawyers of reputation as would enable that tribunal to execute judicial as well as legislative functions, would be the best organ that could be constituted for the government of our empire in the East. I am the more inclined to express this opinion, because it is frankly avowed in the letters of the Judges, that there is in fact no limit whatever to the jurisdiction of the Sepreme Cents, so that he degrees that exact is, I conceive, iskely to sit in judgment upon all the acts of the executive government. Another part of the plan of the Judges is, that convenient divisions should be made of the whole territory, and that, for each portion of those territories, a tribural should be created, which should exercise a large portion of the civil administration of the country, and exercise judicial functions, civil and criminal, equal to those which are now exercised by the King's courts, and the Company's supreme courts or the audder adaptly, at each presidency; I conceive that such a plus, if well arranged, would operate most beneficially, manmoch as it would provide an adequate and convenient tribunal for the administration of instice to persons of all descriptions; and, at the same time, give the government an effectual contiol over the whole provincial administration, and prevent the recurrence of those planses which have frequently occurred in that administration, and of which the government have had no knowledge, until their attention has been awakened by tumults and insurrectionary movements amongst the people, as in the recent instances of Mysore, Malabar, and Canara: of the real cause of such disturbances the government are at present ignorant, and have born obliged to depute local commissioners to investigate the same. Under a controlling authority on the anot, such cases would not I imagine occur-

616. Whatever administrative powers uight be delegated to the tribunals to which you allude in the subordinate presidencies, or whatever those divisions might be, and I to understand that you propose to concentrate the power of legislation in the connect at Colenta — In a source concentrate the power of the power of the content of the connect at Colenta — In a source concentrate when the content of the co

the Governm (seem) and the present consoil should be component parts.

625. You were at the College at Hayleybury before you proceeded to India?

—Not at Hayleybury; the college was then at Heriford.

600. He was a second of the control of the control

ON THE AFFAIRS OF THE EAST INDIA COMPANY.

2 March 1832

but not to any great extent. On the whole, though the College has, I think, ficution for office, yet I couctive that the same object might have been easily attained without it.

627. Should you say that the advantages derived from it were equivalent to advantages could have been attained without the expense. It would be difficult

otherwise to weigh the one against the other, 528. Is it your opinion that this institution might be dispersed with without any serious public detriment ?- I think without any public detriment.

629. In the event of its abelition, would you suggest that my and what new rules relative to the age and qualification of civil servants should be adouted?-I think the plan lately acted upon by Parliament might be generally applied; I mean that under which they allowed certain civilians to go out without entoring the College. At the same time I think the civil service is such, that a ligher stindard of analification than has yet been required, ought to be made a condition of anocentment. I have no doubt that in England any standard of qualification that can well be desired, may be obtained without having a special institution for the purpose of communicating it; and it strikes me as being unresponsible for Government to go to any expense in furnishing the necessary qualifications,

when it has so good a service to offer as the reward of their attainment. 690. Will you state what you intend to convey by the expression higher multifigurion, and in what respect you promove the numbrication should be raised?-1 should think that from all the centlemen appointed to the civil arraice there should be required a much more extensive sequisition than they now recertily make, in every branch of European knowledge which the College professes to teach, esnecially on subjects connected with the science of government; and that the successful candidates might be equal to the best men that the College sends out,

631. In regard to see, what alteration would you suggest?-- I think it would be an advantage if they were not to so out to India till they were 92.

632. At present the young men sent from the college at Hertford are of necessity entered at the college at Calentia on their arrival in India?-Yes, that has

hitherto been the plan; but it applies of course only to the Bengal service. 683. Has it been found generally, that on their entry into the college at Calcutta, they have made any such profesency in oriental languages as to qualify

siderable proficiency, but in general their acquisition of the languages has not been such as to enable them to enter immediately on public service. 635. What is the general nature of their studies on their entrance into the Col-

lege at Calcutts ?-Their prescribed studies are confined exclusively to the sequisition of two oriental languages. The condition of entering on the active duties of the service is such a knowledge of two of the oriental languages as, in the orimion of the examiner, may emble them to transact public business.

635. And during the period of their acquiring those languages in Calentia they are maintained by a public allowance?-Yes, they receive in Calcutta 300 runees a month, and a house,

536. Should you say that the institution of the College at Calcutta has been publicly useful, and it so to what degree?-I think it has been useful chiefly in providing books, by which the requisition of the native longrages has been greatly ficilitated. But that object having been accomplished, I think, on the whole,

637. In there any corresponding institutions at Madms or Bombay?-At Madms there is a collegiste institution, but it does not, I believe, precisely correspond with the College at Calcutta, as that college stood a short time ugo. There never were European prefessors at Madrus: there were professors at Calenta until very recently, but the office has now been abolished. At Calenta there are a mid ing, but I cannot speak proctively to that: in Calcutta, they generally readed in what are called the Writters' Buildings, under the general control of the secretary to the college council. At Bombay there never has been any college for the civil (445.-L) scrvamts

PUBLIC. Yok Meshes Esq.

servants; but the countiness were paid officers, in which respect, however, a change was proposed when I left India. 638. Are you aware what was the ground of the abolition of professorships in

the College in Calcutta?—Chiefly because the advantage derived from them did

not appear equivalent to the expense.

639. The systems at Calcatta and Modas not being the same, are you aware
whether any different result was resduced in the education of the voting then in

the two efficient establishments?—I am not sufficiently acquainted with Midnisto say what the result was there.

to say what the result was there.

540. What has been the plan pursued at Bombay?—At Bombay, I believe, the Government make no provision for instruction in the languages, except re-

the Government make no provision for instruction in the Imparges, except requiring the knowledge on a condition of promotion in the service.

641. There being no such institution at Bombay, should you say that either at Calcutt or Madras any superior advantage over Bombay was full from the existence of those capitalizations. — I should think on sufficient advantages to insuf-

any material expense, of course some facility must have been afforded by the assistance of English gentlemen in aid of the rative teachers.

849 Was twan found of Calenta that the civil surgars, were your controlled.

542. Was it not found at Calcotta that the civil on wants were very generally involved in dels?—A great number were.

543. To what curse do you attribute that ?—Perhaps the main cause was the

65. I 8 wider critise or your attention for the **—"retrips the return the wave interfered facility of their getting measury; and as they were very young mean, they could not well be expected to be very position." Deals whiting all meets to tenute, they could not well be expected to be very position. compring Burspoon Routerlegs, would be conful, as it pures allowed, the whole

648. You would give the students some instruction in languages in England?

—I should like them to study the Sussoit, though I consider the question of languages to be one of inferior importance, in so far as the education in England is concerned.

659. The best education for an English gentleman would be the best for the Company's service?—With the difference that arises out of the necessary of Jenniing languages, of which the sequesition would be a more matter of curiosity in an English gentleman.

600. Does trapport to you that their certy distribution through theseewest period most and their flynes in florishard their array, would make them some year layer and their control of the control of their co

vision over the young men which would be required. By such a plan their studies would be as much facilitated, and their good conduct better enough than

651. In Calcutta I presume they can make little or no proficiency in sequiring any of the different versacular languages of the country?-- There is no want of acquire much readiness in conversation, though there have been some who have done so. It depends a good deal on their mode of life. The must of the poopyease with us in Hindostaneou

65%. Does it appear to you that the present plan of nommation those who are secure the qualifications necessary for the discharge of the important functions they are to be crilled to ?- The plan of nomination goes only to secure qualifiand as every office held by a civilian, at least every office that qualit to be filled by gentlemen deputed to India, is one of importance, I conceive that any plan offices may be probably well filled, there being few; but looking to the great mass of offices, which are also very highly important to the well-being of the people, since every judge and every collector exercises an important influence body of men fit to exercise, as it is desirable thay abould be exercised, the func-

663. Under the existing system is not the patronage exercised in this respect by the individual Directors considered to be their private patronage, their reupon them, and is subject to no public researchility?-As far as I know, the case is so.

654. That being so, most it not necessarily harness that their selections are very much influenced by those private feelings of affecting and connection which are common to all mankind ?-It certainly is a; and the appointments, I imagine,

have always been ayowedly made under the influence of such motives 655. How then can you be disposed to say that such a system would be likely to ensure a qualification little better than the onlinery average of gentlemen of the same rank?- My notion is, that the chance of success in India, the prospect at least of rising to the highest offices there, depending much on the qualifications of the individual, the value of an appointment to a man of talent is much higher part of those who distribute the patronage, to seek among persons standing to pointments they give; and that they will consequently, among any considerable number of individuals in whose proposets they have the same interest, select the most taleuted. Something should be allowed for the qualifications required as a condition of appointment; but to that I should not attach much importance. I believe, however, that there has been, independently of other considerations, honour; unit that motive, though I do not imagine it can operate to prevent predominance of private leeling. I have no doubt gives a salutary direction to the force of private feeling-

ti50. Would there not be advantageous results, at least in an equal degree, from any sy-tem that might be devised of appointing to the situation through higher average qualification might be obtained.

657. However distinguished we know many of the civil servents of the Company to have been in their career in India, should you say that, for the general mass of offices to be supplied, there was a sufficient room for a selection in India on the nirt of those in whom the associatment rests in Spekind?-I think not. I think we have many judges and collectors inferior to what would be if there was a fuller scope of selection in India, or connectition for entering the service in England. 658. Does it moved to you necessary to provide civil servants from home to fill all the offices now held by that class of functionaries, or could you suggest any Emitation?-I think too many civilians have been employed in India, and that it

Has the ever occurred to you to may what you think would be the best system of pottonge?—As far is the evil overview is conserved, i. think the plan of congection at public somiraries would be a great improvement. It was, I believe, acted upon by Mr. Wyms. I am not aware of any heter whan.

the number of offices held by Europeans may be immediately abildued to a considerable extent, and readually still further. The principle I should adopt, as resurds the civil service, is to send no more men to India than is necessary for maintaining the supremacy of England and for securing good government to India; and I believe that in the ordinary administration of the country road sovernment to India is best to be secured by employing the natives in all details. Thus, I conceive, that the indee of a district should be regarded as the governor of a district, and, subject to his control, the decision of individual exact should rest almost solely with the natives themselves. It seems unreasonable to expect that a few English centlemen can otherwise do much towards giving the mostle a government much better than they could give themselves. Our main business must be to check misconduct in those we employ, and to movemt the strong from tyranising over the weak a and although, while we hold our newer over India, we must, by a system of assocal, control the administration of justice, yet the cognizance of all cases in the first materice might, I conceive, at a year carrie period, if not immediately, be vested in the bands of natives,

688. An you name with proportion of native functionnies as now employed in the province of Burnes, and what proportion of European "A—UPSau peoperal incited files. Here see in the four districts of that province four European judges, two of when an earlier magistrates, and two districts have required implications of the province of the province

690. Can you starte to the Committee the average number of natives employed in respect to the four chiefs whom you now mention as being Europeans?—I do not recoded the provise number; they are very nesserous, and vary in different

districts. I can, however, get the information and furnish it hereafter.

691. State to the Committee what, from your experience, is the capacity of the natives of India generally for civil employment?—I think generally they are exceedingly scribe as mea of business, and very industrious.

excreasingly scale as nees of towards, and very industrions. (60). Will you state with an best on those towards promoting the education of the natives of Indias saces the last cluster?—The government has enhalped the folbosing new ordeger or randomies core in Chultang, for the Indias of most India, and another in Agra, for both Morlean and Haskos. The old Morlean College at Chultan the between very under reformed, and the saday of Ragis intereby since Challege at Bleuters : all binary now editicarily respectively college and Callege at Bleuters : all binary now editicarily respectively called any significant books. It has also established a few reduction polymer and of the country, and

other reminaries, established by individuals, have been aided by it.
608. Do you mean Europeans or natives: h-Partyl both. In Calcutta, the
Vidyalays, which is an Handoo acudemy for the instruction of natives in English,

was disting established by natives. It has been saided by government, and long that in the altered has been lattify what of My. In force Maynas White, the property of the said of the sai

(96. Do you recollect what was about the territorial revenue drawn from

India at that period?—I think, about \$0,000,000.

607. And what sum has the government since appropriated to the purpose of curive education?—In Bengal a lac of supers was placed at the disposal of the

fig. 8. Are you aware whether the Government of England make any and what provision for the education of the people of England?—I am not aware of any charge on the general revenues of England for purposes of education in that part

446,—L) 1, 2 690. Do

Halt Manhenrie

600. Do you conceive the two cases to be in any way parallel?-No; I consider the distinction to be, that the people of England govern themselves and educate themselves; the people of India at a governed by the English. 700. Then ative covernment of India, which proceeded the British Government,

established certain institutions of a charitable kind, parily for the relief of sickness, grant was personal, it has ordinarily lapsed with the death of the party. I do not

701. In addition to that oue, you have already stated that Mr. Hastings founded one institution, and Mr. Dunean another, and that the Government laws contributed to the maintenance of other institutions prior to the year 1893, when they established a formal system for earrying into effect the Act confirm-

709. With a view to the more general identification of the natives with the overnment of India, do you consider that the more general extension of the Eaglish Imguage is highly desirable?-Yes; I think it is very desirable. 703. Has such extension been upon the whole, in your opinion, hitherto discomiged or encouraged by the government of India ?- Latterly it has been an

object in all the government institutions to introduce instruction in the English language.

704. Systematically?—Yea, Interly; I do not think the same policy had been previously purroed. There is a paper, written by the late Mr. Charles Grant, which was, I believe, printed by the Committee of Purkement on the the subject, submitted by him to the Government as for back I think as 1793; but his views were not neted upon. Of late years it has been the nolicy, or

longing to the Bengal presidency, be said to be almost as foreign to the natives as people, I mean of those who read and write; but there in the lower courts the prothat language. In Bahar, and in the Western Provinces, most men, whether dialect, still the Persian is known to a great multitude of persons, not only in the

707. Should you say that the Persian was as familiar to the people of India as vinces of the Bergal presidency. Almost every public officer with a monthly ness; and the same may be said of the majority of all classes who can rend and write at all, excepting probably the mercantile classes, many of whom, though possessed of great wealth, do not understand Pensian. I should therefore conceive that a knowledge of Persian descends much lower in society in Hindostan,

than a knowledge of French in England, though it is rarely spoken. 708. The proceedings are conducted through interpretors ?-Not generally;

709. In your opinion would it be possible gradually to introduce the English language into the proceedings of the courts of justice in India ?- I think it might be tion of a language in judicial proceedings?-I understand that the change should be made district by district. 711. Then complete and absolute in any one district at a given period?—Yes.

712. Is not every regulation of the government translated into the native langroups of the district in which it may be propolimted?-No. In Beneal we have a manufaction into Benealese, for the use of the papele in that province: the Persian turnilation is the only one that the natives of the other provinces have. The recomlanguage of the body of the normation varies so much in different muts of the Unner Provinces, and, from want of schools and books, is so little settled, that it would be extremely difficult to translate the regulations into my harmon that would be understood there, unless a senarate translation were made for every district, if even then. But, practically smarking, I believe the Persian regulations are nercesible to as many neonle in those provinces as Acts of Parliament are in England. The men of business real Persian, and the rest of the people, when their rights are affected, ascernain through them the bearing of our regulations. And so I suggested it is with the laws of most equatries.

713. Does there exist on the part of the natives a disposition to become acquainted with the English language, or otherwise?-I think on the Beard side of India there exists a very strong disposition; indeed it has been very strengly evinced both at Agra and Delhi, which may be considered the most

remote of the chief towns of the provinces under Bengal-

714. Have you any doubt that the distribution of prizes for education, and the making, in some measure, the acquisition of the English language a condition of preferment and employment to the natives, would be such a stimulus as world tend rapidly to spread the language through the Indian empire?-No doubt its extension would be orently promoted by any preference being given to those who 715. Are the Committee to nederstand that you think there is a reasonable pro-

bubility under any eironmounces of the English Isnatuge being at all generally diffused throughout any part of our dominions in Inche, and becoming at any very much on the number of Euroneans who may reside in the country. I do not think the thing hundress, though time is of course remired for such a change. A and that the natives will nowhere object to the acquisition of English, may perhaps ment being Emplish, it was reasonable that he, a Hindoo prince, if orquired to

an agreeable one. But it has been neted upon; and I should look to such induonces as one mesns at least of extending a knowledge of the language

717. Are you aware of any instance in listory of an European language being

718. Do you think there is any dauger in an attempt on the part of Governand would it excite convenencious that it was preparatory to further clauges in population?-No : I think not.

710. Do you not think that the attempt to alter the form of dress in 1809, was one of the principal causes of the disturbance that took place in the native strmy?-I believe that had some effect. 720. Would you not consider the setting of capitalists in Italia, with a view to
(446.—L.) L. S the

the extension of commerce, a means of very much fitelitating the introduction of Reglish generally?—I think the diffusion of English depends grently on the number of English sections. 721. As you warm whether the Trutar government of China has ever intro-

721. Are you aware whether the Tratar government of China has ever introduced their own language into the judicial proceedings of that empire?—I beliage not.

780. Do you set consider his the neives would comfer the introduction of English safers a test simulation of the simulation of the conquereus for the language of one set from the language of one set from the language of the control of the conference for the language of the control of the conference for the language of the control of the conference for the language of the control of the conference for the conference of the

course ferences me angular and the matters as to emble them to acquire it missilistly.—I think it may be probability barechoose, and that the interference manner of the matter of the form of

generaty in India as to enase the natives to acquire the English language ?— I think that in the province of Bargal Proper the number of presons speaking English may be expected at no distant period to be considerable. 725. Is three at present any considerable number of natives in Calcutta who speak and with the language fleently?—There is a considerable number of

specs may write us suggiousy memory 7—There is a considerable number of persons who write and speak the English language extremely well; and the person who write and speak the English language extremely well; and the property of the person of the person

735. Of course any introduction of the English Impurgo into the courts of jus-tice could only be contingent upon a long and established introduction of the langauge into the general education of the country 2-I think it should be contingent upon its becoming general, or nearly so, among the educated classes; but in so far as the Persian language is used, I conceive that whenever English becomes known to the educated classes in a degree at all equal to that in which that language is now known, it should then be substituted for it. In Bengal Proper, ral extension of English would justify the superseding of Poision in the others in which it is now used, by English, then in theother provinces where Persian is more generally known. Independently, however, of its general introduction, there are particular situations held by natives, in which it has been surrousted that a knowlodge of English should be required, being in the first instance made a title of pre-Pleader, who manages the government suits. Many of the pleaders are now eduented at the college in Calcutta; and the young men have expressed themselves decidedly that their study of English must depend on its comparative ntility with the study of Arabic, as a means of cetting on in life. Now if the government pleaders, who have to communicate with the English efficers on all matters relating to the public lawsuits, many of which require a reference to English ranges, were appointed on account of their knowledge of English, the arrangement would be a the study, without interfering with the interests of any one. That measure alone would probably have no small effect in extending the knowledge of the Knowledge linguage. In the same way, in the revenue and other departments, Government might, in appointing to particular offices, give a proference to those who know quanted with our language. For every office to which the knowledge of Engand in that way, I thunk, without anythme like compulsion, or an interference at all offersive, the Government might promote it greatly.

such nots of deportation could have occurred during your employment without

consideration I should certainly have known it.

787. The former questions have had reference to departation from alleged

time of your connection with the government of Fort William ?-I only remember

739. Are the Committee to understood that the powers of the Governor General, or of the governors in the several presidencies, to deport individuals

remorability which a public man owes to his country?—I apprehend so. foreign adventucers, not from England, appearing in the Decean and other parts

the French officers were removed from the armies of native princes, they were senseally ordered to proceed to Europe. Some of the French officers who left the Malicatta service indeed settled in Bengal, and the same may have happened at Fost St. George. 76%. Do you or not conceive that a greater nower must be left to the executive

government, considering the nature of the course in India, than would be fairly claimed or exercised by the English Government at home?-Certainly a much

743. Doyon think it necessary that the government in India should have a more summery power of removing natives of other European nations than it should have to remove British subsects?-I should object to the summary exercise of any such power. But it would be sufficient, I think, to require a sulcann legislative act in the case of British subjects; and, as far as treaties allow it, the power of removing foreigners should be absolute.

744. Do you apprehend that, considering the large expense of the voyage to India, and the total impossibility of the more persont maintaining himself by settlers would never be equal to that which it is desirable to have; and I see no risk of public inconvenience from the resort of needy adventurers, although there might be some individual misery to themselves.

745. Have you any doubt that the resort of Europeans, under any relaxation of the present system, would be confined to persons engaged in commercial or manufacturing enterprise, or to scientific men?-I should think the relexation

746. Is it not the nature of such a power as now exists, over the persons and cerned, I believe their experience of the principles of the government has rendered them very little apprehensive of the misuse of the existing power; and that in so far as the introduction of English capital or intelligence depended on them, the effect is much less than upon persons who in this country might speculate on their making new establishments in India.

ON THE AFFAIRS OF THE EAST INDIA COMPANY.

I. PUBLIC. Holl Mochemia, Enq. 2 March 1882.

747. Do you conceive that there exists in our Eastern possessions a great field for mercantile enterprise?—I think there is a great opening for improvement in the commerce of the country.

788. With a view to avail ourselves of it, should you not consider it of import-

The street of th

749. Are you aware what has been the chief obstacle to the establishment of Europeans in the provinces?—I believe the difficulty of administering justice is considered to present the chief obstacle.

750. Will you state to the Committee bow Europeans and natives are excumstanced in regard to each other in that respect?-Within the jurisdiction of the Supreme Court there is no distinction, excepting so far as their possibir law of inheritance, and other special laws and customs, are secured to the natives, and as the acts regarding juries operate. In the interior the criminal courts can only try a British-born subject for an assault: any felony, however inconsiderable, renders it necessary, if he is not a military man, that he should be sent to the presidency. In the civil department, suits may be brought against him in the local court, but an appeal lies to the Supreme Court in any case that would be appealable by a native to the Company's chief court. It is doubtful whether one British-born subject can sue another in the country courts. Europeans are not government; and holding such land without neurission, they cannot recover against any nerson who disturbs their possession or withholds their rents. For almost all the hards, therefore, held by them (and many do hold considerable tracts of land in the names of their native servants), they are necessarily very much in the power of those persons ; the government having hitherto only granted permission to Europeans to take leases under certain conditions, which seem as vet to have practically operated to prevent them from taking advantage of the resolu-751. Then the natives, in the event of sustaining injury from English settlers in the provinces, have, except in the very limited case you mentioned, no other redress than by going to the Supreme Court of the presidency !- All cases only

rearies that by given by the Supreme Court out on personally 1—an chance of cognizant by the Supreme Court must go there; but the jurisdiction of the local sourts is considerable.

70%. Would it, in your opinion, be practicable to render the European settlers amenable to the provincial criminal court?—I think that Europeans should be placed on a footing with subtree when they live in the interior, and be subject to

753. How would you alogs that system to the altered state of things that would need from a man being alleved to attalk in the interior 2–11 does not settled in the interior 2–11 does not settled not existed not that any change would be accessory, beyond what is necessary to the good administration of values. The Europeans, 1 claim, would be sell, and I do not approximed any difficulty from their cases being thind by the native judges, if of a kind that would be officially cognitive by them. All very retroot access, where mivies were occurred, I should, for the present at least, reserve to the European judges, using the natives no their askind that officearies.

76.5. What shares of persons du those natives judges comists of 3—The base landing legions are Modernet Efficiency; they are generally, the ferrours expension, since a detection, as fir as their cown learning extends. In the criminal department the Moss-dimen efficient is desermined and the state of the

adducted as a proof that the ownership of land on the part of Englishmen in India must produce effects very detrimental to the English character in that comstry? -I believe that opinion has been held by many. I should observe, that never having been in charge of a district myself, I can only speak from the authority of others; but I have communicated on the subject with a great number of nublic my inquity is, that the disorders of a few have been allowed a great deal too much weight in estimating the general character of the class; and on the general question, I should say that the beames of good is exceedingly great. I consider the evils in the lower parts of Bengal, with which I am best acquainted, to have a her in India. If the persons who own or support the indigo factories had been allowed to send home for any nersuns whom they thought likely to be good managers, their concerns would have been in the hands of a class very superior to I believe, often in the hands of persons not qualified for so great a trust. I apprehend also that great mischief has arisen out of the difficulty of occupying land, by which Europeans have been compelled to hold land, which they do very extensively, in the name of native agents. I have understood from gentlemen, indigo plusters they had the means, if not of ruining them, at least of putting them to great loss and inconvenience. Another effect of the prevention of Europeans holding kind avowelly, is, that when disputes arise in the courts, it is much more difficult to it probable, if Europeans had the power of holding had, that the tenures necessary for the conduct of their indigo business would have been fully ascertained, and there would excels have arisen the question, now often disjunted, whether a particular planter be entitled to the produce of a particular tract of hand or not. erest of the moment to decide disputes involved in doubt a and us their decision can hardly be quick enough to save the sesson, the indigo planters are often comvailing opinion of the public officers in Bengal, to whose opinion I should attach most weight, was, that the indigo trude had very greatly added to the wealth of the districts in which it was established, and benefitted the notive inhabitants,

the districts in some in wait installation, and extensioned use a mixed manhating and dist the outsigns complained for were rather exceptions for the general trible 1707. Now there exist any general jestony on the party of the nature of Europe 170 and the party of the nature of Europe 170 and 170 and

the reverte to it ?——I cause not, supposing the Curropeans respectance.

75% Done it come within your knowledge that the seminates have shown a great anxiety to induce Europeans to extend their occupation of land?——I have haved it so stated, but I do not know the fact.

700. Should you not consider it advantageous to the semindars for European testing, as it seeds illureast that what of him 300-41 would be for their arbainages, but a gold deal sead depend on the extent to which they may really be the best as the contraction of the contract to the cont

thould be of a mixed civil and milliury character?—Not as a premanent plan. In the ordinary administration of the country, Links the cruil reducity should be appeared and predominant. Sir Thouse Monro was, I singapo, very Bitled or a military man when he held the appointment referred to.

770 Do not you think that with every improvement we can introduce into

The share of the last and the is great unions that turns of the swort - fact, and a part of principal and the last part of principal and part to part of principal and it is taken the share of the swort of the swor

771. In the promote course or the Conjugary's governments are for the representation of the tenure is what you admit it to be, that of the swood, very likely to coordine such as to require unitary them to or the part of those sevents of 'the Company filling the most important transitions problemly for the next of yourse's—I think that, generally speaking, we must look to our hobbing finds, for a long time (446—1). See the contractions of the contraction of the cont

to come, very much by the sword; but I should not therefore conclude that military talent is what is wanted in the governors of the country. To establish a good civil administration appears to be their primary object, and if that be successfully accomplished, it may be hoped that gradually the power of

272. In answer to the third question proposed to-day, you state that you think 92 would be a better age than that now by law provided for the admission of young men into the service of the East India Company as writers; in making that state-

moral catabilities and qualities of the young men admitted into it?-Yes, as far 773. Do you conceive that the age of 93 is more or less adapted to bear the change of climate than the age at which now by law the young men are admissible, and, in point of fact, are generally admitted?-I am not aware of any

reason for decidedly preferring the one to the other a but I should rather think 774. The litter put of your examination this day has had reference to the

expediency or inexpediency of selecting the civil servants of the East India instance provide for the admission into the military service of a young man only considered the suggested plan as an improvement on the present system, not so the hest system which could be adopted. One objection that occurred to me was that was could scarcely require the same general test for the united as for the arrange civil service. But even on the plan of nominating to the general service, civil and military, you might, I think, require a test equal to that now required for the civil service; the appointments would still be sufficiently good to justify even a higher acquirement. Then for the qualifications necessary in the more important entitions of the civil service, you would have the opportunity of selection from a large instead of from a very limited body.

976. If you required the same qualifications for the admission of young men into the military survice of the East India Company which are now required for their admission into the civil service, what advantage do you conceive would exist by such alteration which would compensate for any possible disadvantages of them, the qualifications of the persons so selected by comnectition in India would doubtless be higher than those obtained by the present system ; surmosing of course a fine exercise of the patronage of the local government.

776. In addition to the acquirement of science termed military, and sciences connected with the military profession, would not the young men so transferred from the army to the civil establishments of the Connegue have to acquire there the same knowledge of the languages, of the revenue and judicial system of the country, which is the present day must be found in the young men introduced into the civil service?- I am not aware of any military science being required from the young men now sent out for the army, excepting the engineers and the artillery, which form a receial and very limited service. These might or might not fall within the general plan, but they would not materially affect the scheme.

777. At what age is a young man ordinarily appointed to the office of assistant in the indicial department?-I suppose now presently at the age of 18, 978. It appears from the first part of your evidence, that you would contem-

where a considerable reduction in India of those offices to which young Europeans are now in the first instance appointed, by the substitution of native agency 1 is not that one of the grounds on which you would conceive that for the time to come young men sept out from this country should be sent out at a more advanced are than they at present are, insemuch as higher situations only would then be opened to them ?-Any change of that kind will render it essentially more important to have men of more advanced age and superior qualifications. But I think, that even although the existing plan be otherwise maintained, it is very

desirable that measures should be taken to fix a later age of appointment. 779. Do you know whether there existed under the Mogul government large quantities of land in Bengal called Charity-lands, lands liberated from tribute as being appropriated to charitable purposes?-Yes, there is a vast quantity of land

p

Tolt Mostera

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 98 in Bengul given, some for charitable purposes, but generally for the maintenance

of individual brahmiss and others.

780. Do you know what has become of these lands under the British administration in Bengal?—I believe the greatest part have continued in the possession of the parties.

"23. You do not know whether any considerable quantity of thee hash, have been considered to the considerable quantity of thee hash, have been considered to a small proportion of the first merit here because that I believe by the hash not been but a small proportion of the first such had in Bongst. March 1802.

standard, on affidivit being made that he is subject to the jurisdiction of the court; and on one occasion, a few years ago, a copies was issued against a native of greet runk, livingst atturnational, where he was arrected by the sheriffs officer; and although ready to satisfy the chain, and to give security to any amount, he would have been carried down to Calcutat if the local magnitust hand not releved.

780. What occur was this 7—The Supreme Court of Calcatta; and I beg to observe, that the Committee will find this subject very fully discussed in the Minntes of the Boogs government, and of the judges of the Supreme Court, relative to the exchibitionard of legislative councils and the reform of the law, which have been subsidied at Amendity U, to the Remort of October 1881.

The Material's that are, and also to the proceedings of the Suprems Cores of Materia the most Katenezulla Kinch, one better, in your cription, report to be any real limit to the assumed parallelism of those course)—I think there is to be any real limit to the assumed parallelism of those course)—I think there is to be supported by the state of the proceeding the state of the supported by the supported

which I have mentioned.

791. If the court has thought fit to exercise its special jurisdiction to the ex791. If the court has thought fit to exercise its special jurisdiction to the ex792. If the court has supposed to have been the limit of its jurisdiction, what
793. It is there to the indefinite extension of such a power 2—There anneans.

to be no local final, except that of the Company's government.

70%. What steps were taken in either of the cases to which you have alluded, either the case of arrest at Furneckelond, or the case of the controversy between the emberties at Bernbay?—I am not avere of anything having been done to memod the persitio personal in the Furnickhade case; in the other case the matter was referred hume, and a decision personal against the judges of Bombay, which I sun-

these may not occur, and other retining on some new point not less importune.
7(3). That decision determined that the wrist of the Suprome Court do not
ran beyond the local limits of the presidency P—I do not timit that decision
method the ease of a native who may be texted, on cond, to have commonly
defining in Colomb, use in any way limited the jurisdiction which his besser
when the proper control of the property of the property of the property in the control of the property in the control of the property in the proper

795. Was any legislative proceding adopted in consequence of those transactions 2—I am not source of any,
730. Without entering into the discussion whether any native might be brought alown 500 miles to Calculta, does any such case occur to your knowledge—I have methoos die seas which occurred at Furnishabul, a distance of the control of the control

of about 800 miles.

793. Did you not state that the Supreme Court considered the magistrate as basing stell dilegally in setting the person at liberty ?—Yes.

707. Was there any proceeding in consequence f—Yes, there was a procedution in the Supreme Court, the particulars of which I forget; but it was hold to be an established point that the magistrate had no power of builing the person who was arrested, and that his exercise of authority was quite illegal.

798. The writ of the Supreme Court was recognized?—Yes.
799. Can you state to the Countities on in stationes during the last 70 years, from which time the jurisdictions of the King's Courts at India will lable, in which collision has taken piece between the Supreme Court and the local government?—The disputes which occurred on the first establishment of the Supreme Court at Calcius, are doubtless fally in the recollection of the Committee.

These were estitled by Act of Parliament, and since that time there have been no disputes leading to serious consequences in Bengal.

800. That occurred about 69 years ago, did it not r—It is more than 50 years

801. Therefore during that period there has not been any collision heading to any serious consequence?—None, but the Supreme Courts have been gradually bring during a dispersal to the Courtering of Southerngton Library Duringston Unstructurating

the extent to which it is now carried is tikely to be very seriously inconvenient. though the inconvenience is not such as to justify them in registing it, and there-6th March 1835 fore they have referred the matter home. 80%. In the case you have supposed of the native banker at Benarca having

his residence at Benares, but an establishment in Calcutta, how, except by renduring him subject to the process of the Supreme Court, would you mayble for the due execution of justice in respect to those who might deal with him in Calcutta at his establishment there?-If there were one system of courts for the whole of the prosidency, the writs of the Supreme Court, semposing it to retain original jurisdiction, would, I suppose, be issued through the local courts and security taken, when necessary, by them. Even on the present plan of sensarite establishments of King's and country courts, the same process might be observed as between England and Scotland, or England and Ireland.

803. In what way would the situation of the native he more or less improved under the case supposed, compared to what it is at this moment?-It must be greatly improved by any arrangement that diminishes his liability to be brought down under arrest to a distant province. For an up-country man to be carried forcibly to Bengal I should regard as one of the soverest panishments that could 804. Suppose a man has an establishment in Calcutta, and another in Agra,

and that he has defrauded a man in Calcutta, how would you provide for the trial by any other means that those which exist now?-The occitize may see him in the local court of the district in which he resides. All property within the limits of Calcutta remains liable to the jurisdiction of the Supreme Court, and all the accents employed there are also subject to it. The objection. I may remark. does not apply to the case of persons who have themselves transacted business in Calcutta; but there are establishments there belonging or connected with bankers who live in the most remote parts of Irelia, some in foreign states,

805. Is it not necessary, to give validity to all regulations or lows massed by the local environment, that they should be registered in the Supreme Court at the presidency ?-Registry has not been considered necessary, in regard to the control regulations mased for the guidance of the provincial courts, under the authority given by an net of the 21st of Geo. S. The only resulations which are registered. are what are called rules and ordinances for the good order and government of the settlement of Fort William, &c., passed under the Act of the 13th of that King.

806. In the event of the Governor and Council at Bengal thinking it necessary to pass a new law, the you mean that such law would have firee without bring registered in the King's courts?-Such a law has full force on the Courts of judicabure beyond the Mahratta Ditch, without registry, and I do not apprehend that the judges of those courts are entitled to take any exception to the nationity of the Government in passing such laws a though there may be a cloubt as to enactments going beyond the limits prescribed by Act of Parliament; as, for instance, in the case of new or additional duties imposed without the previous sanction of the Court of Directors and the Board of Control, such sacction being specifically required by the Act of the 53 Geo S. The only laws registered are those which apply to the country immediately within the jurisdiction of the Supreme Court, which, inland from the river, was formerly bounded by what was called the Mahratta Ditch, a ditch intended to protect the settlement from the incursions of the

Mahrattas, the line of which, though now filled up, is still observed. 807. How is this at the minor presidencies?—The same law applies, I apprehend. But at Madras the immediate jurisdiction of the King's Court extends

to a greater extent of country, and at Bombay to the Island-

808. How are the duties of customs levied at Calcutts, and under what law? -The duties of oustoms are levied under the general regulations, and it was a jurisdiction of the Supreme Court. But that point was settled by an Act of Parliament pessed in the 54th of Geo. 3, which receptised the power of the Government to impose such duties by regulations similar to those curetail for the provincial courts. On the other hand, the stamp law, in its application to Calcutta, was required to be registered, sad it must be acknowledged that the motter is not yet free from doubt, and requires to be considered. The very circumstance that the custom laws have not been registered, and that the stamp law was held sug. The PUBLIC.

Holt Muchensia,
Euc.
Sth March 1852.

S00. The power of making laws existing in the legislative council, subject to the exception you have stated, comprised in the Act of Parliament, is absolute.

is it not f-Yes, I do not know of any other restriction.

810. Of whom does the legislature at present consist?—In Bengal the legis

three members, appointed by the Court Directors.

S11. In that Council the power of the Governor General predominates over the rest of the council in the event of a difference of opinion, does it not P—I apprelend he has not the power of passing any regulation by his single voice, but he has a casting twice. The Act which gives to the Governor Goneral and Governors wherein a net without concentration of their council, excepts from the overation

of such independent power, legislation and matters judicially before them. 819. Is unanimity in the council necessary to the prissing a regulation ?—No, a majority is sufficient; and it may be right I should remark that the Com-

mander-in-Chief is often absent.

813. Does it appure to you, clear a looky so constituted in adequate to this great deapy with which is it notineated an a liquidire body?—I think it is the desirable query with which is it in translated an a liquidire body?—I think it is it desirable deapy and the second of the

814. Is saything known of those laws; do they undergo any great public discussion till they are promajent?—Prequently the drafts of proposed laws are communicated to the public officers, and pretty fully discussed. In other cases they are passed without any discussion, except among the members of

business now transactual in India, to admit of discussion by correspondence.

8833. Should all these perants inve votes, or merely give univine?—I think they
should all have votes, reserving a vecto to the Governor General, and further
giving thin the power of passing laws which he might deem necessary to the
softer of the state.

896. By what under me the general laws to be discovered by a council so dispersed 1—Those who could assumble would be summoned to meet it such place as the Governor Gorean and has Constraint giant ground. In the anamaly so a set the Governor Gorean and has Constraint giant ground. In the anamaly so, should be fallowed and required to give their opinion in writing; and the about tape of suscelling in the council conse persons in the more existent province, whose opinions are not use sufficiently countied, would, I think, outwight may inconvenience fixely to result from the consolition being dispersed,

885. Would not the same end be asswered by getting the opinion of those, and then verting the dissocion in a smaller body?—No. I Takink that the exercise of a vote would give them a weight and a sense of responsibility which would be very solutory.

886. Might not the leading members of the government be defeated in any one-

ject of their own by a majority of the council thus created?—I should not approbend injurious consequences from that cause. Suppose the appointment of com-(446,—I.) x eillers 98 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

6 March 1832

ciliers to be vested in the Governor General, and that he shall have the power of 827. You state it to be highly desirable that laws should be made by a legisfrom any special instances, to which you would call the attention of the Committee, as occurring of fate years, and requiring this change?-Several favor annear to me to have been passed without sufficient consideration, and especially without a clear view of the practical operation of their details.

888. In what department !- Both in the judicial and revenue departments

the laws seem to me to have been too easily presed

889. The Committee have understood from your larner answer that the judges,

which they may suggest as fit to be made the subject of regulations?-Yes. servants, enable such respective governments to profit by all the experience of

their servants as much as if drafts of the laws were submitted by the sourceme legislative council to those who might be called their subsidiary members in There have been several laws passed without any reference to the local authorities; and in those cases they have had no opportunity of discussion; and when they propose laws, or are referred to, I think that they discuss with a sense of interiority which it would be desirable to remove. 831. Would that sense of inferiority be much duninished if the same parties

still communicated in the same manner, namely, on paper, with the supreme government, knowing that the same power would still exist in the Governor and feelings of the parties would be essentially altered, if no law, excepting on very special exigencies, could pass without their votes being taken and weighted 882. The question assumed a reference to those called councillors, but that the parties resided at a distance from the supreme legislative conneil 2-At present there is no obligation of making such reference, and a reference frequently is not made; and though they have the power of suggesting laws, those laws may be rejected without discussion; they have, therefore, no negative upon what the government propose to do, and no means of giving force to their sug-

833. Are any regulations passed by may of the presidencies that are not trustmitted annually to England F-No , they are all transmitted annually to England. 895. What number of regulations will each government have passed during the three last years?-I suppose that on an average about 90 or 30 regulations

835. If such a legislative council were formed, might it not be sufficient that it should be assembled for a time only to form a code, and then be assembled at intervals, leaving the authority of the government to pass such Acts as it saw expedient in the interval ?-It strikes me, that no code can anticipate the wants of a people under the lest established government, still less under a government Doubtless it would be useful if, at the end of some fixed term of years, the existing laws were systematically revised, consolidated and simplified, and so a retrospective code periodically formed. But I do not think that any code could prospectively supersede the necessity of frequent legislation, or the expediency of having a well constituted legislative body always in existence. 836. Would not such a retrospective code be waitable, leaving to the

government to form laws in the interval?-My chief objection to the present system is, the little deliberation with which laws may be passed under it 837. You are of opinion that no law should be nessed without a preut deal of discussion?-Yes; such discussion as the circumstances of the country permit; and certainly, in my judgment, the object is not sufficiently provided for at present. The council may be said to consist of three persons, for the Communiter-in-Chief is very frequently absent, and takes little share in civil business; and their thoughts being of course very much engaged with the affairs of the executive govern-

ment, if I might speak particularly of laws drafted by myself, I must acknowledge my conviction that they were adopted by the government too readily. 838. What proportion of the regulations have been repeated or modified us subsequent experience of their deletis?—I cannot speak to the precise propotors; but a large part, I think, of the clight or nine volumes of the Bengal Code.

consists of regulations repraine, altering or consolidating others.

890. Should you not think it neight be advantagrous, that while have are under discussion, before they are adopted, they should be made matter of discussion by the press of the country?—I think some advantage would result from

840. In a country circumstanced as our Indian empire is, where the laws to be made are to affect so many millions of persons so widely scattered, and where there has existed no adequate check, in the shape of public opinion, upon the passing of such laws, do you not conceive it must be desirable, for the interests of that community, that the power of making laws should be fenced round by every possible security, and every means exerted to introduce to the discussion of them the best shillities which the country affords?-I think the present constitution does not require a sufficient number of persons to join in the making of the laws, and thereby does not secure a sufficient representation of the views of all parties whose interests are effected, nor that full information as to details which is necessary to an efficient legislation. It is this, rather than the want of abilities. I should complain of. Indeed, supposing all parties fully heard, and all necessary information collected, which cannot however be if we shot not discussion. is might perhaps be expected that, in so far as concerns the more exercise of legislative talent, the best laws would be excogitated by a single individual in his closet, rather than by a number of legislators.

501. Do you not think that a discussion of those leavely nations, through the means of the public preas, and introducing them into a share of pollical discussion, may in the event be singerous?—Confining any observation to Bengal, it is known to appear to me that there would be many reticors disrupt in such discussions. 504. It is giving them a right to exercise poligonant in matters of registration, and as a rate to the exercise in policital power, would it not, in the present stand of the Luddins possessions, be a dangerous step?—I think not, as far as my experience of Bengal goes.

843. Do you conceive that our empire in India is an empire of opinion or of

(445,-I.)

their being so discussed.

force — It is a mixture of both I conceive.

84. 10 year conceive the influence of the British name has existed chiefly by
the idea of the union which has been thought to prevail among the submittees in Initial ?—I think that it stands chiefly on the permassion of our rational power,
many in Bengal form the fieling of protection and recurrity. And I do not conceive that, disputes among the evil officers have much trainings to affect the

tifs, to long as the military remain united and uniter good distription.

845. You do not consider that the collision between the King's Court of
Boubsy and the local Government of Bondon has bed any injurious effect in
Bondon and the local Government of Bondon has bed any injurious effect in
workering the conditioners of the unitive in the honour and integrity of now
government—I should think not much. The but effect I should have appreparent mental the proposition of the state of the should want to the likely to flow from the cleared of an alarming, mysterious, and
unpopular process; but I do not think that the mere dispute of the Governor

and the Court is thekly to have had now years effect.

846. Do you consider that the discussion throughout all India of measures intended to be adopted by the supreme government, becorder to be constituted as a council, will as will not contribute to the stability of the English government in the minds of the people?—I think it will contribute to the stability of the government, if it results in executing better have

"All "Will of the give-remeen, I 'I 't 'chief un elevring better assu."

37. "Will en telescopy an extre to the Committee in having studily as item from the present system, from the absence of that freedom of discussion which arene the present system, from the absence of the Lephonium of the committee in 1835, and subsequent years of the Bengal Code, with very partial exceptions, to the value of the Celebral and Conspected Previouses, an increase of the most serious amounts has resulted, the laws being found to be very implicable to the state of things existing in those provinces.

102 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

For each division, viz. that of Delhi and that of the Doub, there is a Commissigner of revenue and circuit intermediate between the resident and the discrieofficers.

850. Would the establishment of anthorities, exercising somewhat simslar nowers but always subordinate to the Governor General, in different parts of the provinces, operate beneficially to the administration of the Government or otherwise ?-- I think he has more power than it is right to trust to one mun under any orneral and permanent system. But in particular places, where there is likelihood of disorder, unless the people are restrained by a strong hand , and where they similar arrangement may be advantageous. In the Delhi territory, however, I do not see my sufficient russon for leaving the people altogether without published laws, though it would be very wrong hastily to extend to them the rules that

prevail in other parts of the country.

870. Will you state what are the boards now constituted at Calcutta for conduction bublic business?-There are two revenue boards. One, called the Board several agents was provide the sale and opining, from the sale or which our revenue is derived, and over the other officers employed in the management and protection of those branches of the public resources. They similarly control the officers who are employed in the collection of the customs and town duties, the majority of reference to the land revenue, all the collectors are under them in matters relating to the stamps and exche. For the general control of the business of the Land Revenue department, there is a board, denominated the Sudder Board of Revenue. with commissioners over divisions of three or four districts, who also exercise under the Nizamot Adawlut, the powers of judges of circuit. When the Governor Sudder Board, to exercise its authority over the affairs of those provinces sensrately from those of the Lower Provinces, and I believe it is proposed to establish a distinct board in that quarter, as well as a separate sudder court, 871. Is there not also a military and medical board ?-Yes; there is a medical

of medical stores, to collect and examine the reports of the medical officers, and to advise government on medical matters; and there is a military hourd, which betion of all military stores, the management of all military agenties or manafactories, the construction of buildings, and, in short, superintending and advisor

 879. Are there beards of those descriptions at the minor presidencies also? have a board of revenue and a military board. At Boarbay a notitary board did all bounds employed by the government in its political capacity. At Bengal there is also a board of trade, which manages the provision of the Company's commercial investments, but has nothing to do with the political government of the

873. Is all the machinery now employed in carrying on the government: the of the boards more efficiently than a collective body; I would except perhans there is an advantage in their being discharged by more than one person; but I

point aroung others.

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 108

875. Are you aware that the amount of the salaries of the Emopean civil servants in India amounts to the sum of \$,000,000. annually ?-It probably

believe, been considerably reduced by the revision which has taken place lately. 876. The principle of the system of Indian administration was to connect Indian and England, by giving the English who govern India, a continual interest in I believe, to keep up their connexion with their native country in that way. 877. Would not that object be better answered by giving them retiring

878. In point of fact, about 1,000 or 1,100 Englishmen, of high education and

good consexions, are receiving from the Indian empere the mount of making fortunes and returning to this country?-I think they have generally the means of making fortunes sufficient to enable them to return to this country, but I am 879. What is your opinion of that law which prohibits civil servents realizing

restriction on the purchase of hand, except such as may be suggested with referactually in the service there would be a difficulty in allowing them to acquire land, because the possession of that would subsequently limit the aphoto in which it would be, objectionable that they should exercise authority in districts where they themselves possessed land. Saving those objections, I think the obstructions inextredient and unnecessary 880. Would it not be desirable, as far as the prosperity of that country is con-

tagrous commercial and manufacturing speculation there, rather than in remitting at the same time I should not expect that much capital would be invested in land by the servants of the Company; the natives are willing to give so high a price for kind that, to say nothing of climate, I have no idea that it would unswer the manufacture or trade, or had some scheme of innerovement in view. But I think the restriction is usaless, and, in the degree in which it essentes, inexpedient, 881. How meny years' nurchase is obtained for land in the aciehhomhood of

Calcutts ?-- I have understood from many natives that they are very old to nurcharge with the prospect of a return of six per cent, and some expensed officers have stated the ordinary rate as high as 20 years' purchase upon the net profit, after paving all the public burthens.

889. If land in India sells at from 15 to 90 years' purchase, and in England from 80 to 50, why do you presume that persons having made money in India, would not, if permitted by law, invest their money in land in India?-I do not think the difference of profit would be a sufficient temptation, except to a few. Most mea slesire to come home, and the chance of bad health and other contingencies, from

which the native is free, would render it an undesirable speculation. 883. What is the general rate of interest of money?-The government pay

five per cent, for most of their debts, and the six per cent, debt, which they current immediately get rid of, bears a high premium. They are now, I understand, paying off part of one of the five percent loans, and endeavouring to raise money at four per cent, at which rate a considerable sum was at one time mixed, circumstances having occasioned a glut in the money market. Five per cent, may now be considered established as the government rate. Native bankers, I have understood, charge on accounts current six per cent. The mercantile houses in Calcutts are at present, I believe, giving about eight per cent. The bank of Bengal has of late generally discounted at five or six, requiring perfect security. The cultivators of the land hardly ever, I believe, pay less than two per cent. a month, and often more; and interest varies within wide limits according to credit. 884. With reference to the two millions annually paid in salaries to civil servints in India, you were asked whether that did not enable young men of good education

(445,-I,)

and consections to make their formures there, and cent them to Decident from what severe, such cents including a flow in the industry of the tense by the tense by the procession of the procession of the first procession of the section of the first procession of the owner. But of course without lought type the sale will too yield reat, and in that seven the first procession of the first p

judges in this provinces 2—1 think about 41 in the districts.

892. How many now exist in the districts?—There are 32 judges; the proposed plan would give 41; the total civil servants of the higher grades at present 133. I district processes.

85%. The saving of judges would be 11, and of other servests 27;—Yes; and ultimately I think that fewer Europeas judges would suffice. The authority of mitteebeing grantally extended, and the control of the European judges becoming less and less detailed, much expense might thus be saved. The conduct of the

6 March 1832

natives will. I have no sloubt, be found good in proportion as they are well and liberally treated. The Bengal indicial officers are united in saving that the andder ameeus are respectable men, and at Madras the potive district sudms are conally esteemed. 806. Are there any gradations, or are the judges all of the same rank 2... Of the European judges there are three grades, the district judges, the provincial judges, and the judges of the Sudder Court. Of the antive judges there are two

classes a moonsife, of whom there are several stationed in the interior of every elastrict, and studder ameens, who are established at the same station with the 885. There is no judicial officer inferior to the judge in a district?—Not uni-

formly t but there are magistrates or joint magistrates, who are not civil judges, but exercise civil jurisdiction under special appointment; and the registers

generally try and decide causes referred to them by the judge.

805. Does your experience in Benzul enable you to state to the Committee under what circumstances a disability in respect to the property of the antives of India, whether Hindoos or Mussulmans, occurs when they shall have embraced Christianity ?-I have never had any case of the kind brought distinctly to my excepting what are stated in a pamphlet printed at Calcutta by some of the gentlemes engaged in propagating the Gospel in India; but I have communiented with different officers on the subject, and I believe it to be generally recomised as part of the Hindoo law that the right of inheritance is foriginal by

conversion to and the observance of another faith. 807. It is the same with the Mahomedan law, is it not?-I apprehend so, 808. In both cases generally, not by conversion to Christianity, but by denarture from their original faith; by becoming an outcast in the case of the Hindoo, and an infidel in the case of a Mussulman ?-Yes; and in the case of a Hindoo the question would probably turn, not on matters of faith, but on the toleration of our native subjects, the rights of those who may become

practices appropriate to be inconsistent with the retention of custs. 800. Has any mode occurred to you by which, preserving perfectly and entire

Christians, rights connected with civil property, may be preserved to them also? -The question was discussed in Bengal, and is adverted to in the correspondence regarding a legislative council. It was admitted to involve considerable difficulty. Upon the whole, the impression apon my mind was, that a general law should be trassed, declaring that no such consequence should follow a departure from which there might be conditions inconsistent with a change of religion; such, for vested in any who had not adhered to the old fifth. In the case of Hindoo, too, I should imagine that it would be ordinarily found necessary to leave the conceive, he impossible that the convert could live with his unconverted relations.

900. Your experience has not furnished you perhaps with any practical in-

ancestors?-I think the law of bequest ought to be left as it is. Meelens are limited to the bequest of one-third of their property; and though the Hindoos, under the law as administered in Calcutta, are, I believe, considered to have an absolute right of bequest, I should not interfere to alter the law by a logislative

902. The Hindoo having the absolute right of bequest, would be very likely to

the property?-Still I should not interfere with the right if it exist.

the property of such person, being a Christian, in the same way that he would divide it if he had remained either a Hindoo or a Mussulman?-No; with the exceptions I have already mentioned.

105 MINUTES OF EVIDENCE REPORT SELECT COMMITTEE

6 March 1812.

904. The Committee understand that certain regulations have been established in Bengal, by which certain offices were reserved to Hindoos and Musculmans, with reference to the exclusion of European condidates for such offices, or the believe it has operated to exclude Christians in districts under the Madras premay similar result having occurred practically in Bragal

subject I been negativation to refer the Committee to a report of the Finance Committee which sat in Bengul in 1889-30; it is dated the 30th April 1890. The chief difficulty is to determine how for it is incumbent on the government to

006. That being also a question of finance?—We had to consider it chiefly as such ; but the late Bishop Turner, I believe, reported to the government fully upon the subject, with reference to the suggestions of the committee.

907. Do you know that in Southern India, Christians, both Cathulic and Protestant, intermarry with the Hindon tribes, and continue to keep up caste?--- I am not aware that such is the case. I know that in the Upper Provinces of the Bengal presidency many retain the name of Rajpoots who have become Muslema; and other Higgso converts to the Mahomedan religion adhere to their notions of ea ie, and other ancient customs and prejudices; but I do not believe that those of different religions intermarry.

908. Are you aware of any instance in which a Hindoo, from having violated easte in many instances, was declared by the court to have been subject to the nenalty of expulsion from his trade irrevocably, in reference to one only of all the offences proved to have been committed by him; that one being the offence of cohabiting with a Mahomedan woman?-I do not remember any such case; indeed. I believe several Hindoos on the Bengal side of India have been guilty of the offence without the penalty following; though probably, if it were brought under the cognizance of their punchayet, or general assembly, expulsion would follow.

909. The case to which reference was made in the question lately put was a case said to have occurred in the Sudder Dewance Adawlut in the year 1814;

does that or not bring the case to your recollection?-I think I know the party referred to. The family was one of distinction in Buhar; but the circumstances have escaped me; they will probably be found in one of the printed reports of decisions passed by that court.

Jovis, 8" die Martii, 1832,

SIR JAMES MACDONALD, BART., IN THE CHAIR.

Charles Lushington, Esq., called in ; and Examined,

Esq.

8 March 1812.

910. DURING how many years were you a servant of the Bast India Compusy in India?-I was actually resident 62 years; but altogether I was about 27 years in the Company's service. 911. During how long a portion of that time did you fulfil the duties of Secre-

tary of the General Department at Calcutta?-I was Secretary to the Governperiod also I was about six or eight mouths Private Secretary to Mr. Adam and to Lord Amberst.

912. Mr. Adam was at that time exercising the functions of Governor General 5 -He exercised those functions from the end of January to the beginning of August 1823. 913. Will you state to the Committee, as the result of your experience in India,

obscuring the drift servants of the Company 2—I think the present spates of obscuring a Hieridal of Indirects. The Ambienter of the schoolines of the obscuring a Hieridal of Indirects and Indirect of the schooline of the schooline and the schooline of the Indirect of the Indirect of the conflict as layer one as more. socially as though have made about progress us the acquisition of the English language, a great stimulus would be giren to the natives generally to acquire it?—Yes; I think so.

940. Even at present, small as is the portion of natives in the civil adminis-

tration of their own country, do they not, in many instances, prefer the English language to the Sancerit, and other foreign Oriental language ?—I think the younger class do. There has been a very great interest indeed excited among the raine everytiem in favour of the English language.

DAL Ven are aware that the accomplism of the re-

massessily carried on through the medium of a foreign language, namely, the Persiant (of your latins it might be pusable genebully to introduce the English see any objection to that, because the Persian language is as much a foreign but sugge to a Unition on English is. The Bengal government, however, have gone for towards settling that point, by promulgizing their intention gradually and buttoness through the control to the property of the property of the buttoness throughout the country.

592. Do you conside that the giving to the natives systematically an enlightened education, affords the best chance of the advancement of the Unitation religion in India 2—It is the only radional foundation. While oncouraging, to every pradential degree, the dissembnation of useful knowledge among our Indian subjects,

every government under which I have served, has enjoined the most communication above the state of the server which is also as the server which is enjoined under the first which is enjoined under the first which is enjoined under the first which is enjoined to the server which is enjoyed the total the server which is the ser

pagements to sur nuive subjects, we new clicitate on thair litter desdletteds. 988. Here you led occusive presentily to observe any lentances in which the extension of clicitation in that the consequence of affecting the religions feelings because the continuous of the continuous conti

944. Has any progress been made in the Bengal presidency in the conversion of the natives to Christianity ?- I am afraid very little; there have been to my knowledge one or two remarkable instances, however, of sincere conversion, and many more are claimed. The coase of Christianity will not be promoted in India by version of adult Hindoos or Mahomedans (especially the former) is extremely rare; it only remains therefore to seek the propagation of Christianity by the slow process results will be solidly beneficial. Any efforts to force such results, by open intering the great cause in view, produce consequences the most injurious. Such proceedings might tend to our expulsion from the country in the midst of our enterpr of meduluess, and east back the objects of our care into their ancient ignorance. We must patiently persevere in the course which has already produced a large natives the value and extent of their power will lead to their asserting it, and to the of knowledge has second widely, and beyond the risk of extinction, bringing with titude will succeed to resistance; and instead of our being executed as reckless tyrants, our memory will be revered as belonging to enlightened benefictors. 945. In what light are such converts held by their countrymon in Bengal?-Greatly depreciated. They crose to associate with them; they will not out in their company; and, in fact, despise them

the Year stateful tay so had a Join against of the native their), here year the activate plan by some of their retineval tasks as considered than intering engage, and entitled plan by the control of their retineval tasks. The state of the process of the process

as much protonce of supervision as it was possible for me, under such a state of inexperience, to evinue. I was then summoned to Crientia to officiate as poliand to range from the collectorship (for I can use no other word) without complaint of defilertion, owing in a great measure to the integrity or moderation of the principal native officers,

947. The seam "Collector" would imply to an Englishman a mere receipt of volve upon an individual filling that office P-The principal duty of a collector is

encouragement to the village schools, however trifling the amount might be in each case, which would considerably facilitate the acquisition of English by a large portion of the nonulation? - The most effectual mode of siding them would be to exsist in providing them with competent masters, a measure not very easy of accomplishment, as a considerable prejudice exists on the part of the Hindoos against becoming teachers for hire; but this prejudice has of late been weekened.

900. You said that the natives had shown a great anxiety to obtain a knowledge

of the English language; can you state whether many of them have made any prothe Hindoo College, and other institutions, are in the habit of helding delection guarry, and read lectury, and estays of their own composition, upon various literary and scientific subjects. At one of the meetings above mentioned, the question for action or not." It is true that the delates seen beneful off into a consideration of the novibility and probability of human perfection, but the outers spoke with remarkable fluency, quoting Gibbon, Husse, Reid, Bolingbroke, Voltaire, Shakspears. Milton, &c. The forms of similar meetings in Rogand were imitated, and the chairman laving inquired the reason of the secretary's absence, a load cry of "Persecution!" was unised, and it was explained that he was prevented from attending by his figher, who was affaid that his minchiles of paranism should be beginning of a most wonderful change been worked among a race, who for a long time were considered as sunk in a bundless state of ignorance and the blindest idolatry. I should have mentioned before, that one of the young Hindoos in question being called upon at the police to swear, as asual, on the waters of the Ganges, declined, aver increting that he should just as soon swear by the waters of the Nile.

ing a work turning into richenic the idolstry and superstitions of the Hindso religion. The question refers to a work published in the year 1880?—I do not

remember it. 952. Are you aware that any of the young men at Calcutta have established

a periodical work in the English language?-I cannot speak with certainty; but I think I have beard it mentioned 958. Wenc you present at any of the debates you have mentioned?-No; but

934. What subordinate offices had you filled in India previous to your appoint-

assistant in the Governor-General's office. That office consisted of eight or ten transcription, but of a strictly confidential nature. Afterwards, upon the dissolution of that office, I was appointed assistant to the secretary in the Political to the acting collectorship of Burdwan, and then became socretary.

Burdwan ?-- I was entitled to a collectorship by my standing.

969. The power of making regulations by the government of India, the Committee understand, is at present vested solely in the Governer in Cosmill?—Yes, 570. Does it appear to you that any better tribunel might be constituted in India for so important a purpose?—Not having given my attention to that sub-

ject, I am not prepared to speak upon it. 971. Does it occur to you that, in statters so vitally affecting the feelings and wants of the natives, it might be possible to introduce into such legislative councils a person of notive talent and experience ?- I think it would be consistent for me to return the same answer to this question, that I have not considered the subject. 972. What was the state of the press in Calcuta at the period of your residence there; and what do you understand it to be at the present time?-The press in Calcutta was for a long time under a consorship; at last, in the time of Lord Hastings, an Anglo-Indian editor discovered that he could not be legally suct out of the country for press offences; the consequence was, that he set the government at detiance, and refused to adopt the ensures of the chief secretary, who was the censor of the press. The government then, making a merit of compulsion, adopted a set of regulations, by which they required that the proceedings of the public press should be conducted, and took off the consorship and those regulations were for a time, as far as I recollect, very fairly adhered to. At last a gentleman established a newspaper, called the Calcutta Journal, which soon became extremely popular, and which was excellently conducted, I mean as to ability. The editor certainly created in India a great taste for literature, and for the prosecution of enlightened pursuits; but, unfortunately, he thought it necessary to infringe the Regulations, which produced remonstrances from the government. To those remonstrances, as far as I regollect, he generally returned respectful answers, and the I am correct us to dates now, but about this time an address was presented from certain individuals at Madres to Lord Hastings, congratulating him, and complimenting him upon having taken off the restrictions upon the press, which restrictions were in existence at that time. Lord Hastings was extremely pleased with this address; and in his reply dilated upon the advantages of a free press, and the credit which reflected upon a liberal government from allowing its measures to be publicly discussed. Whilst he was receiving those compliments, as Governor-General, he was sutherising remenstrances and threats to the editor of the Calcutta throw into the teeth of the Governor-General three liberal expressions in his though he acknowledged the necessity of earling and coercing the editor of the Calcutta Journal to the very utmost, yet he was in a diloums, and he deferred each hour the infliction of severe punishment until he left the country. of the government, so me as a reconstru-1974. Do you recollect any specific instance of having excited natives to rebellion, or the soldiers to mutary, or any offences of that description, tending to put the government in peril 7—No.

973. Do you know what were the consequences to the editor of the Calcutta
Journal of his summary deportation?—The consequence was that its suffered

576. You stated that the government applied to the Supreme Court for a bye-law; will you be no good as to explain to the Committee what you mean by the government applying to the Supreme Court for a lyre-law?—The Supreme Court, in conjunction with the government, are entitled, according to law, to enued certain haw for what us called the better government of the town of

Calcutta and its vicinity, or some such expression.

177. Will you state what is the difference between a regulation and a byellaw?—A byelaw imply applies to Calcutta and its vicinity; a regulation is one of general extension to all the courts in the interior, and is either strictly judicial or territority.

978. Do you mean that a bye-law would have no effect beyond the Malurata
Dittle 2—I think not.
979. Is it necessary that such bye-laws should have their origin in the
Supreme Court 2—As far as I recollect, the government proposes the bye-law

to the Squeene Court, which registers it or not as a legal concerner, after bearing objections to it, according to fixed forms. 580. Is that type-law will in force, or last it since been repealed?—I suppose

at so to force.

(81) Are you aware whether it has in any instance been acted upon ?—I do
not remember.

(82) Are not the civil servants of the Company generally at present precluded
from taking any part in the press of India ?—They are debarred by the orders

of the Coart of Directors from being proprietors or clitons.

SSS. Is there any interdiction against their being writers in periodical
journals already established 7—No, I do not think it extends to that.

SSS. Does like power of the government under this bye-law extend qualify to

508. Does the power of the government under this by-slaw extend equally to the active as to the European peres 7—Yes, it was interceled to extend the control to the editors of native newspapers which had lately risen up. 985. At the pecied of proving this by-slaw, does it come within your knowledge how many of the judges in Colonta were present upon the bugst 2—As

far as I received, there was only one, Sir Francis M'Ninghton.

(86. Was a similar bye-law applied for to the bench as Bombay ?—I do not know.

A property of the property of

army is the only body which is to be considered now-a-days with regard to the press. I think the press may continue just as free and just as licentious as Indian politicisus may desire, so long as the infection does not spread to the native srany, Whilst we have the notive unity stannels, it does not much signify what newspaper agraphics take place at the presidencies. When Earl Mintowas Governor-General, he was so alarmed at certain publications which proceeded from the missionary under the protection of the Danish government. It is mentioned by Sir John Malcolm, in his History of India (1896), that for 85 years a most active circulation of infinematory papers, in the shape of letters, proclamations, and prophecies, has been made to the native troops, causing a deep impression tabut owing to the difficulty of multiplying copies, the emissaries of scritton did not do much hann. ment, in aid of their designs 1 If the native army be once tainted, the empire which we have taken so many years to consolidate may be lost to us in one day; and therefore I think it is of the highest importunce that the native journals should be carefully scrutinized, and my opinion is that this salutary supervision was rather too much neglected in former days. I cannot speak of course as to the last five years. 989. In what languages are the present newspapers written?-In Bengaloe and Persian. I believe there was one in Hindostance. The Persian papers

are accompanied by a Hindostance version. 990. Are those languages that the senges emerally understand?-The senges enerally speak Hindostanes, but of course they soon pick up a knowledge of Bengalec, when quartered in the Lower Provinces. I have head that some of

the native officers understand Persian, and even Earlish, 991. Have you understood that any ill consequences have been satisfacted to

the existing relaxation of the press at Calcutta, so far as it has gone?-Yes. 902. Can you state in what respect?-I am bound to answer frankly. The subordination in the civil service was affected in a few instances and I think it had a still screener influence onen a nortion of the officers of the Company's army. 093. Do you know whether the present government of India have expressed themselves as sensible of any such iil consequences to their government?-No

994. Does not the condition of the press at Madras at this time differ materislly from its condition at Calcutta or Bombay ?-Yes; I understand the censor-

ship still exists at Madra-

995. Does it not appear to you that there should be some uniform system adopted with regard to it, throughout all the presidencies generally?-Yes; I would remove the consurship, because it is lateful to everybody; the very name as fome as the native pray is not offseted, it does not signify,

996. Does the state of voricty in Calcutta at present admit of trying offences of the raws by the intervention of juries ?- I should be sony to throw any imputation moon a considerable body of men, but I should not like to have a press cause before my jusy in Calcutta.

997. Of what classes and descriptions of persons would such juries be composed?-Principally of Euronean shopkomers, and of Anglo-Indians. 988. Do you mean to the exclusion of all the civil seavants of the Company?

-Yea; the civil servints never sit upon juries, except when specially summoned.

1000. Has any experiment been made of submitting to such tribunals offences touching the press ?-Yes ; there was one case where the editor of the Calcutta Journal was tried for a libel upon the spereturies to government, and the scoretaries were cast. At that time disputes about the freedom of the press were extremely rife, and it was very difficult to get an unbiassed set of men as a jury. The power of venue, us in England, did not exist; we were obliged to submit to a jusy who certainly thought warmly upon the subject, and taken from a class of persons who generally gave their opinion most decidedly against my interference with the liberty of the press.

1001. In your opinion, can the present system of licensing individuals who rocced to reside in India be conveniently or advantageously relaxed?-Yes, I think so. mos. Do

116 MINUTES OF EVIDENCE REFORE SELECT COMMITTEE

PUBLIC 5 March 1839.

1002. Do you consider that in the event of the absence of all restrictions upon individuals resorting to India, any very formidable influx of needs adven-I do not see how they would get out.

1008. If they should get out, does India afford a possible means of subsistence to either the mere agricultural peasant or the lowest description of artisan?-I with which the rvot can live, and also in consequence of the climate. It is impossible that any European could personally engage in agricultural pursuits in the elimate of India 1 and as for the common-rate artisans, the natives of India are

remarkably good workmen, and excellent imitators of patterns, and therefore I think it would be only the superior-rate artizans who could expect to succeed. 1006. Should you conceive it for the advantage of that country to encounage the report to India of individuals possessing more or less of expital?-Yes, I think so. 1605. Are you aware of any benefit that arises from their prohibition to pos-

sess or occurry may lands in the interior?-I do not see why they should not be permitted to possess lands in the interior, provided the natives are gearded against their possible oppression. 1006. In what manner should you propose so to muzzl the natives ?-- I would make the Europeans in question amenable to the Company's courts, and the less

that the Supreme Court is allowed to interfere the hetter. 1007. An apprehension has been expressed by some natives, in a recent petition to the House of Commons, lest by the permission of Europeans to settle in the interior they should be exposed to persecution, against which they should have no other redress than by proceeding to the presidency; are the Committee to conshale from your answer to the last question, that you see no difficulty in rendering the jurisdiction of the native provincial courts such as an European might sufely be made amenable to?-I think that the complaints adverted to would be

obvisted, and might be remedied unexceptionably in the manner alluded to. 1008. Would it not be the direct interest of any European emberking capital in manufacturing or commercial speculation in India, to cultivate the mood opinion and to secure to himself the co-operation of the natives? - It would seem

to be but common good policy to do so.

1009. This then being his interest, and the protection afforded to him by the courts of justice being so improved as you propose, do any dangers occur to you as likely to result from an unrestrained admission?-I think that the class of persons who would go out to India, that is, persons with some small degree of espital, because we have excluded the lowest class, would generally be people of respectability, who would have a knowledge of their own interests, and I do not

1010. Should you say that any jeakousy exists, generally speaking, in the minds of the natives as to the settlement of Europeans among them?—Yes; in their ignorance, they are naturally apprehensive of it. They have lead northern a few persons settled among them who may have treated them with recordings

and violence. I aliade to the class of indigo planters; but on the whole, they have generally treated the natives with mildness,

1011. Are you of opinion, that in the event of free uppers being permitted to with any summary powers with respect to the residence of individuals ?- I think the Governor-General can scarcely he made too powerful; emergencies might arise where the exercise of summary power would be necessary, therefore I would leave him the power of sending Europeans to England, although I think it might be accompanied with certain explanations and modifications. I think that a great deal of secret mischief may be done by an ill-intentioned man, without coming within the jurisdiction of a court of justice.

1012. You would therefore leave to the Governor-General a power of sammary deportation; should you propose to do so with or without his assigning a cause for so doing, and giving the individual an opportunity of disproving, if he could, the accusations against him?-I would cortainly give him an opportunity of disproving the accusations, if he could; but I think the procedure should be sommary, and not be elogged by an appeal to the Supreme Court, or any other court of indicature in India.

20.5. Would have be now design, in specuspine, of the existence of what an all-this size because over well-displayed must not every members and every remember as an all-this size because over well-displayed must not size, and every remember as an above the problem of the prob

At home. 2010. You have intlinated that some modifications might be desirable; a birt after more of the accollisations you dails to 1—I would make the procedure. It is the more of the accollisation of the procedure in the procedure and the procedure and the procedure in the form of the procedure in the procedur

of the Company's government, which he did not choose to conform to.

1016. Do you contemplate the probability of cases arising in which it would be attended with public danger to postpone the infliction of such a penalty until sanctioned by authorities at home?—I think, in the case of a political effence,

sanctioned by authorities at home?—I think, in the case of a it would be prejudicial to the safety of the state certainly.

1017. De yeu think that it might not meet the exignery of almost my case the yeu could imagine, that until need sanction should have been received the individual should be pisced under more or less of pursual restraints—I think in most cross it might excitation, but at the name time that fooliwhide, in a small society, as Calestia till is, would be doing a great deal of mischief by remnining unon the sent for many mooths.

1018. Have you not known many Europeans of the poorer classes io Calcutta in a state of destitution, and objects of charity?—Yes, a good many.

1019. Have not you known any beneficial effects in respect to the administration of justice and police result from the existence of the press in India ?—I do not remember any at this moscent.

not remember any at this mosacnt.

1020. Are you aware that so long ago as the time of Mr. Hastings, when the
press was free, be had no difficulty in obtaining ventions from juries against
editors in cases of fibel 7—My memory does not serve me as to that posse.

1021. Should you not nitribute the development of political libel, not be permitted by discount of the permitted of the permitted strong inclinations of the juries to convey the cases no political libel, not the parallax excitement of the time, in concupeness of the controversy upon the subject that use then going on \$-1\times, or training must minds were very much excited then. 1022. Has any class of the safety population shows much interest in this greation above the liberty of the press \$-4\$—think they have, apparently, but I

question about the liberty of the press?—I think they have, apparently; but I excepted that they have been only instigated by Europeans in the first testaces, otherwise they would have been perfectly undeferred to it.

102S. You said that so long as the native army was not affected by the press,

you apprehended no designer from the liberty of it; would you therefore apprehend any danger from the entire liberty of the European pees, nearly sudges. If one the entire liberty of the European pees, nearly sudges to the common resert of the courts of leaf w — Yea, I should, because by degrees the point of the European pees using the commissional on the native multy braunch of the European pees using the commissional continuation and other suches. We have been very subsection and other suches. We have been supported by the peed of the pee

1034. Have you been in the limbit of reading any of the native journals ?—
No, I have not; I have hard their substance sometimes mentioned.

1025. Do they reaemble English newspapers?—As far as I recollect, there were some few heads of intelligence that were interesting to the natives, and a

good deal about literature P 3 1066. Was

IIS MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

S March 1952.

1096. Was there mything in the way of political disquisition?-Not much so far as I recollect; but that will soon follow, if it has not obtained yet. 1027. Have the native newspapers found their way into the interior?-Not many hitherto, I believe.

1028. For example, at Beseres and Daoes, Delhi, and the more considerable places?-I know they have reached Delhi; I cannot speak positively as to other

1089, Does your experience during the period you were socretary to the government in Bengal, enable you to say how far the present machinery for conin frequent instances. Familiarly speaking, I think we calculated about two

years in getting an answer from the Court of Directors on general subjects. 1000. Have you known any instances in which the determination of public stations of importance has very greatly exceeded that period?-There is none

1031. Can you suggest to the Committee my means by which the transaction of the public business of India might be conducted with more expedition and

1039. You think that a single organ for administering the offairs of India at home world be preferable to a double one, as now existing ?-I should think

1033. How soon closs a merchant in India receive a reply from his agent in London?-Generally within a twelvemouth, sometimes much earlier.

1034. Have you considered the present ecclesisatical establishment in India as selecuate to its corposes ?-Yes, I think so. 1005. You musk from your knowledge of Bengal?-Yes; the exclusiostical department was under my office as secretary to the government. The number of chardains, was, I consider, adequate for Bengal. It would have been desirable

to have more, so that a larger mamber of Europeans might have access to public worship. I mean those scattered at small stations. But the approximement of clumbing is not to be considered with reference to the extent of our territory, but to the number of Christians who are to benefit by their ministrations, and the reservement cannot be reason be removed to incur a large methy for the accommodution of a few individuals, who do not contribute towards definying the clurge, or resident, had a chaptern located; the Company had built several churches where they were called for, and were building more, only they wished to incur the expense syndrolly. I think that the member of chaptries is as great, if the complement be kent up. (become some are absent on furlough and on account of sickness.) as can reasonably be expected, the government paying all the expenses.

1036. What is your ominion as to the expediency of augmenting the number of bishops?-Having the misfortune to differ on this point with namy excellent persons. I abould distrust my own judgment, but the conviction presest most strongly on my mind that such augmentation is quite manecessary. My resson is this, that I think the deties and labours of the bishop have been exaggranted, and that the archidences at the several presidencies have very little to do. I conceive that their functions might be very much increased. I was assured by Doctor Loring, the first archdenose, that he had very little to do. The store particular charge of the ecclesisatical interests at the different presidencies might be safely intrusted with increased powers to the several archdeagons, who might for should) control the subordinate clergy, and transact affairs connected with their department, without the imposing title of bishop, under ulterior appeal in important cases to their diocesan. It would acareely be denied that the prelidencons are connectent to visit the congregations of native Christians. With respect to the alleged bardship of the visitation, in any other branch of the service, the option of taking a voyage to see, or up the river, or making an excursion in tents, or even a long journey in a pulmquan, at a proper season, would be hailed as a been by the healthy, and as a means of renovation by the sick. Therefore, I cannot understand why so much stress has been had upon the infliction, as it has been called, of the bishop going upon his visitation.

1087. Are there any duties of ordination to be performed by the bishop in

aguin,

India?-There are; but in my experience they are of very rare occurrence. Then

C Luckington, Esq 8 March 1828.

and Bushop Hebus allowed to practise as an attorney in the Supreme Court, and lives were generally described on some other service, therefore the histon was decertainly has, I believe, a very voluminous correspondence, but then he has deprived himself of persons who might draw up a number of letters are him, or at sey rate transcribe them; and both Bishon Middleton and Bothon Heber were in the balist of copying their letters to the severement with their own hands. Then again, great stress has been laid upon the danger to which persons at the time of life at which bishops usually resort to India, are exposed from the climate. My opinion sons at a mature age have just as good a chance of health in India, as younger ones. With respect to the remarkable and husented stortality among the baliops, I would observe, that Bishop Middleton lived eight years in India. The immediate cause of his death was, that he went out in an open carriage rather too early, and allowed the sun to strike upon his head. Force ensured, but in consequence of his neculiar constitution, it was found very difficult to subdue the disorder; so that it cannot be said that his death was produced by the onlinery effects of the climate. Bishop Heber unfortunately committed the great immudence of plunging into a cold both after being exhausted by fatienc, and allowing the stimples of expreise to subside, which error caused anoplexy, to which he had a constitutional tendency. Bishop James, I have heard from elergymen who knew him, was by no mesons a healthy man in England. It has been stated in a mesonic of the life of Bishon Turner, that he had for many years suffered under an internal complement in England, for which he looked to relief in a change of climate; so that the sun of India, however nomous, cannot be justly accused of accelerating that prelim's and, I think, therefore, that the chiate of India may be acquitted of the desthol those four hishops to a very great extent, and that it will be uncorent that a clergyman in accenting the enisconal dignity of Calentia, entering on the enjoyment of high influence and consideration, cheered by the prospect of extensive usefulness, receiving a fair stipend, and looking to a fiberal pennon, does not confer as has been infinusted, in extraordinary favour on munking by extrainer binself to an almost certain premature death. I shall rejoice accordingly, if my exposition shall in any degree contribute to cularge the subtree of selection for the highand revered station in question. If further proof were required, I might assert that India has not been mirrical to the lives of chief justices . Sir John Austruthor come home after a long residence: Sir Henry Russell returned after a long residence, and is at this moment slive, I believe ; there is also Sir Edward East; and Sir Charles Guay, the fourth chief justice is about to come home, his term having expired; Judges M Naughten, Burroughs, and Buller are now in England. Then, on the other hand, it may be sold that Sir Henry Blossett and Sir Christopher Puller died in India. Sir Henry Blossett went cut in a dving state, from a schirrous stomach, and survived but a few weeks. Sir Christopher Pollier, it was notorious, was subject to a confarmed determination of blood to the head; and in the fever supervening upon this most unfavourable predisposition, he was for some time attended by a physician practically inexperienced in tropical disorders.

1038. What objection should you see, independent of the question of expense, to there being more than one belon is so extensive a country, for the purpose of ordination and other purposes?—It certainly appears to me to be unnecessry, because the ordinations occur very narely, and the few persons to be

1039. Is there not this objection to there being but one bishop in India, that a

greet part of his time is necessarily consumed in travelling from place to place in obsertance an discover-1-He cannot result for without coming tourns place which it is desirable for him to valid, and he can advantage range as to be correspondences which I suppose can be conducted written traversenance. It should be needbed, by the conduction of the conduction of the conduction of the best of the conduction of the conduction of the conduction of the India, who should be table, upon the watering of the offices, to construct one on of the

clergy upon the spot, so that he might enter at once upon the functions of the office, which might save the necessity of a journey to England ?—That might be convenient, but it would not be desirable as an unifocus practice to appoint a clergy—(445.—L)

120 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

man on the spot to the vacant bishopric; and if you make a second bishop, you must give him the allowances to enable him to keep up the dignity of his station. Besides, there would be a division of rule, perhaps; in fact, in the present infancy of the establishment it does not appear to me to be necessary. I think the archdeacons could perform the functions just as well, and the Company or the government would be saved many thousands of pounds a year, both in salary and in possion. At all events, the public finances should not be burthened with the expense of two additional bishops; but if the Christian community in Iudia should urse the appointment of a more numerous bienersby, they might reasonably be

1041. What objection do you see to the archdencous being enabled to perform the functions of the bishop with the same using that they now receive?—The government can by Act of Parliamont delegate to them certain functions of the bishop, while the episcopal station is in abeyance; and I can see no objection to additional allowances, and do not assume the prelotical title. The establishment of chapbins is too small to justify any increase of dignitaries. It appears quite discommationate to have a histor for S5 chaptains in Bengul, a bishop for S0 at

1052. Of the Europeans in India, is there any considerable proportion pres-

1043. When seet of proportion of the Europeans in Calcutta do you think?-There are a good many Scotchmen at the presidencies, and they are generally out and pay a chaptain.

1044. Have they not a presbyterian establishment at each of the presidencies?-Yes.

1045. Are there many Catholics among the Europeans?-Very few, except among the European soldiers, the responty of whom are generally Irish; they ere allowed access to a Catholic priest. The government pay the salary of a

of the namers published at Calcutts in the native languages simply, or in the native and English Linguages?-I have not any accounte information as to the circulation 16 March 1802. of the native papers, but I can give a good sides as to that of the English news.

1038. In what language are the native journals published?-All Bengaler,

1059. Including the tri-weekly as well as the daily papers?—Yes , the number 1000. Cue you state what number of newspapers or periodicals are published

at the other two presidencies?-There are three English newspapers published

1061. At Bombay?-At Bombay, two: The Bombay Guzette and The Courier.

1068. At Prince of Wales Island or Singapore ?-There is a newspaper at Singapone, and one also at Malascu. At Penang, the Gazette, I believe has ceased. 1056. At Canton 2-At Canton there are now two.

1065. Have you seen the official roturn that has been published of the newsnames in India?-I have seen such a return copied into the newspapers only. 1086. Did it appear to you to be accurate as far as it went?-No, it was in-

1007. Have you the means of stating what portion of the papers, whether native and English, or English only, are subscribed for by natives, and what postion by Europeans?-I have no certain means of answering that question;

published by Emopeans in English is extremely limited. 1058. With respect to papers published in the native language, do you mean

that the circulation in that case is confined to the natives exclusively ?- Almost 1059. Can you state what portion of the 3,000 papers are anbecilied for by

natives ?-That number totally excluded natives

1070. That is totally excluding the notive press?-Yes. 1071. Under what regulation practically is the Calcutta press at this time?

How is the press at present conducted?-Every paper is published under a license from Covennment, revocable at pleasure, with or without inquiry or notice. 1079. Do you mean with or without assigning reasons?-Yes, with or with-

1073. Has this Regulation ever been noted upon ; and if so, at what period?

-It was first acted on in the case of the Colentia Journal, in the year 1883; that paper having been suppressed under that Regulation.

1076. Was it acted on in any other instance you are aware of ?- In another 1675. Can you state from your own personal knowledge, the particulars of

these two acts of suppression?-Yes. I have no copy of the official corresoondence in the first case, but I was attached to the paper at the time. I recollect that it was estensibly suppressed for the insertion of a pampidet of the 1076. Were they suppressed with or without any reasons assigned?-The

reason assigned in the first case, to the best of my recollection, was the republicution of the pamphlet in question; I beg to state, however, that I speak entirely on this point from memory; I have no document by me at present to refer to. 1077. Were you connected yourself with either of the publications at the

107.3. What was the reason in the case of the Calcutta Chroniche?-I have # copy of the official correspondence in the case of the suppression of the Calcutta Chronicle, but no specific reason was assigned the general tenor was stated to

1079. I think it was stated by you in the case of the Calcutta Journal, the reason assigned was the republication of the pumplilet of Colonel Stanhope ?-Yes, I think that was the principal reason assigned; the official letter may have

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 193

PITRILIC 16 Mech 1832

1080. Will you explain what you mean by casign? Do you mean formally notified by the Government to the proprietors?-I mean it was adverted to in Jones Statestand the letter suppressing the paper.

1081. Do you recollect whether that was the sole ground stated in the latter?

-I do not at this moment distinctly recollect. 1082. But it was your own impression at the time that that was the real cause of its suppression?-Not that it was the real cause. My own inversion was

that the law itself had been made with the express view of putting down that paper 1083. How long previously to the suppression had that Regulation been

made ?-It came into operation a few months previously. 1084. Was that prior or subsequent to Mr. Buckingham's transmission?-Subscouent to Mr. Buckinghan's transmission

1085. With respect to the suppression of the Calcutta Chronicle, was it ever ascertained on what grounds that suppression took place 2-The government, although respectfully solicited to state the grounds, refused to do so; but it was privately stated to have been suppressed for a paragraph, of which I have a copy here; the substance of the paragraph contained a suggestion, that if the government should presente a certain irru in Calcutta with a view of making them the "scapegosts," as it was called, in the case of the Stamp Act, that the community should indomnify them for the loss likely to be entailed on them thereby. 1086. Have you a copy of the official correspondence?-Yes, I have.

(The Witness delivered in the same, which is as follows:)

"To Mr. William Adam and Mr. Villiers Holoroft, Proprietors of the "General Department:

"The general tenor of the contents of the Calcutta Chronicle having been for some time past highly disrespectful to the Government and to the Honourable the Court of Directors, and that paper of the 89th instant in particular, compress, I am directed to inform you, that the Right honourable the Vice-President in Council has resolved that the license granted to you on the 25th January last for the printing and publishing of the Calcutta Chronicle be cancelled, and it is hereby cancelled accordingly from the present date.

" I am, Gentlemen, your obedient servant, " C. Lushington.

" Chief Secretary to the Government."

Council Chamber, 31st May 1827.

" Charles Lusshington, Esq., Chief Secretary to the Government-"Sir. "Calcutta, 31st May 1827. "I have the honour to acknowledge the receipt of your letter of this date, informing me that the licence of the Calcutta Chronicle is cancelled by the Right

benourable the Vice-President in Council. " As his Lordship in Council has not seen fit to indicate the particular articles or paragraphs that have brought upon me this heavy expression of his displea-

sure, I am at a loss to know wherein my offence consets, what are the violations of the Press Regulations to which his Lordship refers, or in what respects the general tenor of the paper has been considered as highly disrespectful to the

"I beg to call to the recollection of his Lordship in Council, that the rules attached to the Press Regulation are expressly declared to impose no irlosome restraints on the publication and discussion of any matters of general interest relating to European or Indian affairs, provided they are conducted with the temper and decorum which the Government has a right to expect from those living under its protection; neither do they preclude individuals from offering, in a temperate and decorous manner, through the channel of the public newspapers or other periodical works, their own views and sentiments relative to matters affecting the interests of the community. With profound deference to his Lordship in Council, I beg to state, that in offering my sentiments relative to

PUBLIC. For Satherless Evq.

matters affecting the interests of the community, I am not conscious of laving
4 transgressed the bounds here prescribed.

6 I her restrictfully to submit, for the consideration of his Lordship in Council,

a) Day respectfully to submit, for the consideration of his Lordship in Council, that in every foreour case of suppression screen layer-loss and trained that the general trace given, whereas in the present care, withough I as suffered that the general trace of the contents of the Calentia Clickoide has been considered for some time post, lightly disrespectful, yet the withdrawnol of the Bience is sudden and interspectful, put the withdrawnol of the Bience is sudden and interspectful.

and the not note processed by any and any inclination to attend, bons at once my duty, my interest, and my inclination to attend, "Knowing the difficulties and dangers that beset the path of an Inclina editor,

« Knowing the difficulties and dangers that these time pain or an institute of the pain originally bissects and how many manifest the pain originally bissects to allow manifest was vanapsitized chiefly by the long of hing instrumental in seving from destroscen the property of a poor moster of a payer better than discrete the displessment of Government in that case and subsequently encouraged must be embeda property on may own section in all the contract of the payer of the payer

"Chief Secretary to Government."

(Corresponding to the Control of Contro

spore, what was your own impression as to what these practicable were "—I send it extremely difficult to form any lides are the subject, from the wastey of inside which was introduced into one day's paper; a great variety of topics being discussed in each number conduct is impossible.

1003. Your stateshoot was recalled to a particular number 2—The number of

the 20th Mays, I think it was in that number that the principally which I have mentioned appeared, and which was afterwards privately pointed out as the paragraph that gave offence to the Government. 1000. You stated that it was privately infimated to you afterwards what the

objectionable parage was, do you mean that it was infimited to you by a private friend?—Yos, by a private friend. 1091. Not from authority?—No, not from authority.

1009. Yea, in fact, then never lind reason to know what were the grounds of the aspproasion 8-Nothing beyond that private initination.
1008. The last better of the cloid receivery adverts to wannings publicly gives to other allium, which be conceives would be sufficient for your information, what was the nature of those public warnings?—They had called the attraction of

other editors to certain articles which had been deemed offensive by the Government-1094. Where

ON THE APPAIRS OF THE EAST INDIA COMPANY.

PHREAG

16 Much 1812,

1094. Where and to whom were those warnings given?-In Calcutta, given 1095. Publicly?-Officially.

1096. To whom were they addressed?—To the proprietor. 1097. What was his name?—Monte de Rosario.

1098. Were not those warnings matters of public notoricty?-They were mublished in the newspapers of the day.

1000. Had they any effect on the editor of the paner in making him more contions in his publications?-That paper never was suppressed. 1100. Then may it be inferred that they had that effect on the rener?-It is difficult to say, because a change in the Government occasioned in several

instances a change in the policy towards the papers. 1101. Was the Government changed at this period?-It was,

110%. In the case of Mr. Buckingham, were any warrings given to him 1103. Was his conduct altered in consennence of them?-I believe so. In

according to the wishes of the Government, but that he did not succeed is assurant. inasoupph as he was first transmitted, and the paper subscoupptly suppressed. 1104. Is it within your knowledge at what date the present Regulations affecting the press at Colcutta were made; are they correl with the suproug-

authority of the English in Bengal?-By no means; the Regulations under 1105. Was not the press always under some restrictions ever since the English

authority was established in India?-No, it was not; in the time of Warren Hastings it was as free as it is now in England. 1106. On the occasion of the suppression of the two papers in question, was there

any less of property sustained by the proprietors?-In the firsts very exerumons loss. 1107. At how much do you estimate that loss?-I should say it had not been overrated at 40,000L

1108. How do you estimate that; was it divided into shares ?-It was divided into 400 sharps, 200 of which were offered for sale, and upwards of 90 of them readily sold at that valuation prior to Mr. Buckingham's transmission

1109. The Calcutta Caronicle was only a three-times-a-week paper; what

there for offences against the press ?- Two from Calcutts and one from Bombey. 1111. Is the case of Bomboy that which ultimately came before a court of law in this country ?--Yes; Mr. Fair.

1119. To what extent then, under the Regulations, does the liberty of the pross practically exist in Coleman ?-It entirely depends on the views of the

1113. How did it stand during the time of his immediate predecessor, Lord Amberst?-In the carly part of Lord Amberst's administration it was extremely limited; indeed Lord Amiserst transmitted one editor, and suspressed the Calinterfered with the press at all while he was on the spot.

1114. Does not his policy with respect to the press seem to have undergone some change during his administration?-Yes, some considerable change.

1115. During the absence of Lord Ambeust in the Upper Provinces was there

1116. Did anything transpire publicly to mark his Lordship's sense of that suppression one way or other? - Not et all. 1117. What were the general objects of discussion in the English new-supers

at Calentin "-Revenue, police, judiculure, colonization; but also a very large infusion of strictly European politics. 1118. Had the editors numerous correspondents, and if so, of what class this

(445.-I.)

PUBLIC 16 March 1812.

1119. Are not the civil servants prohibited from engaging actively in the toppers at Calcutts?—There was some order of the kind published some years age, but they still do correspond very largely with the press, both civil and military servants of the Company.

1120. What was the circulation of the Bengal Hurkura when you left that

1121. That is to say, in its tri-weekly editions?—The three editions circu-

lated upwards of 1,500; that of the daily slone was 800. 1122. Of when did your subscribers consist; were there any natives amone there?--Very few patives.

1163. What is the price of the daily paper at Calcutta?—About 7d. sterling. 1184. Is there say stump duty?—None. Three is a postage charged. 1165. What was the monthly subscription?—The monthly subscription is

eight rupees, or 64 supers by the year, if paid in advance.

1126. Are the expenses of paper and printing heavier there than they are in England ?- Considerably. 1107. From what cause does that arise?-We have to import our paper, ink,

types, presses, &c. from England. 1198. What was formerly the price of newspapers at Calcutta, do you know?

-Formerly, I believe, they were all weekly journals; the price was then four rupees a month. 1129. By what means was the price reduced?-By active competition, in

which Mr. Buckingham took the lead. 1190. What class of persons do you employ as printers and compositors ?--Portuguese of the country and Hindoos.

1131. Native Christians ?-No, Portuguese and Hindoos. 1182. Are they expert in their business ?-Very expert.

1133. The Hindoos, pray how do they perform their parts?-When is is considered that many of them do not read English at all, with surprising exportness. 1154. What number of persons in all are employed on the Hurkura press?-Probably 50 or 60 in the publication of the newspapers alone; I have no means

of knowing accurately. 1185. Of the native press, what are the topics that are principally discussed? -They now discuss cuestions of government, jurispredence, revenue, and police; and religion some of them discuss very largely.

1136. Of your 800 subscribers, what number may have been resident in Calcutta?-More than balf.

1137. What impediment is there to the circulation of the newspapers in the provinces?-The postage. 1138. Is the postage as beavy now as it was formerly ?- Lord William Bentinck has made a very considerable reduction in it; formerly it was charged

peorly as a letter postage, now there are two fixed rates ; two comes to all places within a certain limit, and four status to all places beyond that limit. 1189. What was the largest amount poid to Government by that postage?-

One journal prid by contract to the Government 3,000 secta ranges a month, or 8000, under the old system. 1140. Has the reduction in the postage increased the sale of the newspapers? -Considerably. That of the Hurkura has increased: I am not sure that it has

been so with the other newmon 1141. To what extent ?- Probably 200 or 800. 1142. Has the reduction produced any defileation in the revenue ?-I imagine

not, because it was agreed that the proprietors of newspaners should be responsible for such defairation, if any occurred, and no claim has been made upon them, therefore I suppose there is no defalcation,

1148. Do you know what amount is derived from that source for the conveyance of newspapers ?- I should think one-tenth of the whole post-office revenue.

about 70,000 rupees. 1144. By the year?-Yes. as at Bengal?-No, the old rates are retained, and they are very heavy. 1146. Can you speak to what they are ?-The postage of a paper from Madras to Calcutta, for example, is one super 14 anims; one runee seven minus from Madras to Gargam, and seven annse from Gangam to Calcutta. Under the pre-

sent Regulations the postage from Gangam to Culcutta would be only four anna-

Jenus Sutkerland

1147. The Madras rate of postage would appear to be more than double than 1148. During your connection with the periodical press, have you known any instance in which writings have been charged as having a tendency to promote

secition or revolt among the native troops? - I am not aware of any instance of 1149. What benefit do you suppose to have arisen from the free discussion of

functionaries, and occasionally led to very useful investigations. 1150. What reason have you for supposing that it operates as a salutary control on any of the functionaries at Bengal ?- I imagine they all stand in awe of that public constituted by the Europeans, in the service and out of the service.

a large body of Anglo-Indians, and a number of intelligent natives in Celeutta. 1101. Has the press on any occasion within your experience been endered available for the defence of public functionaries when attacked?-Very frequently ; they have frequently availed themselves of it against attacks made on then through the same channel.

11.5%. Do nny particular instances of this nature occur to you?-I cannot st this moment recal any particular instance. I remember one instance in which a gentlemsn in the civil service was charged with having compelled a rich native to lend him his bost. The Sudder or Supreme Company's Court of Calcutta wrote to request the name of the author of this attack, which was given to them,

and an investigation ensued, by which, I believe, the conduct of that servant 1153. Since the relaxation of the press in Beneal, under Lord William Bentinck, have you heard any allegation of specific mischief in any instance basing rival paper; perhans, in discussion with rival uspers, they endrayoured to make out that the relaxation of the press was dancerous to the Government; but I

know of no specific instance that can be preduced. 1154. When you snoke of the relaxation of the restrictions on the press on the next of the existing Governor-General, do you mean the Committee to understand that the same power of transmission from India which has been exercised in former instances is not at this moment held over the tress and its conductors exactly as before 2-Precisely the same state of law exists.

1155. Then what do you understand by the term relaxation under the later government of Lord William Bentinck?—I mean, practically, that his Lordship has never interferred with the press, and that it has been privately understood be never will do so.

1150. You have stated in your own experience in India you have known 1157. Does your experience, or does your knowledge historically, mable you

for offences of the press. 1158. Then in the course of all that you know, personally and historically, you

can state to the Committee only four justances in which this power of restricting the press by transmitting from India the conductor of a periodical work has four instances in which the press has been restricted by that means. 11.59. In one of those instances which you have specified, the case of Mr. Fair,

at Bombay, the party applied to a court of law in England, to receive compensation for the injury sustained by him in consequence of such transmission; can you state to the Committee what was the result of such trial?-To the best of my recollection. Mr. Fair was too late in bringing on his case; there was a technical objection taken; I think he was defeated on that ground

1160. Can you state to the Committee generally at what period the press was restricted for the first time to the class of restrictions under which it is now subjected in Bengal?-In point of fact, it is under two restrictions at this juncture; the one the law of transmission, the first enactment of which I do not positively recollect, but it was long prior to the date of the present Charter; the second was enacted in 1883. 11G1. What was the second class of restrictions to which in your has answer

1160, Reference 1160, digitared by the University of Southernpton Library Digitation Unit

1102. Reference has been made to the case of Mr. Pair; upon what ground has Sadardani, was he transmit d from Bombay?—For an alleged missepresentation of the pro-

 1163. Was the paper be critted his own property?—It was in part, if not entirely, the property of one of the accretates to Government, Mr. Warden.

one of the King's judges, conceiving the Government to be responsible for this misegreesentation, inamonia as the paper was the property of one of their principal confidental sevents, complained of it, on which the Government called on the contract of th

to Enginest, von Clinia.

1163, Uniter what Government Regulations is the press at Bombay conducted 3—There is no Regulation for the press at Bombay, but it is restribute
by the terror of the law of turnorisation, I quirectuant, applicable to Engilation
1166. Do the same Regulation that exist at Calcutt exist at Running y—No.

the same Regulation was proposed at Borolsty, but the judgers manimously rejected it as "repugnant to the base of the realst," in the words of the Act of Parliament. 1187. Was that decision not in contradiction to a decision of the Prive Couneil?—It was; but the judges of the court did not conceive themselves bound by

cil?—It was; but the judges of the court did not conceive themselves hannel by the decision of the Privy Council. 1168. When the Regulation was registered at Culcotta, do you know how many

Juspes were on the name and yourself at the time?—I was, and reported the whole proceeding.

1170. What look place on that occasion?—Counsel were licinal against the

1170. What took place on that occasion?—Counsel were local ugainst th Regulation, on the past of the proprietors of several journals there, and also use part of some enlightness markes on behalf or their cannergemen, that I judge stated in the course of his jodesment that he had previously promised it

Government to cancilon some such Regulation.

1171. The Regulation refers to the licensing, and not to the power of trans-

mission?—To the licensing,

1178. Who were the judges at Bombay who refused to register the Regulation of the Government?—Sir Edward West, chief hustier, Ser Charles Har

1178. Did the other judges at Calcutts dissent from the upinion of Sir Franc M'Naughten!—There were no other judges at the time, he was alone on the

bench.

1174. What are the Regulations respecting the press at Madrus?—It is under a formus consorbin.

1375. Who is the censor?—Generally one of the scoretaries to Government; I believe, the Chief Secretary.

1176. Is the censorable usually acted upon?—Constantly. There have been

sepesael instances of articles rejected in the Madria juspes, leaving been well up to Calcinta, and juddished there.

1177. What is the form adopted as between the juddisher and the center?—

The paper is sent to man in proof, and no stilles out anything that he disapproves of, either original or select.

1178. Have you known instances of considerable ornissions in consequence ?—
Screed. The first Investigate is that of the more continues of a...

to address the Marquis of Hastings in 1818; the censor Kerhade them to be published, and they were sent on to the Calcutta Journal, and inserted in it. 1170. The Marquis of Hastings being Governor General?—Yes. The first course in which I new board of it were latter of the Section 1818.

instance in which I ever heard of it was a letter of the late Princes Charlotte, written on her dash-bed to her mother.

1180. Does the consenship extend to European politics as well as Inslian

matter?—Even to Parliamentary debates.

1181. Can you produce any examples of rejected articles, rejected by the center of Midnis, which have been forwanted to you at Cultuita for publication?—Yes, I have one here, userted in the Bengui Harkora of the 68th of

July 1830.

1182. In the event of an omission being made by the censor, how is the wavour filled up?—Generally by lines of stars or naturales.

1183. Then the Committee is to understand that, excepting only the pureer of deportation, which is common to each of the three presidencies, the presidencies Protect may distinct by the Committee of Southernoon to Protect Deposits along that and the Committee of Southernoon to Protect Deposits along that are the Committee of th

18 Murch 1812

are practically under Regulations each distinct from the other ?- Yes, each dis-1484. The crossoship depending altogether on the judgment and discretion of

India 2-1 see no reason why the press in India should not be left as perfectly

1186. State to the Committee the mounds on which you form that onlines?-I conceive that the press for the present, and for a very long time to come, can only operate on the minds of the English, Angle-Indians, and the natives very considerably enlightened; that if the Government desire to have the good the fact recorded in Judian History, that in the time of Warren Hastings, cortainly the most entical period of our empire in India, the press laboured under no other restrictions than the law of England, which was found amply sufficient to check its licentiousness. Three had an opportunity of referring to the enliest paper published in Bengul, and it was violent, and even sessitious in the extreme, in its attacks on public men; but the law in that case was found sufficient to

lihel in the Supreme Court, and the verdiets of juries. 1188. Do you think that writings of such a description would be tolerated in

1180. Was it the enforcement of the English law of libel that was found suf-

ficient to put it down?-Yes, the English law of libel. He obtained various verdicts against Mr. Hickoy, the proprietor of that paper ulinded to, Hickey's Grante; and when that Governor left Bengal, he held a

1101. Has not the circle from which insies might be taken considerably 1192. What difficulty, in your opinion, exists in jury trials for offices of the press at Calcutta?—I know of none. I have heard of fears expressed by legal soon

that there might be a difficulty of obtaining verdicts under the existing system.

1194. With respect to the system arto British dominion?-To the system alone,

1195. Were the verdicts which were gained by Wan en Hastings for attacks on his political character?--- For attacks on his public and private character, and on that of the rayal commander-in-chier. 1196. Not for notitical articles, not for articles on Indian politics?-Yes;

for strictures on his nubbe conduct, and on that of the naval communder-in-clief,

1197. Would you find a strict resemblance either as to the society or as to On the contrary, no resemblance whatever; the advantages are all in favour of

1198. No natives at that time read English newspapers ?-Very few, I imagino, 1199. There was no considerable class of what are called Anglo-Indians?-1200, Therefore

16 March 1612

1900. Therefore the newspapers printed in English were principally sead by James Superiord, the servants of the Company ?-- Principally by the servants of the Company, connected with the East India Company?-No, certainly very few; the monopoly effectually prevented that

1908. Under what restrictions is the nutive press conducted at Calcutta?-Precisely the same as the English press, with the exception of the law of transmission, applitable to Englishmen alone, or British born subjects.

1904. Yes?-There are no native papers

1905. Do you know whether the Regulations are the some for the Bengal severy, amounting to confiscation of the types and presses in some cases,

1207. Then there are papers printed in the provinces of Bengal?-I am not positively aware of the fact; I have heard that there is one, and I know there is 1908. In the event of the paper being published after the Government has notified the cancelling of the licence, what is the result?-The fine of 400 rupees for each publication, levied by summary process by the magistrates of Calentin, which magistrates hold their appointments at the pleasure of the Government.

1210. More than the English press?-Yes. I would observe, of late there

recently a discussion about the Princess of Kittoor, who deed under confinement 1911. You have seen that case freely canvassed ?-Yes-1919. In the event of the financial accounts of India being published for in-

formation as they are now in England, do you conceive it would excite interest, and be productive of discussion or otherwise?-It would excite very great

interest, and lead to many useful suggestions. 1918. Since your first accommonance with the natives of Calcutta, has English

education made any progress?--Very great progress indeed. 1216. Does there appear to be a growing disposition to approximate to

1015. Woold that apply more to the rising penemation?-To the young men.

and the rising generation more: it is undicated in the institution of literary societies, and the increase of native schools for tracking English. 1016. You refor to schools instituted by the natives themselves for that

purpose?-Yes. 1917. Do you consider that this has led to make may impression among any of them in the superstitions of their religion?-I concerns that your few of the great number of the well-educated Hindoos any longer adhere to the super-

stitions of their countrymen in former days, whatever they may find it convenient publicly to profess. 1818. Do you alliade to your residence at Culcutts principally ?-Yes

and respectable persons, persons much in halats of association with Europeans at Beauty also the natives presented Lord William Beatings with an address of

thority on his abolition of the rite of suttee. 1680. To what do you ascribe this growing change in the character of the natives?-In the first instance, to the opening of the trade, which has led to a viet increase of European association, which has produced that improvement that, I believe, it has been remarked to have done everywhere else. In the

intelligent than the inhabitants of the interior, where there had been no inter-1921. Is it your opinion that the increase of this intercourse, and the extension of education, are the most probable means of effecting ultimately any degree of conversion among the natives, among the Hindoos?-I should say the only

1922. Are

probable means.

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 1922. Are there any native literary societies established at Calcutta 2.... There

are several, I believe, I attended only one. 1923. What class of persons resort to them ?---Respectable Hindoos; young 16 March 1832. men principally. 1994. At the meeting you state yourself to have attended, what ourstion was

discussed?-A very able paper on the British constitution, written by a Hindoo, was read, and some discussion ensued on it in English.

1995. Do the Hindoos of Calcutta prefer the English literature to the Secretary -Most decidedly. I have been in company with fourteen or fifteen of the youths educated at the College, and their conversation turned estirely on the they have all a great ambition to learn the English language, and to acquire a knowledge of English literature.

1886. Are you of opinion that means might be taken for disseminating much more largely the English language throughout India ?-Yes, I think means might be taken, by the introduction of that language as the language of the courts in the

interior. I think also that the sepoys in our army might be taught to speak English, and I have heard Lord William Bentinck is satempting something of the kind. 1927. What opinion do you entertain of the capacity of the Hindon and

think they have great natural capacity.

1928, Should you say they are trustworthy?-I think those who are educated and those who have the advantage of European intercourse, are as trustworthy as any men in the world. With regard to those who are not educated and have not the benefit of that intercourse, they labour under the disadvantage of a superstition which inculcates falselood as a virtue sometimes-

1939. Is there any improvement which strikes you as easy to be made in the native achools of India in teaching the English language !- No, I am not aware of any, except that a great number of translations into English of elementary works, on the physical and useful sciences in particular, might be an advantage,

1930. Could Government at a small expense increase the lacilities of the natives acquiring English in the schools?-I imagine they might at a very trifling expense; for I believe the natives themselves are generally disposed to assist in the effort to instruct the rising generation. 1981. Would that be sufficient without the assistance of the Government?-4:

would require the encouragement and assistance of Government also.

1292. Are the Indo-Britons a numerous class at Calcutts; at what do you estimate their number ?- There are a very great number congregated at Calcutta; but I consider the estimate which has been formed in very creatly oversated; I cannot conceive the number can exceed 5,000 or 6,000.

1235. Is the number increasing?-It is increasing 1234. Do you think a little more extended intercourse with India would be

likely to increase the number in Madras of the Anglo-Indians?-I should think it would. I should say that the shades of distinction, however, would decline: in the case of a European marrying an Anglo-Indian lady, for example, the shades of distinction would be almost lost; their children could not be distinguished from those whose naments were both Europeans. 1935. What degree of English education do they possess, and what capacity

have you observed them to enjoy, for the transaction of public business?-There are very many clever men among them, and they are found extremely useful and skilful in the public offices, in which they are chiefly employed.

1896. Have you personally known any of them well educated?-Several under; the exclusion from civil and military employment, and the first society, is

1837. Have you any doubt of the policy of maintaining that distinction?-I

should say it is very impolitic; I consider that it is sowing the seeds of disaffection among a body otherwise extremely well disposed to the British power. 1938. Have they also latterly instituted any societies in Calcutta?-They have

several societies. 1939. Have you attended any of them ?-I have attended one or two of them; the discussions were of a literary nature; I do not at this moment recollect

the particular subjects. 1940. Did you attend them out of curiosity, or for the purpose of making use of them in the course of publication?-Purely from the desire to observe the

governments or presidencies in India, and binding those presidencies to obey the same in like measure as if they had been issued by the Court; but beyond this they could not concrive a case in which such power would be useful, and many in which its would be improper and disagreeus. In consequence of such repre-

1236. Where do you find the representation mude by the Court?-In the records of the East India Company. With regard to the public despatches, section 13 of the Act of 1784, as it originally stood, left it to the Board to transmit, whenever they might see fit, to the Court of Directors, drafts of descutches. without waiting for any copies of despatches intended to be sent by the Court of Directors. The Court were of oningen, that whilst the government of the possessions in India remained vested in the Company, and administered in their name, under any degree of control whatsoever, the power to originate orders and instructions could not be vested in any other class of men consistently with the principles of such a government, or without at once annihilating the executive power of the Company, and that the power thereby given would not only tend to destroy the principle before mentioned, and tend to introduce a doubt which of the two bodies would stand responsible for delay or negligence, but might become highly dangerous in times of political contest and unsteady administration, when it might be very inexpedient that new men just vested with the power of controlling the cost important acts of the Company should decide on materials digrested, and without the aid of those ressons and explanations which a previous discussion by men of experience must ever afford, rather than he led to commit the credit of their Board by precipitate orders, which once issued would not be easily given up; and moreover it did not appear that any use whatever could arise from that power, because it would still be occessary that both the Board of Control and the Court should deliberate on every measure, and no time therefore would be saved by originating the orders in one branch rather than another. The Court were very ready to concur in any regulation which might enforce the despetch of business, and tend to prevent negligence or inefficiency in its own provisions, but whilst the government remained vested in the Company, the power so given appeared at once destructive and useless. The Court therefore gave it as their decided opinion that the clause should be altered by making the same to take place only whenever the Court of Directors should omit to forward to the Board their intended despatches on any subject within 14 days after requisition made by the Board. The Act was altered, and now stands nearly in those terms.

1957. The great bulk then of dispatches connected with the government of India originates with the Court of Directors, and the power and supervision of those despatches rests with the India Board?-Clearly so. I may state, in order to show it more clearly, that from 1814 to 1831, comprising a period of 17 years. there were 7,978 drafts, instead of 7,962, as stated in my former examination. (Question 156) prepared for India in the various departments. Of this number 650 were situred by the Board. The Court, under the power which is conferred upon them by the Act, music representations to the Board of Commissionus, unon 76 of those 109 cases. With regard to the importance of the desautches I have to state, that the Political department comprises almost every subject which is or has been trented of in the Secret department, such as the policy to be observed another very extensive and important part of the correspondence; the Revenue likewise, and I may especially point out the Financial desurtment, which since the year 1892 has been prepared by Mr. Melvill, the auditor, in a sounner which clearly these several departments, during the 17 years, has been pressured by the Board of comprised in one letter what was proposed by the Court of Directors to be comsumented in three several letters. On many occasions important alterations 1938. There have been differences between the India Board and the Court of

for measures, to the encouragement given to native princes to maintain troops after the the European method; can you give me any information on this migrest—oblives the Board and the Court have entertrained some difference of opinion with regard to the policy of training the troops of native priories after the European modes, but the Board have ultimately after the same view with the Court, and rather condenned that policy, or at least they have concurred in despatcher which condenn it.

1959. Can you state any, and what objections have been cutertained at different times by the Court, with respect to the employment, or rather the retention in India of half-pay officers in the service, such service being the service of native princes?-I think it was in the year 1819 or 1820, after the conclusion of the Mahratta war, when a considerable reduction took place in His Majesty's regiments in India, that Lord Hastings permitted several half-pay officers of such regiments to remain in India. Those officers having found their way into the service of the native states, the Board of Commissioners called the Court's attention to the subject, refer to the Comt's letter of the 19th June 1883 to the Board of Commissioners. upon the subject of some alterations made in the draft proposed by the Court relative to this subject; orders had originally been sent out in the Secret department, but the subject of those orders was afterwards treated of in the public records. The Court observed, "if there be one thing more indispensable than another to good government, it is the taking due precaution that those who are entrusted with power shall be duly responsible for the exercise of it, and although this responsibility will absence of it. In proportion as power is great and liable to abuses, should be the efficiency of the checks innosed uponit. Hence it has wisely been deemed necessary than are generally found sufficient to restrain the unarrued class of society, but to keen the military force completely subordinate to the civil authority. But in the case in question, all precaution is perfected under circumstances which render more than ordinary precaution secessary. The European officers in the service military. They not only discipling and command the come to witch they are nolice, and in both canacities number to the Court to be estably execut from responsibility. The governments of Hydrahad and Nagpore have been actually supersyded by the British residents, whose authority however prest in other respects, does not legally extend to those officers; and even did the government ment to render British subjects amenable to their laws. Setting aside, too, the anomaly in the constitution of a military force of which the troops would be by British officers when employed in the service of a foreign prince. There are a ordinary newers, placed in circumstances of strong temptation to abuse those powers, and subject to little or no responsibility for the exercise of them. The Court are far from wishing to exaggerate the probable evils of such an arrangement, but a solomn scane of duty does not permit them to suppress their apprehensions, that it will be attended with practical abuses most calumitous to the countries which may be the theatre of them, and injurious little less to the

of the immediate actors in them."

1850. You have stated two instances in which differences of opinion had

you state to the Committee whether, in your opinion, such delay be or be not attributable to the existence of two such Boards?-I am quite aware that it is that a Return has been called for by the Committee of the number of letters were prepared here to such letters. I may take the opportunity of stating, that or delay that may leave taken place in the replies, that the date of the receipt of that a letter may bear date in January or Pebruary, which letter is sometimes

nine storths on the voyage, and sometimes it is only four. 1963, 'The Retorn we inquire after states the date at which the letter was received?-I beg purdon; not the date at which they are received, but the period

1964. Can you state any instance in which such delay lass arison from the inmications, and in order to show the rapidity with which answers have been returned to letters of importance. A desputch in the Political department, from Bengal, dated 14th of Yebruary 1820, was received in Jane 1829; it related to to the North-west Provinces of India. That letter was naswered in 16 days from its receipt, the previous communication having remained at the Board five days

only. There was one also as to the Tennasserim provinces. 1865. In this Return the letter beam date on the 14th of Pebruary 1889; and opposite to that the sister of the unswers to that letter me, the 13th of July 1889, the 1st of February 1830, and the 17th of August 1831; you state

1990. That is a very different account of the correspondence from what the Return gives?-That Return is signed by the Essiminer of Indian Corresponmay have contained some further explanations with regard to it.

may be an error in the Return; but the principle, namely, the removal of the government, was answered on the first date to which I have taken the liberty of

1938. It appears then, in the Return we now have, that in answer to the letter of the 14th of February, three different replies were given at various periods, the first being on the 3d of July 1823, and the last being on the 24th of August 18317—The only mower of which I am aware, and of which I am spenking, was detect the 3d of July.

1980. Will you just explain how this has arisen ?- I beg leave to state, that that Return was not prepared in my department. I have taken out one or two uny other explanation without referring to the records. I apprehend that in the nower I am now referring to, the whole principle is treated of with respect to the transfer of the government, that is, the Court's disapproval of the measure, and

1970. In point of fact, in cases in which delay has arises, do you or do you not

ON THE AFFAIRS OF THE BAST INDIA COMPANY. 13

may be placed as an advantage against it?-If I might offer any opinion with repard to the general subject, it appears to me that the maintenance of the mode ignortunce. No despatch from India which requires an immediate reply is left uppressered for any length of time. There are other important points mon which. in previous communication as well as in the original preparation by the Court of which that delay affords to both authorities of discussing and seviewing the several applieds which are contained and treated of in those despatches, marriv communities for the delay which has occurred. I shall portuge better inform the Committee by reading part of a letter which was written by the Chair to Lord Ellenberoson on the 27th of August 1829, when his Lordship pressed for some arrangement which might facilitate the correspondence with India. The Court observes, "Were the Indian government, as at present constituted, (comprehending under that term the a single word, it might with no impropriety be denominated a government of checks. expense of delay, and the amount of delay will generally be in proportion to the in a detail quite unexampled, every, the minutest proceeding of the local governments, including the whole correspondence respecting it which passes between departments. In the ordinary course of Indian administration stuck must always be left to the discretion of the local governments and unless upon questions of general policy and personal cases, it rarely occurs that instructions from honor can reach India helore the time for acting upon them is gone by. This is a necessary decision, and adopting their measures, on their own responsibility, to the varying the judgment passed by the Court be deemed useless whilst, though they have imdental oversight on the part of the Court, or their servants at home. From a

tive activit, and to make a proper selection of members of Commit."

1871. It has been started, "the Count of Direction have a power, wheheat the snacsion of the Board, to receil a Governor or may one of their servorist; but the Board, no the color band, have as almosted power of financing the despetic in which the decisions of the Count is conveyed to finals; used I believe it is not an engagement one, but that the Counthirous proof of Country were climitately, into passing properties of the country of the cou

PUBLIC. Peter Anter, Est. 20 March 1833.

power has been exercised?-I believe the instance adverted to was that which occurred in 1807, of the recall of the then Governor of Madrus, Lord William proposed to communicate it. The Court had sent up to the Board a draft, which contained their sentements in the form of a resolution. The Board lawe invariably rejected a draft so framed, because they very justly state that they are thereby precluded, if they adopt such resolutions, from making my alternation in the draft. The draft, as proposed by the Court, stood as follows:--" Resolved. that although the zeal and integrity of the present Governor of Madras, Lord William Bentinck, are deserving of the Court's approbation, yet when they consider the unhappy events which have lately taken place at Vellore, and also other of opinion that it is expedient, for the restoration of confidence in the Company's coverment, that Lord William Bentinck should be removed, and he is hereby removed accordingly." The Board altered it in the following terms: "Though are deserving of our approbation, yet being of opinion that circumstances which of our service, that a new arrangement of our government of Fort St. Goorge should take place without delay, we have felt ourselves under the necessity of determining that his Lordship should be removed; and we do hereby direct that Lord William Bentinck be removed accordingly."

1272. The justance which you have quoted is the only instance in your experience of the affilias of the Company to which the statement recited in the last question could have reference?-1 know of no other.

1973. Have you any recollection of a despatch signed by 23 Directors, censuring the conduct of a Governor-General, which was withheld by authority of

1874. It has been stated that, " the Board have no control over the communications made by the Court to any persons in this country; the Court may, therefore, write a letter in London, communicating a view of a subject, or of the case of an individual, and may then be obliged or may even have been previously chliged, to take a totally different view of the case in a desputch sent to India." Can you state any instance in point in reference to such rucital ?-- I am aware of only one instance, which took place in 1821, and in which the Court's decision in the case of an officer in the Bengal establishment, who was in this country, was made known to him before the draft which had reference to his conduct. and which necessarily would go to India, had been approved by the Board; but since that period I am not aware of any other, the Court luving invariably abstrained from communicating any decision whatever to maties when such decision was in any way subject to the approphation of the Board, unless that anombation lad been received

1075. You stated in your former examination that the references were 50,146; the recital occurred, is the instance to which you have now referred in the case of the Bengal officer?--Most unquestionably; perhaps I may state that the 50,000 references alluded to were not all matters in which the Board would necessarily have a control

1276. It has been stated, " that the Board is restrained from taking part in the appointments to office; I should say, however, that the Governor-General and the Governors of Madras and Bombay, and the three Commanders-in-Chief cannot be appointed by the Company without the approbation of the King. The warrant of approbation is countersigned by the President, who is therefore the responsible minister on such occasions. This approbation has been repeatedly refused." Be-Majesty's Government the President of the India Board has refused the warrant of approbation to the great offices appointed by the Bast India Company, as recited by best it is important to repyine the Committee that the King was not result with Part Mode. For the Committee that the King was not result with Part Mode. For the Committee the Committee that the Committe

and caused a delay in the appointment of Sir John Malcolm to Bembay.

1977. In point of fact, is there a single instance of a Governor-General of India, appointed by the East India Company, having been refused by the President?—

I'm not wave of one.

1878. In point of firet, is there a single instance of a Commander-in-Chief appointed by the Company having been refused by the President I—I um not aware there is an instance, with the exception of that to which I have adverted to the period and the state of the I have adverted to the period of the state of the I have adverted to the period of the state of the I have adverted to the period of the I to command of II ill Michaely's frome I india, generally appoint such officer to command the Company's troops, ou an understanding with III Michaely's Midstates that the positionation will be committed with the committee of the III Michaely's Midstates that the positionation will be committed with the committee of the III Michaely's Midstates that the positionation will be committed with the committee of the III Michaely's Midstates that the positionation will be committee of the III Michaely's Midstates that the positionation will be committee out the III will be committeed to the III will be committeed to the III will be committeed the III will be committeed to the III will be committeed to the III will be committeed the III will be committeed to the III will be commit

firmed by the King.

1979. Can you, without any breach of official confidence, state any circumstances that took place in the year 1806 in respect to the appointment of the Governor-General of India between the mouths of February and Jone in that year. You are not to unswer this question unless you choose?- I can have no difficulty in answering the question. The appointment of a Governor-General to India at the period alluded to gave rise to a long correspondence with the then President of the Board, Lord Minto. It will not the Committee in possession of correspondence. Lord Monto, in reply to the letter of the Chain, in which they objected on the part of the Court to the nobleman who was proposed to them, wrote, "It is with perfect satisfaction therefore that I subscribe entirely to the unquestionable dectrine concerning the right and powers which relate to the appointment of all officers, civil and military, including the Governor-General, as vested in the Court of Directors by the elearest provisions of the law, and so far from disputing, I am prepared to second you in asserting and muntaining that doctrine. At the same time the powers of revocation are vested, by provisions equally clear, both in the Crown and to the Court of Directors. I subscribe also been usual with the Court to have an understanding with Administration, and to consult their opinions and wishes;" nor can I feel any inclination to controvert extent, exercised their own judgment, and a choice, not objectionable to either

"In these great outlines of strict legal powers, and of a due and discreet execcise of them, we are, I trust, and I am happy in this opportunity of declaring so,

"On that account, indeed, I am the more unwilling to pass by entirely without notice a passage in para, 14, which appears to me capable of bearing a construction which I am promote the Court of the viscound but I it also no absolu-

and in the most distinct manuer, the illegal design brought into view by this nanthat paper even the trace and sindow of an injurious allegation, altogether unwar-

united by any part of the proceedings to which it has been applied." Mr. Caming in 1818 wrote to the Chair on the choice of a Governor for Bombay: "The more usual practice for the Court is to look for their Governors rather among persons of eminence in this country than among the sersants of the

1230. You have stated three instances since the year 1813 in which the approbation of the Board of Control to the appointment proposed by the Court of Directors has been formally withheld; do you entertain any doubt that in other dent of the India Board has been a different appointment from that which had been originally contemplated by the Court?-As far as public proceedings go, I are instances in which individuals have been proposed by the Chair; and I know have been proposed by the Board in the same manner, to which agither much would consent, and that the principle Isid down in the letter from Lord Minto has been the principle acted upon; viz. that there should be an understanding between the two authorities before the nomination is publicly brought forward;

1981. In the instance you have referred to in the year 1806, was not the result of what passed between the Court and the President of the Board of Control at that period the substitution of the name of one poblemon angreested by the India Board for the name of another pobleman, whose name had not proved arresable to the Court?-I believe I may confidently assert, that Lord Minto was provailed upon himself to take it by the Chairs,

1982. Do you conceive that Lord Minto's description of the relation in which the relation in which they stand towards one another new, with regard to Indian power of negativing appointments now which His Majosty had not then 1283. From the view of the working system connected with this nomination, is

to fortify it by the opinions of those who have taken a prominent part in Indian offsire. It appears to me that the government of India has nover been altered so for as regards the body in whom the actual government of India is reposed. Pronow, with the Court of Directors, who were then subject on various points to the supervision by His Majesty's Secretary of State, as they are now to the Board. It which inquity led to the Act of 1773, the Chairman of that Committee, who was Colonel Burgoyno, said, "I shall perhaps be told that the object and end of my no such purpose. If the Legislature has not power and wisdom so to model and regulate the sovereignty of the state in India, or so to delegate its powers as to

powent the inflatence of the Crown in Engined, let it never be attempted."

Mr. Burke, on the same occasion, says, "Their authority I would not have diminished in India by any severe animadversions. Let the people of Bengal be not taught to despise them by finding their authority limited and circumstribedfuture, when they have so widely extended our empire and commerce, when they

In 1773, when Lord North was about to being forward his regulating Act, he said, "The point to which I shall confine myself at present is the territorial pos-Printed image, digitared by the University of Southernpton Library Digitalition (1999) 600 \$

20 March 1832

agasions; and I think it necessary, in this part of the affair, to drop all exunination or declaration of the right which the Crown has to these possessions; since, from Peter Jules, Eag angle to be left for ever in the Company. I am fully and elertly of that opinion. if not from right, at least from policy. But this depends upon their conduct. If they in future govern them no better than they have higherto done, my oninion

In 1783, in order to show the minuteness with which the examination had been sutered into by the Committees of the House of Commons as that period, Mr. Fox. when about to submit his views on Indian affiles, in allesion to the Committees' Reports, said, "they contained a body of information so complete, that nerhous

the like had never been laid before Parliament."

It was with this information that Parliament legislated in establishing the Board of Commissioners; which measure did not, I conceive, take away the government of India from the East India Company, but placed their administration of that government under the control of a branch of the Executive Government of this In 1793 Mr. Dundas says, " If the mode at present adopted for the government

of India is to be examined on any principles of general theory, it may be liable to many criticisms; but it has been proved by experience to answer the purpose of a successful and presperous administration of our Indian affairs. And under these circumstances, it seems much wiser to found on the basis of established systems, than to substitute in their room the most plausible untried theories." In 1800, when the subject regarding the private trade with India was brought forward, Mr. Dundus said, "That a direct interference by Government in the affairs of India is necessary for their stability and uniformity, I am more and more convinced; but that the extensible form of government, with all its consequent

and socurity of our constitution to their own personal aggrandigement and ill-

In 1808, before the negotiation commenced for the renewal of the last Charter,

Mr. Dundas said, "He had not yet heard or read any arguments against the contimming of the system under which the British possessions in India were governed of authority weight to counterbalance the practical benefits which had been derived from it in their increased and increasing prosperity, and the general security and happinges of their inhabitants. It was novable that the same effects might have been produced under a government immodiately dependent upon the Crown; but for the attainment of those objects the experiment was at least unnecessary; and it wight be attended with dangers to the constitution of this country which, if they could be avoided, it would be unwise to encounter. Any alteration, therefore, its details." And again: " He assured the Court, that it would be the earnest desire of His

Majesty's Government to supprest to Parliament such a system only as should be

conformable to the principles on which the Regulations of 1784 and 1793 were founded, as would secure to this kingdom all the benefit that could practically be derived from its trade with our possessions in India; and to the milies of those and preindices, and consistent with the British chameter, and which should also In the year 1813, it was stated by Lord Castlereagh, when moving that the

House do resolve itself into a Committee of the whole House to consider the petition of the Commun for a renewal of their exclusive privilege, "That if he and his colleagues had conceived that the arrangements they should propose would shake a system which had unquestionably answered all the great purposes of government, they would have besitated before they had suggested them; but his proposition would not only abstain from touching the principle of that system, but would sender it more amplicable to the times.

And on the 4th of June 1813, the Committee of the whole House resolved, "That it is the opinion of this Committee, that m long us the government of India shall be administered under the authority of the said Company."

ON THE AFFAIRS OF THE EAST INDIA COMPANY, 148 lations passed by you with this object, in the beginning of 1881, have our condist

approbation; and we were greatly pleased with the valuable Memorandum which Peter Ander, Esq. was then submitted to you by your Chief Secretary, Mr. Bayley, explanatory of the policy which and influenced the framing of those Regulations. But though, under the provisions then made, the powers of moonsife and sudder numerous were increased, and their number may be increased indefinitely, we apprehend, from the lange arroar of undecided causes stated in Mr. Adam's Minute to be depending in are still inadequate. It has frequently been objected to the employment of the nistration of justice. To this objection it might perhaps be a sufficient mower to say, that they are already so trusted. But our principal reason for noticing the objection is, that we may impart to you our decided conviction, that when we place the natives of India in situations of trust and confidence, we are bound, under every consideration of justice and policy, to grant them adequate allowances. We have no right to calculate on their resisting temptations to which the generality of fide in them, and liberally to reward meritorious service, and to hold out promotion to such as may distinguish themselves by integrity and ability, we do not despair of improving their characters, both morally and intellectually, and of rendering them the instruments of much good. It will be gaining a most important point if we can substitute a well regulated and responsible agency for that manufactized and permissions influence which there is reason to four that the native officers of the nistration of instire has been tried with success on a larger scale in the Madeus to the expeditious despatch of which they had been found unequal, besides having, as we believe, been attended with other important benefits; and we have derived much satisfaction from observing a spreading conviction of its utility. When the revenues of a state are more than sufficient to define the necessary expenses incurred on account of its government and dufence, the people are entitled to look for relief from nort of their burthens; and you will busides have seen from our recent descatelies in the Military and Plauncial desortments, that according to the best view which we can take of the actual state of our affairs, it is not such as to exerrort you from the strictest attention to occopomy in every department of your administration." The Board have undoubtedly pressed more strongly than the Court, subsequently to the Act of 1818, for the employment of natives. The Court are disnosed to adont the same principle gradually a but they still pergin from going to the extent to which propositions have been made for conferring certain offices on the natives of India. The measures of Sir Thomas Munro on that subject have been alluded to in the letter just read us to the employment of natives. There is a Minute, which was placed on record by Sir T homes Mastro, which has reference to the precipitancy of some of our measures in 1884. "Our experience is too short to judge what rules are best calculated for this purpose. It is only within the last 80 years that we have here begun to acquire any practical knowledge. A longer period must probably clanse before we can ascertain what is best. Such a period is as nothing in the existence of a people; but we act as if this were as limited as the life of an individual." With regard to precipitation he has this observation: "Onegrent error in this country, during a long course of years, has been too much precipitation in attempting to befor the condition of the people, with hardly any knowledge of the means by which it was to be accomplished, and indeed without seeming to tem of government, in a country of which our knowledge is very imperfect, to be constantly urged by the desire of settling everything permanently, to do everything in a lawry and in consequence wrong; and in our seal for personency, to put the remedy out of our reach. The ruling vice of our government is innovaalthough made after what was thought by us to be mature discussion, it must oppear make everything as English as possible, in a country which resembles England

Board of Commissioners and Secret Committee of the Court of Directors to concur together in a measure of that kind, which is most improbable. 1800. There are no orders which they might not frame as they pleased?-It would be a most tremendous responsibility, if they were to frame and send out any orders which did not strictly fall within the limits of their appointment.

1301. And you consider the limits of those are sufficiently defined for that practical purpose ?-I do. There is no desire that I am aware of to keep matters in the Secret department. One iostance, in which it was proposed lately to treat of the affairs of a certain state in the Secret department, was opposed by the Court of Directors, who made a representation against some portion of a despatch regarding a state in the western part of India, which had been prepared in the Public department, being struck out by the Board, on the ground that it was their intention to include it in the Secret descriment. The Court exposalited against it, but the Court have no nower to control the Secret Committee

130%. It has been stated, that the division of the Directors among the Committees is regulated entirely by seniority; has it happened that within your knowledge at any time the Directors composing the Committee of Correspondences have all been members of a particular professions all nuntical men, for instance? -Clearly not since the year 1794. I am not aware of these being at any time a greater number than three nautical, or perhaps four nautical members, and that 1803. Any statement to that effect would perlans in your judgment not be

in very few years.

sustained?-Most certainly not. Some explanation may be necessary to put you into possession of the reasons which weighed with the Court of Directors, in electing the committees as they now stand. These committees, as I have already stated, were formed in 1785, to consequence of the Act of 1784, and in some measure in communication with the Board of Commissioners. Under the roof of the India House is comprised all the departments which are necessary for carrying on the whole of the affairs entrusted to the Company; and may be compared, in a smaller degree certainly (although still a very large one of itself),

1804. I thought you were going to state, that in the East India House there were departments analogous to those of the state of England generally; what part does the Committee of Correspondence hear reference to ?- In the correspending branch you may compare it with the Secretary of State for the Colonies. done in a great measure at the Hosse-guards and the War-office. The Financial department, being political and commercial, embraces the various points that are mercial desertment and the Committee of Shipping, what in some degree is carried on by the Nevy Board and the Board of Trade. It may be necessary to state, that the shipping concerns of the Company, the members of which profespany's affairs, and was conducted under a variety of Acts of Parliament; in point orders connected with the despetch, rendezvous, and sailing of the several ficets of the war, the naval force of the country was frequently inadequate to afford the Company's fleets; and such was the importance attached to the size and character of the Company's ships, that in 1790 the Company transferred, at the instance of Government, eight of their large ships for the seavice of the public.

1805. Military service?-For political service. 1806. Not commercial service?—Not commercial. They transferred eight of their commercial ships for the military purposes of Government; they likewise the Court of Directors has necessarily contained a proportion of professional Elphinstone, one of the most able Directors, having filled the chair twice or three (445,-I.)

PUBLIC.
Feer Auber, Esq.

times; Mr. Marjoribanks the same; Mr. Lindsay has filled it once, and Mr. Loch has lately retired from it. I believe it will be correctly found that any genetiemen have been more efficient in conducting the Company's affairs, or who have possessed more knostedge of them, than those gendemen, and they acquired it by progressively posting through the reveral committees.

1979. Has not the size of the bijts and their equipments been the same since the pane as they were in the war. —In consequence of the opening of the India traft, the Company, as far as the India shipping is concerned, have totally alandhored it. Their Chline ships are in part sent circuitously by Bomkuy, Marlans, and Calentia, as troops and stores may have been required to be transported, and as the commercial concerns of the Company in their eveningaments.

1308. Those thips carry the same number of guns and treen as in the time of wart—They do not carry the same number of guns, but I believe the number of une is the same. The Court have interly been in the habit of employing what are terred discussful delays, which have gone a constitutable number of voyages, but are let at a lower rate of freight, in consequence of their being found in a less sensition remains.

1809. Are they not altogether got up on a scale of expense which no individual merchant, or any set of merchants, would think consistent with prudent or advantageous commercial speculations?-If you look at the Company's shipping at the present moment, and compare it with the private trade, viz. the shipping that is now soling to and from India, the charges on account of the Compeny's Chira ships is considerably larger; but I doubt very much upon the outturn of the whole concern in the long run, whether it will be found, that when the services they have performed, the cargoes they bring, and the security and safety altogether of that class of ships are considered, they much exceed the cost of the private traders. It is an important point to bear in mind, that from the opening of the trade to the present time, peace has existed; but I should confidently predict, that if we were to be at war again with any naval power, the India trade (and supposing the China trade to be thrown open it would be still worse, great detritisent, I should say, of the country and of the revenue, looking at what has occurred in a state of war even with the Company's shinning in former times. 1310. With reference to the formation of the committees of the Court of Directors, have you over known a barrister a member of the Shipping Committee,

and the communitor of a ship a member of the Law Committee?—Yes, there is at the present time.

1811. Within your experience has it not happened that the greater portion of men of experience and high reputation in Josin belonging to the Court of Districtes have not become members of the Committee of Correspondence 2—No.

I should my not.

1812. Do you mean to my that many individuals of great weight and character
have not, within your remembrance, been excluded from the committee by the
operation of the rule?—That there may have been some, I have no doubt; that

operation of the rich t=1 there may have been soons. I have no doubt, but I should say, taking the whole ceries of sevents a they have occurred with respect to the Court of Directors, most of the members who have hold high stations in India have sooner but the rechest the Committee of Correspondence; and, at take the Electry of stating before, they have, and every Director has, to all intents and suproses, the same power of interference in the Company's stiller, and causiling a thocough knowledge of all that goes on, except that of sitting and differential the Committee of Correspondence.

1818. But is it understood that they do take part in the proceedings of the Court?—I am quite sure that the very dissents which those gentlemes have re-corded on the mintes of the Court's proceedings, which are sent up to the Board, show that they do very fully cater into, discuss, and interfere with the various matter consideration.

show that they do very fally enter mix, discuss, and me sent up to the obtainunities connected with the correspondence of India.

1814. It has been stated that the Beard has also a power of directing permission to be given by the Court to any individual to go to India, and they are not required in this reast to state their reasons; also the power of the Board, in a officeting the court of the india the court of th

mission to be given by the Court to parties to proceed to Ladin, been exercised in over-ruling the decision of the Court in respect to the same parties?-The Polar Aultr, Esc. return is now before the Committee of the number of individuals who have 20 March 1832. applied, being 1,547 since 1814. 1815. Of that number of applications so made, how many have been granted by the Court of Directors !-One thousand two hundred and fifty-three.

1816. How many have been refused by the Court of Directors?-Two hundred and minety-four. 1817. How many of the 294 so refused by the Court of Directors have sub-

sequently, under the permission of the India Board, proceeded to India?-

1318. Then, in point of fact, the decision of the Court of Directors has been

1319. What is the principle upon which the Court of Directors has necessited is preferred to the Court, and laid before the first Court after its meann, when it is referred to the Committee of Correspondence, who judge of the grounds set forth, for a compliance with the application. If any good reasons whitever are shown, either to join any mercantile house from whom the applicant may in fact, he has any ashstantial reason whatever for proceeding thistier other than to the Court to arquiesce, or that the Coust refuses permission.

than more speculation"?-I should say, if an individual had made an application, no specific object, the Court would call upon him to state for what purpose he wishes to proceed, and if it should be represented that it was to seek employ-1921. Do the Court of Directors take cornizance of nurties who may apply for

permission to accommon the Governor General, Communders in Chief and other great functionaries; and if so, what is the combance so taken by the Court?-The Court of Directors never hesitate in permitting any portion of their family. or such attendants as they may think fit to apply for, accompanying them to India : but if any request is made for parties to accompany them where there is no ostensible prospect either of employment, or for any other apparent purpose, the Court of Directors, I apprehend, would object to it; but it is so well understood generally by the personages who have been appointed to those high stations, what the practice of the Court has been, that I do not think my application has been made to which the Court have felt it necessary to object.

vious experience of the evil effects of the more general introduction into India of strangers so accompanying functionaries of high rank?-I think restances have occurred in which objections have been privately taken to such parties proceedthe individual in some situation, or some employment not estensibly avowed when

The Iraila stock from 1845 of mency in such stock as a commercial special root actualing this invariant of mency in such stock as a commercial special proprietor in the Iraila stock who became proprietors without altogether considering the interest they would get by that stocky but superadded to the, three use introne indicementals for them to be seeme recognition.

1345. Will you state what other considerations actuate one mm who has

capital, to invest or by it out is Italia stock than in any other public stock?— Let he first place I consider that the interest which Italia stoch has given and does give is better, that it a poeminy reason. With regard to others, it arises from long connection with Irabia, and from deferts to take part in Indian affirst and in the discussion at the General Courts at the East India House, where points arise in which they feel an interest from having proviously been in India; also to promote the election of their friends, and in the loops of participating in the partinging is some messare.

of India stock in order to keep up a legitimate mode of manifesting the interest which they take in the affairs of the country which they have left?—I have no doubt of it. 1587. The duties exercised by the proprietors of the stock are much more

1897. The datased exercised by the proprietors or this stock at a much more stricting under the present system than they formerly were T—Clearly they are abridged. Formorly they interfered with appointments, and with regard to every measure for the nonsecution of the servants for malweration, &c.

measure for the prosecution of the servants for malwessurion, &c.

1948. They are confined now to the selection of the Directors?—There is no nsipict which they cannot take up, and I may mention the very subject of the

affair at Hydrabad. On those transactions the Court of Proprietors expressed

their opinion most fully; they have also conferred grants of many and votes of thanks upon some of their distinguished servants.

1849. Without entering into the question as to the expediency of the formation

Bedde Breit to destine in strong, and their granter of qualities, one year test the which is nature of the namely, white it this manned of Regulation numerically which is nature of the namely with the line manned of Regulation numerically which is the strong of the Regulation numerically which is the strong period by a strong of the Regulation of the R

Precy Anter, Est.

the government. The power of exacting Regulations was first conferred on the enveropent by Act of Parliament in 1781. Mr. Burke himself brought in that Act, but the government in Incia had before exercised the power. The Act of they saw fit. In 1793 they were formed into a code, and from 1793 to 1830 there appears to have been 761 Regulations passed in Bengul, averaging about 90 every year. At Madras there have been 218 Regulations passed, averaging not quite six armsally; and at Bombay there have been 483 Regulations, be relieved from the labour of legislating for India (a right which I can scarcely 5,019, and that the local Acts, which are to be judicially noticed, are 6,682, posed change, were there no other reasons to be arged against it.

Onlinences, and Regulations passed by the Government under the 37th section of the Act of 13 Gen. 3, for the good order and government of the settlement Court. They are then to be sent to England, and exhibited at the India House. Within 60 days from their being so exhibited, any party may appeal against Revalations may have amounted to about 130 or 130 since 1778. The other possession of the manner in which these Regulations are classified; and by reference my existing Regulation may be most easily traced. It is the work of Mr. Augustus Prinsep, of the Bengal civil service. One on somewhat similar printhird class of Regulations has reference to the imposition of taxes and duties by the Governor, and they are not valid until approved by the Court and Board of

1851. Is it your oninion that the number of new Regulations passed since the lest Charter, not having amounted on an average to SV a year, would be a sufficient could be desired for the purpose of unking laws for the people of India?-By on means; but the question involves a very large subject. So far as my individual coinion goes, I can have no hesitation in offering it; but it would require some time to enter on the different points connected with the subject. I am decidedly of opinion that it is incumbent on the authorities of this country to provide in the best and most efficient manner for the good administration of India, and especially for giving to the natives of India the most clear, comprehensive, and simple form but it was soon found that the powers they exercised were most injurious to the naafterwards. The discussions which passed between the Supreme Court at Bombay various enesticus connected with the influence and nower which the Sussame Courts have a right to exercise over the natives of India, and to the proposition for

Captala V. Mucov

a legislative council for India. In the papers which are put forward in support takes place, whilst, on the other hand, members of the covernment contend that the Government itself must be supreme, and that the remedy might be applied, as far as the acting courts are concerned, by strictly defining their nowers over the notives of India generally. The Government countries of the nowner of the Supreme Court not being pointed out, and Sir Charles Meterife adverses the face that a native of the Himalaya mountains may be brought down to the stilling heat of Culcutte, who, at the same time, may be utterly ignorant of the existency, and much more so, if nossible, of the powers or operation of the Sanrama Coart. Mr. Mackenzie, I believe, has suggested that a registry should take place of the norties who should be liable to the Supreme Court; and in fact a variety of suggestions which have been offered might be enumerated, whilst the remedies pointed out are not less various. The first question is, whether the Supreme Court is to remain us at present constituted? if so, it appears to me the most elicible course would be to define clearly its powers, which I think might be India pull the practice of the Supreme Court. The other point for consideration is the internal administration of justice for India.

Jecis, 22° die Martii, 1832,

SIR JAMES MACDONALD, BART, IN THE CHAIR.

Captain Turner Mnows, called in a and Examined.

1332. IN what service are you?—The King's military service, in the 16th

anters. 1853. For how many years were you in India ?—Twenty-three years actual saidence. 1894. During that period did you discharge also any civil fauntions in India?

--For the last 13 years of my residence in Italia, I held the attention of Pensian interpreter to three successive Commanders-in-chief, Lord Hartings, Sir Edward Peget, and Lord Combeturers. It cannot be called a civil function, it has always been ited by a military officer.

1303. Did the duffee of that situation necessarily bring you in centace with the eith servants of the Company 7—with the exception of the Fernin sessentary to government, the residents at surface esserts, and political agents, the dutes of their streating dute of bring me in ordifical contact with the eith servants of the positions and in personal festercourse.

1301. Were you conversast with any other Oriental language, than the

Persian?—The Persian, Arabic, and Hindostonee are the languages I am occurrent in, but most so in the Persian.

1367. Have you had occasion to observe the amount of qualification in Oriental

languages with which young men generally have proceeded from this country to lanta e.—Hawing resided from the general part of the last 12 years in California. In the contract of the contract

1300. It is your quinten that the system adopted as that Callage was well calculated to the cold of queening the low quies of investment plays disclined in the cold of general field was quied in the cold of the

rimou mage digitised by the University of Southernplon Fibrary Digitisation Unit

22 Harch 1832.

1860. They were also at considerable expense in maintaining them ?- They Captain T. Maces, were circuss to the government, and I should say at an amount expense for each added to their qualifentions as Oriental scoclars. The College of Calcutta 1 have of the writers; and as a proof of this, I will only mention that a few years back,

was, as nearly as I can recollect, about a million and a hall'sterling. 1361. State the numbers and the period that it embased ?- The entire number of the civil servents on the establishment could not have been above 400. The debt was confined comparatively to few. I know not the number; and I believe much of it to have originated in college extravagance. It was not uncommon in former times for young men to leave college with a debt of from 50,000 to a lac of names, on which they were generally paying an interest of 10 per cent., with if they borrowed it from agents; but it sometimes was borrowed from natives, who lent it not so much for the sake of the interest, but with the hopes of profiting by their patronage when appointed to official situations; and in this manner a giol servant lost much of his independence. For the first 10 years of his ourwho were in civil administration, he was seldom able to pay even the interest of this light, which accumulated with fearful rapidity a and many civil servents, after a weitherca's India of 28 or 30 years, after having hold high official situations with a salary of perhaps 40,000 rupees a year for 10 years or upwards, have been unable to shake off the embarranments occasioned by college extravagance.

1862. Those individuals, then, oppose to have anticipated the fruits of that preforment to which they considered their writerships as having given them the right? -The debts were originally contracted in the reckless extravagance of youth, without any consideration of the future, but for the gratification of the present moment. The assembling of young men in a capital like Culcutta, where there is a temptation to every extravarance, and where a great facility exists, or rather

did exist, of raising money, induced the extravagance I have snoken of 1383. Do you attribute nothing of this recklessness to the nature of their annointment, which holds out to them an almost certain expectation of Inemtive employment?--- Uniloubtedly much is to be attributed to this cause. To show that the extraverance is founded upon the auticination of lucrative employment. I need only mention, that young men in the military service, who have not even one half of the allowance of a writer upon their arrival, and have more to do with it, have not got in debt, and could not if they had wished, borrow even untitenth of the money that has been profusely invished on writers; so that the lender as well as the borrower has anticipated the effects of lucrative comleyment. 1364. In your time do you remember many leatances of young men leaving been sent back to England from want of due qualification for preferment?-

cannot recall one instance. 1865. Should you say from your experience that the young men so appointed India College in England, are strictly enforced, it will always ensure a sufficiently high degree of calucation. I think the age at which they go to India, with form, is not sufficient; they are too young. The age of 50 would be better than 18. legislation in all its branches, and calculated to call forth latent talent wherever it

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 15%

1366. Do you consider the amount of requisite qualification in this country as being too high or too low?- I think, for their age, the amount is neither too Captaia T. Massa. high nor too low; but I would wish the tests to be strictly enforced. 1567. Should you propose to substitute any other tests of qualification for

my at 50, in which case I would make some knowledge of jurisomdence a 1368. Would you require any test of the knowledge of Oriental languages?-

Yes; I would require a knowledge of the general principles of the Persian and Hindostance languages; in fact, the test that is now in force,

1969. Supposing them so grounded, by what mode of disposing of them after their arrival in India, should you imagine they would best arrive at the utmost degree of proficiency in the languages?-The judicious regulations and alterations prade by Lord William Bentinck in the College at Calcutta seem to claim for that college a trial of its ageness. I am of opinion, that under its present able secretary, and under the present enlightened Governor, the College of Calcutta will be found to answer all rational expectation, and that the students will acquire in a short time sufficient Oriental knowledge, without contracting debts; but I am decidodly of opinion, that a preferable mode of disposing of the civil servants after their arrival, would be to hasten them into the Mofassil, but not to collect too many at any one station. I would not have more than three at any one place ; and at those stations native teachers should be kept on small permanent salaries from government, their full salary to be made up by those who employed them. The civil servants thus disposed of should be required, after three months, to attend the court of justice and the revenue office of the station, to qualify themselves in the practical details of those duties; and on a report from the civil authorities of those stations, they might he sent to Calcutta for final examination, for which purpose two professors would be adequate, in addition to the socretary,

1370. Does any peculiar public advantage appear to you to arise from the congregation of the young men destined for India in a large hody in a college, previous to their departure for India?-I should say the reverse; and I consider the East India College in England a useless expense to the government.

1871. You think that the grounding of the Oriental languages might be fully as well accomplished by individual masters, if due encouragement was given to them, as by the aid of professors at high subside at college?- I have not the slightest doubt of it.

1372. Do may of the ovils and disalvantages respecting the writers, to which appointment?--- A writer may have gone greater lengths in braving the orders or regulations of government, from the consideration of the support of that patromage by which he was nominated, though I should not say that this extended to any number. I do not think that the debts of the civil service, or any other colls I heen appointed; but I conceive that if superior qualifications were made the test for appointment to India, that is, if competition instead of patronage was the mode by which vacancies to all departments in the Indian service were filled up, you in fact, command a great portion of the talent of England for the Indian government. In this case the tests of qualification for a writer should be higher and of a different nature to those required for the military service, and those again should vary according to the branch in which they were destined to serve. By these messes, the candidate should have his option of what test he would stand, whether for the civil service or the military, and what branch of the military 1878. You have stated, that during your 23 years' residence in India you have

had occasion to make frequent tours in the provinces; has your intercourse with the natives on those occasions been considerable ?-It has, partly from official duty, partly from my Oriental purents. I have occasionally corresponded* and held happansa

Epistolary and personal intercourse between the Commander-in-chief, during his tour of Leffin. control throwing that periods control of the party unlikery, and that about from Calcare, he modiles not in civil also freeze. (440,-I.)

I. PUBLIC. Ispinin T. Marss 22 March 1885.

personal intercourse with almost every native of rank and takens from the Sasked; to Calcuta; and from myach holding any official distudies under government, which would make them entations in communicating their opinions, our fatercourse has been very surrestrained; and many of them have economic Government Lindstudies and individual classactors with as much freedom and, I have no doubt, justices.

1276. Generally gaussian, low laws you found the natives effected twenties to disciple Generally analysis, low laws you found the natives effected twenties the origin Generally — that they have about mirrorially elassowed per the form of the contract of

desire a change.

1375. You find, then, the educated natives universally conversant with the debils of the British government in India?—Not universally conversant with the debils of the British government in India?—Not universally conversant either with the regulations or details. but with the unactical effects of the administration.

1570. You have totied that you consider that for the most part they would being a change, will you define most purisularly what you contemplate by the world change?—Any mairie government intends of that of the shiftish; I mont that our rule in leafs is supported, not by the justice and wisdom of our laws, or the low of the poople, but by our military suprementy alone.

1577. Do you consider that they appeared to feel themselves aggrieved by their exclusion from what they would deem a share of the civil administration of the states of the country?—I think a due share in the administration of the country would tend to attach them notes to our government, and ranks thom feel an interest

in it, which they mee do not.

1759. Will you state to the Committee year epission of their enjectify for being 1759. Will you state to the Committee year epission of their enjectify for being 1759. Will you state to the Committee to the Commit

1878. Will you explain what you intended by the observation, that every individual was considered occupit in proportion to his powers, and treated as such?— I uses under the native governments, but this sentiment still obtains with natives,

and has a baneful influence on moral character.

1880. By what means abould you propose to amoliouste any existing moral deficts in the character of the nativer?—By education; more particularly instruction through the means of the English language, and employment in evid administration.

tration.

1381. Do you believe that a general system of education, coupled with opening to the natives all such eits offices as they might become competent to fill, yound have that tendency—I think it would, if you give a man seemaking to loor, he will be cauches how be lesse it. I think their employment should be limited to the judicial and revenue throughout of the service. A great part of the limited to the judicial and revenue throughout of the service. A great part of

the employment of more naives and fewer Europeans.

1888. In those sixuations in which they have field-tierto bean employed, has not their resonantion bear marked by low!—Comidering what has been executably expected of them, and the dapper of respectively of the chaining to their studients, and the chapter of respectively of the chaining to their studients higher situations, I would raise their salaries according on the control state of the chaining to the chaining their salaries according on the chaining their salaries according to the chaining their salaries according to the studients.

1883. You are of opinion that an inadequate amount of compensation necessarily leads to dishonesty?—Undoubtedly in the native character.
1884. You have stated that you consider the furcheduction more generally of the

Rugiish language as a great object, with a view to the better establishment of our nower in India; by what system does it occur to you that it might be more generally ntroduced ?-I would propose, that a proclamation be issued in Calcutta, starting English language. I have not the least doubt that at the end of that period, more than double the number of persons qualified in that language would offer themselves. even Milton and Shakspeare, with much fluency, and explain difficult possesses in those authors. The language now used in the different comts of justice is as foreign to the untives of the country as the English language. I except Beneal in all other provinces the Perrian language is used: it was forced into judicial proceedings by Mahomedan conquerous, and is not understood by any one of the witnesses that are usually examined, and but imperfectly by the native officer who takes down the evidence, and perhaps still more imperfectly by the indre. The language of correspondence between the native courts and the government is also Persian, and three-fourths of the native chiefs with whom this correspondence is kept up, do not understand one word of it; so that they are obliged to keep a moonshee to read the letters that are received, and explain and answer thern; and be carried on in English: for they would only have to keep an English writer or translator instead of a Persian, and it might induce them to make their children study the English language.* At all events the Governor-General and public more or less acquainted with the Persian language; but the language of their courts is Hindostance. They are but very imperiently acquainted with Persian. 1385. Would not the making the acquisition of the English language, after a

1885. Would not use massing the acquisation of the Enginest Engaging, more a certain period, a necessity qualification for office on the part of a native, operate, in your opinion, as a powerful stimulus to the dissemination of the language in India 2—1t would estarro it. 1886. Was not the attempt of the Mahomedan conquerous to introduce Per-

sion unsuccessful?—It succeeded so far, that the proceedings in their courts and the whole of their correspondence was conducted in it. 1887. But in a very imperfect degree?—It was universally adopted by Malso-

medans in all proceedings in their courts; depositions were taken in it, a was the lenguage of correspondence.

1388. But still very signorabily taken down?—Most probably.

1300. Thus what gwelve probability would have be first the English beauges until the mean generally sadeped from the Machinella, which we introduced whether the state of the second norm only then that he longers. They had note of these second form only then that I have been second to the second norm of the third beautiful. The second probability of the s

1392. Are you nequalated of any instance in the whole history of the world of a people adopting a foreign language, or have they not always formed a blended language of their own and that of the conquence ?—I am not at the time proported with any instance of that kind. I know not how far the Romans forced their language upon Spain when they conquered it.

1935. You are aware of the rapid disappearance of the Celtie language in Scotland and in Water 2—Yes. 1934. It the instance you have mentioned at Delhi the only instance in your

knowledge of a volume of sets to part of the natives—The was we continue, the mean of the continue of the continue of the control of the continue of the continue of the control of the continue of the continue of the control of the

the natives of India a disposition to study the English language for the purposes of science or general information, that they would see with pleasure may attempt to cagnaft the Eaglish language upon the institutions of the country !-- In speaking of the natives, we most always distinguish the two great divisions, the Mahomedans and Hindeon; what is applicable to the one is not always applicable to the other. I do not think they have ever contemplated the question in the way stated. I consider that the Mahomedans would not be at any expense or trouble to study or acquire the English language for the take of the sciences, or formy knowledge they would acquire; with them the knowledge of Ambie, in which the Koran is written, is paramount to every thing, and their most learned men are, after all, what would be considered very ignorant in any European country. The whole of their learning consists in alittle knowledge of Euclid, Ptolemy's Astronomy, some mutilated extracts from the writings of Aristotle and Plato, on which is founded their system of othics; but above all, their claracter for learning principally depends on their knowledge of judicial theology, as the whole of their law, both criminal and civil, is taken from the Koran. With regard to the Hindons, there is a marked difference between those who have resided in Calcutta and are inconstant intercourse with Europeans, and those who have not had those advantages or disadvantages. The former show nected with our literature, government and institutions; and a few layer evinced this when there has been no hope of employment or prountary reward of any kind-

motive of attachment to our government, though administered with more justice and attention to feelings and prejudices than nay former government. 1418. Are you then of ominion that no improvements in the European system of government would reconcile the native population to it, unless it were possible to

infuse more spirit into the native population, by throwing the doormach more widely open than it is at present to their arriving at posts of distinction and importance i -I think it is impossible, without some such participation in our government. 1414. Do you think it would be impossible to make such participation compa-

the participation should be confined to the departments I have before mentioned. viz, judicial and revenue; I exclude political or military, 1615. Would judicual or revenue functions be any temptation to the natives of

rank and ambition?-I think they would 1616. Is the indicial character highly esteemed among the Hindoos and Mahomedans?---Very much.

1417. You conceive, then, that the disaffection of the native population to the European government is founded rather on political than religious grounds? -I think so: we have never interfered directly with their relation, though they begin to complain, that if we do not directly interfere, we at least wink at, if not encourage, interference.

ments of many talented natives, Mahomedans, who have spoken to me of the countenance shown by Government to missionaries, and to the excesses to which One of those missionaries mentioned to the mixed population he was addressing, "that they hoped for pardon through the intercession of Mahomet, but that he their belief of his doctrines."

1419. Do you estertain any apprehension that anything like an official introthe natives of some interference with their religion?-I think, with due precaution on the part of the Government, it is not to be feared; the most prejudiced notives are willing and ready to admit that, with the exception of what I have said regarding missionaries, Government have hitherto held their faith with respect to religious toleration, though some doubts may have lately arisen upon

14/20. Do you consider the state of feeling of the Mahomedan population to be such, that it would be disposed to make any demonstration in favour of any other Ruropeen power that might attempt to disturb the British dominion in India?but the vicessitudes in Asiatic empires are so frequent, that the hopes of rising, however fillen the condition of a State may be, is never absent from their minds; and though the Mogul was in confinement when we conquered the Mahrattas, and cruelly treated, having had his eyes put out, yet he could still anticipate with confidence an end to their dominion and his matery. This is not the case under the British government. I do not say that the Mahamatans have relinquished all hopes of expelling us from the country; on the contrary, I believe they would join any European power, even with but a slight prospect of success, in hopes of casting off the certain throlden in which they are now held, for any

1441. Were you ever in that part of India where the French power at one period was very prepandemting, towards the southern part of India?-I have never been in the southern parts of India; but perhaps the French power never was so strong in India as that which existed under Scindials. It was the French nower under Dellit, and extended their conquests to the Sutlege. It was ugainst this power that all Lord Lake's campaigns were directed; and it is a common saying with the

22 March 1682.

that we asined it by conquering him and them. The forts of Agra, Allyghur, Capt, T. Masse. Gwglior, and a vest number of others, were all in the possession of that chief and of artillery over brought into the field against us by any native power; and be

1482. Was not it the system of the French government rather to conform to the character and bubits and mages of the people than to induce them to adopt thelis?-The French in Hindorian consisted of a small set of ambitious but enter-

territory and no subjects. I am speaking now of the Bengul presidenty, not of to their own, and everything connected with the science of war, such as the every other respect, I believe, they scrapulously endeavoured to follow the native

1428. Do you not think that the French are more popular in India than we are, and that they have left a stronger feeling of attachment to them than we have been able to acquire?-Of those parts of India in which the French had establishments, I am ignorant. With regard to the classecter of the Frenchman I have spoken of, they were all officers, and had enormous patronage, great selaries, and could reward to almost any amount; they have therefore left a man has left so high a regutation in India as an Englishman who went out before the most in a ship, from which he run away, and established himself in the west of India at Hissar, conquered a vast extent of country, and ruled it with justice and windom for several years, until he was conquered by General Peron, of Scindials's service. This man's name was Geome Thomas, and the natives to this day speak of him with the most affectionate regard, and the highest admiration. A native's attackment is comerally in proportion to the gratification of his interest.

1494. With regard to the actual state, and feeling, and disposition of the natives in the Begord provinces, where the permanent settlement has been established, do you not conceive that the remindars of that country feel an interest in the continuance of the actual state of things?-I think they do. I think that

in Beneal Proper, we are looked upon, perhaps, more as protectors than conqueroes.

1425. By all classes ?- I should say by the moss of the neonle.

1426. Is it not then your coinion, that by the extension of a similar system through every portion of our dominions in India, the co-operation of the native landowner in our favour might be more generally obtained? - I do not attribute the feeling in Bengal to that cause alone, or chiefly to that cause. That system of permanent settlement was undertaken in ignorance, and founded in injustice. This has been clearly proved since. We gave permanent hereditary property to many who had but a temporary interest in it, and some who had none at all. and many attempts have been made since that settlement to remedy the defects of it a sometimes to relieve the roots from the power of the gemindars, sometimes to give authority to the remindars, to esable them to collect their revenue from the rvots. But such are the evils still connected with that system, that one of the last acts of the late Mr. Harrington, who was a member of council at Calcuttawas a very long Regulation to remedy those that had arisen from that system-This Regulation was not passed into a law, as it was considered generally by the service a remedy worse than the disease. If such a system were adopted in the Conquered and Coded Provinces, it would only be extending injustice, which, unfortunately, in the first settlements made in those provinces was too little guarded against; and I do not believe that anything connected with the perminent settlement would attach the natives more senerally to us, than a settle-

ment of 25 years, or any other period. 1427. You referred to the instance of a migh who, in order to show his gratitode for favours conferred upon him by the British Government, and upon his scal, "The Servant of the King of England;" do you conceive that, with a view to further encouragement of the natives of consideration, it might be desimble to devise means of conferring upon them marks of personal distinction ?- I think it would have a decidedly good effect; such a project. I believe, has been considered ON THE AFFAIRS OF THE EAST INDIA COMPANY.

Governor-General. I think, however, it would have more weight if it came from the King of England. 1468. The dresses of dignity are now conferred, are they not ?-Yes, hono-

may dresses, which give no permanent distinction; they are called kellauts. 1469. Do the natives look upon the British as benefactors to their country in the way of great public works and undertakings, in comparison with our producessors in that country ?- It was the tausting and just remark of Burke, that if we were driven from India there would be no monument or trace in 20 years of our having governed that west empire. I consider the opening of the canal at Delhi to be one of the principal, if not the only public work we have undertaken beneficial to the country. The revenues of the country have not been sufficient to support our great establishments, and to undertake at the same time any of those conensive public works; and in any fature introduction of the natives into the administration, care must be taken to get rid of some of the present expensive establishments. for our revenues are already but barely sufficient to support the present disbursements. Under native governments the aristocracy of the country were notives, who spent their money in it; and whatever they acquired, either by salary, exaction, or corruption, was frequently spent in public works, beneficial to the community, such as digging wells, planting groves of trees, building serays for travellers, opening watercourses, and thus making fertile lands of desorts. That gristocracy has been destroyed by our government, nor will the revenues of the country afford us to replace it in a manner, by the introduction of natives into our civil administration, without getting rid of some part of our expensive European establishments. who never think of spending the money they receive from the country in and for the country. Great public works, of which traces remain, were frequently the acts of private individuals under former governments, sometimes from the vanity

of transmitting a name to posterity, sometimes from religious motives. 1430. From the revenue derived from the soil of India, exceeding 20,000,000, you conceive no portion can, under the existing system of administration of Indian affixirs, be set apart for the improvement of the country in such works as aqueducts, canals of irrigation, great roads, and other essential improvements?---I 1813, when the revenue and commercial accounts were directed to be kept superate, that the revenues of India have never covered the expenses within nearly a million sterling (I may be wrong as to the actual amount, I believe it is between half a million and a million), except in one year, when there was a small surplus; under such circumstances, unless reductions are made somewhere, we have nothing left for great public works of utility; but I must confess that departments) not always connected with public utility. I may isstance the Mint Many of the public offices of Calcutta are also instances of what I mention. The house for the Board of Opium to consult in for a few hours during the day, cost the government 1,80,000 rapees; and these houses have been too often built more with reference to the convenience of some member of the Board, or the secretary, who is to inlinite them, then the official duties to be performed in The system of offices in Calcutta is altogether had. A public functionary gets a large office rent, with which he often hires a dwelling-house, and approprintes perhaps the lower story of it to the office for public business; such a place as his office is confined to in that house might be obtained for one-third of the amount; besides, great inconvenience orises to a person who has to transact business with those offices; he finds them at a distance of a mile or a mile and a half from each other, and he is often handed from one to the other several times before he can get his business done. Now, if the College in Calcutts was abolished, and that long range of building appropriated to public

1431. What is the amount of office rent?-Four or five bundred rupess per

month; but it varies in different offices. 1482. The return from such public works as aqueduets would be enormous,

would it not?---Very great. Some individual did offer to open casule, if permitted the opening of the esnal that flows through that city, are very great, and spoken of

Cant. T. Mercy.

by the people with gratitude. The King of Delhi, upon the occasion of the water coming into that city, went out in column procession to meet it. 1433. Are there not very advantageous works of the kind that might be com-

pleted in the Decean, productive of enormous results, and at a little expense?

1434. Should you not think it desirable that works under such circumstances

of is the Saugur Island Society is the caught assess Society.

1635. Would Europeans be likely to invest their capital in works of that social -I think there is much error upon the subject of European capital in India.

1435. Under the existing law that restricts intercourse with India, is it probable, in your opinion, that any companies would be found to undertake such works?—I think Europeans who have acquired capital to India, might malurake in truth, capital is, I believe, never taken from England to India; it is made

there, and remitted home. 1607. Have we not constructed a great military road through a part of Malwa? There is not such a thing as can be called a great military road in any part of Incia; the best road is that from Calcutta to Cawapoor, called the New Road.

passable in wet weather. I am told it is under the contemplation of the govern-

ment to make a good road of it. 1438. Has not a read been made from Calcutta to Juggermant 1-The read from Calcutta to Justicement was made with money left by a Benjamin, with some little addition from government.

1439. Is there not a great line of read through Malwa, upon which great expense has been incurred in carrying bridges over tonents 1-1 and not aware of such a work; small bridges may be thrown over some of the mountain torrents at the expense of a few thousand supees; but there is not what would be called a good read throughout India, except the road to Barrackwoor, the

1440. Would a read through India be of great service for internal traffic !-Not much; it would be useful for military communication, but for traffic it is

not very necessary, as the Ganges runs through the heart of the country. 1441. Mirks not such a road be useful for post communications?-The post might be sentented a little, but not much. Various propositions have been made to government to carry the post with greater colority. I do not know that any have been considered more feasible than that of emrying it on loot : I

1442. Greet reads are not so necessary for civilization in India as in other countries I No: it is a vast plain, that may be traversed in every direction;

but a road road from Calcutta to Measut would be a great advantage

-I do not think it will tend to any practical good; you may send it up to slow that it can go, but I do not think it will pay the expense. 1446. Is the stream so rapid !-The stream is rapid, and it is filled with sands

which vary their position every year. The depth of carrout is where the stream is most rapid. A steam vessel in going up is obligsed to keep in the deepest part of the stream, where there is most obstruction, when a country bout with a tattered sail will run is shore, take advantage of a back current or a nullah where the water is still, and pass a steam vessel struggling and buffeting with a current running at seven or eight knots an hour in the centre of the Gauges.

1445. The principal obstacle, in your opinion, to steam navigation on the Ganges is the draught of water of the steam-boats I-The machinery of the steam vessel and the coals sink her in the water to such a degree that she can carry no great weight afterwards for useful traffic. If any improvement should take place in

such a large quantity of coals, there is no saying what may be done. If you will

ON THE AFFAIRS OF THE EAST INDIA COMPANY. (4) construct a bost that will only draw two feet of water, she could go up the river

constructs a room until will only draw two feet of water, she could go up the river better than any country vessel.

1446. An idea has been broached that great additional security would result to our Eastern empire from the extension of our frontier to the Indox is that a

1447. What is the result of your opinion?-- I have heard many military men say that the Indos was our natural boundary in India; but it has been proved by late and former wars, that a river like the Indus is little or no electroction to a well organized invading army, and if we are to have a defensible boundary on that side, we should do more than stop at the Indus, we should push our posts into upon which latter river our frontier posts are now stationed) would be highly upon which latter river our monuter posts are now statistics; we use ungary impolitic and unjust. We already possess more territory than we seem emphic of governing well. The chief of that state has been on anicable terms with an since the treaty made with him in 1808; the cause of that treaty was an attempt on his part to conquer the Seik chiefs east of the Sutlege, and the purpost of it (which has been faithfully observed by both parties times that period) was, that he should not interfere east of that river, nor we to the west of it. The coasequence has been, that he has gradually extended his conquests over the whole of and fertile a his army numerous and efficient, porhaps the best native army in Afghans, one of the bravest, most bigoted, and fanatical of all the Mahomedan tribes. Now, it is well known that the Seiks are neither Mahomedans nor Hindoos, but admit converts of both, though their religion has infinitely more of the Hindon in it than the Mahomedan; they are therefore a nowerful limited between us and those function tribes, with whom if we were to some in collision. it would unquestionably have a dangerous influence on the religious prejudices

1448. To revert to a topic you touched upon some time since, namely, the administration of public affeirs in Calcutta. The Committee has been informed that Though I have never been officially admitted into the arcans of the civil administration, yet the obstruction to public business, arising from the constitution of the Boards and unnecessory details, is such, that he who runs may see it. I consider Boards to have been more or less efficient in exact proportion as the business has been conducted by one individual of the Board, or a spergary. I have ever considered them clogs on public business. I have no memorandum by me to show when the various Boards connected with the revenue were established, but as well as I can recollect they are of very modern date. They would have been useful if they had relieved the government from any details, but they soem to have been ledge, first for their own information, and afterwards to lay before council in the minutest detail. They might have been further useful had they been sufficiently consulted as to the macrical effects of certain Regulations made by the government. or alterations in old Regulations, but this has not shown been the case; and even when they have been consulted, sofficient attention has selden been paid to the opinions of men who in reperal have great local and practical experience. I do not say this from personal knowledge; but there is scarcely a Bosrd, the members the Sudder Adawlot in Calcutta. The details of all judicial business should have, might have been more valuably employed. Is has been a matter of surprise to had been considered a very important functionary until lately, when I have it is discovered that his duties, and those of the secretary in the Nevenue Department, can be well conducted by one individual; and from my personal knowledge of that individual's talents. I have not the slightest doubt but the duties will be as well

PUBLIC.

conducted as when friends. Bettern of the greater better critical to be better the content of th

1440. As fir as you have observed, is the course pursued in this department one calculated to abridge and condense the public business, or nither to create public husiness b—A decided tendency to create public business.
1450. Does the constitution of the local government in Calcutta, as composed

of the Governor-General and three Councillors, appear to you the best calculated government as it is at present constituted has some defects no one can deny; but that it is fully equal to legislate for the saffee population of India cannot, I think he questioned. It seems deficient in power to legislate for Europeans settling in India, and it is much hampered by the undefined powers of the Supreme Court, with which it is likely to come, and sometimes has come, in disagreeable collision. The Act of Parliament for the establishment of the Supreme Court secres not to lasse defined the power and jurisdiction of that Court so exactly as not to admit of doubt; and the Court have taken advantage of this obscurity or doubt, (to which most people think it was intended to confine it), but throughout our small debt (which he offered at the time he was arrested to discharge, and of the existence of which be was not aware till be was arrested); and if the interference of the magistrate of the district, which I believe was considered by the Supreme dragged 600 miles to Calcutta, and taken into a court, which sooner than lave appeared in, he would have sacrificed not only his property but probably his life. Against this undefined power of the Supreme Court, some protection should be General at present can act even against the opinion of his councillors on his own responsibility, and Ponnider this power absolutely necessary to preserve our consire in the East. I conceive that powers should be granted to the present government to legislate for Buropenns likely to become resident in the country (they are now amenable to the Mofussil courts in a certain degree), and I see less objection to granting such power to the present government than to any other mode I have yet heard proposed for remedying this defect. As for the extension of the power of the Supreme Court over the Mofissil, I consider it the greatest calamity that could betal India. I speak, I believe, the universal sentiments of the nutives out of as the greatest misfortune and calamity. The natives who are connected with the there are gangs who live by perjury, and by threatening prosecutions in that court; and the nativeshave frequently told me that those perjurerance in the habit of going to men of respectability and rank (who would sacrifles half their property or even their lives rather thango into the court), and threatening that unless they will give them money, they are prepared to bring some accusation against them that will compel them to attend the summons of the court; and such is the detail of its power, and the diagrace of being dragged into it, that men of wealth are contious how they will come and sleep in Calcutta. I may here relate an amordote of two

natives of wealth who had some family feud; the object of one was always to get the other into Calcutta to make him amenable to the Court. He succeeded, under a pretence of reconciliation, and having kept him up at Calcutta most part what truth, that the Rajah of Burdwao, who is a man of immease wealth, pays a certain sum annually to a lawyer to keep him clear of the Suprama Court, and Nagahanee, which means an "unexpected calamity."

Veseris, 23° die Mortii, 1852.

SIR JAMES MACDONALD, BART., IN THE CRAIR.

Captain Turner Mann, called in; and further Examined.

1451. YOU have meeticood, that from your observation the native independent Capt. T. Mossa

rulers under the Bengal presidency, whether Hindoos or Mahomedans, still recret the overthrow of the Mahomeden supremacy in India, and that they prefer that 55 March 1882. dominion to ours. Can you state the reasons of that preference?-I am of opinion that both the princes and their subjects are averse to our dominion; the former from a perfect hopelessness of emancipating themselves from our supremacy, or of extending their possessions or consequence by conquest or by intrigue, sod from disgust at our interference with their internal policy. Scarcely anything has produced so much ill-will to our government, in the minds of the native princes, as this interference in the internal administration of their country and domestic affairs. We have had no fixed political principles by which our intercourse with native states has been guided. In some cases we have interfered most materially in almost every branch of their administration, as in the case of Lucknow, while on the other hood, we have sometimes avoided even what might be considered a judicious control. With reference to their subjects, their dislike has arisen from other causes. The cleacks to despotic power are two: first the influence of religion, and second, the fear of rebellion. The dread of the latter his considerably checked and modified the despotisms of Asiatic monarchs; but as long as our interference with the internal government of the independent states continues, the subjects are prevented from showing their dislike to their rulers, or checking their despotic authority, by the knowledge or fear that the instance of the thraldom in which the subjects are held under the government of the native princes, from the dread of British power and coercion, I would particularly mention the state of Rampore and Lucknow. I have heard natives. who have lived under the government of Rampore, frequently declare that were it not for the fear of British power they would not allow their ruler to sit upon the musual for \$4 hours. The difficulties and embarrassmeots that the British Government in India have brought upon themselves by their mischievous interference in the internal policy of the independent states, has been fully exemplified since the conclusion of the Pindarree war, by the disturbed state of Rajhwarra; our have the government, I believe, been yet enabled to extricate themselves from the embarrassing situation to which political agents, acting on undefined principles, have placed them with those states by such interference. If intertrence should be considered absolutely necessary, (which I cannot admit except as regards external policy), then it should be upon principles of justice as well

to the chiefs as to the subjects; and if the power of the former is protected against the rebellion of the latter, then the latter should be sheltered from the oppression of the former. But I am decidedly of opinion, that all interference with the internal policy of independent native governments is impolitic and unjust, and the cause of beinging the British name into more colum with those states, and the notives in general, than anything I am acqueinted with. I may here men-

tion a third cause of the dislike of native princes to our government in India, which is the knowledge of its annihilating efficiency. An Asiatle has no idea of quiescent power; where it exists he expects aggression, and although it is generally supposed that our conquests in India have been conquests of aggression, it will be found on examination that this is without foundation; that they have

(445.-T.)

Cupt. T. Mason,

more frequently, indeed invariably, been made in wars commencing on the defereive. Now, if it be asked, why native powers, conscious of their own weakness, have provoked us to war by agreements, my reply it, that knowing we had the gower, they expected and authorisated our using it to their annihilation, and

in gover, they expected and intendented our using it to their annihilation, and they stroke, integrating an expected blow.

16-20. You have streed these feelings to be, in your opinion, common alifes to the Hinde and Mahomedann, how are their interests intentified in this respect.—The Hindeo population of India were not entirely excluded by the Mahomedarn rules from a participation in the offices and enterturest of govern-

Mahamudan rulers from a participation in the offices load enformments of government, as they have breen by the British. Many of the Hindoo miters were tolerated and supported by Mahamudan emperors, partly from fear of their united power, and partly from other motives. 1608. Do you apply these observations exclusively to the provinces under

1668. Do you apply these observations exclusively to the provinces under the Bengal presidency?—I know not what application they may have to the other provinces. 1454. You have stated, that in your opinion the local legislative government in

India, with some modification and extension of power, is efficient; will you state more fully your coision with respect to an efficient legislative body, and what modifications and changes you would propose in the existing power?-I believe in will be generally admitted, that India must be governed in India; and with regard object is to legislate for the mass of the scoople, that is the 80 millions of native population according to what is considered by them as affording the greatest sequrity to their property and persons, the greatest quantum of instice at the cheapest rate, the most perfect toleration of their prejudices and religion, and the greatest security against the introduction of foreign laws founded on foreign intercourse, Now, I think that legislative body is most efficient which has the greatest opportunities of knowing the character and wishes of the people, and who will frame their have on that knowledge, and not on abstract principles of theoretical government, nor sacrifice the interests of the 80 millions to the advantage or wishes of 400 foreigners who may now reside in the interior, or 4,000 who may be supposed likely to reside there on the abolition of the present law. With regard to the present legislative administration in India, I would suggest that they should be relieved from all unnecessary details connected with the executive sovernment, perlups from all details connected with it. I would suggest that an officient Board of Trade might be established in Calcutta, to correspond direct with the authorities in England, and that the basiness of the Company as a trading hedy, if they are to continue so, should be entirely conducted by this Beard. If the present logislative government are relieved from the details connected with the local administration, I would suggest a Deputy-governor or Lieutement-gover-Lieutenant-governor might be sufficient at each of them. But in order to aid framed by this body should not be histily made or adopted, but after full discussion and commitation and discretionary reference to all persons, whether natives or Europeans, whom they may consider capable of throwing light upon the subthe Governor lisving always a casting vote. But in all questions involving the security of the state, a supreme power should exist in the Governor, to not upon his own responsibility, even in opposition to his council. I consider this pre-

suggiore to les habitority necessory for the native of ear fundam complex.

Med. No ruit has transport has en beneated these distinct propositions; the arbitority of the native of the

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 160

I am not aware of any material objections to the present constitution of the governments of those expants prosidencies further than that it leads to an additional expense, and that it prevents an uniformity of system in the administration, which is much to be desired.

expense, and thus a prevents an uniformity of system in the administration, which is much to be desired.

1466. Have you over calculated what proportion of the expense could be saved by the substitution of a limitement-governor or governor in council at each of the presidencies, supposing always that much limitement-governor much is much emissional council and the proposing always that much limitement-governor much is much emissional council and the proposing always that much limitement proposing always the much limitement proposing always that much limitement proposing always and the proposing always are always and always are always and always are always are always are always are always and always are always are

1470. On a general view of the amount of the civil expenditure in India. has anything suggested itself to your mind that would tend to its diminution?-First, focuntion of a legislative and revenue code, simple and well defined, which would enable more extended power to be given to individuals, and to dispense with uncleas appeals, which generally retard justice, multiply details, and increase expense. Thirdly, an economy is all public buildings, in which there has been a wasteful uscless military buildings, such as runges of Assyrian-roofed stables built at with the civil and military administration, in which a profuse and wasteful expenditure of public money has taken place. Though of minor importance, I think ounsiderable reductions may take place in all public offices. The sum may be mail in each, but in the aggregate it would amount to a good deal. I give as an instance what I have been mentioned, and have since verified, that some years lack, when One clerk presented a bill for coming early before official hours; another for remaining late after official hours. The secretary inquired what were the official hours, and told the clerks he required no more of them than their duty, and that he would not receive any bills for extra official writing. This slone produced a saving in that one office, as well as I can recollect, of 20,000 supren in the year; office in Calcutta. If the establishments in those recretaries' offices be compared now with what they were some years ago, when the business was equally well performed, it would be found that they have increased twofold. Take, for example, the military secretary's office to government: when that office was held

by Mr. Gardiner, and I believe by the late Mr. Adam, if I recollect right, there was seither deputy nor assistant; now there are both, besides a considerably interessed establishment of clerks. I have already in my previous evidence (4666-46-16), deputs, do by the University Scientific Foundation of the Control of the C

PUBLIO. Captrin T. Macas 22 March 1832.

touched upon the expediency of an abolition of the Bonnis. This also would be a considerable suring to provenence. I can not at this moment prepared to mention any other sources of saving, except what may arise from the comployment of mixes in our administration, and the consequent reduction of Kinepoens, and I bolives that the greened information of the control o

1497. Is there snything in the general character of the law to be administered in the provincial courts, which, in your opinion, would be likely to deter an Nothing whatever, except his own ignorance of its nature. The law as admiende. A general belief, however, exists, that it is that law unanodified which is administered; and prejudice, no doubt, operates on the part of Europeans against it, but I concerve that, when they become nequainted with its actual nature, such projustice will cease. The craminal law administered by our courts is infinitely more mild than the law of England. No punishment of death caspes, except in cases of express murder a and even in crimes of that description the sentones is occasionally medified to transportation, or conferencent for life. I keepen myself to know the case of an European soldier, who in the open day shot a native boy within a few yards of him. That man, if tried at Madras, modified, and authority given to them to try all Europeans in the King's service, whether British-born subsects or not; but in consequence of their having un jurisdiction over that person, he was tried by one of our provincial courts, and condemned. There were no chromostomes of pulliation in the offence: but on account of the extreme contrition expressed by the prisoner subsequently to it,

Britain and India, it might be found necessary to adhere to a sytem of passports. propose that passports should be rempiete?-The only use of passports would be to control the employment of foreigners in the service of the native states. Without them, foreigners might find easy access from the foreign settlements into those states; and as natives are perfectly ignorant of the nation of the European, and consider all white faces slike, the object of a passport would be to distinguish Britous from those of a foreign nation, and to prevent the latter passing through the country without permission from the local soveraments; but the restriction is not one to which European settlers alone are subject. All

gentlemen in our own service gladly county with so simple a restriction; and I have known a young man in college who declined to do so, arrested, and carried 1500. Are passports now requisite for travellers in India?-Throughout the Madess presidency. In Bengal, less attention is paid to that arrangement, for

1501. What officers are appointed in India to see that travellers have passports?-It is the duty of every notive police-officer who sees an European

welling, to demand his passport. 1502. Are you of opinion that this restriction is not considered vexations?-I cannot undertake to say that it has not been considered vexagious by many persons ignorant of the object for which it is established; on the contrary, I

helieve that one person in particular, Mr. Peter Gordon, has strengly objected 1503. In the view of making the system of passports entirely subservient to distinguish between British subjects and a foreigner, might not the passport of the British subject be considered as his right, eather than as a matter of favour?-

Passports are never matter of favour; they are issped to all British subjects having leave to revide in India, and also to foreigners; and the object of them is 1504. Then the fact is, that though the object is to affect only foreigners, it affects Englishmen also?-It does

1505. Are you aware of any instances having occurred of a passport having been withdrawn from a British subject?-A prosport cannot be withdrawn, but

the issue of it may be refused. Once given, it justifies the bearer travelling from a point nominated to another point nominated, and nothing can obstruct him, as 1506. Are they normanent or temporary?-They are granted on each occa-

no official situation. 1507. Supposing you wanted to change your line of route for any reason, what

must you do?-The passport denotes the place from which you move, and that

1508. Can passports be obtained in other places besides the presidencies?-

Britain and India, to reserve, either to the Governor-general or the local governor of a presidency, the power of deporture an individual settled in India, at his pleasure, and without trial?-I think such authority very objectionable; at the same time. I conceive it absolutely necessary for the maintenance of our power in India, that restrictions should be placed over nersons dangerous to the state. I would not, however, place greater restrictions over Europeans than over natives. The native under a warrant issued by the government without trial; and, in a case in which, by the murder of his wife, he excluded himself from succeeding to the

times of the state?—We the regard to the pollutaria one from Regard at M yellow developed the state of the s

some small cone; or the other hand, should access to you that there is not, and when, objection on the later score, manife, on the small ground, as a young man destined to yass the greater part of this life in leafles, remaining in England, and forming in Indigated the hallow of England in life-I certainly bits that young men saying in this country till the age of its might form habits and views that would attach them more serroughy to England that they are liable to order the existing system. I can easily imagine that they are liable to order the existing system. I can easily imagine that they are liable and extra orders which I think they are note rive from marter they present made extrangence, while I think they are now from from mader they present made.

1525. Do you mean to may, that you conceive that the class of young men from whom multiply the writers are asclected in this country, would be more likely to contract habits of expense and extravagence between the ago of 18 and we at home, than that you would be in India 3—1 think that they would so that we the same means in India that they have at home; because it getters, whom you would not be a sufficient to the property of the country of the countr

who, I believe, takes cognizance of his conduct.

1524. Do you mean to state this to be the practice in India of your own knowledge 2—I believe it is so at presents but if I am wrong in this supposition,

you have only to place Calcutta and London in opposition to each other as to the means which they affect of indulging extravagance, and if the young men

were consequently to remain at Calcutta, I should say they were as liable to Poor Ander, Esp. lights of extravogance and expense there as they would be bere-1005. And you not aware that the young men have been in the habit of nati-

the young men at Calcults has presented moves of extravagance, which the

should suppose they might be likely to form habits and views that would attach I have no doubt that almost every servant who goes out does so with the hope the latter age they are less disposed to view India, as it ought to be considered

1527. It has been suggested that it would be an improvement upon the present system, though not the best system that could be adopted, if, the whole of the cution of the existing system?-It appears to me that it would be a total deporture from the principles at pursent hid down by the Legislature for conducting the two tended that it is desirable that young men should remain till the age of 22, to acquire a better education to fit them for civil duties in India, you would necessorily obline all parties to remain to the same age; and I think it will be admitted that 92 would be generally thought too advanced a period for young men to enter into the military service. I think also that the course of education which is now pursued by eadets in very dissimilar from that which is followed by those intended which individuals in the military service have been selected to fill high and unportant civil situations in India, more expecially in the early pert of the Commune's government, when newly acquired possessions were comparatively in an insectled state. They are now ulso chosen; but the oninion of Marunis Wellesley, who when Governor-general had selected military men, was averse to the employment of them in civil situations as a principle. His Lordship recorded a Minute, in July 1799, wherein he stated, "Although I acknowledge with grout satisfaction the eminent services of Lieutenaut-Colonel Rende and other military officers in the administration of the revenue, my opinion is decidedly averse to the systematic employment of military collectors and assistants, and I accordingly recommend that all appointments of this nature stude by the commander-inchief, under the immediate exigency of the case, be rovoked. In the room of military assistants, I propose that gentlemes from the civil service to invasinity chosen for these situations." In this the Court of Directors fully computed. There is another objection that occurs to me, which I may take the liberty of stating. If the principle were to prevail of selecting from the military for the civil stations, the government would necessarily make choice of the best military services, and thus would leave the Indian army comparatively divested of the and in command are so essential to the maintenance of that good understanding

so important between the European officers and the native troops. 1528. You consider then, that under the plan suggested, the army would be left without the higher talents which are now, intermixed with it; those higher talents being taken prominently into the civil service as the higher in point of emolument and general consideration?-My mower of course has reference to the supposition that all are to be chosen from the military service, and if so,

1529. If the command of corps were made equal to those higher givil situations, do not you think that the military men would be as discound, or probably more disposed, to retain their command of curps than to go to civil situations?—If

that is decidedly my opinion

it is simply taken in a pecuniary point of view, then an a pecusiary indexenced is personate licy would, but I thuit it would be a very material frescores of expense, and it is to be also excepted with the recollection that they are to remain it is the concern full these goal of its modern that they may have the ferentful first deviation which it is proposed to give normal for civil offices. It would likewise the a note of the contract of the

1680. Do you think the system established at Haileybury is the best upon the service in India ?-I know that strong testimonies have been borne to the cooto the Indian service a set of young men well qualified in every soint of view to perform the important daties which devolve upon them. When in 1886 a motion was made in the Court of Proprietors for the abolition of the College, Mr. Robert Grant observed: "I find, generally speaking, that the most important peets seem to have been filled in India by those who have been the most distinguished for proficiency at Haileybury." He added: "Of five or six civil socretaries at Calcutta, three, Messes, Mackenzie, Pringen, and Stirling ware distinguished pringmen for proficiency at Haileybury. Of four secretaries at Madau, and four at Mr. Farish, had just been promoted from the some situation at Bombay." With reference to its being considered the best means of educating young men for India, I by no means take upon myself to give any such opinion, for I believe it would be equally possible to get men as well conlined elsewhere always provided a proper and sufficient test is established by which the qualifications of the individuals are to be decided a for I consider the service in India deserves to have the very best educated men it can obtain.

1531. It has been suggrested, that in consequence of the nature of the appointment of the young men at Hailerbory, they are apt to prisume too much upon their interest, and emissider themselves too free from restraint. From your official connection with the East India Company, have you any reason to conceive that this has practically operated to the dwadvantage of the College and of the service, or can you state to the Committee any grounds upon which you doubt the accuracy of such suggestion?-I can scarcely believe it probable that my young man would rest upon the interest he might have with an individual Director to sceme him from the results of misconduct, even at the College, and certainly not in India. With regard to the College, the Court of Directors divested themselves of the power of interfering in any way with the proceedings of the College Council, olther as to punishment, rustication, or removal of students from thence. With ference on the part of the Court of Directors, or any Individual Director, in the to rely upon any interest he lud here, so fix as the Court of Directors were concorned, because every event that takes place in India having reference to the conduct of a civil servant there comes under the cognizance of the Board of · Commissioners, and this fact prescrits one of the many points wherein the check of the Board forms so essential a part in the present system.

times as much?—It does.

1039. It has been suggested, with a view to a unity of action in the administration of the British power in the East, that one Supreme Governor should be extensive, that I think one Supreme Governor would hardly be able to perform the fications, may be fitted to embrace a larger rule than another; but looking at what has taken place, especially during the Ava war, when Sir Thanna Muuru was requested to remain at Mailins during these operations, and also of the procurdings to the situation in which the government of Bombay was placed at the connatencement of the last Melicatia war, I think that it is most exceptial for the welfare and interest of India to retain the provergements as they are at present constituted. I can however readily imagine that it might be expedient to give to the Governorgreened growter latitude for the exercise of the nowers of government than he at areason possesses; and I can conceive no objection to his being entrowered to act in any may tel India, that is, in Bengal, Madras, or Bumbay; and that when he may be st other of the other presidencies he should take the chair in council, having, as he would then possess, the sid and advice of those who would necessarily be conversant with the affines of the presidency, and whose opinions the Governorrestoral might or might not follow, as he should judge best for the interests of India: exercising also the power, when at those presidencies, of acting contrary to the coision of the whole council, if he should see fit, recording, as he is now called usen to do, his reasons for the course of policy that he might adopt; which reasons would necessarily be sent home, and be indized of by the authorities in England.

The number of these since 1798 have searcely amounted to 150 for Bengal. The next point is the Regulations for the good government of the interior; these are passed by the Governor-general in Council, under the 21 Geo. 3, and subsequent Aces. I may perforp refer to a remark of the Marquis Welleday, when stating the grounds upon which he proposed the establishment of the Calcutta College. His Lord-bly premaked:

"The pleadings in the several courts, and all important judicial transactions are conducted in the native languages. The law which the Company's judges are bound 1.2 to 1

bound to administer is not the low of England, but that law to which the natives codingry indicial and executive functions of the judges, maristrates, and collectors the judges, manistrates, and collectors occasionally act in the capacity of governors of their respective districts, comploying the military, and exercising other extensive nowers, they are likewise required from time to time to propose to the government such amendments of the existing lows, or such new laws as may appear to them to be necessary to the welfare and good government of their respective districts.

constitute a species of subordinate legislative council to the government, and also a channel by which the government ought to be enabled at all times to ascertain the wants and wishes of the people, Thus in a measure corroborating what had been stated in ourosition to the formation in India of a legislative assembly, immediately preceding the Act of 1781 (for the idea is not a new one), viz. that Parliament was not called on to emact new laws for a new colony, but only to grant more extensive Regulations for a people who had long a constitution of their owo. The only rotat is acce-

sideration, before the Regulations are passed. The question then appears to be, how can the best consideration be ensured

upon every proposition for the enectment of a new Regulation. The Governor-general does not think that at the present moment India presents the means for forming a legislative council, and proposes that the Supre-

Government and the Supreme Court shall be the materials.

A gentleman, to whose opinions on India matters much weight is attached. thinks such a council ought to be composed of a large number, comprising not only the Supreme Government and the Supreme Court, but some civil servants and some natives, and also the lientenint-governor (supposing the change made) the members not being able to meet, that they should interchange their ideas in writing. It is difficult to imagine that such a proposal could have been seriously intended, more especially as promptitude is one of the arguments arged for the establishment of a legislative council; whereas a proposed law might originate in Calcutts, and have to travel from thence to Simlah, and then to Madras and Bombay, and find its way back to Calcutta before it passed into a law. Moreover, Governor-general would not, as it appears to me, be relieved from the duty of considering the propriety of the proposed law, for he is to have the veto, and surely he could not be expected to give it until he had full considered the subject. The time will no doubt arrive when India will be in a situation to levidate for

and in so doing to be guided by those principles which are recorded at the commencement of the Regulations formed into a code in 1793.

By defining the powers of the Supreme Court, which I presume to think ought to be maintained under whatever changes may be made, in consideration of the number of British subjects under the denomination of East Indians, now little short of 30,000, and which must increase; added to whom will be the British subjects who may proceed under a less restricted intercourse with India; by opinion of the Supreme Court, who, if no legal objection exists, after a certain the advocate-general, or any other functionary at the presidency, such as the terrilegislating for India, in the enlarged acceptation of the torus, would still be preserved to the British Parliament, and a further infringement of the principle of

So it is with regard to every other civil servant in the establishment; and if it would not be troubling the Committee too much, I will take the liberty of reading a letter, which has particular reference to the course now observed with regard to the natronaire in India, and the scrutiny which is exercised by the authorities here, or rather the knowledge which they possess of the course pursued by the government abroad. It is an extract of a letter from the Chairman and Deputy of the Court of Directors to Lord Ellenborough, dated in November 1889; "The Legislature has placed the local governments in subordination to the government at home, and it has exacted from them obsdience to the orders issued by the constituted authorities in this country. The Legislature has provided, that all the Company's servants in India, civil and military, under the rank of Governor-General and Governor, shall, in the first instance, receive their appointments from the Court of Directors; that the members of council shall, excepting in particular cases, be nominated by the Court, and that the Governor-general and Governors shall likewise be appointed by the Court, with the approbation of the King. The Legislature has empowered the Court of Directors to recall the Governor-General and other Governors, and to remove from office, or dismiss from their service, may of their servants, civil or military; and as a security against excessive lenity or undue indulgence on the part of the Court, it has conferred upon the Crown the power, under His Majesty's sign manual, countersigned by the President of the Board of Commissioners, of vacating appointments and commissions, and of recalling any of the Company's servants, civil or military, from the Governor-Peter Ander, Esq. general downward. By these provisions, the fortune of every servant of the 29 Much 1852. Communy in India is made dependent on the home nuthorities; and as long as the powers with which the latter are thus entrusted continue to be properly and sensonably exercised, there appears to us to be little ground for apprehension that the Indian functionaries will forget that they are accountable agents, and still less that this forgetfulness will be generated by so inadequate a cause as an occasional delay here, not in issuing necessary instructions, nor in replying to special references, but in reviewing their post proceedings.

"The Legislature having thus provided sufficient securities against the independence and irresponsibility of the governments in India, has, with a just appreciation between the two countries, not only left to the governments there the distrithe power of suspending from the service such individuals as may be guilty of general, individually and temporarily, some of the most important rights of sovereignty, such as declaring war, amking peace and concluding treaties with foreign states; and whilst it has enacted, that the wilful disobeving, or the wilfully omitting, for bearing or neglecting to execute the orders of the Court of Directors by the local functionaries, shall be deemed a misdementor at law, and made it punishable as such, the enactment is qualified with the exception of cases of necessity, the burthen of the proof of which necessity lies on the party so disobeying, &c.

" Nor do the powers thus conferred (large as they are) exceed the exigencies of the case. It would be superfluous in addressing your Lordship to enlarge on the magnitude of the trust reposed in the local governments, and the difficulties with which it is encompassed, difficulties so many and so great, as to be almost insuperable, the grant of a liberal confidence in those to whom power is delegated. The indiof mature experience, who have distinguished themselves in the several gradations of the service. At the head of the two subordinate governments are generally services in India, or persons and from this country, who, without exactly the same recommendations, are on other expends supposed to possess canal qualifications. the gross amount, compassing almost every branch of the establishment; I do 1561. What proportion of that expenditure should you say was incurred by

the Company in their commercial capacity?-I think I stated, that about 78,000k of the 350,000L or 350,000L was political, but I am not quite certain as to the exact sum.

1562. Of the mass of public business now transacted at the East India House, what proportion should you say might be attributed to the mercantile transactions

is a very considerable part) is to be taken in. Alexander Duncan Compbell, Esq., called in; and further Examined. 1.969. WILL you state to the Committee what appear to you to be the defects in the existing system for the education of the civil servants of the Indian governwith young men of their own age likely to be employed in public situations in the at the same establishment at a very early age, their relative capacity for public emfor the highest situations in England, and should further embrace instruction in the Indian tenures and Indian codes, as well as in the general principles of the civil or Roman law. A knowledge of the native languages can easily be acquired in eigenmatagues which gootar to me to depress the civil service generally in India; the Marquis Wellesley; also to their relative rank with their brothren in the meny, situations, from those honorary distinctions which have been extended to their fellow-servants in the Military department. Formerly, the highest grade in the Indian army was that of colonel; and the present relative rank of the civil service with the army was settled at that period. The higher grades in the army have since been opened to the military, without any corresponding alteration in the rank of the civil service; and whilst the civil service rise, after 12 years, to a rank corresponding with that of lieutenant-colonel, all further advancement ceases. Such advancement may possibly commence too soon, but it should not stop altogether, especially at that period when the members of the civil service rise to the highest employments in the state. I allude to these points, as depressing that exprit de corps which it is descrable to cherish in all branches of the service. The want of union, also, in the civil service at the three presidencies, appears to general chiefly to one presidency, and as depriving each presidency of those advantages which a reciprocal communication of improvements, by an interchange of public officers from one to the other, would obviously confer and the whole. I would also add, that if the natives are to be more extensively employed in details, it is of the greater importance that the Europeans to be employed in superintendence and control should be the error of British talent. selected by competition, not average talent only, as under the present system,

1564. Are there any defects in the existing system at Madras more verticularly to which you would direct the attention of the Committee?---When the Committee of Public Instruction at Madras was joined with the College Board, at my suggestion, by Sir Thomas Munro, I delivered to him a paper, strongly recommending

that the justice review or Marlers school be stratched to the various offices, a fine barriery in the predictory. The suggestions was one of Acadepted by him; and I consider it highly desirable that the junior civil servants between about he removed from the memorpois immediating on other around. In the Committee deliver in:

Committee deliver in:

[The Within the blower of the sense, Vide Appendix.]

1565. Do you know what prevented Sir Thomas Munro from acting on the suggestions contained in this paper ?- I am not aware. I soon afterwards left the presidency; but my impression from personal communication with Sir Thomas, was, that he was highly favourable to the suggestion. He acted upon that part of it which proposed the union of the two Boards; and I conclude that it was only the multiplicity of other business which prevented his adopting the remaining part of the plan auggrested, for he personally expressed himself in favour of it to me I may perhaps explain, with reference in the system paraued at Madras for the innior civil servants, that it is very different from that pursued in Beneal. 'The allowances of the young men depend entirely upon their proficiency in the native languages. They are fixed, on first entering college, at about 240% per annum. and are raised, on the acquisition of a sufficient knowledge to transact business in one language without the aid of an interpreter, to about \$30L and when the student acquires a similar knowledge of a second language, to about 460% per The students have never been congregated together in one building as in Bengal, the college being merely a hall in which they are examined, and in which the natives are instructed, who are connected either with the education of the junior The consequence has been, that at Madras we have had very rare been entirely free from debt. On quitting the college, those few who bave been involved in debt have left it owing sums generally less than 400L or 500L. There have been one or two instances, in a long period of years, in which particular pleasure of the government; and a feeling pervades the service of Madras, that such extravagance nearly operates to proclude promotion to any high situation in the service.

1566. From your experience in India, in what respect does it appear to you that either the executive or legislative powers of the government in India require or are susceptible of practical improvement?-The great evil which appears to me to pervade our Government in India is one partially felt at home also, from the very nature of our Indian administration. I mean the evil arising from disunion of authority, and the operation of conflicting principles in the different branches of the public service. The officers of the same state, we cossuit divided into separate departments, instead of being subjected to the control or review of successive heads, placed in due subordination to each other, and therefore enforcing uniform principles, emanating from a common central superior, directing the whole, find themselves under distinct authorities, in a great degree independent of each other, consequently acting on separate, and often conflicting principles, which necessarily bring their subordiin India is, under such a system, liable to draw their independent superiors into long discussions, involving the general principles, which each respectively has long adopted, without any common consent, for the regulation of its own department, and to which each adheres with the tenacity of halfst. To this cause may be traced not only the well known differences between the local governments and the King's courts in India; but also meet of the voluminous discussions between the officers of the three presidencies, and between the officers of the same presi-India to be reproached for a vice inseparable, I fear, from the present system of the Government itself. The great object, in my opinion, therefore should be to give to Europeen control the vigour and strength of unity in the executive ments of the state; otherwise, I conceive that the old Indian system, by which of controlling officers in the same, but not in any conflicting, distinct or independent department, would be far the best system in India for the executive

A. D. Campbell, Esq.

districts under them again, confining themselves to the department of supervision of secretaries attached to each of the high controlling authorities at the different presidencies; and if they were permitted to not as councillors to the local liepat home, where they might differ in opinion upon any subject of importance, confficting discussions would cosse, the subordination would be enforced, and a vigore would be infused into our government, by consolidating power, highly beneficial to our interests in India. Besides, whole volumes of correspondence, assing from differences of opinion amongst the subordinate Bourds and their local officers in antbority in India, one great defect is the existence of different local codes in the provinces under each of the three presidencies. The enactments of the local governments are also acattered in so unconnected a shape as to render it difficult for any individual to make himself at once master of the whole referring to any single subject. I speak the more confidently from having been engaged in pub-At present our law in India, especially our revenue code, savours too much of the technicalities of English law, and is ill adapted to the feelings of the people; our enactments are also in general drawn up by persons around the government who have little personal information respecting the real grievances of the people in the provinces. Any new system, therefore, for the formation of a legislature, should include as its chief object the selection of such individuals, not only Euronems but natives, as would be most likely to give the government a clear insight into the grievances of which the inhabitants complain. This, I think, might be done by allowing the local governments to select both natives and Europeans to furnish their opinions, in writing, on the laws, and to suggest such new laws as they may consider expedient. I say in writing, because I would include at numerous a body of the local functionaries, as well as others, that it might be impossible, without putting a stop to the details of civil government, to congregate the whole together at one place. Independently of these local mumbers, other the Governor-general, in whom the legislative authority should centre; and such European officers might act with great benefit, both as a legislative council and as secretaries of state, moving about with the Governor-general from one mesidency or station to another, as might be expedient, and discussing the suggestions to be avoided would be the granting too great a prepondenance to such latter officers, necessarily employed in drawing up the law, in comparison with those with such a council, when held at the providency; but I conceive it should be less general law, without reference to the noculiarities of our own code. I would not, therefore, give any preponderance in such a council to contlemen of the legal profession, and concerve that men well versed in the minciples of sensors government may be found amongst the secretaries, to be selected by the Governor-

general, without nominating any person of that description from the mother 1567. Would the system of improvement in the executive administration of the Indian government, as suggested by you, lead, in your opinion, to economy as well as to incressed officiency ?-I think, certainly, that it might be arranged to as greatly to reduce the existing establishments. It includes, as I have before explained, the employment of natives in all possible situations of detail, and con-At present we enter too much into details, and a great deal of European talent is now thus thrown away in India. The comployment of antives in such duties would no doubt greatly diminish the present expenditure. Indeed, such a sys1368. You spoke of a collision. Will you explain to the Committee what is meant by that expression?—By collision, I alluded to conflicting opinions being upon the same subject; as for instance in the Judicial department, opposed to the Revenue; or in the Magisterial department, opposed to both. Very opposite constructions of the same law have been given by the Board of Revenue at Madms, and by the Court of Sudder Adawlet, two separate controlling Boards, quite struction given by their controlling authorities respectively, have at once come into collision. I would instance the case of the purchase of lands by the head native servants in the district of Tanjove, annulled by the Board of Revenue, of which I was a member, on the ground of their being contrary to the Regulations of 180%, but which ensetments I afterwards found, on joining the Sudder Adamlut, were considered by them applicable only to remission lands. The government had no doubt of the expediency of unnulling these purchases a bet finding the Sudder Adamiet construe the law differently from the Board, many months passed without the measure being carried into effect; and when I left the presidency, the government had directed a new law to be exacted, similar to one in the Bengal code, in order to give effect to the construction put upon the code by the Board of Revenue, which had been opposed by the Court of Sudder Adawlut. 1560. Is not such collision incident, more or less, necessarily, to the very exist-

a superior superintending one, such as the question implies. The evil complained English, and another under the Scotch courts of law, neither being subordinate to the other, each independent, and the principles on which each acts being con-

1570. Does the answer assume that there is necessarily any impresses on the part of the approace authority of the principles upon which the subordinate authority England; is there implied any ignorance of the judicial decisions of the infinior courts in Scotland from which appeals are made? - I did not suppose any language of the decision. I suppose that the Board of Revenue, the independent controlling power in the Fiscal department, opened the code, and construed it to the best construction. This construction is then called in question by the lower judicial officers in the provinces, who thus come into collision with the local revenue offiorrs; and it becomes necessary for the former to have the opinion of their distinct controlling tribunal in the Judicial department. The construction put by that tribunal, the highest controlling authority in the Judicial department, differs from the construction put upon the law by the highest controlling authority in the Revenue department: the same law is construed differently by separate indesubordinate officers into collision with each other. I therefore advocate a system of government which would unite the controlling authorities, and place all the subordinate officers under one united suptrintending power.

I conceive that collision would be entirely avoided by a system exclusively of by the instance of Mr. Chanlin, as commissioner in the Deccan, or of Lord William Bentinck, uniting the powers of the Revenue Board with those of the authorities both in the Revenue and the Judicial department; a system which I do not think could fail, if the centlemen selected were sminent revenue men, and had been relieved from the overwhelming details of the Court of Circuit. Control may thus be rendered more efficient when brought neuter to the inferior agency, distinct independent tribunals under no subordination to each other, the inferior (445,-I.)

194 MINUTES OF EVIDENCE BEFORE SELECT COMMITTER agency to be controlled, will set under the same construction of the law, instead of

1572. In the event of a Legislative Council being established in India, do you think it would be necessary, upon system, to exclude the natives from it?-By no means. I think it highly desirable that they should be admissible into it; though difficult at present to select any native antificiently distinguished by his rank and he qualified for the high situation of councillors attendant on the Governorgeneral. Many natives might be selected perfectly capable of giving the most fixed. I suppressend, however, that at first the focilings of the natives of the country will find vent more easily through the local European officers than through any native, unless he is selected by the people themselves. For the natives, praccustomed to such a situation, will at first feel much at a loss to collect the origions of their countrymen; and unless a popular selection is made, the people, accustomed as they are to represent all their grievances to the local Buropean officers, will be inclined to place more confidence in them than even in their own countrymen, unless they have a voice in their nomination, or they

are known to them personally or by repute.

1578. You stated to the Committee that you thought it would be a great improvement in our system of Indian government to revert to the old system of uniting the control of the Revenue and Judicial departments in the same persons; is it not the case that, under that system, the greatest abuse was found to result Revenue and Judicial departments than under their separation; they have never forthy distinct desortment. Abuses in India will always exist, particularly in the Revenue denorment. According to the various systems of revenue menarement pursued, we may see them more or less, or may be excluded from the sight of them. But the abuses still exist the same, though perhaps less abserved by Europeans in one district than in another; and, for the people, the best system of revenue management is that by which Europeans obtain the best insight into abuses; for unless we know them, we cannot check or punish them. No one should judge of revenue systems by revenue abuses, in India. The best managed districts are those where abuses are bust seen and exposed; and the only mode of eradicating abuse completely, is by strongthening the hands of the superintending authority, not westening it by a division of power. Abuses are much more likely to be checked under such an union of mithority, than under the present system; its practicability alone is that of which I doubt.

1574. Will you explain what you mean by the union of the Judicial and Revenue departments 2-I allude to a securate class of native officers in the management of the revenue, acting independently of a distinct class of native officers in the settlement of judicial disputes, but both liable to the superintendence and control of one European authority, in whom it would consequently become necessary to sus not limit the appeal to him only. A further appeal, only upon cause shows, proceedings of the natives, both in the Revenue and Judicial departments, for he is enabled by his knowledge of the one to correct the irregularities of the other. which frequently would not come to his knowledge, if he were left dependent for information only monone class of the tribugals under him. My own information as a revenue officer was of material benefit to me as a judge of appeal in controlling some of the native indicial functionaries, and few have more exposed or punished native abuses in all departments of the service. I therefore speak from experience when I say that it is impossible to do so exceedable without some such union of authority. There should be a wide door come for somest, to provent injustice and to correct error; but many a corrupt native servant now escapes, by availing himself judiciously of our present divided and conflicting tribonals. 1575. with respect to delay will show that I think it is true, that the orders sent out from effect upon the proceedings of that government; and it is clear that man matters connected with peace and war, and negotiations with native princes, this observation must be peculiarly true. In an emergency, the government must act, and does not, without orders; but I distinctly remember several very important subjects which were treated in the Secret department, and for a long time in the Secret department only, and in which the views of the Board, not always consonant with those of the Court, were enforced upon the Supreme Government, and did materially influence the conduct of the government. I recollect a descatch concerning the alliance with Jyepore, which was recommended; a contemplative measure respecting Kurnoul, which was forbidden; a great deal concerning the treatment more lively recollection, because, if I mistake not, the despatch, which went under the authority of Mr. Canning, will be found to lay down, in plain and strong language, the principle of non-intervention, of which so much has been tion perhaps not possessed by the Board ; and it is extremely probable that in the To sum up what I have to say upon this general subject, I would observe, that if it is intended to say that the Court of Directors, comprising within themselves all the functions of all the Boards, superior and inferior, which conduct the business of a great state, must have and have the larger share in the administration. I concur in that representation; all I mean to say is, that there is no part of that administration which can be the subject of correspondence with India, for the due management of which the Board are not responsible under the Act of Parliament, and the oath which they have taken. If, in giving this goswer, I have in the slightest degree treated the subject in the spirit of controversy, I have done that which I am most anxious to avoid. 1587. Adverting to Question 411 of the Evidence taken before this Committee,

have you any observation to make?-Generally speaking, with the qualifications which I have already mentioned, the statement in that answer is in a great degree correct. It is true that the secret despatches, and the political despatches, which are not secret, have had less effect upon the situation of India than those who framed them intended and expected. With respect to the matters alluded to in the answer relating to the maintenance of order and security among the subjects, the Board linve not the power of directing such subjects to be treated through the Secret Committee; but there is another class of subjects not provided for tions with European states having settlements in India, and generally all matters connected with European states or with war in Europe.

1588. Has not the existence of the Secret department enabled the government at home to use a greater freedom in its acissodycusion occasionally upon the conduct of the authorities in India than it would have been convenient to do if those despatches had necessarily been communicated to the Court of Directors? -I doubt that. The secret despatches are seen by a great number of persons in England, by all the Board and several of its officers, by a considerable number of sworn clerks at the India House, and then again, I apprehend, by a number of functionances in India; and I know, in point of fact, that Members of this House having correspondence with India have been minutely acquainted with instructions, and have even incl copies of papers sent to the Secret Committee, while

the Court of Directors, technically speaking, was ignorant of the subject of them-1589. Do you conceive this want of secrecy to arise from any defect in the manner in which this department has been constituted?-It is impossible to say but that a Secret Committee that cannot insure secrecy is defective in its constitution. I rather apprehend that the mischief must have arisen from there being treated in the Secret Committee some subjects occasionally, concerning which secrecy is of no importance, and probably sufficient care has not been taken to distinguish subjects which were of importance. Again, I may be wrong, but I am they arrive there from the other despatches. I speak doubtingly upon that subject.

1596. Will you advert to the Questions 1996 and 1338. Is it your oninion that the alteration contemplated in those spections would be likely to lead to the consequences surmised in the answers?-If the surgestion which I took the liberty of making was such as the answer contemplates, it certainly would lead to abuses much greater probably than those which now exist. Certainly, I never contemplated giving to any political functionary the selection of the body or public officer, who should from time to time make the nominations. My notion was, that the nominations should be given in a regular order; as, for instance, Oxford should have three appointments, then Cambridge three, then Dublin three 1 or, if among towns, London so many, Liverpool so many, and so forth, according to a fixed rule, not to be interfered with for any purpose of patronage. The number of appointments to be made must certainly be fixed either by the government abroad, or probably by the government abroad, subject to the conis a real responsibility, to the House of Commons. With respect to 1988, I see of persons contending for writerships. The experiment has been partially tried, heard any allegation of favouritism. The Committee will observe, that my sugever either to the absence of favourilism, or to the finess of the person appointed, but simply to the avoidance of that influence of government which would certainly result from the transference of the whole Indian patronage to any political officer or department. I apprehend that so long as the present be taken, there is no mode possible by which you can previously secretain the fitness of those young men for the higher stations. If, as has been suggested to the Committee, you require persons of above average talent, you must abundon the present system, and take that which exists in England as to all but offices of mere routine, of appointing persons of various ages and different habits and pro-

for though the slare of patronage which each would get would be much greater. yet not being saleable, it is not available for all the purposes, though it is for some to which salaries are applicable.

1,508. Supposing that by any new mode of appointing young men for the civil

Discretors, in lieu of the natronage they would lose, would be an expenditure the natronue of the Directors, a fitter selection of voung men might be made; unquestionably, a small expenditure of money for the aske of insuring so L as my former answer will show, am not prepared to say that there is any method consistent with the preservation of the present Indian system, by which 1599. Are you aware of any advantage that has practically resulted from the

six Directors going out annually by rotation, and going through the form of being re-elected at the end of the year?-I should think some disadvantage; at the same time. I am not prepared to say that it is desurable that the Directors should in all cases have their offices for life, they might perhaps go out with the

1600. What disadvantage do you conceive to have attended this operation ?-I necessarily speak more from theory than from practice. It is obvious, that if a Director has given his particular attention to one subject, he may, under the present system, be cut off from the means of pursuing his inquiries, and giving his advice while those inquiries are in their most important stage. I apprehend that that has happened; but it is necessarily a subject upon which I connot

1601. Your previous answer has had reference to the number of individuals composing the Court of Directors, and has implied that in your judgment that number is inconvenient; are you aware of the number of committees into which the Court of Directors is divided, and the number of individuals allotted to each, each committee being, in point of fact, a department of the state corresponding to similar departments in the State of England, and having the management of the Indian Empire, so for as the government of India is committed to the East but it will be observed, that my answer was given without areat confidence, but functions of the East India direction; and it may still not be true that so larges number as 24 are a convenient body to discuss all the more important matters of business, particularly I allude to the despatches to India, which come from the several committees into which the Court is divided. My notion of inconvenience chiefly applies to the discussion of controverted points in descatches, venience of which I can speak practically, is, that it has of late years been almost to answer what the conduct of the Court shall be, and it has frequently haspened fication perhaps, or some compromise between the Court and the Board, and have not been able to effect it. I apprehend that if the number of persons having venience; but I beg to say, that with respect to the intennal operation of the system at the India House, I cannot speak with much confidence,

1602. You have stated, in reference to the system of rotation, that there are inconveniences connected with it; is there not one convenience, by which the body delegating the nethority are enabled to resume it in the case of a Director who either has been inefficient, or at least supposed to be; and has not that occurred so often as to render it by no means a matter of form that the same individuals should in all cases be re-elected?—I have shready said that I am not of opinion that the Court of Directors ought to hold their offices for life; and I certainly hold that view of the possibility of a necessity for omitting the name of a Director whose conduct might not have been of the electing body to form a correct judgment of the propriety of a Director's conduct, or at least of his capacity for his office, always excepting cases of corruption or gross impropriety of conduct, in which Inpprehend that the body ticular interests in the body, and with no reference to his qualification as a Director. 1608. Under the Bill of 1788, it was proposed that the Crown should nominate

seven Directors, and that the proprietors should nominate more; are you aware sider the notion that it is the interests of the proprietors which the Directors represent, to be a great fallacy. The groundstors have really no interest whatever in the concern except that of receiving their dividends: they certainly are interested in the mood government of India and in the conduct of the China trade so far as their dividends are affected, but otherwise they are not really the people whom the Indian Directors represent in the government.

1604. During your continuance at the India Board had you occasion to consider the construction and working of the local governments in India ?-Not as it has been considered more recently. The only point upon which I was disposed to form an opinion, from some personal communication with competent authorities, was this: I do believe that the Governor-general, having the local government of Bengal in addition to his more general duties, has too much to do, and that the consequence must be some inconvenience in the exercise of one or other of those functions. I do not apprehend that one scheme which has been submitted to the Committee, that of having the Governor-general and three general, as the governments now all report to England, would at all answer the end proposed. I apprehend that, under those circumstances, the Governor-general hend that the labour put upon the Governor-general would be excessive, not to advert to the very high degree of confidence that must be reassed in him if his control is in any degree to supersude that of the authorities at home, a point of which I own I entertain considerable doubts, though I am not prepared to say that some of the minute superintendence might not be dispensed with: if however, that soes to the Governor-general, it will not have the effect of relieving him from the burdensomeness of his present duties.

1605. You consider that this evil would more than counterbalance the existing evils of the subordinate presidencies being independent of government?-They are not now independent; but I have a middle course, which course, however, unfortunately would not lead to a saving of expense, and I appreliend that when the suggestion was made to me at the Hould, that was the one that was contemonly, there being a Governor also at Bengal, or if you please to call them all Lituterant-governors, that makes no difference ; but that there should be three local Governors and one superintending Governor, but that that superintendence should not consist in that minuteness of control which the other scheme appears to me to contemplate. By this means the Governor-general, I apprehend, would exercise a general superintendence in all the other departments over all the subordinate governments. That I take to be the scheme which was several times

must not that depend upon the necessity of maintaining the councillors on the Decidedly: but I assemblend that the councillors would not be necessary on the appointment of a Governor-general at Bengal. The continuance of councillors, 1607. What has been your observation of the working of the system of the

Governors and their Councils at the respective presidencies ?- I speak with hesitation, but I am upon the whole suchited to think that the government might be very well conducted without the Councils. At present the councillors are no

[44Boss Li]men, distinct by the University of Southampton Library Distingtion their

1608. The plan to which you first adverted as having been mentioned to this Committee, contemplated further the establishment of a permanent legislative council in India; has that subject come at all under your consideration? - Certainly in a degree. There again I apprehend the plan has come before the Committee in more than one shape. One object I take to be simply framing what are called Regulations, those ordinances having the effect of law, which are now passed by courts and the law of the Company's courts throughout India, and I understand it to have been proposed even to form a council which should have the same power over India as, in truth, Parliament now has; a council enabled to make I do not see the necessity of that great change, and I have great doubts as to the possibility of creating a council that would perform the functions satisfactorily, possible, in the confliction of the King's courts with the Company's courts, and the functions of the government; but I am not prepared to withdraw from the King's English subjects the benefits, as they are well considered, of the English law; and on the other hand, I am quite as little prepared to extend that law to the provincial courts. I apprehend that that is a very great question, which may be very properly dealt with in England, with the help of some of those who have been judges in India; but I am very far from desiring to see the judges in in this country, forming part of any legislative conneil for this or for any other I really am not aware that the Regulations of the Indian government are open to more criticism than all detailed laws are said most be. If I were to make a comparison, I should say that the Regulations were rather better done then our Acts of Parliament, and I conceive that a much slighter change than might ensure any amendment that is required in the composition of those Regulations. I think there appears to be in some part of the records before the ment are two conflicting authorities. I apprehend that is not more the case in India than it is in England. The Court of King's Bench in England is perfectly competent to coerce and restmin a public functionary who exceeds his daty-The only difference is, that in England there is one authority supreme over both, namely, the authority of Parliament; and it has been suggested, I observe, that the Government should have, being the supreme power in Iuclia, the anthority which Parliament has, an authority superior to the courts. Now it is hardly necessary to say to this Committee, that Parliament seldom, probably I may say never, interposes its authority in any proceeding of a court, and therefore, the power to be given to an Indian government, if given at all, must be given upon perfectly special, peculiar grounds. Now I am not prepared to say that those grounds do not exist, that is, I am not prepared to say that there may not be a case in which it may be fitting for the Government to interfere with the process of the King's Court, especially in a case in which there is any doubt as to jurisdiction: and I do not absolutely condemn the proposition for giving to the local of the process of the King's Court upon a distinct and positive declaration, attended with public danger. It certainly has been represented, that the exercise of the process in some instances would have been productive of that result, and considering the very peculiar nature of the Indian government, I think possibly defined?-Certainly not; and that is one of the considerations that promots my former answer. I think it is impossible to read what has been written men this subject by the Bengal judges without seeing that the jurisdiction is extremely indefinite. One mode of getting rid of that difficulty is to define the jurisdiction ; another is that to which I have alluded before, of having but one jurisdiction throughout India. I own that the difficulties in the way of the latter appear to me insuperable; and I think therefore that the former should be attempted. Another scheme is to appoint local agents baving the entire control of districts considerably less, if I understand it, than those of the government, but larger than those of the present collectorates. I am inclined to believe that that suggestion has a foult, which I own, much as in many respects I admire the system of Sir Thomas Munro, did belong to many of his suggestions. The gentleman who made it was a disciple of Sir Thomas Munro, and the fault, if it be one, is attributable to the same circomstance, namely, his own competency to do that to which men in general are not equal. I believe that if you could always insure good men in such an office as that contemplated in the evidence of Mr. Sullivan, there would be a great improvement I take the liberty of referring to an observation of his, in which I entirely concur, amongst whom he is to live in one particular line. I do take the liberty of saying, that I consider it as a matter of very great political importance that the persons, both military and civil, who serve in India, should be, more than they are now, connected with others, according to the English University system. I cannot, in this Committee, pursue that observation with respect to the army, in which I think an improvement might be made with very great facility; indeed, I am not so well prepared to suggest the mode in which it should be done in the civil service, but traving read the evidence of Mr. Sullivan, I beg leave to give my opinion, that it is a matter which in any new arrangement ought to be

On the case I have all facilities to a reverse of of the grants. On the case I may be greatly good to the case of the grants. On the case I may be greatly as the process more creatly of the grants. On the case I may be grant on a proposal to a five all the success of access, putched the marrier patients and proposal to be from the less accordanced to being grants with the substance of access putched to be subject to a success and their disposal control of the subject to the success of access putched to the success of the

encourage and restand the faithful and devoted exerction of them.

1018. On what principle is the promotion of young near once embarked in the
civil employment in India regulated; is it by seniority for the most part, or is it
by selection?—There is no fixed rule, and it must depend uninjly open the
judgement and discrimination of the Grovernor General, but, order's powering,
seniority has always been considered as possessing a claim to promotion; at the

sembority has always been considered as possessing a chain to promotion a stream time three are numberless instances of junious, having been appointed to attentions of the highest class, to the exclusion of their seniors in the survice.

1619, But you would consider that rather as the exception time as the reals?

1619, but you would consider that rather as the exception time as the reals?

1619, but you would consider that rather as the exception time as the reals?

1619, but you would consider that rather as the exception time and the real of the exception time. The exception time are the real of the exception time as the real of the exception time and the exception time as the real of the exception time as the real of the exception time as the real of the exception time.

that in my own case: I fast the good fortune to be selected to fill oblices of desintetion and emoliment that my senior unight justly have chimed. I only mention this to show that instances of deviation from the rule of seniority have been exceedingly common, and, as far as I have had sensor to observe, they have generally been regulated by the extigencies of the public tervice. 1620. Are you of opinion that the mode of nonnination by individuals subject to

1980. Are your of opinion that the mode of nomination by individuals subject to no public repropulsity in the energies of their parasayas, glarish the best chance to the public of obtaining men of eminence and high qualifications for the civil review of India-1. This list such cannot be mentioned to that object, breams the purposition to that object, breams the purposition of the public of obtaining the object of the public of the p

1691. Would not this be equally the case if the appointments were conducted under another mode than that of individual nomination: for example, by public competition?—Certainly that would afford the means of selecting youlds of the

legitest promise.

1622 Should you not say that the clearaster and talents of young men begin to develope themselves at the period of life at which they are now selected for the Indian service?—That cannot be desided; but the promise of a nomination is

very commonly given before a judgment can be formed of the future ability and chiracter of the youth, and therefore to that extent it is a matter of clamor. 1923. What regulates the determination of the number of young non amounty seet out to fill the writerships of the different presidencies?—A return of the

casualties by death or by absence which is received from India.

1633. Is regard lead to the number of persons encapshoyed at the time in India?

—I hardly feel sayself competent to nawer that question. That statement is

—i inergly beet alyest competent to answer that question. I has statement as always maid out in the Auditor's office at the Iodia Houses. The Auditor's office at the Jodia Houses. The Auditor's would be able to give the most accurate information upon that point. 1865. Beyond such roductions as may reasonably be effected in the salaties and

appointments of any civil seromas in India, what other means present these obey to your mind by which that large expenditure might be interedired distinished I—By a more extensive complayment of earliers, I think there is no ideal that as the civil seround. I conceive should not be allowed to go beyond a certain extent. If carried too far, it would tend to the revival of those multiprecises which exists a conceive should be allowed to go beyond a certain extent. If carried too far, it would tend to the revival of those multiprecises which exists a conceive the control of the control o

ecusion many years ago to a great extent, and which were encentary theorems, by the very opposite process, that of increasing their sularies. 1000. From your long observation of the character and capacities of the natives of India, about you say that their services might be with native more extensively literadured into the civil administration of that country.—I think they wight but

they should act under the amprintendence of European functionaries. They containly supposed the state of the

1657. In these department you would see no adjection to opening the curse to thus, subject dways to hirryapan curtur —Cactailly not, I have cleave been an advocate for their more extended employment; at the same time, I should not be for advancing them prespirately to the excesse of the higher functions of office; it should be those gradually and cautionity, and they should be more liberally used that they are at present.

(445,-L)

1628. Wit

Y. B. Edmonston,

1628. With a view to their more general admission into such employments, should you not consider a more extensive system of native education is highly desirable 2-Certainly; and that system has been long in operation. I was 16 April 1982. always favourable to it, and when in a situation to promote at, I contributed my

1609. Are you of opinion that it would be desirable that a greater promulgation

1630. Does there not exist a disposition on their part to acquire the language?-Many of those who are in the habits of communication and intercourse with that many apply themselves to the orquirement of the English language.

been found to consist in the want of instructors; does it uppear to you that due description of persons called half-castes in India, or might they not be more employed as a useful body in that capacity?-I do not imagine they can be considered (senerally speaking) well qualified for such a duty; they are oct hold in respect by the natives; the bulk of them are in a very infusior station of life, have never been out of India, and are very imperfectly educated. There are, however, meny well educated and respectable persons among them,

essecially those who have been sent to England for education 1692. What effect upon the minds of the surives mornly do you conceive would

be likely to be produced by their being more closely and intimately mixed up with the administration of the affairs of their own country?-The untural tendency of it would be to improve their moral character, and to attach them to the government. 1688. The Committee have understood that at the present time a free untive press exists in Iodia; under such altered circumstances, does it appear to you more then ever desirable that every means should be taken to connect them by their

interests with the British system in India?-Most curtainly. The native press has arisen since I left India; I imagine it may be a powerful engine either for evil or for good, according as it is directed. The establishment of a free native press forms, in my opinion, a new and most important exach in the history of British India-1634. It seems that at present the Regulationarcgording the pressyary materially in the different presidencies; do you see any good reason why those Regulations should not be assimilated, and one uniform rule had down respecting the press

throughout the whole of India ?- I am not aware of any such differences between the several presidencies as to render such a distinction at all necessary. I should be of opinion that an uniform system of restriction, as far as restriction is downed expedienc, should be established in all the presidencies.

1635. At Madras, for example, a direct consorable is up to this hour exercised, while, on the other hand, the press in Calcutta appears to be perfectly free; do you see any good grounds why such a distinction should continue?-- I was with the condition of the people and with the nature of the government; a live press, and what may be called, in a limited sense, an arbitrary or despetic government, seem to be wholly unsuited to each other; and accordingly, the effect of opening the press has, in my opinion, been to weaken the authority of is cow, I presume, entirely out of the question. I should have preferred the

continuance of the consculing on the ground that I have stated; but as it has also, upon the general principle of establishing an uniformity of system. from the relaxation of the restriction supon the press in Bengal?-The unrestricted

discussion

ON THE AFFAIRS OF THE EAST INDIA COMPANY,

N. P. Education 16 Aug 1818

discussion of public subjects and public measures, and the latitude of observation on the characters and conduct of persons high in office, to which the press is accustomed to indules, have necessarily dimunished that deference and respect in which

it is of so much importance that the government should be held 1637. Can you state to the Committee any evidence which lus appeared of been at any preceding period !-- I can only say, that from the information we receive from India it does appear to me that the government is not capable of exercising the same degree of anthority and control over the European population, and over the civil service, that it need to exercise before,

1638. Are the Committee to understand, that any representations to that effect have been conveyed to you from the government in India?-I derive nov impressions from a variety of sources, both public and private, from official doenments and private correspondence.

1639. Do the minutes of the council in Beneal bear out any such inference? I have not, to the best of my recollection, sum that opinion specifically stread

in any minutes of the council. 1640. When you state that, in your opinion, the increased freedom of the press has had the effect of diminishing the respect telt by the sobjects to the government

in India, do you mean to confine that observation to the European subjects, or do you include also the native acquistion?-The latitude of discussion which I have described must necessarily have an effect upon the native population as well as the

1641. Have any instances come to your knowledge of that effect having been produced upon the native population, or have you formed that opinion upon general grounds?-Upon general grounds. I think that it has a natural tendency to spread beyond the limits of the European population, and the native press must uccessorily add to it.

1642. In a government founded upon the opinion of the force and the talent of their present rulers, like the government of our Bestern empire, is it not a matter of course that anything that impossches the ground upon which that government acts, must, in the nature of things, weaken the hold which it has upon the people so governed?-Tint question in fact explains my own meaning I conceive the habit of unrestricted animalversion on the measures and proceedings of the government and the conduct and character of its members, must necessarily produce. The state of society in India does not admit of that counteraction which in this country readers such unlimited freedom of discussion not

only innoxious, but to a certain extent beneficial. 1643. Should you concur in calling the government of India a government same time it is an opinion founded moon a real superiority of character and

1644. Are you of opinion that it would be expedient to put the native press under closer restrictions than the European press should be subjected to ?-I should think not. It could not, in my opinion, have my beneficial result; indeed,

as it would be enloatsted to excite suspicion in the minds of the natives, it might rather have a prejudicial than a beneficial effect, 1645. You have stated that you consider it designble, for the sake of uniformity, that the systemodosted with respect to the present Calcutta nodat Bombayabould

be adopted at Madeas also; do you conceive that there have been local circumnative princes, much nearer to Madras than to other presidencies, which have rendered it inexpedient to give the same year to public opinion in Madvas that has been permitted at Calcutta or at Bombay?-I have never contemplated the subject in that point of view, but it does not uppear to me that that constitutes any particular reason why it should be so-1646. What amount of restriction should you consider it desirable for the

future to impose upon the access of Europeans to India?-I am favourable to the continuance of the existing restrictions. 1647. Do you include in that the restriction with regard to the occupation of

land in that country?-Yes. 1648. You (445.-I.)

1644. You are aware dut to some extent latterly in Bengal that restriction has been deviated from immedia in 16 short permitted to Kimprome to take four them deviated from immedia in 16 short permitted to Kimprome to take four with regard to the calculate of Bingson in millimident several to the deviated deviated of the four in millimident several to be already decided, the feel of government having, without previous reference to the mithorized at home, come to a reaching in which previous reference to the mithorized at home, come to a reaching in which are previous reference to the mithorized at home, come to a reaching in which are the reaching in the first of the control of the contro

which I was entirely adverse-1649. Upon what principle did you feel adverse to this alteration of the system? -I think that the European settlers would interfere with the possessions, rights the natives rather than to elevate them. We have seen, in the conduct of the land. If British subjects are admitted indiscriminately as badholders, it would of them. The meant has been found insufficient for that purpose, and would asttlers. Our primary daty is to consider what is most for the benefit and prosnerity of our native subjects; and it does not subcar to me that the effect of allowing Romesons to hold leads will be to secure their rights and promote their interests, but, on the contrary, to imure them. The reports which have been transmitted upon that subject from Bengul within the last two years contain numerous representations of disturbances, and even actual conflicts, occasioned by the collision of rival interests, and of the injustice and oppression experienced by the evots and others at the bands of the planters or their untive servants. One source of such disorders in the practice (it minears not uncommon) of evets each party of course claims the fulfilment of his contract, and endeavours to see possession of the eron by an armed force, which the planters are stated to be

conduct of the administration abroad, and it is the more efficient because the General that you consider such aid to be indispensable ?- In both, 1684. Is not the authority of the Governor General paramount to that of his

1685. In any case may not his sole authority supersede the decision of the three other members of his Council ?-Not so; because in that part of the Act of Porliament which applies to the subject the cases in which the Governor General is at liberty to act on his own and sole responsibility are defined to be

authority can legally be exercised, and they have not, within my observation, 1686. Do you mean to say that in ordinary cases, where such difference of oninion has grisen, that of the Governor General has yielded to those of his

own Council?-In ordinary cases, where a difference of opinion arises, the question is decided (as the law prescribes) by a majority, but I have known

1687. That which you so consider as necessary at Calcutta, do you consider equally necessary at the other presidencies?--Certainly.

1688. What advantage appears to you to result from the existence of a greater exercise an official superintendence over the subordinate governments. He could not do it, unless all the proceedings of those governments were regularly reported them. In cases of great importance, the other governments have been in the habit of making a reference to the Governor General in Council. Generally, I think the subordinate governments might expediently and beneficially exercise legally, as in fact they do practically, an independent authority with regard to the affirirs of their respective presidencies 1689. Would it not, in your judgment, be highly desimble, if practicable, to

East?-I should say so, if it were practicable; but supposing such a general conceive that it would materially interfere with the control of the home authorities over the governments of India. It seems to me that it would be trunfir-

1600. To what respect would that effect be producted by the control at home being exercised over one governor, instead of being exercised, as at present. over three distinct governors?-Because the supresse authority could not supply the outliorities here with the information and the recorded proceedings necessary exercise a control over every branch of the administration; and that could not, I personne, take place if the subordinate governments were placed under the

ings to that authority instead of the home authorities. 1691. In what manner would the control at home be diminished if the Governor General of India were enabled to report the proceedings with respect to the administration of the whole of India to the government at home instead of that information being furnished to them by three distinct governors?-At present

the several governments transmit to England the whole of their proceedings and their correspondence. Now, under the supposition of their transmitting such correspondence and proceedings to the Governor General, it would be necessurv, to enable the home authorities to maintain the same supervision and control that they now exercise, that the Governor General should famish them with the same reports and materials that hitherto have been transmitted from the three different presidencies, which would obviously be impracticable. 1692. Does your objection then resolve itself mainly into the distance of those

strikes me is, that the proposed system must necessarily superied the control which

abroatly because, according to any conception, those authorides could not, under thirty system, he supplied with this means of exercising. In Indeed, IT is were proposed to the control of the control of the control of the control of the general, but is another question; but as long as it is considered necessary that the authorities at home bound exercise an unitant control cover the proposedings of the governments abreat, so long, it appears to me, their proceedings must be governments abreat, so long, it appears to me, their proceedings must be 1390. If for instance, a cuttin number of vice-governous or laustenna-

With the dominished means of acquiring fortunes at present existing in India is it or is it not deduable still further to diminish the means left to the

precurious and indefinite?-I think it of the highest importance that the civil scavice of India should be upon such a footing as to afford the individuals belonging to it the prospect of returning with a competency to England, and not

1700. Do you consider it the first duty of the Government and Legislature of are to be made ?- Contrasting those two objects, there can be but one answer:

instified the conclusion that there is anything inconsistent with the interests and happiness and prosperity of the natives that the individuals appointed to the autrenne authority in each of those presidencies, and expensity in the two subordinate presidencies, should be selected from those who have grown up in the public service of the East India Company ?- My opinion has always been generally adverse to selecting the governors from among those who have belonged passed through the several gradations of the public service, and has consequently attact that degree of deference and respect, which, in my indigenent, contribute importantly to the efficient administration of the office of Governor, as regards both the European and native population. A person of entinence and distinction proceeding from England to fill that office, it duly qualified by character and talent, carries with him a greater-degree of influence, and inspires more respect, than an individual who has been known in a subordinate especity in India availy can-

1709. Are you name of the number of individuals selected to the government the course of the last 50 years?-I am aware that a considerable number have

1703. Is it your opinion, looking at the increasing territorial debt of India the administration of that country?- That reductions must be effected is obvious, that, I believe, according to the latest report, there is reason to expect that in another year or two the charges and revenue will be nearly, if not entirely, equalized, but I am decidedly averse to such a reduction of the allowances of the public functionaries as would endanger their integrity; and I am firmly of situation of respectability and independence, with the means of acquiring by

1705. The whole principle of the Indian administration having been to keep

India as much in connection with England as it was possible for a distant depenit or has it not been materially promoted by giving to those persons who are 1706. Must not, pursumently, a more effectual mode of maintaining our connection with Inche consist in sparing and festering to the greatest possible

Printed many distinct by the University of Southernston Library Distinguish Unit 1707. You

1707. You have been asked as to the necessity of allowing individuals to accumulate fortunes in India; are those fortunes to accumulated remitted home, or N. B. Edmontes, are they left to fructify in India?-For the most part they have been remitted to

England; but some have left a portion of their property in India to fractify, 1708. Are not they, so far as they go, a perpetual drate upon the industry of the natives of India ?—They constitute, so far, a political debt, which must be paid sooner or later from the produce of India.

1709. If no capital is invested in India, and the fortunes there made are remitted home, does not it necessarily follow that that operation is a dmin apon the resources of that country?—The way in which property left in India is invested, is either in what is denominated Compuny's paper, (Government bonds,) or in houses and other objects; when ultimately romitted it must be supplied from the resources of that country.

1710. Since we have derived a large revenue from the territory of India.

amounting now to 20,000,000% annually, can you point to any great improvements great public works in the country, by which any marks appear of the benefits derived from our empire there?—Not from public works; that has generally been left to the industry and skill of the native landholders. There has been one work of that description that has been of very great importance, the renewal of some canals anciently drawn from the Jumpa in the north-west quarter of India, which have been carried through a great extent of arid territory, and been productive of very great increase of revenue.

1711. In that single and small sample, is there not evidence of the vast the lands being private property, it necessarily depends upon the promietors of those lands to introduce such works and improvements as they find best calcu-

1713. Does the beneficial tendency of our government appear upon the improved condition of the people in that country?—I think it does.

1713. In what part of India?-Particularly where the permanent settlement has been established. 1714. Do you consider then that their prosperity very essentially depends upon the manner in which the land revenue is fixed?—I think so.

1715. Have you had an opportunity of observing the condition of the people in the independent Jaghires?—No; I never was in any of those.

1716. Have you had occasion to observe the condition of the people in the few states that yet remain independent of our government in India?-No; my

employment has been almost always at the presidency, or with the Governorgeneral whenever he has gone. When I spoke of the improvement of the people, own, of being protected from all external invasion, and the security of life and property, which they never enjoyed under any other system of government, unless before the dissolution of the Mogal carpire; the Emperor Actur, for instance.

Government?-The body of the people I conceive to be fully sensible of the advantages they enjoy; that is not the part of the population of India that are hostile to us. The chas of persons that are dissatisfied, are those who have been removed from places of authority and power by our supremacy.

1718. Have you seen a list of public works executed in India in the several

presidencies since the renewal of the East India Company's Charter in the year 1813, as such list was presented to the Committee setting last year, marked not happened to see it-[The same was shown to the Witness.]

1719. Though you have not previously seen it, yet from your cursory inspection of it now, or from your general knowledge of the subject, are you able to state what has been the agg egate expense of the public works there enumerated? -The course of my survice was not calculated to afford one the means of answering that question. (445 miles) major, digitised by the University of Southampton Library Digitisation University

6 April 1882.

1780. You cannot then state what proportion of the revenue of India has been expended in public works, as contrasted either with the amount received, or as compared with any proportion which it might bear to some expended upon which, being executed when I was in India, I am acquainted; but I understood the country for the benefit of agriculture.

1721. To what body is delegated the legislation for India ?- Each presidency has by law the power of framing its own Regulations. The subordinate presi-

1722. Do you mean that the subordinate presidencies are compelled by law to anbuit their Regulations for the sanction of the Governor-general?-Not by out of transactions and crents as they occur. In Bengal all the public functionaries in the interior of the country have by a specific exactment the privilege of Council, and if approved, a Regulation is framed accordingly. The public functionary himself is sometimes required to draw up and transmit the scheme of the proposed Regulation. Regulations are also sometimes framed under the immediate direction and superintendence of the soureme authority.

1723. Are they when passed of necessity registered in the Supreme Court? -Not those that have relation to the interior of the country.

1784. In what manner are those Laws promulgated when passed, how are they made known to the natives?—They are instalted into the notive languages. 1798, which describes the particular mode in which Regulations shall be framed and promalgated. Wisen printed they are transmitted to the neveral judges of the provincul, allah, and city courts, and other public functionaries, both in

17:26. Would it not appear at first sight desirable that there should be one general code of laws applicable to the government of India generally ?-I do

1727. In what respect do the different presidencies so essentially differ from each other that the same system of law night not be made applicable to all of them?—There must be differences of local circumstances which require different Lows and Regulations to be applicable to them; there are different tenures of very generally, which it does not on the side of Beneral or Bombay. Therefore a Regulation required for Bombay abould be figured at Bombay, and the same

1789. Have you considered in what manuer a body might be constituted in therefore propored to give a confident opinion on the subject; but on this first

there in the first instance, which might be submitted for revision to the Legislative Council established at the seat of the Supresse Government 1780. sider that it might be practicable to draw any line which should supersede the ceedings of the governments abroad, so long apparently must the whole of their

proceedings be sent home. 1738. While you were in the government in India, was not an order issued upon every subject, but to send a diary, and to send a list of the letters, and such of them only as were material to the disry?-I recollect (being reminded

of the circumstance) that when I held the office of shlef sceretary, instructions were issued to the residents to keep and transmit periodically to the presidency, a diary or precis of their correspondence, and to abstain from transmitting copies 1789. You stated that you were connected with the Secret department when you were in India; does your experience lead you to believe that the Secret

department in India is properly constituted for the purposes of despatch and

Martis, 17º die Aprilie, 1802.

SIR JAMES MACDONALD, BART., IN THE CHAIR. Neil Benjamin Edmonstone, Esq. called in; and further Examined.

N. R. Edmantons. *1789. IS there anything you wish to state to the Committee in reference to

17 April 1822.

the evidence you gave yesterday?-I have had an opportunity this morning of I referred yesterday, and have made two or three extracts from it, with a view conduct and proceedings of the indigo planters and their agents.

you allude to?-These extracts are contained in the answer of the Court of Directors to the describes from Beneal on the subject of the indice planters. and I have taken them from the answer, not from the original despatches; so that I do not exactly know the dates. The letter to Bengal, answering these

despatches, is dated the 10th of this month, 1741. Do you wish to make any observations to the Committee in recard to the answers you gave yesterday on the subject of Europeans occupying land in India?-It has always appeared to me that the admitting Europeans generally to now afforded, may obtain a footing in the country. They will become the rivals and competitors of the native landholders, and progressively supplient them in the possession of their lands. The essential difference of chameter, hubits, religion, language, attainments, modes of thinking and acting, castoms and prejudices, between the two classes, constitute an insunemble har to their over being united by the associations and connections of domestic life, or by any common bond of national interest and feeling. They cannot coalesce and commix. There must be a constant collision between them, as well as between the Europeans themselves and their respective agents and adherents; the effect of all which will be to create disputes and disturbances that must engage the almost exclusive time and attention of the local magistracy and police. This enticipation is of the presidency of Bengal as indigo planters, and must consequently be aggravated by the unlimited admission of Europeans as landholders for general agricultural purposes, to which the door now seems to have been opened. The reports referred to show that their conduct has had the effect of creating dis-

ON THE AFFAIRS OF THE EAST INDIA COMPANY turbance and disorder in the country where they have been located; that it

has been found impracticable for the magistrates to control their conduct; and N.B. Edmonst I must repeat my opinion, that if such an influx of European landholders as the arrangement involves be introduced into the country, it will be found indispen-1742. The Committee understand that you have extracted from the answer to these despatches, such parts as you think tend to bear out the particular view you

take of the subject?-Yes; it was with that view that I made those extracts. 1743. In the answer to the despatches very voluminous?-It is very voluminous. The recorded reports of the conduct of the indigo planters and their agents appeared to me to afford sufficient evidence of the truth of what I have stated.

1744. Does the despatch entirely refer to this question ?-It does, exclusively, Finding it difficult to describe concisely the facts represented in the extracts which I hold in my hand. I desire to refer to the detailed narrative contained in them, as bearing me out in the statement that I have given, " As magistrate of Nuddea, (says Mr. Turnbull) I have had some apportunity of witnessing the scenes of contention and strife ensuing from the various and conflicting interests to which that competition gave rise. The disorders which then prevailed in that and the neighbouring indigo districts have. I believe, nothing shated to the present day, and they are certainly such as to call for the serious interposition of Government. From the moment of ploughing the land and sowing the seed, to the season of resping the crop, the whole district is thrown into a state of ferment; the most daring breaches of the peace are committed in the face of our police officers and even of the magistrate himself. In utter defiance of all law and authority large bodies of armed men are avowedly entertained for the express purpose of taking or retaining forcible possession of lands or crops; violent affrays, or rather regular pitched battles ensue, attended with bloodshed and homicide; our police establishments are corrupted, and the daroghas are said notoriously to be in the pay of

1745. What is the name of the maristrate?-Mr. Turnbull: he is now a member of the Sudder Dewanny and Nigamut Adawlut v be had been magistrate

of Nudden, which is distant about 100 miles above Calcutta. The magistrate of Docca says, "I will not here put on record acts which have come to my knowlege of the open during violence directed to the destruction of rival factories a but will ask, where is the instance in this part of the country of the astive zemindar, who, unsided by European partners or influence, has erected indige factories, and successfully carried on the speculation, without being in the end either entirely raised or obliged to admit his powerful neighbour to share in his own rights," Mr. Ross states, that "armed men are kept by the planters to enforce the ryots' contracts;" and Mr. Sealy, another officer, speaks of "the number of affrays that now annually take place for indigo lands, which are invariably attended with severe wounding, and frequently with loss of life, in consequence of the plinters entertaining bodies of fighting men for the express purpose of fighting their battles on these occasions." These are facts, independently of my own observation and reflection, on which my opinton of the opinions of the personal character of the indigo planters; notwithstanding which, it

1746. These facts, if well founded, were, I presume, known to the government

of Bengal; and knowing the existence of these facts, has not that government come to a determination that it is desirable to permit Europeans to hold land upon long leases?-They have so; and it appears to me to be likely to produce an approvation measure calculated to elevate the natives, and to promote their interest and prosperity; and I think it is acting in opposition to that principle to introduce into the country a numerous class of persons, who, from the nature of their objects obtain an ascendancy overthess, which they are likely to employ for purposes adverse country. It would be absolutely necessary, as already observed, to make such an alteration in the administration of the laws as would be calculated to control this

(456-molt)men, distinct by the (8-70-Sity of Southampton Listens, Distinction body

17 April 1852.

body of Europeans. In fact, where a community of Europeans is established, British institutions must follow; the effect of all which seems to me to be the prosecution of a system for prosecting the interests and advantages of British mbiects at the expense of those of the natives. Our forbestance hitherto in abstaining from all interference with the rights and possessions of our native

1747. To what proportion of the places in which indigo plantations are esta-

blished do the extracts you have quoted refer?-The districts of Nuddea and Dages Jellalpore; but the practices and scenes described in those extracts appear 1748. You have stated that it has been found impossible for the local magis-

he pressury to that end to establish a new system of judicature; has any recommendation to that effect proceeded from the Bengal government?-Not to my

1749. Has the Court of Directors found it to be its duty, in justice to the natives so suffering, to send out any orders to such effect ?-- Certainly not. By British law with all its machinery into the enterior of the country, which I should regard as an evil of great magnitude, and which indeed could only be effected by a parliamentary enactment.

1750. Has the Court of Directors found it to be its duty to disapprove of the introduction of granting leases of land to Europeans, as sanctioned by their government in Bengal?—They strongly censured the Bengal government for adopting a measure of such paramount importance without previous reference, as well as for allowing Europeans to hold lesses without any security against the abuse of the privilege :- the majority of the Court, however, concurred in smetioning the grant of leases, subject to certain conditions and retrictions, and with a limitation as to the duration of the leases. The local government of Bengal actually adopted the resolution of permitting Europeans to hold lands on lesses of 60 years; the Court of Directors have limited the term to 21. I, us a member of the Court of Directors, entirely disapproved of that measure, and did not

concur in it, and I stated my reasons. 1751. In what possible manner does the limitation of the term of occupation to \$1 years instead of 60, tend to mitigate the evils which you have represented as arising out of the occupation by Europeans? - I do not think that it is calculated to remove them a door has been opened, which it will now be difficult to close.

1752. Then the Committee understand that on this point both the local government of Bengal, the Court of Directors at home, and the Beard of Coumissioners at home, have dissented from the opinions introduced by yourself?-My opinions were submitted to the Court when the question came under discus-sion in the form of a proposed despately to Bengal. The sanction given to the measure under certain limitations may perhaps have been given under a conviction that, as it had already been adopted in Bengal, it was not possible to withdraw from it without public inconvenience; some of my colleagues did not concur in the measure, even as proposed to be modified, any more than myself, and a dissent was entered upon the proceedings of the Court, to which reference can be

1753. These opinious have not been seted on by either of the three governing bodies?-The establishment of Europeans as landbolders in that country is a measure entirely novel, and has only been brought under the consideration of the authorities at home, and has received their sanction under the qualification and restrictions I have mentioned, within these three years, 1754. The system in India, up to the present time, having been founded upon

the exclusion of Europeans from holding lands in India?-Yes, except to the extent of 50 bleegas (about 17 acres).

1755. And the present being an experiment for the first time formally introduced?-The measure appears to have been introduced not experimentally but absolutely, and I consider it to be a measure pregnant with evil.

place

place it in the power of the Court of Directors to alter this system at an earlier

producing great complaints on the port of those who may have embarked in large concerns under the encouragement of the local government, 1757. You have stated that the occupation of land by Europeans must be followed by the establishment of British institutions; will you state to the Com-

mittee why Europeans so voluntarily actaling themselves should not be rendered local judicature is calculated to control their conduct, and experience seems to

I mean principally the British laws; the British system of judicature, with all its appendages.

1759. You would consider that, on a trial by jury, part of the jurymen should be Europeans?—Yes, I mean the trial by jury; the introduction of British law

1760. When you state that the occupation of land by Europeans is injurious to the natives, do you menn that where it has been hitherto tried it has had the

that the European will necessarily enter into competition and collision with the displace these. 1761. The question refers to the mere caltivator, to the rvot?-He will not displace the rvot; but it has been found, in the case of the indice planters, that

the rvots have sometimes been very much oppressed by them; that they have been compelled against their inclination to cultivate the indigo plant and to receive advances a instances of this species of copression are stated in the despatches I have referred to.

176%. Have you rend the evidence taken before the House of Lords in 1830 on this inquiry ?- I have not-

1763. Has not the occupation of land by Europeans rather acted as a stimulus to industry, and increased the demand for native Ishour?-I should think to a certain extent it must have done so, but the natives have not bithorto been at a loss to obtain employment from the land. The indigo manufacturers have no

1764. You say that it has been the duty of the Government rather to assist the natives in prosecuting the acts of industry ?- I think that has been the object

1765. Will you inform the Committee how and where the Government have assisted the natives in prosecuting the arts of industry ?-By the security that is afforded to life and property, by the moderation of the assessments, and their permanent limitation where these have taken place, and by the protection that the natives enjoy under the British Government from external invusion and internal insurrection, and by removing all obstacles to the free application of labour and the free enjoyment of its produce.

1766. What grounds have you for supposing that the life and property of the natives has been better secured under the British Government than under their own native government?-By the establishment of independent tribunals of justice, which under their own government had no existence,

1767. Does not every Mahomedan history with which you are acquainted, or even a native history written in English at Bengal within the last 60 years, familiarize you completely with instances of perpetual oppression on the part of their rulers, before the British acquired any territorial dominion in India 2....I administration for some time anterior to our possession of the country.

1768. Do you consider the introduction of skill and capital into a country, or the assumption of the whole civil and military power of a country, together with the whole of its territorial revenues, to the exclusion of the natives in a participaa great benefit, and I think underproper limitations British skill and capital may be (445.-I.)

N. R. Edwanstone,

very successfully employed, and to a certaindegree has been so; what I object

1750. Are you aware what is the total number of Europeans actually employed

1770. Are you aware what is the revenue derived from the number of Euroneans employed in the indigo factories?-I am not.

1771. Are you aware what is the amount of revenue derived from that source? -I am not. I could have no knowledge of these subjects since my return from I dot recollect having seen any statements of the kind

of increased wealth and comfort among the cultivators?-Not from my own knowledge and personal observation; but I have russon to know the fact, as I well remember that the semindar of Tirboot was remarkable for the excellent manage-

ment of his lands; but the great improvement in this and other districts I am dis-1774. Did not these perpetual disputes arise from the circumstance of the uncertainty of the boundaries, in the cases of the indigo plantations : you talked of there being conflicts and shedding of blood, did they not generally arise, not from the circumstance of the cultivation of indigo, but the ancertainty of the boundaries ?- I think it is stated, in the reports accompanying the despatches on the subject, that they are occasioned principally by the ryots receiving advances from different persons for the same crop, when each of the parties making the advances endeavouring to enforce the fulfilment of his contract by means of an armed force, conflicts and affrays ensue. I um speaking from a perusal of the papers.

1775. Does not that arise more from the peculiarity of local circumstances arise from the avidity of the systs to receive money, and from the proceedings of

the servants of the manufacturer.

1776. Are not they generally Europeans who make the advances that you are speaking of ?-Yes, through their native agents. 1777. If the persons who made the advances were natives, do you think the

same result would follow?-Native manufacturers would be much more easily 1778. In such instances as have occurred from the misconduct of the indigo planters, are you aware whether it has arisen from the employment of improper

adjusted of my being intimately acquainted with the details of all those proceedings. What I have been stating is derived chiefly from a perusal of the despatches intely received on that subject; but my opinion with regard to the projudicial effects of the admission of Europeans renerally as landholders into the country, is not derived from these communications, although I think it is very much supported by them. That opinion arises from a general knowledge of local affairs in India; from my acquaintance with the habits, character and populiarities of personally acquainted with the management of an indige factory. I have never been in a situation to acquire a personal knowledge of them 1779. Has not the present system of exclusion of Euroneses very much nar-

rowed the means of selection which they can have of European agents at these subject, nor have I sufficient knowledge of the system to form a judgment on

1780. In Nuddes are all the indigo planters Europeans, or are there any Mus-

1781. If two native planters had made advances to the ryot, would not they done?-Certainly; but as I said before, I conceive that the local tribunals are fully capable of controlling the natives, but that they are not efficient in conning the context of suropeass.

1788. Why could not they be made efficient to that object?—The high tone of the European character itself, the influence and connections that a British subject

PUBLIC.

turns of Franchisis with the local fluctuation, a fulfing of imperiodity over its improvement of the influx of government of the influx of improvement of the improvement of

ment depending upon British skill, energy and enterprise.

1753. Reversing to the topic of the opened the provenment entablishments in India, will you state to sur what advantage to the public service appears to pour torself from conducting so much of the public burners of the country through the medium of boards. — In a object of the exalishments of become of course was to railwise the sure medium of the country of the public burners of become and course was to railwise the sure efficient and well qualified for their dusings, that doplet in a darrangeously securious productions of the country of the collector of revenus, seems on we very expediently dopled in the Board of Revenus. It would be impossible to me very expediently dopled in the Board of Revenus It would be impossible to the country of the cou

The Military Board, the Marine Beard, the Board of Salt and Opium, and the Beard of Trade. 1785. Does it come within your knowledge whether the individual members of

the several boards do take an active part in the conducting of public business?—
While I was there I had resson to believe that they del no; but the president
usually takes the lead in the business, as is the case, I believe, in all boards.

1786. The president and the secretary. I presume, are the official members?—

The production is to efficiently amounts, whench of course by the executive control of the course of

of the Revenue Board; the Miliury Board is constituted upon a very different principle.

Processing the Control of Salt and Oplum detached from the Boted of Revenue?—I believe because the business was found not burtheraccouse in addition to their other duties, and also because all and optiom are beauches of revenue so very important as to have been thought to require a special and exclusive superintendence. I believe these are the grounds on which they were

1790. In a government eigensystanced as the Indian government is, does it not appear to you peculiarly desirable that the executive powers of the government in that country should be enconcentred as much as possible in the hands of one individual?—As a general rule or principle, I think so certainly. I consider the constitution of our ludius provenients to be well adopted to the classacter, habits and

individual (which I conceive is essentially the actual constitution of the Indian (445.—L) E E 4 government

Esq. 17 April 1832. generation, and is regarded by the natives to be literally rook) harmonisten with his from a given remain to which from the entirely revised for Founded history, they have been accustomed, and is calculated also to accure that vigous, prompittals and decision which the manks of Beithis flunds have shown to be to necessary must not efficience in the ever recurring emergencies of our ristantion in that comman, The existing constitutions of our fluids part of our ristantion in the comman, the contract of the

1798. Is it not in the nature of such a constitution as the executive government to daily impede the course of public business?—By no means, in my opinion, to an extent that in any degree counterfalances the advantages derived

1703. We will suppose the laderiduals now composing the councils of the Governoe-general populated makes to desingle regulative time reactive denies, and to set, if necessary, upon certain occursion in the nature of a perty control of the Governoe-general would in the year opinion that under marks state of the Governoe-general would be to you opinion that under marks state of government worked more capacitatively and more advantageously to the public interest.—I expose not not take in a government to constituted united British India, it is not exposing extension to the state of the control of t

1734. By legislative power, I mean the power of framing have for the local government in India?—A separate council might no doubt be formed for that purpose, but I am of opinion that any laws so enseted should still be subject to the confirmation of the Government itself; but for the mere practical purpose

of framing Regulations, I think a separate hody might be experimely farmed, 1738. Would you explain to the Committee what you mean by the confirmation of Government—I—mean the confirmation of the Government —I—mean the confirmation of the Government and Consolidation of the Government of Consolidation of the Government in Consolidation of the Government of the Government in Consolidation of Cons

1797. In what year were you sheeted a Director?—In October 1880.

1798. Flow soon after did you become a member of the Committee of Corre-

spondence?—It was only in April of last year that I been Committee of Correspondence.

1790. During these I. I years after your stam from filling the important station you held in India, on what committees of the India Bones were you appointed?—According to the established practice, I became a member of the Committee of Supplying with fertilistations, and then by gradual rise I became a member of Committee of Buying and Warristones, and afterwards, an already stated, a member of Committee o

my arrival in England, as the question implies; I was elected two years and a quester after.

1901. What compare the control polarity data.

What compare the control polarity data.

Wherebourse filled a Director of Securing scapalind with more important matters of the government of Infin?—As a member of the Court, when the Court metals he has an opportunity of discussing any subject that is brought believe them: for instance, when drafts or reports oone from the Countities of Courtpulantaes or other consistency any position of may other subjects, there is no instance, when drafts or reports oone from the Countities of Courtpulantaes or other consistency any position of may other subjects, they been consistent or the consistency of the consiste

with the subject; so that by these means be is qualified to discuss the analysis when it is brought forward for decision. --Ven, lit is so. It is at the option, of course, of each of the Directors to take such share in the discussion of we subject is to may think proper. Some take more and some lens. Some are in of despatches or other documents of the work of the property of the subject is the subject in the discussion of we have a subject in the subject in the subject in the subject is the subject in the property and thereby making themselves fully acquainted with the details of the analysis; they are not thereby the coulded from obtaining that knowledge to which the quotient of the subject; they are

NOM. Might it met hougest that individual who have filled high nations will be greater than the property of th

1804. By the continuation of the Court of Directors, as it exists at present, it is justice member of such Court edigible to the claim of the Court is much as the sentence of the Court can be considered in the Court happen that the jumine member should be appointed to the chair of the Court. 1805. It is, however, a matter within the competence of the great body of the Court to select the individual of all their dain who, whether he may have been

a memour one, ten, or twenty years, may in their judgment be best entitled to the chair—Certainly it.

1808. The Committee understand that the functions of the government of India, so far as the Court of Directors are concerned, may be considered as bound up with the Court generally, but that among themselves the Court for

bound up with the Court generally, but that among themselves the Court feet their own conventioned divide them functions into different committees, convenposaling to the different departments of the state of India; is that a right view if "That is the correct view. 1807. It is understood by the Committee that the chairman and depayschairman of the Court of Directors are, en gelfeet, unembern of all committees,

and from their station have the direct central, or at least a leading influence is every department of indom administration, as fir as the Court of Direction is conceived; is that sol—They have. As the organs of the Court, and as the region of each committee when they have the committee of the court of the court, and as the court of the cour

described as organs of the Court, must be members of other committees officially, and cannot while in the chair attend regularly to such committees; do you or do (445—L)

you not consider that in such circumstances an advantage is derived from these

1800. There being at the same time no bye-law or other legal impediment on the part of the Court, to the selection of any individual to the clasir, if he should be pre-eminently qualified in their judgment to fill it ?-There is no such

1810. And the Committee understand that the despatches are open to every pondence or not; and that practically many members of other committees do

has access to despatches and documents of all kinds that are not secret.

1811. How many clames of committees are there?--There are three general committees, with subdivisions 1812. What public advantage results from there being so large a number of

Directors as 94?-That it facilitates the transaction of business, by their being divisible into committees, and also it seems to me to afford a latitude for the introduction of various qualifications that are useful and necessary. 1813. Do you think in your opioion that the substantial business of the India

House could not be conducted with a diminished number of Directors?-I will not on so far as to say that I am not aware that the existing number of Directors is exiculated to clog and impede the progress of business; it does not appear to

me to do so in practice. 1814. Supposing the East India Company was to divest itself altogether of its mercantile character, I presume that there would be an end of committees of shipping, warehousing, and so forth; under such circumstances, by what number of Directors could the public business of Judia be in your judgment satisfactorily conducted?-There is no doubt if that was the case that a considevable reduction in the number of Directors as well as in the establishment

might be effected. 1815. In the event of its appearing to the Legislature desirable that the supply of young men destined to fill the civil offices in India should be provided from opinion would result from the remuneration of a Director being in the shape of salary instead of that of patronage; for instance, whether it would lead to a different description of men being appointed ?-I do not think that any injury would result from the change. On the contrary, I am rather dimensi to think it might be an improvement, as it would constitute a stronger obligation on the individuals appointed to attend to their duties; and if the existing system of election were continued. I do not think it would lead to a different description of men being appointed, unless the salary were so considerable as evently to

extend the field of competition. 1816. Do you consider it might probably happen that a limited number of Directors so appointed would feel it more imperatively their duty to take their full share in the transaction of the duties of the Court?-It appears to me it would impose practically as well as morally an additional degree of responsibility

upon them. 1817. I would ask you generally, whether upon any of the points to which you have been examined by the Committee, or oo any others which they have omitted, any suggestions occur to you that you consider it important to the object of our inquiry to state to the Committee?-I am not prepared at this moment to suggest anything in addition to what I have already stated; but should anything further occur to me I will submit it to the Committee in writing.

Mons. L'Abbé

J. A. Daloiz,

23 June 1532

Sabbati, 25° die Junii, 1882.

JAMES A. STEWART MACKENZIE, ESQ., IN THE CHAIR.

Mons. L'Abbé Jean Antoine Dubois, called in ; and Examined. 1818. WERE you long in India?-I arrived in India in 1792, and left in

1823: I was about \$1 years in India 1819. In what capacity were you there?-As a Catholic Missionary from Paris (des Missions Etrangères), but belonging to the Propaganda Society.

1820. What part of India were you in particularly ?-Tanjore, Camptic, and 1821. What is the present number and state of the Catholics throughout India?-In answer to that question, I will briefly state, that owing to several reasons which have been fully unfolded in my former works, chiefly in that entitled " Letters on the State of Christianity in India, &c." which is before the public, the Christian religion has visibly been on the decline during these past 80 years. When I arrived in that country in 1792, in the expacity of a missionary, I was credibly assured by the old missionaries I found there, that before that time the number of native Catholics in the peninsula, to the south of

the Krichea, was far above 1,000,000; the actual number cannot be determined with a positive precision, but it may be done by approximation. During my abode of more than 30 years in India, I endeavoured to ascertain, as far as possible, what was the present number of nersons of this description, and I believe that there is no exaggeration in carrying their aggregate number to about 600,000; about 160,000 will be found in the island of Cevlon, and between 400,000 and 500,000 in the several provinces of the south of the peninsula; however, the greatest number amongst the latter live on the Malaber coast, from Goa to Cape Comorio, including Travancore; and from the information I received from several respectable quarters, I believe that the number of Catholic Christians in that tract of country amount to above 300,000, the remainder are disseminated over the provinces of Madura, Carnatic, Mysore, and Deccan-That numerous body of Christians have for their chief religious guides eight bishops, viz. four titular bishops who are appointed by the court of Portneyl, and four bishons in sortibus indications, with the title of apostolical vicurs, directly

appointed by the Holy See, without the interference of any temporal power. The titular bishops appointed by the court of Portugal are the Archbishop of Goz, the primate, and the bishops of St. Thomé near Madras, Cochin, and Crangomore on the Malibar coast; the two latter bishoprics have been vacant during these pest 40 years, they having no revenues for their support, and the Portuguese government not being disposed, it appears, to pay bishops living in countries submitted to a foreign power.

The four spostolical vicars appointed by the Holy See are stationed at Pondicherry, Verapoly near Cochin, Bombuy, and Agra; the former is a Frenchman,

In reneral the Catholic bishops appointed by the Holy Sce in Asia, and even in Protestant countries where the spiritual authority of the Pope is disregarded, and having the true episcoool characters, they are what is called hishops in partibus infidelium, the titles of their bishopries being derived from ancient bishopries in Asia Minor or in North Africa, before the overthrow of the Christian religion in those countries by the Mahometan invasion. Thus the titles of bishops in portious are merely nominal, their real episcopal sees being either reduced to ruins or entirely occupied by infidels. The principal difference between titular bishops and hishops in partitus, or apostolical vicers, is that the former, after having once received from the Pope the emonical institution, can no more lose on the Pope, who can at his will revoke or suspend their spiritual powers, and order them to cease their religious functions.

Each

FUBLIC.

Mons. L'Abbi
J. A. Dulois
23 June 1882.

Each hishop is axisted by a number of priests proportionate to the extent of his jurisdiction; most of those priests are natives of India, educated by European coclesisates in seminaries established for the purpose, and ordained by the bishops.

1822. What system would you advise the British Government to adont for this.

question is more intricate and much more embarrassing than the first. It cannot be decird that, generally speaking, the Christians in India are held in a state of have embraced it are considered as forming no longer a part of the social body. const and at the island of Caylon, the Christians have, like the Mohometans, formed a sensence social body, living without molestation according to the rules of their religion, and peaceably carrying on the several trades and professions common to all other Hindoos, without the difference of religion affecting their temporal interests or their social intercourse with the generality of the Hindoos. They are not admitted, it is true, to the familiarity of the katter in general, but in remeral intercourse of society a full scope is given to their industry, and there engaged. Many among them are chiefs of villages, and live respected. When my political incapacity has been imposed upon them anywhere in India on the score of their religion; and under the Hindoo and Mahametra princes the dears to civil and military offices were always opened to persons of merit among them, without regard to their religion. I am fully aware that there exists a strong prejudice against them among a great many Europeans, who are disposed to dishonesty; but from a long personal and attentive observation, I am thoroughly convinced that so far from this being the cose, if an impartial inquiry was made on the subject in morality, probity, and honesty, the Christians would set the better over the other castes, and the balance would be greatly in their favour. I do not mean that a great proportion of rogues is not to be found amidst them, but it is proportionally less than among the other classes of Hindoos. Many among them have been admitted to pinces of trust under the British Government, and I know positively that they have most of them discharged their duties with fidelity, and to the entire satisfaction of their comployers,

Thus owing to return Lancau ones full yet paleard in my foreign wash, a deliver, and the control of the control

materially improved if their religious instruction and moral education were better attended to, and, above all, their religious guides were placed above the state of pennsy, I may say beggary, in which they generally live. It is well known that more more than the pennsy of the penn

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 6

most of these have cooling also for dark support but the sensory unissense of this discussion flows, who are generally related to the contract flows to a state of great powers, and the contract flows to the same of a little contract flows to the contract flows to the contract flows to the contract flows to the contract flows the contract flows to the contract flows the contract flows to the contract flows the contract flows to the contract flows the contract flows the contract flows the contract flows the contract f

At the same time, I cannot now of what saility one closes from timely being compared to the control of the cont

it, to have in future the four or five spostolical worse appointed by the Holy See for India exclusively chosen amongst English or Irish born priests, assisted by two or three of their countrymen, beginning with the island of Ceylon, as containing the greatest number of Catholics. I am of opinion that this arrangement would be conducive to the good of the country, and produce the best effects. I know that the native Catholics of India are, in general, anxious and would be proud to have religious guides belonging to the nation which rules over them a and this circumstance would contribute to render the Catholics more respectable. An English or Irish apostolical virus should at first be appointed for the island of Ceylon, whose religious wants are great indeed. I know from good anthority histop of Goa, under whose spiritual authority the island is placed, and who would not see with indifference so large a part of his flock withdrawn from his religious power; but all things would be satisfactorily adjusted by negotiations with the Holy See. I think that such an arrangement would be highly conducive to the welfare and prosperity of the island, and I have been proud to find that a gentleman of rank, who has administered justice during many years in the island with so much credit to himself, and so much benefit for the inhabitants, Sir Alexander Johnston, who is so well acquainted with localities, and with the character of the inhabitants, coincides in the same opinion with me.

I owe apologies for the incoherent style and grammatical errors of my statements in a language with which I am but very imperfectly acquainted; but I have judged that my evidence in bul English would be preferred to another in a little better French.

1893. In your answer to the second question, you have referred to the expendince of the British Government giving salies to Baropean missionnies; nas if or fast in to theen the uniform practive of the Broom missionnies; nas if or fast in to these the uniform practive of the properties of the Government to interfere at all in the project of the Government to interfere at all in the

gation of Christianity; the interests of religion have been left to themselves, and I have considered that they are without any famils other than those contributed by their own poor flocks, whereas other worships are in past supported by funds raised elsewhere , in some cases by tithes, in others by postions of the harvests

ference of Government, except to that limited extent, injurious.

1884. What do you mean by the word tithes?-I mean a certain portion of the crop; a stare of a crop for the religious worship was contidered a title.

1825. When does the portion of the produce of a crop prise as a right to be Syrian priest or any other class?-This applies, I ought to say, only to the tioned that the Government give no preunitry assistance, I must make an observation : in two or three instances I made application, by means of intermediatory magistrates, to the Government, representing the state of the chapels, the expense of extechists, the repairs of the chapels, and several other disbussements, for the candles and so forth. And once when I was in the Barumhal, I obtained an allowance in respect to those expenses, and also in Mysora : and in Mysora ! obtained an annual allowance or grant of SOO suppes for the same purpose.

1896. What was the name of the apostolical vicar at Pondicherry, during the

latter part of the period of your residence there ?- His name was Louise Heber. Josep. 12º die Julii, 1832.

Ray, J. H. Batten 12 July 1832

JAMES A. STEWART MACKENZIE, ESQ., IN THE CHAIR.

Reverend Joseph H. Betten, D.D., Principal of the East India College, Halleybury, called m; and Examined. 1827. HOW long and in what connected have you been connected with the

East India College?-Since 1805: I was then amounted one of two profesors in the classical department, but was not to be called in till the number of pupils should exceed 40. The college opened in February 1806, and I commenced my duties in August 1806. I remained professor till January 1815, when I was appointed Principal by the Court of Directors, the appointment being confirmed by the India Board, and was required to continue my lectures in the classical department, in addition to the duties, but on the same salary, as Principal. In

that espacity I have remained over since.

1828. What was the design of that institution, and what was the original plot College was to supply a want, which had been felt and acknowledged by the government both in India and at home—the want of qualifications in the great body of the civil servants, commensurate with the extent and importance of their 1800, quoted by Mr. Malthus, in a pemphlet, entitled, " Statements respecting the East Incla College," 1817. Of this Minute the following extracts are found

P. G. "To dispense justice to millions of people of various languages, moments

Europe; to maintain civil order in one of the most populous and litigious regions P. 11. "The civil servants of the Bast India Company, therefore, can no longer

be considered as the agents of a commercial concern: they are, in fact, the ministers with a reference, not to their nominal, but to their real occupations. Their duties are those of statesmen in every other part of the world's with no other characteristic

differences than the obstacles opposed by an unfavourable climate, a foreign language, the peculiar usages and laws of India, and the manners of its inha-

httms.

"The proportion of the civil acream in Bengal who have made once a fact the program bounds the attained made and the fact that program is not the civil program of the proportion of the civil acream in the civil acream

government.

"It must be admitted, that the great body of the civil acrounts in Bengal is not a present sufficiently qualified to discharge the duties of the several archaeas tathens in the administration of this empire; and that it is particularly deficient in the individual forms of the several and achieves the property of the civil archaeas tathens in the administration of this empire; and that it is particularly deficient in the individual forms former and an delived because of the several archaeas.

in the judicial, fiscal, financial and political branches of the government.

"The state of the civil services of Madras and Bombay is still more defective
than that of Bengal."

There is also a seeech of the late Mr. Grant, in a dehate at the India House.

Pedramy Sci., 1877, proceed on our one on the common in a causate 10 the 1886 in 1889; Pedramy Sci., 1877, proceed in the Achieval Coronal for April, 1877, in this speech to be declarer that the Court of Direction, in reducing the grand collegistate estabishment which the Hauguis Wilderley (in parameter of the view above stated), feather conviction of the necessity of missipproved columnion for their civil severate, but thought that they could start the same end, not only at smell has a populabati in a much better manner, at home. To prove this, he quotes as follows from a deputch drawn up by the Court of Directions in 1804.

"Whatever European colonition is deemed peoper for our servants, we are decidedly of opinion they should necesive in Europe, and that their application in India should be confined chiefly to the study of subjects properly Indias; who we therefore in contemplacion to establish sub-regulation as thomeswishil afford the means of their acquiring, with classical and multicantical instruction, elements of those branches of neces most medial in our review above.

He proceeds to assert, "that even before Lord Welkeley went to India, the want of an appropriate institution in this country for the instruction of young mendershood for the service of the Company already was felt, and the outlines of a plan of schoolstop proper for that purpose (nearly such a plan as was alterwards adopted) aggregated."

He likewise quotes a Report of the Committee of Correspondence of the Court of Directors, dated October 1804, to the following effect:- " As the Company's early entrance upon the duties of active life (also year necessary in their case), they should receive an education, comprehending not only the usual course of classical learning, but the elements of such other parts of knowledge as may be more peculiarly applicable to the stations they bare to fill. Independent of the improvements which they may receive from establishments in India in studies properly Oriental (improvements which cannot commence till some years of youth are already past), there is a most important period of life to be filled up before they leave sequisition of European literature and science; and, in a word, on the use which is made of it must depend, in a very material degree, their future character and varieties of situation, tusorage, example and other circumstances incident to persons one course and standard of appropriate education for them; and to this end, one place of instruction. There they should be trained with care, and required to give proofs of real proficiency; in order to which they should be subjected to the test of strict and impartial examination, a test bardly to be looked for in all the different modes and degrees of their present education. Nor ought it to be the only object of such a system to form good servants for the Company; the system should aim also at making them good subjects and enlightened patriots. They are to leave their native country at an early age, to pass many years of life among a people

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 688

system of education which it found established at the English universities. The next department had more immediate reference to the peculiar destination of the Rev. J. H. Better fessors reducing their instruction to a catechetical form, and referring to a textbook; from which, and from the comments of the lecturer, the student had to and the history of Asia, as well as in the Oriental languages; according to the following statements in the "Preliminary View of the College," 1806:

" After laying thus provided for the agasistion of learning in general, it is further intended to furnish them with the means of instruction in the elements of Oriental literature. For this purpose they will not only be taught the radiments of the Asiatic languages, more especially the Arabic and Persian, but be made acquainted with the history, customs, and manners of the different nations of the East. Among the variety of studies which may be pursued with peculiar advantage in this country, it is not to be expected that any very great portion of their time can be allotted to the acquiring a knowledge of the various languages of the East; but it is presumed that the main object of the institution will be attained, if the students be well erounded in the rudiments of the two languages already specified, and that on their leaving the college such instructions be given them as may enable them to prosecute their Oriental studies during their passage to

Such were the essential departments of instruction. There were also French, drawing, and fencing masters connected with the establishment. The students were to be admitted at the age of 15, on nonmation by a Director; but not without first passing an examination in the Greek Testoment, in two Latin classics, and in the elements of arithmetic. Public examinations in the subjects of the several lectures, after the models of those at the great colleges of the

1831. Did the system undergo any material change prior to the Act of Parliament introduced by Mr. Wynn in 18255—Several clumges, and some of them important: one change immediately after its institution. The Oriental professor, who was to give lectures in Hindu literature and history of Asia, was allowed to substitute the tenching of the Sanscrit and Bengalee lenguages. This alteration, his evidence before the Lords Committee, as above quoted. But it was attended with the loss of what may be considered equally or more important for the civil effect of introducing a demand for more than two lunguages, and thus of increasing with minor changes in other departments; the general effect was improvement, resignation of the first principal. When I was appointed his successor, I was required to continue my classical lectures; and from that time there has been no provision for divinity lectures, properly so called. The defect has been in some measure supplied through the classical department. A portion of the Greek Testament, with appropriate collateral sending, under the direction of the proand my own lectures to the senior students are so conducted as to involve, more or less directly, the study of Christian writers of eminence (such as Paley, Butler, &c. &c.) upon Revelation and its evidences. The pulpit also of the college chapel is filled by the principal and professors themselves. There has been a complaint of the want of more direct lectures on religious

subjects. The present system has the good effect of giving a taste for these subjects in connexion with classical literature ; but a regular course of reading upon 284 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

PUBLIC. Ber. J. H. Hotten, D.D. 12 July 1883.

*gijl. (estateelte is nodgraaf province), night be introdueed with advantage, if metrod by an elegate set at a finel examination. Other changes in the college were that of the age of admission from 15 to 15, the latter tested one orly on age of the centring previous attainments, or habits anitiate to the state tested one orly on age of the centring the contract of the state tested in the contract of the centre of th

desce there; the introduction of an improved code of laws by the Court and India Beard, in which the power of expulsion was given to the principal and professors forming the College Council, and the Bittiop of London was appointed wittor to them and to the students.

Another change was the institution of tests, upon which subject I would bee

leave to quote from a "Short Sketch of the Established Course of Studies at the East India College," drawn up by me in 1896:

"In 1814, when laws for the government of the college were framed by the

authorides specified in Act 20 Geo. Rc. 150, a text was enablished, by which every manlest was to have hisporicious yearstraine before ne could oxism his final exclidates. This text is confined to the several Oriental Inequages required for the presidency to which the submets in continueds, and it thus described in the regulations 1 fal. Writing the citatener peculiar to each language in the first and highly perfect the confined or the second oriental to the continued of the Pervision and Hinten. Mr. A competent knowledge of the readinest of each language. 4th I. Reading, translating, and pursing an easy passage of each of those languages, and if Succert the one, furnishing an analysis of

"The College Council, in 1815, suggested the propriety of adopting an European test also, 'an bumble one, just sufficient to show that the student would not be allowed wholly to sugglest the European departments, and to confine his occardions basely to a preparation for the Crimital test." Accordingly, in January 1818, the following Magiliation pussed: "No trademity and the Crimital test has shall obtain the testimony of proof profession; in one department of European Identical, or of pro-

forency in two at his last examination previous to larging the college."
"It is evident that the above tests respect only the minimum of qualification

absolutely measury to be secured before a student can obtain his certificate, in order to prevent an absolute waste of time when at coolings, and an inter incompetency for his doties on leaving it. Their effect, therefore, is limited to those who are influenced by no higher motiver than form and recessity, whilst this section is sections of the great majority are excited by the other parts of the system, and are in upportion to their house, not merely of passing the tests, but of obtaining

those rewards and distinctions which are attached to industry and merit in the

several departments," 1882. What has been the effect of Mr. Wynn's Act upon the college, and, to far as you are aware, upon the civil service i-The Act of 7 Geo. 4, c. 56, was professedly an expedient for the purpose of supplying a number of writers, more in proportion to the demands of the Indian service than could be furnished by the substituted an examination without residence at the college for the collegists course. and it shortened the collegists course in pertain cases. The effects of the out-of-European and Oriental, required at the college, and the minimum of qualification sufficient for the London Board; a contrast most invideously felt by those detained at the college, and producing discontent and alienation, especially in its senior students; detrimental too to the college, by the contrast between the expense of education there, and that sufficient to procure the limited attainments necessary for passing the Board; whereas, if it were required to obtain elsewhere instruction, at all commensurate with the combination of European and Oriental learning supplied by the college, and due to the demands and provisions of the civil service, parents would certainly find the cost at least equal to the expense of residence at Haileybury, an expense below that of an university, or of an eminent private totor. On the other hand, the college has felt some advantage in losing the offium of exclusiveness, as well as in having an outlet for students, whose continuance there would be injurious to its discipling, though their offences may not have been marked enough to warrant their final expulsion. In fact, several of the persons who have passed the London Board were withdrawn, or sent from Haileyhury. Ilnoo the service I consider the effect to be, with one exception, detrimectal; first, by

ON THE AFFAIRS OF THE EAST INDIA COMPANY ORK

omitting in the "plan of examination" (otherwise in many respects satisfactory) any Bay, J. H. Sta grafted upon such an education. This will appear by reference to the "Plan" and "Test;" of which the latter, as originally settled, is as follows. Subsequently an

"No candidate will be deemed qualified unless be found to possess a competent elements of algebra, including simple equations: it being understood that apperior attainments in either of the departments of literature or acience comprised in the dered to compensate for some deficiency in other of those departments. These are the minima of qualification. The candidates so qualified will be classed in the order in which they may reach bigber degrees of attainment, and such classification will determine the relative rank in the service of the candidates when

Thus the London Board examination, not withst anding the learning and integrity March 1889, of 84 persons who have passed through the London Board, no one the third class: slowing the tendency of a mere test to run rapidly down to its minimum as a standard. The lowness of this minimum has also undered it almost impossible for the college to raise its own ultimate tests during the time, from the invidiousness of the contrast as felt by the parties respectively subjected to each, To the above defect is to be added the substitution of mere testimonials for a probationary course of conduct as at the college, affording a test of character not to us and the public only, but to the students, one with mother, materially affecting the value of their friendships and connexions in India. Again, the other result of decidedly detrimental both to the college and the service. It takes away the best men of the college just at the time when it would be most advantageous to themselves and to the rest that they should stay there, dentiting it of the example of jecting the college to be judged of, in India, by the qualifications of persons have done something, perhaps as much as they well could, by imposing such demends upon students leaving prematurely, as it was, in their sudgment, proper to exact, consistently with the low ultimate test statuteably required of those going out regularly. This is a very imperfect check; and India appears of late to have been overstocked with civilians not detained long enough in Europe for their sound and as well as from the London Board. In stating that I thought the Act 7 Geo. 4, c. 56, which are more necoliarly taught at the college; for instance, Hatley Frere, chosen from Westminister achool as a prize writer, and a very distinguished classical acholar, which he would not have been qualified, as he has since proved himself to be, for

the civil service of India-1888. Has the college had to contend with any peculiar difficulties; and have you any considerations to offer in answer to the objections which have been alleged against it, especially to those which have been lately urged?--- Lthus lad to contend with many difficulties: first, the novelty of the institution, with no sasciation of (445.-I.)

feeling in its favour from parents, &c. &c. &c. having been educated there; a diffion the part of those wito but been long accustomed to look to patronage, unemalified by any similar test of attainment and conduct. Again, mistaken views and expec-tations respecting it, even from its patrons themselves, as if it could effect its object, both moral as a place of probation, and intellectual as one of qualification, without many failures, and some sacrifices. Hence surprise at those sacrifices. when required, and interference with the college respecting them; and though they were made by the Court of Directors, very honourably to themselves, in the first instance, and though afterwards, on finding it difficult for them to continue that course, the Court also honoumbly gave up to the college the power of expulsion, there still remained, in other quarters, a disposition to interfere, and to follow up public. Thus a prejudice was produced against the college which naturally affected the students themselves; some of whom, not liking to go to India, and others, last in 1892 not being in fact general, but disapproved by the great body of tively well established. There was, indeed, a reasonable hope on the part of its conductors of its having overcome those and other difficulties, till the Act of 1886 shook and mutilated the whole collegists system. Another difficulty was the insulation of the college at Haileybury, thus removing its authorities from the support of other collegiate bodies, and its students from the means of correcting their opinious by comparison and salutary variety of intercourse. This difficulty still pennins, but it carries with it some good as well as cvil; keeping temptation to vice and to brawls in towns more out of sight and immediate reach of the inexperienced and well-disposed, though it shuts up a body of youths by thous-selves, without a sufficient safety-valve of amusement, and tempts them to resort for it by expeditions to the neighbouring towns. This evil, it appears to me, would be much mitigated by an increased age in the students; a change which, besides other advantages, would go far to remove another very material difficulty, that of adapting the same collegiate discipline, which suits the older students, to persons many of them schoolboys in age and habits. A further difficulty is the hardship of being judged by one rule and working according to another; and hence objecing the college. These objections proceeded first from those who had very school, and objected to the university-kind of schokashin, and air and expense of a collegiste institution. These objections, I would hope, are in a great measure gone by; if not, they are sufficiently unswered by the considerations which have been already alleged. Secondly, from those who considered it essented you Oriental seminary, and prenounced upon it exclusively according to its power of enabling youths to enter immediately on the public service in India. This is quite unjust; we have seen that the Oriental department was not originally intended to do more their studies on the voyage; and latterly, although the Oriental instruction has been extended so as to bear a greater proportion to the European than originally, although it has supplied the service with many most distinguished impuists, and has its average working must necessarily have respect to its tests. Now those tests are sufficiently large in their demands to affect the attention which would otherwise be

sufficient for the purpose of guildiring all who knotly pass them for immufation entrance on the Indian service. Of an opposite bank at this objection is that which considers the college as ferming an Indian class. It is not, however, found to have that effects on the contrary, Mr. Ephinstone (Sevidence, 2004) "thinks the property of thing connected with it." They are governing a polymica against a faint and everything connected with it." They are the property of the property of the following the property of the property of the property of the property of the second of the property of the property

I. PUBLIC. IV. J. H. Botte II.I.

and universities; while at the same time it corrects the senarate partisanships of these schools, and sends out to India not so much Etonians, or Westminsters, as Englishmen; or, I should rather say, perhaps, considering the large proportion of students from Scotland, as Britens. Even, however, if it had some of the tendencies to an Indian caste which have been strubuted to it, there will be a compensation in its enabling those who are destined for the Indian service to form friendships. -at once a strength to that service, and a solace to themselves when separated from their native country. On the other hand, if something of an anti-Indian "prejumen from Haileybury, it would probably be found in an equal, or rather greater, degree among Englishmen of that age brought up at any other place of public education in this country: as would, I fear, the extravagance which he also thinks chargeable upon the college. I am not aware of anything peculiar to Harleybury to cause such alienation from India, but of much to produce an exposite feeling. I may observe also that the extravarance of individuals there is no part of the collegiate system, but directly opposed to it; and cannot anywhere be effectually prevented but by the control of parents. Further, as the Oriental education of the college has been judged by a different standard from that to which it looks, so more recently the European education seems to have been judged in the same manner. It has been estimated by the wishes and opinions of those who would have all the civilians sent to India advanced in the sciences of political economy and law, as far as is now the case with the bighest proficients in those studies at the college, rather than by what the great body can be expected to do at so early an age, with so many objects of attention, in so short a time, and with tests so inadequate to answer such an end. Not to mention, that the subjects of that education are not selected by competition, but placed there by patronage; and none but highly accomplished in ween and statesmen; but that it should foreigh, so for as it could under the actual circumstances, everything wanted for the years highest functionaries, and send out the rest with a fair average of general accomplishment. The degree of proficiency required for passing its European test was not fixed specifically to the departments of law, or of political economy, but allowed to be attained in other branches. And it must be recollected, that much of the European education at the college is of a kind not to show itself directly in the immediate discharge of official duties, but in the general enlargement of knowledge and elevation of intellectual character.

timony of others, of the efficiency of the college, not withstanding those difficulties been present at most of the scenes which have drawn unfavourable attention to its and I have long, perhaps too long, filled a most ardnous and responsible situation there; but notwithstanding my knowledge of all its difficulties, and the full force of the objections to it. I do believe that it has in a great measure fairly enswered what could reasonably have been expected from it in its original foundation. although it has not come up to the autent wishes of myself and my condutors; nor, it seems, to the views, perhans more speculative than practical, of some of those who have latterly interested themselves for the good government of India. My own experience at the university, before my appointment at Halleybury, in the classical department there, and as principal, with the means of knowing all that has been done in the other departments, has led me to wonder more at the reach and variety of attainments, on the part of those who have given themselves fairly to the studies of the college, than at the imperfect acquirements of others, coming with inadequate prior education, and at too early an age, detained there for too limited a time, and looking to tests which are confessedly below the level, to which, under other circumstances, they might be raised. With regard to testimonies, (445.-I.) gentleman.

in India the principles and the qualifications of English statesmen. 1835. What capabilities has the college of admitting such alteration as, in your opinion, would render the education more efficient and satisfactory?-I think that it has great capabilities. The age of admission may be raised, and the preliminars The tests may, and ought to be revised; and it should be distinctly stated what are allowed to densit as a civilian to India. The college, in its teachers (nutting whole of the machinery which it has already in action, has a mulc means of educating up to any specific point which may be required, so far as is consistent with the condition of the students sent there, not being selected by competition, but anpointed from a comparatively small class of persons. In short, let it be distinctly understood what is to be done, when the system has received its due improvements, and let the college be judged accordingly; and I have no doubt that the judgment will prove far more favourable than it can be, while the education is not only limited in respect of tests, but indged without due reference even to those very tests which it possesses. As to discipline, its code might be advantageously revised, sons to admit improvements suggested by the experience of many years, and afterin proportion to the value and the cost of his instruction, and of the provision to which it lends; and let the strictest economy be pursued in every respect except cramping the tuition. I do not mean that there will not still remain my opinion, apply to modes of education independent of such an establishment. And if open competition were consistent with the nature and principles of the service, and if a due time were allowed for education at the East India College. I should not be afmid of its standing against even the universities of England,

1806 Have you sayshife to suggest respecting other nodes of qualification for the civil service in build — With registed to trait, it is my decided opinion that they are transfirment of themselver, except mater the condition of a portional that they are transfirment of the condition of a portional that they are transferred to the condition of a portional that they are the condition of a portional transferred to the condition of the condition of a portional transferred to the condition of the condition of

education of Indian civilians. Here I beg leave again to refer to the pamphlet, entitled, " A View of the System and Merits of the East India College," by Mr. R. Grant, who has expressed in the following passage what appears to me to be the true state of the case. After having objected to the plan of substituting the universities for Halleybury, first, the much longer detention, and, secondly, the superior expensiveness which it would involve, he thus proceeds (p. 109 to 104):-"There are, however, greater objections than these. I would say then, thirdly, that an education at the Universities will not, in the majority of instances, afford an enual probability of proper qualification with an education at Haileybury. In so saying, I surely cannot be understood to speak alightingly of those noble seats of learning, for both of which I feel the grentest respect, and for one the sincerest attachment. But at the universities the opportunities of idleness, and even of vice, are stronger and more numerous than at Haileybury; the discipline and superthither with little or no purpose of study; and, on the whole, while an academic the young mind too many reductions of a very notent kind, to the mis-employment of time and talents. Even among those who regularly take the degree of Bachelor of Arts, and who perhaps do not constitute much more than buil the number admitted, the examples of studious reading are not so usual as among the students. taken together, at Haileybury. At the latter institution a considerable portion read fairly, and fully bulf may be said to read hard. He must be a bold man who would say that for the Universities. I am possessed of estimates of the number of real and effective readers at both the Universities, but I suppress them, as being both invidious and unfair. I regard them as unfair by reason of the very circum-stance I have already mentioned, namely, that many of the young academics are non-readers by profession. Let it however be recollected, that the influence of these triflers extends very widely, and that their example infects numbers who have not the same right to be idle. Again, I do not mean to deny, on the contrary, I have already distinctly admitted, that much good is received at those celebrated asminaries by many who are not hard students. Still less do I forget the numerous instances of intense industry and brilliants equirements which both of them produce from year to year, or the inestimable services which each has rendered to the cause of liberal learning and useful science. Looly remark that, out of the limited number of writers annually appointed by the Company, it is highly important that as large a proportion as possible should be exercised to habits of application, and that the actual proportion under the present system is clearly larger than could be reasonably expected under that which it is proposed to substitute; fourthly, it is clearly necessery to the plan, that the conclusive appointment of the young writer should be made to depend on his acquiring some honour or distinction at the University to which he is sent." Mr. Grant proceeds to show that the mere attriument of a degree without honours would not afford an adequate test; and subjoins some remarks, full short of honours." Such are some of the objections to making the universities the specific places of adjustion for the civil service of India. I do not however, see any reason why, if Haileybury continue to be that place of qualification for civilians in general, it should be so to the exclusion of the Universities. I should consider a degree in honours at the University, together with certificates of conduct and of attendance and proficiency at courses of lectures upon law, history, and political the college of Haileybury. I should think also that a shorter residence at the there. As to other plans, that, for instance, of having the college opened to the practicable, it would obviste objections on the score of expense to the Company, and of deficient numbras at the college. But there would be a difficulty in giving a beaus to those not proceeding to India, to induce them to come at all, or to compensate them for the time employed there in studies of no direct advantage to any professional line of life in England.

(445.-L.)

. 940 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

Ray. J. H. Basten, D.D. 12 July 1812. Another suggestion is to licell be originally military, requiring the whole to come, before they suggest on service to some convents, each pull pulls part to the possession, but foreign the superior of the possession of the poss

1887. In the earlier part of your examination you stated that the lectures in theology bad been discontinued some years before the vacancy upon which you were appointed to your present office; but that in some degree the place of such lectures was supplied by lectures on the Greek Testament, and by a preliminary examination on the Scriptures upon the admission of a student into the college; do you mean that any penalty or inconvenience to the student will arise from his irnorance, in whole or in part, of such subject forming the matter of the prelimipary examination?—The preliminary examination existed before the principal gave up divinity lectures. All I meant to say regarding it was, that, together with the lectures on the Greek Testament, it secured a certain knowledge of the sacred Scriptures in the original. The penalty which attaches to a failure at the prelimi-nary examination is that of the candidate not being admitted. With regard to the lectures on the Greek Testament, and to my own, professedly upon classical literature, but embracing religiousinstruction, I beg to place before the Committee to questions, for the trial of the student's profesency at the end of the term. And I would also beg to refer to a letter from a student, now a distinguished civilian at Proprietors, 87 Feb. 1824, and published in the Asiatic Journal for the April of that year, p. 584), in which, after describing the above course of instruction, he

Syrian church which I have mentioned, and says that their bishops were ordered Persia was at that time subject to the Patriarch of Seleucia, who was anciountedly a Nestorian. It is not known at what period the Syrian Christians' faith was reformed, but certainly they do not now hold the tends of that heresy. Their Church of England. For many years they opnear to have met with great success their own church. The Syriss church, accordingly, in Travancore, is at present other the Roman Syrians, in consequence of their being allowed to remin some of authority of the Romish church. As a proof of their former respectability, La Croze, whose History of Christianity in India was published in 1725, says that in down of Cochin and Travancore. They continued in the depressed state to which the Roman-cutholic personation reduced them, until within the last 90 years, when Lieutenant colonel Monro, the British resident at the court of Travascore, commiserating their condition, exerted all the means at his disposal for their amelioration. In consequence of his interest in their favour, and his representation to the government of Travencore, many of their former privileges were restored to them. He found their bishons and clorgy in a state of great ignorance, which is partly to be attributed to the destruction of all their books by the Romancatholics. I limit those observations to the Sysian Christians. One of Colonel to co-operate with him in his designs for the improvement of the people. In combishop of the Syrian church and his clergy. Mr. Fenn had the charge of this or priests: when I left it there were apwards of 50 students in the college, some of whom had made great profesency in the Latin language, the Syriae, and other branches of literature. I have three times visited this college and examined the students, and have soldon been better satisfied with the progress of the boys in an English school, than I was with the progress which these Syrian youths had made. The expenses of this college were in a great measure deliayed from the produce of a gumt of land, I think I may say a whole island, in the back water entirely to support the institution; and the residue of the expense was defrayed 1843. Do you know how many prints have been sent out from that college

since its institution?—I do not know, but think there must have been upwards of 300. Since Mr. From left the collegein 1836, it has been under the care of the (446.—I in Rev.

Rev. William Doum, a missionary of the same society, and while under his care. their acquisitions in Latin and Greek and European literature. These are the latest accounts of the efficiency of the college which I have been shie to college, Another object of Colonel Moure for the improvement of the Syrian Christians. was the translation of their Senptures into the versacular tongue, the Malayelin. from the Syrine. This department of labour was assigned to Mr. Benjamin Baily, who in a few years succeeded in producing a translation which was acceptable to all classes. The third branch of labour was that of the school department, which was assigned to Mr. Baker, who established numerous parochial schools throughvonth, preparatory to their admission to the college as students. It was the missionaries' intention to add two other grammar schools, one in the north, the other in the south of the Syrian colony, but the funds of the Church Missionary Society have not yet enabled them to carry that plan into effect. A printing press was established at Cotym, at which the Scriptures, when translated by Mr. Bully, were printed, besides the different school books and elementary works for the general use of the Syrian community. The whole of these measures were carried on with with whom I have repeatedly conversed, and found that the missionaries possessed their entire confidence. The missionaries carefully abstained from any measures that were calculated to offend the forings and prejudices of the Syrian Christians, although many of their practices and ordinances were such that they could not think of proposing to associate them, in their present state, with the Church of England. They carried on their measures with a hope that by this diffusion of scriptural and literary knowledge, the Syrians would in time propose to reform their own customs. I was witness to the performance of Divine worship in one of the tongue, which is an unintelligible to the Syrian as Latin is to the Roman-catholic the prayers that he was accustomed drilly to read. The missientaries endeavoured to prevail upon the metrous of the Syrians to nilow their entenant to preach to their people: I also have joined them in this recommendation, when the metron assured me that he had no objection to the practice; indeed, that he should be rather glad of its adoption, but that their priests were incompetent to prenels. He, however, expressed his hope that some of the priests educated in the college at Cotym would schools were very extensive, but I cannot state much in their favour, in consequence of the want of constant appointendence, there being only one missionary their community together, consequently they have for years past, that is, since the persecution of the Roman-extitolies, been able to make very few attempts to convert their Hindoo neighbours. The whole of this information applies to those

Syrians who are the descendants of the Syrian Christians.

1844. Have you had any personal opportunity of sceing the Roman-Syrian Christians?—I have had personal opportunities of reeing them, and have visited their college, the Roman-entholic college at Verapoly, near Cochin, where the Roman-Syrian extinars are educated.

1845. By whom was that college founded?--By, I believe, the Romancatholics of Geo.

1846. At what period ?-That I cannot say.

1867. With what receives the Landau and Cong, but I am not certain.

direct information as to the number of priests educated at Vermoly, but encounds.

bishon, Doctor Prendergust, who was educated in Spain. He was subject to the 1849. What is your estimate of the number of native Claristians, first of the Syrisa, and secondly of the Roman-Syrian Clorch 2-The Syrian Christians I have estimated at about 70,000, the Roman Syrians at the same number. But the

1850. Can you state the number of them ?-My best means of information are letters which the Abbé Dubcis, a Jesuit missionary, published about nine yearago in London. He says, " Francis Xavier made many thousand converts about three centuries ago, but that at the present time there are not more than a third of the Christians who were to be found in India 80 years ago, and that this number diminishes every day by frequest apostacy." But the same authority describes these converts as of the lowest character; so low, that Xavier himself, at the expiration of two years, entirely disherriend by the invincible obstacles he everywhere met with, and the apparent impossibility of making real converts, left the country in dignat. The Abbé Dubois himself was a missionary, residing chicaly in Mysore; he laboured about 32 years in India, but acknowledged that he was equally unsuccessful. With the assistance of a native musionary, he says, " I have made in all two or three hundred converts of both rexes; of this number two-thirds were parishs or beggers, and the rest were composed of sudras, vagrants, and outcasts of several tribes, who being without resource, turned Christians in order to form new convexious, chiefly for the purpose of marriaga, or with some other interested views. Among them are to found some slag after having been assured that on their receiving bustism the unclean spirits that I do not remember one who may be said to have embraced Christianity from renviction and through quite disinterested motives. Among these new religion did not afford them the tomporal advantages they but looked for in emthe whole truth on this subject forces me to make the humblisting avoyal, that

those who continued Christians are the very worst among my flock. 1851. What is your observation with respect to the Roman-catholic congregations in the south of India ?- I have known some Roman-catholics of respectable character and respectable attainments; but the balk of them mawer to the

schools no longer looked with a jealous eye on the unives of inferior castes. Some of them when they entered the school required to be allowed to learn their lesson apart from the boys of infesior case. But I have invariably found, I do not know this fincied superiority, and have mingled with their schoolfellows to learn their lessons. They soon were glad to ask of boys of inferior easte assistance in learning their lessons, and also have in their turn assisted others. One very immortant feature in these schools remains to be noticed; it was for many years considered impossible to prevsil on the natives, the Hindoos, to allow their females to be about ten oreleven years, efforts were made to introduce female schools at Calcutta; for some time it was thought quite a visionary project, and one lady who went out (Miss Cooke) expressly for this purpose in 1821, was told by many persons long missionery stations, there were in 1823 nearly 1,200 female children; the returns last year, as well as I have been able to collect them, showed they had increased to nowards of 3,000 a sufficient proof that the native prejudices are fast declining on this subject; there is every prospect of the number of scholars increasing with greater rapidity. Besides these schools for children, the misslonary societies by India have reminuries for the education of native priests, and catechists, and schoolmasters, for which they select the most promising children in their general schools, There are at present in India, I think, about 190 Emenean ordained prissionaries; about 90 country-born or half-caste ordained missionaries; about the same number masters and readers, native and country-born, assistants to the other labourers. I have had too short a time to collect scenarie information as to these numbers, ordnined by the bishops of Calcutta, who were quite satisfied as to their attainments and piety, and their general qualifications for the ministerial office. At Calcutta, it is perhaps unnecessary to remark that Bishop Middleton enclowed a college upon an extensive plan for the same purpose, that is, for educating native

1855. Have you seen any of the surive extechists or native priests in the dis-1856. And what is your estimate of their englifications for the work in which

they are engaged?-As far as my observation has extended, I have found them priest or native extensist with me,

1857. Have you ever visited villages in India composed chiefly or exclusively of native Christians?-In the south of Tennevelly I have visited, I think, all the villages

that contain Christian congruentions, and in the centre of that district there are two entire Christian villages, one containing, I think, 500, and the other 400 native Christians. They had their regular churches, and their native priest and catechist and their boys' and girls' schools; these Christians were living together in a state of harmony; there was not a vestige of idolatry to be seen in either of them, not on daily. I have visited them frequently, and have been particularly interested when among them to see the groups of women, while the mon were labouring in the fields, assembled together under the shade of the Palmyra tree, spinning cotton, and villages me, the one Mothelloor, the other Nazareth. I was much interested to observe the liarmony is which these people seemed to live tagether; each was like an Orziz in the moral desert of this immense country. I was careful to ascertain the character and conduct of the people towards their heathen neighwere of the same character. I could not but regard these villages as encouraging trophics of the Christian missionmier' achievements in the East.

1858. Are you aware of the history of the native catechist, Sattainaden?-I am

(445,-1.) quite
(146,-1.) quite (156,-1.) quite
(146,-1.) quite
(146,-1.) quite

quite aware of his history and of his success; I have just been describing the scene of his labours. Sattainailen was a native priest, a pupil of Mr. Schwartz, and ordained by him with three other natives; he laboured chiefly in the province of Timevelly, where his mane is still remembered with respect. Reverting to these was unknown at Macins at the time I sent my information. Of these two villages I sent a particular account to the district committee of the Christian Knowledge and has been transcribed in a Memoir of Bishop Middleton, by Mr. Le Bas. Having hereby stated the progress of the Protestant faith in India, I am aware of by the Abbé Debois; but I think the contrast may be accounted for by reverting to the means used respectively for the conversion of the Hindoos. The Abbi-Dubois endeavours to account for the follure of the Roman-cutholic missionaries, by assigning these three causes; he first attributes it to the Pope's interference with the Jesuits, who conformed to the customs and idolutries and superstitions of the Hindees, in order to conciliate their minds, and to induce them to embrace the Roman-catholic hith. The Roman-catholics in India, of the Capachins and applied to the Pope. The Jesuits, after repeated remonstrances from Rome, at length found it expedient to desist; but M. Dubois considers that from that time conversion has ceased, and the Roman-catholic religion has been on the decline. This is the first cause to which he assigns the declension of the Roman-cutholic religion in India: the next is the wars between the English and the French. Now, although those was must necessarily have interfered with the labours of the Christian missionary where they occurred, yet the Protestants in the Carnatic were much more exposed to them than the Roman-catholics, who, in many parts, were semoved beyond their influence; whereas, notwithstanding the long wars between those two powers, the Protestant faith has gradually increased in India in the manner I have already stated. But the Abbé Dubois, probably not satisfied with these two causes, states, thirdly, as the chief cause, the Hindoo's detection of the Jesuita' imposture: he says, that the Jesuit missionaries, in order to reconcile respect that would not have been paid to Europeans; but be tells you in the letters to which I have referred, that after a time they discovered that these Jesuit misversion crossed, and that while circumstances continue as they are, he is famly of opinion that they will continue to retrogade, until the Christian religion is extinct tial observer would directly say, especially from the third cause, the failure of the by reverting to the simplicity of the meses which they have used, and a will be acquainted, to sustain the Christian character and Christian integrity in their conmeans which they have hitherto employed, nothing, with the Divine blessing on

1859. Do you consider that the number of chaplains at present in actual service,

ON THE AFFAIRS OF THE EAST INDIA COMPANY. 947

or on the lists of the East India Company, can be sufficient for the wants of the Rev. Januar Hough people committed to them?--By no means. 1860. Do you consider that they are adequate to the wants of the particular

stations to which they are appointed 2. No. by no means, and for this reason a there are, indeed, some stations in the interior of India, where the duties of a chanisin do not amploy the whole of his time, but there are burger stations, such as military contonments, where there is duty for two, if not for three chambins, The English community in India, when their chaptain is obliged to remove in consequence of ill health, which is frequently the case, are exposed for months, sometimes for several veses, to the inconvenience of being without a resident elegenment. 1861. Do you concrive that the single bishop appointed for the service of the Chench of England in the dominions of India generally, is sufficient for the labour necessarily devolving on him?-Certainly not; I think that there should

be at least four bishous in India, one for each presidency, and one at Ceylon, 1864. Besides the admitted duty and policy of promoting Christianity in India. is there any particular mode for improving the character of the servants of the government, either European or native, which you could noint out ?-The Abbé Dubois, in the letters to which I have referred, does indeed describe the general character of the European servants of the Honourable Company in India as very of the natives around; and he considers this as calculated to the extent of this impression to defeat the efforts of the missionary in that country. I should not now entirely subscribe to the Abbé's description, for although it might be, indeed I must confess that, to a great extent, it was correct when he first wrote his letters, yet at present there is a great improvement in the state of European society in India. Since the increase of the ecclesiastical establishment in Judia, it has produced a striking effect on the society of the Company's servants, both civil and military; and I have no doubt if the Company were to extend their ecclesissistal establishment, and to improve its efficiency, that this improvement in the moral state of their servants would continue to go on. I have also had frequent occasions to observe in India that the Company's servants who were the most attentive to their religious duties, were the most harbly respected by the natives around them. I could name an instance on the Tinnevelly station, were not one of the parties now living, of a native who had detected an imposition on the revenue of the Company to a very great amount a he went to the junior magistrate at the station, stated that be had information of that nature to give, and that if he would receive it of him he would give it truly, and he undertook to lead him to the spot where these contriband goods were secreted: the junior declined taking the information without consulting his asperior. The native then said, "I must beg to retire; I know you, and I know your superior; I have no doubt be it an homorable man, but I do not see him go to prayers; I do not see him attend the House of God, and therefore I can place no confidence in him. I and perform prayer, and therefore I will trust to you, and if you will engage not to divulge the information, I will state to you all I know." The junior sent the man away, promising to return an answer the next morning; be stated the circumstances generally to his superior, obtained his sanction to proceed as the man

Now this is one instance of the respect which the natives nav to the moral and religious character among the Company's servants, and the advantages that may be expected to accrue from it to government.

There is another suggestion that I wish to offer. I think it would be of great advantage to the Company's servants, and would make a very favourable impression on the native mind, if the Company required the Sabbath to be observed, and Divine worship to be performed every Sunday at every station where there is no chaplain, by the senior servent of the station, or the preson he may depute, and that it should be regularly reported both at the military and civil stations. I have had reason to know the favourable impression that the regular performance

of this duty makes on the native mind. 1868. Have the British Government given any salaries to Kuronean missignaries 2 - Occasionally a when the European missionaries have been called in to officiate for the Europeans as chaplains, the government have remunerated them for their services, but in no other way that I am aware of. I have answered the question as to the morals of the Company's servants only in reference to the

had so obtained, on receiving the pecuniary remuneration which are required. In this way we recovered the child —When I recovered her she was about four years of age. The kidnapping of children is very common indeed in the

1872. Do the magistrates close the courts on the Sabbath?—I am sorry to say that they do not at all the stutions.

1878. Generally ?—I believe generally, as far as my observation extends; I can answer the question generally, but I cannot say universally; in fact, it depends on the inclination of the partner of the partne

head of the office. But I think if any order was issued requiring the strict observance of the Subbath, it would be attended with a most beneficial effect. In reference to the system of schools, I would beg to offer one more suggestion; I would somest the establishment of English schools for the education of the Commony's servents in their different offices, their courts of justice, and their collectors' offices at every zillah. Thave made the experiment at my own station, Tinnevelly, and found it attended with the most beneficial results. When I first went to Tinnevelly (I was the first chaplain appointed to that station), finding how little my official duties employed my time, I began very soon to pay attention to the natives; one of my first objects was to establish an English school for the purpose which I have stated, and a Tamul school for the natives generally; at first the establishment of a school in English for the natives was so great a novelty, that I could obtain no assistance from the gentlemen on the apot. They did not interfere with me, but they wished to consider the matter before they sanctioned it. I found, however, that they had no time to enter into the consideration of the question as I thought it ought to be considered, and therefore established the school on my own responsibility. Six months had not transpired (Mr. John Cotton), seeing the advantages that were resulting and were likely still further to result from the school, desired to know how I was proceeding, and what was the state of our funds; I sent him an account of our dishussements, and he contributed very liberally towards the object: under his patronage, I applied to the other gentlemen at the stations, and collected an amount sufficient to pay for the building of our schools and the support of our masters; and during the whole period of my residence in that part of India, the gentlemen of the station contributed amountly towards the support of these withouts. Several of the officers in the courts at Tinnevally were educated in our English school, and the officers so educated were found to be much more efficient than those who had been left to pick up their education at such native schools as they could find. I made a point of introducing the Scriptures and Christian Catechism and formularies into those schools, and required all the pupils, whether Bishmins or Mussulmans, or wisitever were their caste, to write me daily an exercise on some part of the Scriptures, which they did, and made great progress myself to recommend to the Government the establishment of a similar school servents can be supposed to have. The gentleman to whom these schools are intrusted, should be required to send in his monthly returns of their progress to ment. I should beg to suggest that the Christians who are found competent to fill the offices of Government, should be placed on a level with the Mahomedons and the Hindoos, and admitted to all offices for which they are emalified.

and one atmosos, and numited to all offices for which they are qualified.

1873. In your progress through the nouth of India, have you been along the line of coast from Bombay to Cape Comorin?—I have been from Cape Comorin to as far north as Cannamore.

1876. Between Cape Comorin and Camannous, are there to your knowledge any British cettlements possessing churches, but possessing no chaplain or particular the company of the company of the company of the particular the company of the company of the company of the land was appointed at this tention of the company of the company of or ten years ago; and while I was there in 1886, the British inhabitant of (455—1).

19 July 1882.

native Christians of Tellicherry were necesstomed to assemble in the clurch on Sunday for Divine worship. When it was in a displicated state, they requested the Government to repair it; but finding that there was then no chaplain at the station, they sent orders to pull it down; being on the spot at the time, I ventured to interpose, and represented to the Government at Madras the advanrequest, and it was put into a state of repair, and continues there to this day a with that exception, I believe there is no English church on the coust without

a chaplain. 1877. Is there a chaplain at Calicut?—I am not aware that there is.

1878. Was there a chaplain at Calicut?—Not at the time I was there.

1880. Was there a church at Cochin?-A Dutch church, not a Company's church. There was formerly a chaplain at Cochin; be remained there about

three years, but he always used the Dutch church on the Sahbath; an English church was not built there during my residence in India. 1881. Is there on English chaplain 5-No; there is an English missionary, a

Mr. Ridsdale, sent out by the Church Missionary Society. 1882. Is there an English chaplain at Quilon ?-I believe not at this moment :

but there was when I was there. 1883. And was there a church there ?- I believe that there was a church,

1884. Then at present there is a church there also without a chaptain?-There is there also, to the best of my knowledge.

1885. You have stated to the Committee that you have not been further on the Malahar coast than Campamore; from any knowledge acquired from other sources, can you state to the Committee whether there bu at Mangalore also a church without a chaplain?-The impression on my mind is, that there is a

church there without a chaphin; but I cannot speak with certainty, and I am doubtful whether, if there be a church, it was built by the government. 1886, Looking at the map of India, and casting your eye between Bombay and Cape Comorin, will you state to the Committee what in that line of coast, extending perhaps 600 miles, is the number of European stations, and the number

of chaplains or missionaries?-What am I to understand by European stations? where judges, courts, and collectors are? 1887. Take it first in the technical sense of the word; where there is a revenue collector, judge, and so forth?-To the best of my knowledge, there are eight

stations between Bombay and Cape Comorin, exclusive of Goa, which is a Portuguese station. 1888. How many chaptains, when you were in India, were stationed along that coast?-Exclusive of Bombay, there were at one time four; four within the

Madras presidency 1889. At four out of eight, then, there were chaplains?-There was at one period of my residence; two of them were withdrawn during my readence in

1890. What was the number of British at Cansamore ?-It was a large mili-

tary contonment; I think when I was there there were not less than 1,000 men. 1891. British born ?-British soldiers and officers. 1892. What was the number of Europeans at Trevanderum ?-I believe from

80 to 30 officers. There was generally as European regiment at Quilan, not far from Trevanderam, where, accounting for the detachments that were stationed in different parts, it may be estimated that there were at least 500 men; grenerally while I was in India there was a resident, chaplain at Onilou, but at one period of my residence that chaplain was withdrawn and sent to another station, and the station was without a chaplain for a considerable time, and I do not perceive now that there is a chaplain there; but I have heard lately that the subsidiary force is withdrawn from Travancore, which probably accounts for the absence of the charlain.

John Walter Sharen 19 July 1832.

John Walter Sherer, Esquire, called in ; and Examined.

1893. WERE you ever in India ?--- I was

1894. Under what presidency?-Bengal. 1895. In what department of the service?-In the Company's civil service:

was Accountant-general of Bengal, 1896. How long did you reside in India ?- I arrived in India in1798, and left

finally in 1826. 1897. The latter part of your stay in India, what were you?-I was accountant-general up to 1822; I returned for ashort time, and in 1825 I was a member of the Board of Revenue,

1898. From this description of your service, the Committee would understand that your residence while in India was chiefly confined to Calcutta or its immediate origiblourbood?-Yes, it was,

1809. What number of natives, being Christians, do you believe are to be found in Calcutts and its immediate neighbourhood?—I believe there to be a

great many, but the number I cannot state. 1900. Do they form a considerable proportion or a very small proportion of the population?-In 1825 I myself received communion with 14 natives, according to the rites of the Church of England. I mention this in order to show that

these were real Christians, not merely nominal ones. 1901. What has been the character of the natives, being Christians, so far as your observation extends?-Highly improved by that circumstance, and some I have known exhibiting the Christian character eminently. Abdoul Mesceh, whose baptism I witnessed in 1811, and who died I think in 1807, was an eminent Christian, and instrumental, I holieve, in bringing many to a knowledge of the Seriour : he was ordained a minister of the Church of Regland by Bishon Heber: I was also present at his ordination.

1909. What was the civil rank of the greater part of these natives, whom as

Christians you know prior to their conversion?-Abdout Meseeh was formerly a soldier, and afterwards practised physic as a native doctor. I have not known

mony persons of rank so situated 1903. Were they generally parishs, sudras or outcasts, or were they persons of decent condition in civil life?-Parish is a term not often used in Beneal; they were from the Mahamedao and Hindoo general population, the native population, Except those who are in offices of government, and a few of the old families

remaining, the general population is indiscriminately poor, I should say, 1904. Whatever their original civil rank and condition may have been, what has been their conduct generally, speaking of them as masses, since their conversion to Christianity ?- The conduct of those I have known as Christians, I consider to have been eminently improved by their faith. I consider the character of the children who are at our different schools to be gradually rising by means

of the instruction they are receiving, and that the whole tone of moral feeling is gradually rising in Beogal through the instrumentality of these schools, and the Ishours of missionaries, and the general progress of truth in the land. 1905. Do your observations with respect to the character of the natives, being Christians, apply generally to all congregations under the name of Christians,

whether Roman-cutholics, Protestnots, Episcopalians, Baptists, or members of any other sect or communion?-I should say it applies only to those who have been under missionary and true Christian instruction. Until I had been eight years in Indis I was not led to consider the state of religion around me; much had been going on, I have no doubt, from the time of my arrival up to that period of which I knew nothing; but sioce the year 1807, I have been led to consider the subject, and have had opportunities of knowing the state of religion generally throughout the Bengal presidency. I mention this because many Indian witnesses, of large information and general observation, may know nothing of what is going on among real vital Christians in India, and therefore discrepancies often arise in evidence given, which perhaps arise simply from that circumstance,

1906. Have you stany time visited any native congregations, or natives being Christians, in other parts of Bengal ?- In Burdwan, Serampour, at Kidderpore, and the neighbourhood of Calcutta, I have witnessed them very often. 1907. What has been the character of such persons?-I have always regarded

such congregations with great interest, and of course have taken a favourable view (445-L)

252 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

19 July 1822.

of them, such as I have known personelly, I have always considered as manifest des Father Storer, iner sincerity, generally speaking. 1908. Do you consider the number of chaplains appointed for the survice by

the East India Company is in any of their presidencies equal to the wants of the part of Bengal, which might be met, and most desirably so, I think, by an exten-

1909. Do you conceive from your experience of the labours of English bishops in India, and from your general sense of the requirements of the Church, that the

of churches actually ready for ministerial labour, there being no minister appointed

sion of minister, but I know that there are many places that require charches, 1911. What provision does the government of India make for the religious instruction of the people committed to them?—No other provision that I am oware of than the support of the established churches : they subscribe, I believe, to some of the schools, and there is a foud appropriated not of the revenues, but not for religious instruction; the committee have applied it to what they call

useful knowledge. 1912. Are you aware of the appropriation practically of the lac of rupees, which by the terms of the last Act renewing the Charter of the East India Company, is the sum to be set area; from the surplus of the territorial revenue for the improvement of the natives of India?-I believe it has been unpropriated to revive some Hindeo and Mahomedan colleges, under a committee of education in Culcutta, 1918. What do you consider to be the political effect and tendency of increas-

ing the moral standard among the people submitted to our rule in India ?- In the bighest degree beneficial and advisable. 1914. Increasing with the moral standard the intellectual standard also?-Certainly, increasing the intellectual standard place

1915. How far has that tendency been carried into effect by the improvements to which you have referred, as taking place within your own observation?-I may mention a circumstance which I have received in a communication from India very lately, that a large impression of Paine's works had arrived in Calentta from America, and had been engerly bought up by the Hindon vonths who are receiving instruction in English, irrespective of religion; the necessity, therefore, of

extending the means of religious and moral justruction becomes imperious under this awakened desire of the natives for European knowledou. 1916. The object of the last two questions was rather to draw your attention and religious instruction; how far any improvement in the political character of the people as good sobjects can be expected or obtained by may improvements in their mere intellectual education, separating that from any religious instruction ?-I consider that the progress of the mind, without religious instruction,

1917. Then, in your judgment, attempts to sprend the knowledge of European science and European literature, unaccompanied with Christian knowledge, will sion ?- I think not; but I would observe, that it appears to me that the thirst for knowledge has been excited in Bengal among the matives, and that knowledge cannot be withheld from them; this state of things residers it more necessary to supply the means of satisfying that desire safely by solid useful Christian know-

ledge and information-1918. Do you consider that the insisting upon making religious education the besis of instruction in India, would give rise to jealousy on the part of the natives, without jealousy; but in this navwer I should my, I consider the government to be entirely distinct from missionary societies; if the government attempted to insist ON THE AFFAIRS OF THE EAST INDIA COMPANY. 203

on religious instruction, the effect might be different, for in my opinion the

FURLIS.

Isla Walar Sherer
Ect,

1919. What is the principle on which you would desire that the government of British India should proceed, in reference to Christiantly 2—My opinion is, that they should follow up the object of the Church establishment to India, extending it to receive all outlet Christian subjects who are oxicious or willing to mult human-level of that establishment.

In part, I assume that the experiment of the property of the personnel of the

Sir Alexander Johnston, called in; and Examined.

Sin Line. Johanna 1927. HOW long were you in India, and what situations did you fill there?

—I held affices under the Crown on the island of Ceylon from 1802 to 1818.

I was for ten years duting that period Chief Justice and President of His Majesty's Council on that Shand.

1928. Did you turn your attention while on Ceylon to the study of the history of India?—I devoted my attention constantly to that study while I was on Ceylon, and I mail two journess by land, the one in 1807, and the other 1818. from Case Concorn to Madra and back spain, for the express purposes

of inquiring on the spot into the history, religion, laws, and customs of the

1958. Were you can intested while one Ceylon with the late Colonel C. Markennia, the Surveyor-general of all finds in on with the collection which he made of materials for writing a littery of India —I was indicately acquisited with his from which the colonel co

Mackenzie to make this collection, and those which led the Bengal government, ofter his death, to purchase it from his widow?-Colonel Mackenzie was a native of the island of Lewis; as a very young man he was much patronized, on secount of his mathematical knowledge, by the late Lord Scaforth and my late grandfither, Francis, the fifth Lord Napier of Merchistoun. He was for some time employed by the latter, who was about to write a life of his ancester John Napler, of Merchistours, the inventor of logarithms, to collect for him, with a view to that life, from all the different works relative to India, an account of the knowledge which the Hindoos possessed of muthematics, and of the nature and use of logarithms. Mr. Markenzie, after the death of Lord Napier, became very desirous of prosecuting his Oriental researches in India. Lord Sesforth, therefore, at his request, got him appointed to the engineers on the Madres establishment in 1789, and gave him letters of introduction to the late Lord Magaziney, the then Governor of that presidency, and to my fither, who held a high situation under his lordship at Madura, the ancient capital of the Hindoo kingdom, described by Ptolemy as the Regio Pandionis of the peninsula of peninsula from the fifth to the tenth century, for the extent and variety of the knowledge which its members had acquired in astronomy, in mathematics, and in every branch of literature. My mother, who was the chughter of Mr. Mackenzie's friend and early patron, the fifth Lord Napier, and who, in coaseoutness of her father's death, had determined herself to execute the plan which he lad formed, of writing the life of the inventor of the logurithms, resided at Brahmins in the neighbourhood in collecting for her from every part of the peninhad possessed in ascient times of mathematics and astronomy. Knowing that inquiries in which she herself was then engaged, and wishing to have his assistance in arranging the materials which she had collected, she and my father invited him to all the Brahmins and other literary natives who resided at that place. Mr. Mackenzie, in consequence of the communications which he had with them, som discovered that the most valuable materials for a history of India might be colformed the plan of making that collection, which afterwards became the favourite object of his pursuit for 38 years of his life, and which as now the most extensive and the most valuable collection of historical documents relative to India that ever was made by any individual in Europe or in Asia. It was Colonel Mackensie's wish, if he had survived till be had completed his collection, to return to England

ON THE AFFAIRS OF THE EAST INDIA COMPANY

and to arrange under separate heads the materials of which it was composed. In 1817, being myself about to return to England from Cevion, I went to Madras to take leave of him previous to my departure from India. He, in consequence of the long friendship which had substated between us, and his belief that we should not meet again, addressed a letter to me, giving me a detailed account of all his On my arrival in England I explained to Mr. Grant, the former Chairman of the literature were Colonel Mackenzie to be allowed by the Directors to come to England upon leave, in order that he might, with the assistance of the different literary characters in Europe, arrange his valuable collection of materials. Mr. Grant, with the feeling for literature and liberality which always characterized bis public and private conduct, agreed on my application, to propose to the Court upon his full pay and allowances for three years, for the purpose which I have mentioned. No steps were, however, taken by Mr. Grant, because in the mean time I received accounts of the Colonel's death in Bengal. I soon after, according I knew to be the fact, that the Colonel had laid out upwards of 15,000f, of his own money in making it. His Lordship, a short time afterwards, purchased the whole collection for the East India Company from Colonel Mackenzie's widow materials which could be procured for writing an authentic history of the British

1931. Is there any catalogue of the Mackenzie Collection?-Yes, there is a printed estalogue in 2 vols, 8vo., which Mr. Wilson, the newly-elected Professor of Sanscrit at Oxford, formed some years ago, partly from the letter which Colonel Mackengie had written to me in 1817, and partly from a list which the Colonel's Brekesins bad drawn up of his papers previous to his death.

1992. Does the Mackenzie Collection consist of such information only as illustrates the history of India, or does it also contain materials for illustrating the state of the arts, sciences, and literature of India?-It contains, in addition to the materials connected with the general history of India, very extensive information relative to the state of the drama, and that of painting and sculpture in different ages amongst the Hindoos in the southern peninsula of India. A considerable part of the information upon these subjects was collected by Colonel Mackenzie, in consequence of communications which passed between him and me from 1808 to peninsula of India, that dramatic compositions, and nictorial and sculptural renewthat nepinsula, as the most efficient medium through which they could circulate amongst the people of the country such historical, moral, and political knowledge as they conceived would give permanency to the system of government and the state of society which they were desirous of supporting. When I sent to Mr. Fox, in 1806, the plan, to which I have alluded in the Judicial Committee, for introducing a system of government throughout British India, more in conformity than the one which then provailed, with the principles of the British Constitution, it occurred to me that measures ought, in pursuance of the ancient custom of the country, to be adopted by the Government for circulating amongst the natives of the country, by dramatic, pictorial, and sculptural representations, such historical, moral, and political knowledge as might have a tendency to make them understand the nature and benefits of a free government, and admire the examples which they might derive from the dramatic, the pictorial, and the sculptural representations, which by the most distinguished British artists; and I therefore requested Colonel Mackenzie to make for me such a collection of the dramas, and such an account of the pictorial and sculptural representations in the peninsula of India, as would emble had been conveyed to the natives of Iodia by this means, and what measures ought to be taken by them for circulating amongst the people, by the same means, such historical, moral, and political knowledge as might be applicable to the system of

(445.-L) government government which they might wish to introduce, and the state of society which

1933. Do you think that government can derive useful information from the Mackennic Collection, as to the instorical, moral, and political knowledge which has been circulated amongst the people of the country in different ages by the Hunlon organization.

has been circulated amongst the people of the country in different sges by the Hindoo government, through dramatic, pictorial, and sculptural representations?—I think they may.

1938. Have any works been already executed in England with the view which you have suggested?—No pubble works. Miss Jonnas Baillie, some years acc. as

For suggestion, were a thermatic work for fortile, then dependently one with the fortile and t

a hatting, which he had executed in the customy to commonwested the victoria, and the control of the control of

moral and political improvement of 500 millions of their follow subject and their art to the moral and political improvement of 500 millions of their follow subjects.

1950. Is the collection as complete as Gobrel Mackenzia originally intended to the subject of their follow subjects. In the collection as complete as Gobrel, but be enrived, intended to have salied as the subject of their subject

remove progress to concern and process them, will be allogache destroyed, because the collection complete. — I should have I have been a support to the collection complete. — I should have I have been a support to the single or, to call the extension of the collection complete. — I should have I have been a support to the single or, to call the collection without allow, a body enclosures to the support of profession and the collection without allow, a body enclosures to the part of profession and the collection without allow, a body enclosures to the part of profession and the collection with the collection of the collection and the collection of the c

consequences and the country, and to the samener and feelings of the people (1858. What measures would you advise for rendering the collection complete). The Braham who in Coloned Mackensie's lifetime less the supermentedness of all the learned natives who were employed by him in procuring materials for his selection, is still place at Madrau, is throughly acquainted with the behind power his colored natives who may be the colored natives who were employed by him to procuring materials for his selection, is still place at Madrau, is throughly acquainted with the behind power which

Veneria, 27° die Julii, 1832.

JAMES A. STEWART MACKENZIE, ESQ., IN THE CHAIR.

Captain Henry Harkness, called in; and Examined.

1989. Have you been in the Madras service?-Yes, 26 years.

1940. In what districts of India did you principally serve?—In the Carnatic, in Travancore, Mysore, Candeish, and the Nizam country. I have also been stationed on the western coast.

1941. Are you not the author of a work upon the character and habits of an

aboriginal ruce on the Nielgherry Hills?—I am.

1948. Did you inform yourself particularly of the character of the natives of

India during your residence in those districts you have manual?—I mude it my stady. It was my amusement to inform myself of their character, moral as well as intellectual.

1046. When is your opinion of the expectity of the natives generally, intullectual and worsh—I do not know in what particular they differ from Europeans, there is a want of fermouse of classater shoot known; I do not think them in any way dediction in intellige, and the better dossor of them are a nownlepople. I think there is an errorsous opinion prevailing about the Hindoo claracter; I think there is not reconstructed in the state of the same than they really range there are of course good and bad among them, and the bad may perhaps prodeomiste, but I think 1946. Do you consider there is a result difference between the Hindoo and the same than the same that the same than the sa

Musselman, as to their moral character?—I do: I would give the preference to the Hindoo by far. I think the Hindoo is as correct in his notions of the duties of civilized life as the Christian.

or cavenred life as the Christian.

1965. What is your opinion of their fitness for office and places of treat?—

1 do not know of any office they are not fit for, under the superintendence of Europeans. With respect to trust, if distinction is held out to them, as well as

pecuniary reward, I think they are fully trustworthy.

1995. You consider distinction, as the reward of merit, would tend materially to render them fit for offices of trust F.-I do.

to render them fit for offices of trust?—I do.

1947. How do you consider them affected to the English in the districts of which you speak generally?—I consider them well affected.

1935. As regards their generally, do you consider them oppressed by the existing state of the government under which they live?—I do not think they are oppressed, excepting is one respect, that they have no means of rising to any dignity or consequence in the State, or to obtain any such distinction as would perticularize them among their fellow men.

1999. In general, in what way would you recommend the government of India, porticularly in those districts with which you are acquainted, to improve the condition of the natives, and advance their moral and political character?—To allow them, as far as possible, to have a share in the government, by employing (445—11).

** **Example 1.5 **C.***

**The district of the state of the

Captain Sony Hurkes 27 July 1832. them in offees of respeciability and rose. My view is, that respectivity results to the contrast at strong indicated with the same way of the contrast and in the contrast and in the contrast and in the contrast is show they are engaged, that they are not more sevenes, and it is now you contrast and the contrast per contrast and the contrast and th

130%. Do you consider it probable that in the advancement which you look to do the political condition of the natives, a beneficial change will likewise follow in their moral and religious habits?—Yes, I do; my opinion is there will be an early change in their moral and religious stage their moral train times theseins, their religious state it cannot deteriorate; and through the advancement of third moral character I consider there will be an improvement in their religious one.

but which of course must be preceded by the former.

1965. Do you consider the missionairs as likely to be instrumental, in an

extensive degree, to that conversion 7—There are many thousands of natives who are not limitone nor Museulmans, whose children therefore wellingly attend the instruction given by the missionaries, whose principal occupation at present is that of affording education to the children of the country, and to which the natives have no average.

1954. From your experience in India, and the course of your hequities in side ferrent parts, have you, or have you not, seen sufficient of the state of the different settlements, with and without chapsins, to be able to state to the Committee wither there be, or be not, an adequate religious apparentsedness for the wants of our own people, and for the promotion of Christian knowledge amongst those at present transpars to it #—I think. I have.

1905. What it he result of such opportunities as those you have enjoyed labels the is a deficiency of clugation on the Establishment; I have been at many stations where Divine service was never performed fee years together. 1905. Any you ware of there being any station at which Divine service has not been performed for years together by any reducined minister of the Church, in which station there is nevertheless a church or a chappel steadily prepared for the recept-

ON THE AFFAIRS OF THE EAST INDIA COMPANY.

tion of such minister?-I cusnot say I am. I know a station where for many years the service has not been performed, but there was no church there; certain places are called stations, where only one regiment may be, or part of a regi-

ment; I was alluding to a place where there are three or four regiments.

1907. By whom, if by mny, in the absence of an ordnined minister is the religious service of the Church performed to the people ?- In large stations, by the staff officer, in small stations by the commanding officer.

1958. In places where there is no military force of European origin, are you

aware in what manner the religious service is performed to Europeans there present?-Where there is no chapkin present, no clergyman to perform the service, it is seldom there is any Divine service performed on the Subbath ; that part with respect to marriages, baptisms, and funerals, is, as I mentioned before, performed by the commanding officer or staff officer.

1959. The question referred to places where European regiments and Euro-

nean officers would not be ?-If there is a native force there would be European officers.

1960. Are there places in which there being no European regiment and no ragiment of native force officered by Europeana, there are, nevertheless, Eurlish functionaries sent to discharge the duties of Government, in which places there is not any provision for the religious instruction of the people so sent? - Yes, I know several.

1961. What is the number ordinarily resident of Europeans at any one such place as most immediately comes to your recollection, and name it?-- I will name

Madura, in the Carnatic 1962. What is the number of Europeans sent there by the Government to do by other causes ?-I should think the number of British sent there by the Government is five or six, but treble that number have been resident there.

1963. Making an aggregate of four or five and twenty ?- Yes.

1964. Can you state to the Committee what is the aggregate revenue derived from every source by the governing power from that district in which this

1965. What is the distance of Madura from the nearest place at which there is a regular chaptain appointed by the government?--- Righty miles, to the best of my recollection, from Trichinopoly,

1966. Have you been connected in any way with any society for the promotion of Christian knowledge, either under that title or as a missionary society, during your residence in India ?-Yes, I have a I was a member of the Church Missionary Society, and one of the committee for managing the offices of that

society at Madras. 1907. In that character or in my other have you visited any congregations of native Christians ?-Yes, I have frequently; I travelled with Bishop Heber, and was with him at his death, and during our progress I had opportunities of seeing

many thousand native Christians assembled to receive his blessing. 1968. What is your estimate of the character of such native Christiana, whether

born such, or themselves converts to the Ubristian faith?-My opinion of their

character is favourable; I think they are a moral, well-behaved people; I am alluding to the Protestant Christians, not to the Roman-entholies. 1969. Does the answer refer generally to both classes comprehended in the

former question; namely, those who are born of Christian parents and to those who themselves have been converted, or to one or the other of those classes?--To both; but I have seen very few who have been converted to Christianity 1970. Does the answer then refer principally to those congressions of native

Christians in the south of India, whose conversion may have been the fruit of the labours of the earlier Protestant missionaries, from the beginning of the last century to the present?-It does principally.

1971. What is your estimate of the character of those Christians as compared, first, with corresponding masses of Christians in this or in any other country: and secondly, with the native heathen, among whom they are resident ?- I know but little difference between them and a corresponding number of Christana in this part of the world; I do not know my other difference between them and (445.-I.)

950 MINUTES OF EVIDENCE BEFORE SELECT COMMITTEE

the Hindoos that surround them, except in respect to religion; I suppose them to be much the same. 1979. Do you mean that they retain the vices of heathenism with the name

1075. Then what do you meen by saying that they are much the same as the heather among whom they are resident? I mean with the exception of religion. 1976. By making the exception of religion, do you, or not, mean that religion

has an active and practical effect upon their hearts and lives; is their conduct different from that of the heathen around them in respect to those matters upon which religion ought to operate ?- I think it is in respect to those matters in which religion is concerned.

1975. Then your answer in the first instance referred rather, it may be pre-

sumed, to the civil state of the individuals to whom you alluded, than their religious and moral character, as affected by the faith in which they were professing to live?-Quite so.

1976. In reference, however, even to their civil state, do you or do you not think that the native Christians are more or less industrious, honest, and civilized than those of their countrymen not yet possessed of the knowledge of Chris-

1977. Give any instance in which you think that their character has been improved by the profession of the Gospel, is it in their love of truth; is it in their abstinence from the grosser vices of the heathen a is it in their love of their parents and their children, in what way is it; having stated that you do not think them more industrious than the heathen, you still regard them as having derived benefit from the Christian religion?-My idea of the benefit they have derived from the change is, that they have come to the true religion from

a filse one.

(2.)—LETTER from —— Eq., of the Civil Service, to T. Hyde Villion, Eq., Secretary to the India Boxed, duted February 1892.

Pobrassy 1932.

I mare had the benear of receiving your Letter of the 11th internst, mentioning some a points as which the Commissioners for the Affairs of India request information and opinions from too. I neourlingly submit the following records:

1. Civil Servanto.

I amondo cha Civil forwards are generally one to John to so young for chick chains are considered in the property of the chain of the c

Bargoirer is so substitute, that is, causes of illness not very server, n cure results? a visit. The Neighbory left have a colder climate which has restored all ill greater into health, and overy facility for reserv there should be allorded; but undeal men above death, and overy facility for reserv there should be allorded; but undeal men above death whither it may be safe and expeditent to send patients so long a journey as any recentred, in particular to a verget to sen.

Native of Italia. Their great disalvarrage arises from the want of character for high affices of trust.

Schools lave been established, but met on entrenive scole, soid sur culterating the acquisition of Rapillo, which I think would be a thorsing unstrances as affected for the artiflatories and the schools of the schools of the schools of the schools which will be the schools of the schools of the schools of the schools which we collectly facilities therein, must used to religious their relatio, and advance the centre of the subjects they related to the schools of the schools of the schools which we have been schools of the schools of the schools of the schools of the Per relative would be able to be such the sepacine, and willing in excessionally the contradi-

scop of the higher orders should come to estarge their uniforstrutings, and see the power of the British nation.

3. Ecclerisation

ON THE APPAIRS OF THE PART INDIA COMPANY

I leave this to those who are hetter acquainted with the subject; merely remarking that

4. Settlement of Economics.

I am of printing that the wists of possibute to India are advantageous ; but, with a size to their offspring, though without astainture of native blood, and in even evident in the Moglada and other porthern Asiatics, who have engagement to our southern provinces. Indeed, an who cannot avert its fatal invesds, even by spreding all that they can by possibility be supposed to possess. 2. If English settlers were to obtain offices, it would displace the ngives, whom it is now the policy to employ, and for whom there is strondy so little encouragement. 3. They would probably be of such a class, that there would be frequent collision between them, and the civil nutborities as well as the natives, (which the inserior possibility with justice of extensing the system of having native instead of English Judges, so has been lately becoght to the test of trial. 4. Finally, there is not much field left for

S. Steen Nunioation. With this subject I am not particularly acquainted,

6. Press in India. I consider restrictions on the press absolutely necessary, canerially if English be generally case of instigators to discontent, or originates of any great public evil.

7. Prince of Wales' Island, &c.

I know these settlements only by hearsay. I shall conclude with a few remarks regarding the administration of lastice. The malimprovement, if greater licalities were afforded for the settlement of disputes and proscou-The remedy seems to be to give greater discretionary powers to the judge or magistrate before whom the case is brought. I have been informed that under the native governments, or so processed departed on a major of the special and the inhabitants, who are skilled in making out on-quate statements. When native servents are brought to trial, they revise have been some instances in which after corruption has been considered proved, the deliccornts have been perfered to be restored to their situations, and taken into employment

(8.)-LETTER from John Sallions, Res. of the Madres Covil Service, to T. Hade Published

I are desired in your Letter of the 11th inc., to state my opinion on the present system (3.) Asserve of

snoo with the men who are hereafter to figure upon the public stage in this country. To should always, I laugust, he a main object of their education. To have belonged to one of (445-945)od many ductional by the United States of Southernston I starts Distriction Again.

Appendix (A.)

A set of voong mes educated at the different national Universities would meet in India

correlately released as at the East India college, There seems to be abused a gameal association in the minds of Englisheres between India.

A very decided improvement, therefore, upon the present system, wealth, in my opinion be, that the young civilians should go, for general relacation on Communes, to one of the

and of hydrantics, would, in may aginion, be of great attivay to many of the young men; as

From what I gaw in early life at the college at Calcutts, and from what I have beard since, I should say that the defects of that instruction controlly counterfulence to afreningss.

of extravagation, either at Hernford or Calcatra, has folled.

The saluries of young area on their seriod at Mission are more than double what ther were twenty-fire years ugo; more innues are in consequence kept, and a higher style of

to different studious in the consery, where the approisition of leasurage and a knowledge of

design grape and the intermediation, is a quotion which are middle place as consistent in the least of the control of the cont

The discharing andre which he nation labor, are their exclasion from all efficient of trust and exmission; their discharing the discharing from the nation which he plot in nodery under the native generation; the appropriates by European of the nerit dust to public service, addrespit in fact to service any has there are readed by articles in procurein scannes and addrespit in fact to shore from the procurein scannes are readed by articles in procurein scannes are sent which they too frequently near with firm Europeans, and our heavy system of trust scannes which they too frequently near the first Europeans, and our heavy system of trust impossible primating repressive European establishment. That is not of primating are poor in European establishment, That is not of primating and the state of the contract of the contrac

It is only of late years that the government have taken any steps for promoting the Bifaomies of Notice. There are now two schools in Coimbetore, which cost the novem-

same of contract contract and an extension of the distillation, which were the polemen and the public reverse between two and these millions of report. The appropriate of English is not made in object of cloudies, it is rubbe, not most unaccumularly descurrings. The destincts in the two rubbes to enables to resulting an interpret extensing of this corn trappage, with normal. Entermity partiting it recent to in aqualithe this way system to be long as we keep them in transic of languables. We must find to lot onlying to all hidren in them—meditives which shall induse them to study our language, laws and lineature. Contacting Nation.

I connot call to mind a single naturase of the conversion of a unitive of runk to chair tonity. Numerous converse have been single natural to the sweet confers in the students provious of the Machan government, particularly in Tinnivolly, under the ampires of the Church Mississary. Seelity, the Sordiers of oldsine to trendingly appearly, by those wine became distribute, is a very review subject upon which some legislative provision sequence consumery. Our Ministryton performers, for from theorem converts in blanc to be levy the

48 the Committee.

For the different education of the nutires, the government coults, is not opinion, to exclore a guarante school at the principal time of each province, in which the Regulat increases a guarante school at the principal time of each province, in which the Regulat increases the results of the principal time of th

are greater estamatement, in by no means adequate to the extent of tendings. These taggets to be a chapital file every province, at present there is not again the average remains not in fire. It appears extraordinary that it should be proposed to arguest the number of bishops, before the multilatherment of warring eterns is completed. The natural of a bishop (446—philat mean, shipsical by the 1, 486-first of Southerment Green's Destination White.

Appendix (

would pay seven or eight cheplains. The chaplains might, I think, he coupleyed in superintending the native schools, and it appears to deserve consideration whether their services union not be unde awalfable, under certain circumstances, in the magnature,

it not be mine available, under certain directionances, in the magnetism 4. Settlement of European.

I behalf any that there is not much danger to the notices, from the first cury of Regions, not clades by a pulse description, that the times the restrictive the inserts common in the contraction of the pulse of the contraction of the contrac

even of the wealthiest, appear serious chatacles to the improvement of the resources of of weekin." The custom of the country too, which remires so many offices hareditary, and many whem the emclaments may be divided, and compels them to resert to note of cor-

raption and peculation. 29. The psejudices of the great mass of the appulation scorver, being unferrounable to the consumption and increase of cattle, it is of little comparative value; and only a small suspotion, trade and manufacture would rise, and bear some proportion to that of corn, and

MEE-Colony Ser.

obstacles to the raising the value of a commodity, of which the high price is, according to Adam Smith, so very essential to improvement. In India, more than nine-tenths of the had in tilings are appropriated to the cultivation of grain for the support of man. In Earland it is the reverse, the larger portion of land is appropriated to the support of 39. What I mean to illustrate by these observations is this, that from the simplicity of ploted in raising food being summily increased, and the proportion in every thing else much to the produce as will magazine himself and pales a family. Men have food, but they has not his daily food and a hat to shelter him at sight. There is more grown confirm

32. The opinion of Governor Duncan, than whom no one knew India better, is important on this subject. Mr. Rickards, one of his council, remarked on the poverty, absence of comforts and insecurity, which ages of opposative government had so universalis fitalism, it was from these and other causes, sometimes not unaccomplie and sometimes to become the received opinion, by those who are to legislate for those in England. From

Egen Buitt-

B3. I will, however, appeal to face, to the condition of the population of Bembey, the

Surcticularies, with relation ranging from 5001 a year downwards. The wages of inhourant and a spirit of independency provides among the people, which they freely assert in the resonances of their rights and privileges. The casten duties are very low. There is no is also erroneous. The number of bullbeks, sheep and hid daily slaughtered on the island

24. Thuse facts are sufficient to prove the few and simple wests of the Hindon. It is a mistake to suppose that the influence of cases has diminished even at Bumbey. Amount the

the military, the cultivators of the land, and the working people) the power of punchayets has become nearly obsolete, and a great revolution has occurred in that class of the popullation within the last twenty years. Those who first came to Bembay were chiefly workenen and protestors, weelved assistance from them in their difficulties, and in secure yielded them a willing respect, as their beneficcors and protectors. It is the spirit of all small and believed castes, and of seets established in the midst of larger communities of a different nation or persons of one family. This was originally strongly felt by the Pomees, while they continued a small and humble body. As their annihurs increased, the thief Parsoes bad each his tribo of dependents, whom he pushed on in various lines of life, and supported at considerable however, continued to pour in from the northward; and as the majerity had no claims unou their own efforts. The econoquence was a greater degree of independence on both sides, their own curres. The consequence was a greater degree or margonizate on both side, which has naturally produced its baselits and disadvantages. The public, however, on the whole, is more effectfully served, whilst the different individuals pursue with pictificence beneficially, chiefly in matters connected with their religion and demestic rights, and in restraint, its maxima and influence are needy obsolety.

35. The Court of Directors expressed an against to restore the power formerly excreised by the higher classes of Parsons over their interiors, by means of their panchayets. It buy acquisaseance in the will of others, when once interrupted, were not easily restored, and least of all by nesitive institutions. The difficulty sense out of the increase of the tribe. unexceptionable body of regulations for the conduct of their punchayets, and unless that were along these twenty of the conduct of their punchayets, and unless that were along these would be for informinable law-mits. The amount claim of rich Parsens with in this and expend their manys at thosp pleans, which not troubling one being transled by proclayers. The Recorder's Coret was, on its restriction, their favore when the process which process which proceed to their own when the process of the core of the second of the conduction of the conductio of casts, when they were a bumble body straggling for existence, was gens, and could not be revived. Autong a rich and numerous propis, who have lost their liabits of porsonal longer command. The schion among the Passees at Surat was of satisf more violent classacter, and they are of a more immoral and dissolute ruos than at Bombny.

36. No such emancianties, from the oppression of casts discipline, has commed among the power expressed by the various castes, which are very numerous, over their members, in lority. Those who refere to abide by the sentence of the caste are expelled. This is the is any of the house of the case people, and the children cannot marry whilst they con-

Mariatrate's Ro-

ladging each other. Sometimes the minority form themselves into a repurnts body, select the projection of a court of law. Such an example is alone wanting to lead to a diseqution of the influence of casts metitorious. Such is the state of the population of Bountay. 37. In the provinces the influence of caste institutions is still more inveterate. Through-

ove the Physics coals the emericativ of the Bealanta over all earthly brings, is in the highest derror incultated, and the scale of caste superiority, and of degradation, is as rigidly mainwithin the same village with nersons of casto; and while a Brahmin is cooking, the skadow as well as prisoners, of whom mean are outcosts, whose near approach, without contact, in supposed to affect the purity of water. One class of Brahmins will not rut food personed by the hands of the Brahmins of any other class, nor six with them at any entertainment. versed to the injury of public prosperity, the destruction of private rights, and seldem calcuencounter " caste and mittorial prejudices, ancient and doubly rected customs, affection influence of evil eyes on their houses, families and eatho, and are always supplicious of

58. Undoubtedly some change has taken place in the political condition, and some relaxing in the prejudiess of the Hindon, under the British rule. Their wenth and their comforts have increased; many of them have substantial and costly houses, keep their homes and corringra, entertain Europeans, and with that view, fit un one or two of their spariments in the English tests, the rest being kept in an unfersibled and fifthy state, Some Brabusius will not served to visit an Englishman at his monts own whilst he is feeding on a round of hard; and Brahmin children no longer heatants to associate with Hindron of inferior custs in the English schools. State policy has compelled Hindro tain Mishomedan troops for the protection of their principalities; and Illindoo sovereigns and celebrate the martyrism of Hassain Hossan. Even the westchedness and misory which character have occurred, and some are manifest to the commentant observer; they, busywar, the existing state of their zummilistares and agriculture, on change is nerecoglide; they and equipages, their expenses are extremely limited. The present executes of the most

30. In fact, the policy of the British government in resistaining those institutions as the to the Recorder's Court would have scalled him anthing. Many camenos here occurred sobrait, and to regain administ into the cesto by confounite to the percentral penalties. 40. Notwithstanding these electrics, the suffuence of custo motivations, their ridiculants

operate. Care institutions are made, institution for regulative the defeate and removing

British government abstain from giving aid to easter in their internal affairs, and refomust, though gradually indeed, inevitably decline by the mere offect of public neglect. It will be long, however, before more there are to think in so were cores to passes objected. (c) Amover of the long some stedium, on the humane and important resolution adopted by Lord William Benduck, people into distinct closses, which has far so many ages proved the most effectual method which could have been dayised by the ingeneity of raun to check their improvement and

4). If we look to the classacter of the natives and the great assistance we derive from And suggesting

their arency in all branches of the administration, we shall find evidence sufficient to prove improvements in that education has not been entirely neglected in India. It has, bowever, here of a de- their sitration. moralizing tendency. In diplomery, sophistry, transbery, and perfidy, are their possible characteristics. "The point of banour is totally unknown to them; and good fieth, at the ples and narrow views preveil; persistion is considered from the sovereign to the present a venial offence; and the grossest abuses are occasionally practiced. When, however, we fairly examine the question, and advert to the little encouragement which the natives have of control, which from the few Europeans employed in the country, but been exercised the existance of abuses, but to the hunted extent to which they have been carried. The scale must represedence in favour of the orneral honesty of the native character. For the first step towards their improvement, is to admit them to a larger shore of official emoluat Bengal. It is only necessary to classify the situations notices are to fill, and to fix scitable salaries to each. This reform will naturally render a smaller mumber of Europeans necessary; but we must take care not to reduce it to too low a standard, for a vigilian

42. At the Presidency of Boushay, there are many signatings which they would fell with wealth and mark are in general, from a constant and long association with Europeans, more ration of Madras should be modelled so the plan of that of Benrul, and should have the same extent of should take their tour of duty with the European maristraton, and officiate at the Court of Petry Sessions, and at the Quarter Sessions in controlling the Parlumentary Assessmuintained from that tax. They should also be eligible to the second and third classes of Nate. A soliritor civil appointments at the Presidency. There are natives at Bombay faily competent to has repeatedly maligible to these situations.

57. Although a revidence in England, or a more govern! intercourse with other nations, must tend to calighten the matires, it does not yet appear assessing that any particular encouragement should be held out to them to visit England; it would prove unavailing. objections which the firmles of the family entertein to the measure, constitute stabbers obstacles to a gestification of their wishes in that ruspect. Mr. Ward, in his History of the Sindons, states, that "the caste converts a dreire to visit foreign realise into a grime, Brahmin, about forty years ago, west from Bragel to England, and lost his rank. Another Bruhrala went to Madros, and was renganced by his relations; but after incurving some expense in tearing Brahmins, he regained his coste. In 1936, a blueksouth of Seyampore

omone the Benimins, he was restored to his family." Rase Mohin Roy is of source wholly indifferent to east; anotherses. The excessed of so enlightened a native is the last possible encoungement to others visiting Kegland. 58 The neglected state of the Euclesinstical Establishment in Western India, until the constitution of the see at Calcutta, was a disgrace to our national character. The first

monal improvement of the natives. It was formerly required by the Court of Duestory,

59. An allowance ought to be made to the architectures at the several Presidencies, to easible them annually or opposite ally to visit the several stations within their respective

Visitations extending beyond the limits of each Presidency. 60. Additions and alterations are much required for the improvement of the native tian families. Native and European, into that college, for the perpose of being educated and tertained as priests, to afford spiritual and and confers to the native christians in Western India. The selector and establishments to be affected to them will of course become objects

61. The Roman Catholic native christians generally, and more especially those in the

Island of Subsetts, which was for shout a century publics to the Postuguere, and has been a

Peitish dependency since the close of 1774, am in the most lamentable state of ones-

stitions degradation, of which one example will suffice.

62. The alarm occasioned by the choice mortus induced the native christians of the class of Coolee fishermen, of a district in Salestre, to instate the example of the Hindoos, and to principally females, whose grows and violent gestines were said to indicate that they were mader a supernatural influence. They were sprinkled, during the violent exercise they were under, with water and enloyed ourth, and were urged to exert thouselves to the atmost in a sort of dance by the sound of native music. It not unfrequently hangeard that an obnoncorn individual was pointed out as the author of the calamity, and that marrier or violent assults resulted from those ecacles-

63. The view excluded the native thristians who engaged in these coremanies to the his assistance. On a point of religiou he declined all official interference, but offered his mediation to edinat the differences. His attempts at recogniliation proved wholly unsureguful, as the parishioners refused to make the slightest attenement to the view for their offence, and threatened to quit the island. On the re-appearance of the epideuse, they reneved livin requires to be permitted to resert to their supermittees corresponds, no our regiment of the proper shall proved intelligence. Their requires was refused, and a shed evented for the purpose was removed. They assembled to be sumber of several handred and insolent, and purished them on the spot, when the rest returned quietly to their homes.

\$4. The occurrence, however, convinced the magistrate that the prejudice was too deeply plained to then that if they would give security to present all disturbances, he would not object to their adapting may recommise they pleased, but that they would not be allowed to assemble in crow-de for any purpose, or to spread an alima among the rest of the inhabi-anns, which the state of the charace did not agreen to warrant. The security was given,

dominion of the Drush Government. Some more derinive measures are obviously required (the Latin) perfectly mintelligible to their flocks. Many respectable serve christians of Selected, have consultanted to me of the decayed condition of their charebes, and the destituto sixto of their religious establishments. There can be no dealst, that had one of our chapteins, or a Protestant missionary, conversant in the Marhatta language, been estationed in Salicate, and made himself known by his pious exertions, to improve the moral conth districts, this is the burner where my an input exertions, to improve the sacra con-clining of the people, them unfortuning cleribitation would have sought she protection, white them have looked for infige by relapsing to the skelating of the Hundons. The circumstance will also prove the greet beneaft which may be expected to result from Bishey's Cellego, as

comparatures; not sentil infine possession. For remote a m general a mixed apprior character me in service; he is more decile; but the Mehomedian has fewer prejudice; so Se, however, as the common beatiness of life is compraid, the religious opinions of the univer do not come prominently into contact with Europeans acting merely in a compayout equarity. There is a material diminution in the proportion of the Malconrolm religion to Davidson, 254 the Hindon. The natives are in general" industrious and regular as labourers; they are an exceedingly maisble and inscreeting uses of men; among them are many gifted at merchants,

Harris, 302. Davidson, 252 and in every way to be compared with the merchants of any other country. Their prejudices prevent their eating with Buroposes, but not from being protest while

knowners, habits, and number of the neople. In the Decond the necessity of being extremely courteque and civil to the native gentry was inculrated on all the European authorities, servants for oppressing the natives, but the law in that respect has never been enforced

except at the instance of the government. The difference between the warens clause of nations on to concludity of improvement in not owner; some are more tied down by religious prejudices then others, and consequently

less accessible to impervement. The religious projections are distribiting assempt some few of the educated classes only; classions will in all probability still further distribit them. The attachment to casts permits as such in connected towns as in country district.

An increased information with Europeans has a tendency to weaken the reciplines of the natives, but it has not had any affect in diminishing their attachment to custs. The Beshmins are not firmed to favour each other more than nersons of any other custs. The native Cockin rajohe, and many of them are options. No such thing is known as a convert by our

D* 207, 208 English missionaries. A person who has forfeited oute sunctions turns Christian, but discovered by their family, and looked upon as degraded.

The cross seldem disture the measures of observment; they are very subservices. The seministre, from their greater information, are more curious to know what is going on, sail The land assessment is very beauty; the only means of improving the condition of the people generally is to lighten it; and this ought to be done. The inhabitants of Malahar are

in wealthior circumstances than these of many other parts of India, but still they are, from was not really lower under the native governments, but under them a part was embassled by the heads of villages, who were so far better off; with us, all is taken by the government. Do 165. There is a disposition in the natives to emigrate freely into districts in which they first

> has distinished the decread for many Indian manufactures, as the Europeans who supply their place make use chiefly of articles of their own country, while the importations from The general cultivation, even in the short period that most of the peritory has been

D- 179, 174, under the Bomboy Government, has been greatly extended, but it has averived a shock from the full of prices, arising from that extension and other earness

The people appear more confirmable than formerly: they have not more clothing or more fernitare in their houses, but they dress batter and in a different way. The Hindees have

adopted many of the Mahemethin customs in point of dress; there is not, however, not ment in the implements of imahnaday; the astive plough is a very coarse and rule instrument. European implements might be constructed to soft the different soils in India, and they would be much better than show now used, but the expense of them would be greater than the silvantage in the cultivation of hand. Dulbi is increasing in population, owing to the si-ministration since we have had possessed of it. In Makhar the scentry is highly cultivated;

all improvement, or alteration of their old customs, and they are very indefent. In the all improvement, or ancesause or user independent jugains the villages are populous, the people well clothed, and in many respects. Cleanin, 184. better off than in our territory. The root has sometry any furniture, and his agricultural better of this is our serbory. And ryo are necessary my measure, not not agreement in the single superior of the serbory my measure and the clothes and bound are better than they were. The nettron are in a deplurable state under our system; their poverty is Richards, 279. extreme; the cultivation of the country is consequently in a low state, and for less productive the if more capital could be employed on it. The agreement of holia is miscrably Davidson, 250, deficient, from the extreme subdivision of land, and the want of accomplanted capital. The natives labour under a most intolerable grievance in being pressed on the part of Batter, 217.

The large properties of the grees peaduce, when the Government take from the

tion. The natives want excess against to apply it.

The priliphars are not enough men. In Allahabal and Cownpers the negativistance set in

The ryots are, granully speaking, a paor class. There are degrees in their poverty, but in

the mina fall, they are not able to carry on their cultivation; they are such of no capital;

proved snywhere. There has been an extension of capital, the effect and consequenced the

the people of Gennerat is less distremed than that of most other parts of India. The farmers five years' purchase; in Madura it is not saleable; there land is a service, not a necessity; it is coarcely a soleable article in any part of the Madros presidency. The opening of the trade to India has greatly conduced to give additional value to the lands in Bengul, and to enable rent, where there was none at all, or sourcely a sounty subdistance. The people of Toujore are Sizelde, 4233. not in so wretched a state as Mr. Gordon describes. Day land is of value both in Tanjura

and Rangood. The inhabitants of Taniore seemed to be very comfortable; the assument is in some places very light, and in very few is it heavy. It is a great experting country; they have much more food than they can commune. There are very few opalent notive families Garden, 762. resident in Madura. No cleas our be considered at all rich except the officers in the natural service of the Coursesy. Whoever has money not employed in trade, has it taken from him olasses, but they council be said to be almost inea situation of beguny; they are very nece, but Ritchie, 1832. Bombay has been irregroving much within the last few years, extending much, and improving

in the strip of building and in the roots. The value of houses and lands in Bombs y is high compared with Modess and Calentia, and remts are riving. In consequence of the return Sallivas, 4951 from a state of war to peace, much of the land which was left untilled is now prednetive, and much of the produce of the country, which was formerly destroyed, is now coming into the the other hand, the prices of some necessaries of life, such as salt and tobacco, have increased entracusty. The coldvature in the Danua are much insolved in debt; they betrow money Chaplia, 5286. on the security of their crops and lands at from 12 to 24 per cont Under some of the native chiefs, whose administration is good, and where perhaps the

zascammant is lighter, the committee of the lower orders is perhaps superior to that of the sema external appearance on in the fully onlineated state of their lands. The ryots, graceally speaking, are not in good circumstances. In some of the districts of the native chiefs, nothing can be worse than the condition of the lower orders. The situation of nativen of a Scillver, 5051. because the whole civil and militury administration rests with them, instead of being vested in Europeans. Instead of having a master in every European, they have only one master who is their prince; but the lower orders are not by say means so well off under the Myseco government at present, because it is a most oppressive government. The higher classes are do not receive under the British gale. Coimbature is in a much higher state of cultivation still more extended calcivation in ancient times. The condition of the complex in Burdwan Bracker, 524. and consumption of consultatured goods, they commune a greater quantity and more exper-aive articles than the Bengalese. The wagus in Java are nearly double those in Borgal. The food of the Javanese is chiefly rice or mains, and a little palm-tree angue. They are Markine, 1718 generally well fed and clothed, and, for the climate, well housed. Their clothing is prin-cipally of cetter; in the central district it is commonly the monufacture of the country. they are chiefly the artisens and merchants. The cultivators in Persia, and in the Signish Etsable, 1255 territories in the south of India, are pretty much alike in print of consists. The natives in

rod enterprise into Incia, is nothing in comperison with what would be the case if the

larly of the English language and literature, of which there are many examples, is quite astonishing. It may even be questioned whether so great a progress in the attainment of complete and conveniences of life, the natives of India have in some male great progress, and

in much more comfortable electrostuness, and coming more habitually into contact with natural telepts and capacity are fully equal to those of the inhabitants of the Providences.

The natives are much given to communical and industrious paraults, and exceedlagly well qualified to succeed in them. They are sufficiently commercial to answer the highest expectations that can be formed, or desired, in respect to trade between the two or prosperous; if the condition of the natives, their habits, wants, rights, and interests were The rative racrobants of Bornhey consist of Pausees, Hindoos, and Mussubnans. Persons are the most intelligente they are the remains of the original inhabitants of Person who fied to India, and they are very numerous. They are fee the most part free from the prejudices of easts. They very frequently emback as atter-engons, principally for Chins. The native marchants are not so prosperous as they were; they were very rich. The natives of the Medies territories are not frank or generous, and gratitude is a wood which does not exist in any of the native languages, or in the hearts of the natives. They would not be insensible to kind treatment, but it solden makes the some impression in India as it does in other countries. Except where a native's own concerns are at stake, he will communicate with the Contrany's European agregate vory freely. He will not communicate with any neesen on his

his neighbours, he has no objection to talk freely. The monle are exceedingly eductative both to notive officers and to Economics; but perhaps more so to the former than to the In Tenyace, instances of stealing from each other the gowin which is left in the fields only The natives of Cutch are a particularly industrious race, much more so than those of

Benguesa. The prices of labour are low, and the people are governly deficient in capital. The matives will in general bear an advantageous comparison with those of any country in

" Here is a unconsiff who dismisses double the number of the suits he decrees, but the rec-R' 161, from resteenmals no less than 394. Now to ensure the receipt of this last even, mouth the sam returns doubled into the bands of the district manner. The mountainess stated exclainly require exclanation, and we trust that you will have the matter theorypythy not prove to he well founded, it will still be measury to keep in mand the temptations to which the district measurife are expend, and the injustice which parties in saits for personal important eaforeneds for justice which are established in all the superior courts, viz., the recording of the evidence and the right of appeal. In suits for kind before the district cases would not be more than compensated by the improved security for sustice which would

46. EXTRACT JUDICIAL LETTER to Fort St. George, deted 1st February 1832

21. The abolition of the office of European judge at Scringopatam, with the establishment Letter from dated of a native judge at Colligal, was adopted in conformity with a plan suggested by Sir Thomas 4 July 1602, (56 Manro. The armagements for the new office wars questilly proposed by the Sudder Adaming, to 65 & 81.) Arof the native pulge was afterwards, in consideration of the state of the judicial hardness, removed from Oslingt to Seringapatum. These strangements, the subsequent attentions of which will be noticed further on, we fully approxy, and we makingly expert aponts from tinable checks, with a view to secure opprectoess in his proceedings, and a faithful record of

47. HYTRACT JUDICIAL LETTER from Bondow, deted 15th January 1822. 96. WE trust, however, that the measures still in progress for increasing the powers of the 47.Extractivation! registers, and the native agents, will yet more beneficially operate in keeping down the tile. Lower from Res-

48. EXTRACT JUDICIAL LETTER from Borslow, dated 16th January 1824. 3. It will be perceived that the punchayet is still our principal means of dispunsing juntice Process.

25. In his employing observations, Mr. Chaplin, after adverting to the mode in which civil institute was formerly administered throughout the country, admits that although it has one principal cause is the run upon our European officers in consequence of the present disinclination for the administration of civil justice on the part of the meamlablers and others,

36. The following general remarks of Mr. Chaplin on the subject of punchayets, and on

27. "No anthority being used for the purpose of compelling people to sit on punchayets, refuse to fill certain exemptive offices. If this be deemed objectioushie, no semedy suggests ADDRESSTY TO REPORT FROM SECTOR COMMITTEE

endix (IL)

cames, and people were usually expected to resort to that mode of adjustment when private ambitration failed. It is however difficult to judge whether more suits were then settled by the whole was then apparently smaller, because the power of Tegara more frequently desided than. They did not in licevine come into Court. The judges often inelated in clear cases upon their being at once settled without any forms of process; now a great portion of causes, and the file in consequence is over-leaded. In small suits decisions by punchayets are certainly quicker now than before, but in larger once they are still spen out in a most provoking

28. "The jaguarders of the higher order constitues undertake the settlement of disputes, but he cannot learn that instice is administered by theo, to may great extent. The smaller jagoredara do not take upon themselves this responsibility unless they can make it a source of emolument, which they segestimes do to the inferry of their relations and dependants :

of their own juggers; but as their lands are known to be out of our jurisdiction, five oun-plaints are preferred. 39. "Neither poteils nor shetties formally administered any justice, though empowered to appoint punchayets; in disputes of which the amount does not exceed 150 rupess he does not use in condinating the first seeds of litigation, particularly in matters of local concern, before they come to any growth. Their judicial power has never been of nuch avail in weighty matters, nor can we ever bope to see much effect produced by it; it is, however, silently and

formerly, became the apprehensing of deviating from our more strict rules detect the potalia from soling with their secustomed confidence. One directionings arising from this change is, that littreauts are more and to refuse to arbitrate, and one or other of them is protive sure 30. "The amount in Poune settle, as will be seen from Captain Robertson's registers, a great atmay causes; one or two seem to be respectable; but on the whole, the character of their proceedings doze not stand very high in the public estimation. No amount have yet the Committee now revising the Regulations, 31. "There have been but very few regular appeals to Mr. Ohaplin, as Commissioner, because the greater portion of causes are decided either by punchayet or by amount, from both

great many complaints of wrongous or strongous decisions, which he refers to the local authorities for investigation; several have in consequence here revised, and seem annulisd. In acted up to, and the custom of the country resintained pather than for the propose of ravising 32. "Censes in which great stream are parties have come under his own cognisance; they

Mr. Toylor was arresinted esperiptorelant of this institution, with a salary of per month - - R 150 And towards the support of preceptors and scholars the sum } 700

> Making the total - - - - Resta Belki: the Rekools of Mr. Prosen.

This gentleman reported to the chief secretary to Government in September 1823, that the year 1816, instituted whools for the instruction of about 80 boys, children of the instruction in the English, Persian, and Hindon languages to 400 hour, the children of ecoindars, at an expense of R' 8,400 per annum.

The general committee to whom this proposition was referred, considered the charge here in comparison with the extent of benefit to result from it, and with the village achecia in village echools, and that as the passantry of few other countries would bear a comparison alreading to the higher classes of the countriality. The Government concurring in this

In February 1826, it was determined at the instance of the Medical Board, to extend the benefits of the institution to 50 scholurs, and to increase the monthly allowance of India. It was also resolved to fix the ages of minission at between 14 and 18, instead of hetween 18 and 26; the latter limitation having been found to exclude many desirable

The Court of Directors has confirmed these changes, and, at the request of the Beneal Government, has sent to Calcuits some models of anatomical subjects in wax, respored in this country for a warm climate.

Surrowen Breton's last report of the state of this establishment, in dated in May 1830.

Culcutta Free School.

In May 1826, the governors of this school represented to the Bongal Government that Pab. Cres. 1 June 1856, which their flands were invested, they were unable to continue the school on its then extended scale, unless the Government would affeed them aid. In support of this applicagirls : and that unless aid could be afforded to them they must make a further reduction.

Pab. from J Ang. 1826, 185, 100. Under these elementations the Government resolved as follows: "The Governor-control in Council, adverting to the extensive benefits which the free-solool is the instrument of diffusing, considers so useful an establishment to possess a strong claim on the housty of Lordship in Council has secondingly been pleased to resolve, that un allowance of 19800 ner month, being the amount hitherto contributed by the Government to the vestry fund, be granted to the free school from that date, subject to the confirmation of the henousable Court of Directors."

The Court confirmed the grant, at the same time suggesting the propriety of uniting the free school with the benevolent institution, the two catablishments appearing to be of a similar character; but the Bengal Government, in reply, has stated points of difference which reader such an union improvideshie. This school is also allowed by the Government to ecaduet its correspondence free of pastage.

Calcutta School Society.

Peb. Cons. 9 April 1889. In March 1825, the Court of Directors confirmed the great of R*500 per month which bad been made to this excisty by the Bengal Government, and expressed their opprobation of the measures which had been adopted with a view to the education of nernous as teachers for notive schools, in the following terms: "The Calcutta School Society appears to comimportance, for educating teachers for the indigracon schools. This last object we deem therefore, a class of teachers, you provide for the eventual extension of improved education to a nortion of the natives of India, for exceeding that which any elementary instruction that could be immediately hestowed, would have any chance of reaching."

Of these 10 were Chilpsown Brahmins,

They were forwarded to their respective stations and placed under the superintendence of the collectors, excepting the schoolmaster for Satisarah, who was placed under the superintendence of the Rajah, by whom his salary was prid.

The salary of Mr. Murphy, the head master of this school, was, at the same time, augmented, to consideration of his historia, to 110 repose per month. In July 1836 it was proposed to appoint superintendents of the schools in Guzzerat and

the Dessin, to which also fer. Warden objected as involving an excessive expenditure.

"Considering," be observed, who promisins and extend of those provinces, the cor of one individual in each would be perhady inefficient. The awarding of prime to solve and to matters without any limitation is surely objectionable. It is enough, in it any to me, for the Government to extend that enough provinces and to matter without any limitation is surely objectionable. It is enough, in it any to me, for the Government to extend that enough enough the confined to the sense.

"All this the Coverement require from the previous would be periodical or annual reports on the state of the schools and the gragness of adomation, and these reports could by furnished by the different collector, who, from their districts and village offices, have ample means of obtaining more correct information than one gentleman can possibly command." Why the desired the commandation of the commandat

assas of obtaining mans correct information them one gentleman can possibly command." With this minute the discussion dropped, and the whole subject was refured to the loars of Directors.

In April 1897, this society was allowed to forward by the agency of the con- Pob-ton 1800,140,15

Com. 7 April 1858 D* 25 May.

The Prince of Wales' Island Government lad previously consented to sugment the allow-ance made to those schools on the part of the Company to 100 dollars per month. The

In July 1927 the President of the Prince of Wales' Island Council, Mr. Fullecton, re-21 Oat, and 54 New, secreted a mustar on the removal sifiairs of Malacon, in which he adverted to the state of lation of Malacon seem, until lately, to have been entirely destitute; few of the children, property of the Children, property of the Dunck resident families, to all appenented Europeans, our read property age, 116. to write. Poverty is said to have prevented the establishment or any schools support that the number of children of the desception amounts to 103, that Com 20s. 182, the constant of appears that the number of children of the desception amounts to 103, that Com 20s. 182, the late, without any means of instruction. A five school has lately been established by private D' to April 250, 215

Molocca as at the other scattements ; viz. 100 dellars per mouth. "On the subject of education it becomes necessary to mention another institution at Malaces, the Augio-Chicese college, which was founded by the Roy. Dr. Morrison in the year 1818, its object being the instruction of Chinese youth in the English language, and instruction in the Chinero language, for which purpose books, trockers, do, see found. The original object and progress of the institution will be found faily explained in the printed ing the college, as well as the preparatory schools, while Singapore is, from its particular and some time must clopse before my hopes of soccess can be expected. The honourable Court of Directors confirmed the liberal subscription proposed by Sir S. Rafflet towards the donations having been processily directed to the erection of extensive buildings of which those funds can never be equal to the completion, and only a past having been appropriated to education, it was not judged expedient to pay up the armore of subscription due by that the general expenditure had taken place in some degree under expectation of the pro-

subscription, Mr. Prince was amborized to soprocuate it as far as required, sewards the (455,-L)

siderations present themselves. The main object of the Anglo-Chinese college was certainly the peculiar fitness of the local situation and aircrematances of that institution, it appears, that without abaneg the primary objects and intention, it might be made the great repository regions that surround us It appears to me, that the oppropriation to the Malocca college of a part, if not the whole, of the arrears intended for that of Singapore, would qualite the founder and members of that institution to increase the number of professors, to make the grages; and with but a little assistance might, at no distant period, became the recceitors of all the learning of those more Eastern countries. Independent of the promotion of seigner and literature, the Government might derive other more clirect advantages which such an institution would afford to such of their servants, civil and military, as were so disposed. diffusion of knowledge. I do not concomplate any interference by the officers of Government most ready and willing to communicate every possible information. I propose, therefore, that the payment of 100 dollars per month to the institution commence the lat of this month; that a recommendation be made to the honourable Court to appropriate to the Auglo-Obnese college at Malacca such portion of the arrows intended originally for the Superpore institution as they may see fit; and that the present members of the college be founders of the institution, suggesting at the same time that no measures involving additional expense be adopted in extension of its objects, until the sanction of the The Court of Directors has confirmed this grant of 100 dollars per measen to the

Public to The Court of Directors has conformed two grants of the arrears. 27 June 1819. 71. Chinese college at Malaces, but not the proposed payment of the arrears. The following are the laws and statutes of this institution, as published in the year 1895:

"There shall be a College Countil

" LAWS AND STATUTES L "Two college council shall consist of the president of the college, the resident prinsiral, and the realistic of Chinese. "It is understood that the principal has the direction of the ordinary daily concerns of the college; but in any effoir of importance to the institution, or in may new toso that may

eified, the principal is required by this statute to confer on the subject with the professor of II. "In a case of serious misconduct on the part of any student, the measures to be

adouted shall be considered by the collars council, and their decision carried into effect by III. "When the president is residing at the college, be shall be chairman of the council.

IV. "When a difference of opinion shall arise [amongst the members of council on any subject, the president and either of the other members of council concurring, shall decide president, and the case does not require immediate decision, it shall be delerged six or twolve months, re-considered, and in the mean time, if practicable, the opinion of some of the trustees he taken by a joint or separate application of the president and the other two " If the question require immediate decision, the president's existen shall be adopted,

of the trustees, whose votes, joined with either party in the council, shall make a first V. "In case of the president being absent, the principal and Chinese professor shall form

a council, and confer on every important subject. The principal may at any time require seasons must be recorded by the principal, and referred to the president " It is to be hoped that there will be a general concurrence of country; but when a dif-

deferred, and represented jointly or separately to the president, whose opinion, or either side, shall decide the case. When immediate decision is required, the principal's opinions the president; or, in the event of the office of president being vagant, to the trustes whose

(28.)-MINUTE of Sir John Molecha, Governor of Boschen, 1859.

I concurs with Mr. Wurden as to the desirable object of diffusing education, but differ I am of opinion the method adopted at this presidency is of all others the best that can be pursued. The chief ground on where I anticiper: advantages from the establishment of the Eighinstone professorships, is, that a certain proportion of the mutives will be instructed by

accessible through the latter medium that it ever can be propagated to any general or bene-

This question may be decided by reference to the History of England. Before the Reformation, our best hooks on religion, morality, philosophy, and seignes were willed in the men of the learned professions, and those who are to instruct youth, still study the classical countrymen, to whom improved education has been so uneful. The reason is plain; the have the path of knowledge rendered as short and as smooth as possible; all that we are now doing tends to that object, the complete secomplishment of which will be effected by the to teach the many, and from whom, as a source, the notives of this quarter of India will be shie to chasin that information and knowledge which is best suited to their wishes, their

I have on political groups a consolution, derived from my conviction of the immoulbility exists for the servants of Government uniking themselves musters of the impanges of the

respect competent to their public duties.

One of the chief objects I expect from diffening education among the natives of India, is now have to prefer to being excessed by natives on denishibed solution. I further look to the employment of the latter in such duties of trust and reseasability, as the only mode in there deservoes, instead of useful, unless the road is opened wide to those who receive it, to

To render men who are continued herough the immediate limits of the Presidency fit for such daties as I contemplate, no knowledge of the English language is necessary. knowledge not only of general science, but to enable them to understand the grounds which more liberal views and sounder maxims of our policy and legislation in England. It is to and as no duty one he more important than that of men who are placed at the year head task will much depend most the liberality of the valueice assigned than, I trust with Mr. at least cound to that subscribed by the natives of this presidency.

I have since my arrival paid much attention to the institution for educating natives in the engineer and revenue branch and recret that my sentiments regarding his progress and utility should differ so much from those of Mr. Warden, and particularly on the essential

While I can quite understand the facility with which som of Europeans brought up at the national school, and similar charitable establishments, one pursue their studies by the sid of most derirable they should pursue, and for which some closes of them, particularly the

The objections which some of the natives have to enter our seminaries to learn English, are not curosconable. The soudy is unknown, and more exclude many pursuits which are Appendia Education prosected, by their queries and wights. Besides remarks course, local and others, one, there is profitted into a profitted message in the case of profitted the traces promoted the most processed, and then, as they now sen, of seguintly science through the mellions of the statest lenguages, the great schazials is errored. (28.)-EXTRACT of LETTER, in the Public Department, from the Court of Directors to the Governor in Council of Bunkus, dated 16th April 1828.

3. Tax reports of the judges, collectors and other local officers, on the state of education (18.) Letter to the of their several districts, the control of the several many management of the several many districts of the several many functionaries in general have cordially entered into your four-rollent views, and have applied 1828.

themselves with olserity to devise effectual means of forwarding your object.

4. The reports prove, that of the population under your Government, only a small population. we were prepared to expect from what has been ascertained concerning the state of education so the other side of the Peninsuin. At the Mahomedon schools the children are taught to read the Koran and some other religious books. With respect to the Hindoorshools the instruction which they afford is not calculated to give to the number moral and intellectual improvement. What they learn comuse of reading, writing, and in most districts, the radiments of arith-

metic, the latter taught in a cumbroon and apparently inefficient way, and the power of reading and writing confers on them little benefit, since their languages afford but few books 5. There are but two means of placing a better education within the reach of the untiver under your Government; the improvement of the existing schools, and the establishment of of the last, there being an immense number of entire mehals without any sphools whatever,

number which possess them. The masters of the existing schools being, in respect to useful information, almost on the same level with their acholics, it was alike necessary whether with 6. The English school which has been already under our nanction established at the

endeavouring to dispose of her as a domenic slave.

Bairford, Nov. 8, 1839.

2. In the territories under the Madres Government, slaves are of two distinct descriptions: the one includes the great since population termed "agrestic slaves," or such as are musally amployed in the field, though occasionally slap in other labour. These consist exclusively occural provinces of the Indian pennaula, such in the Ceded Districts, or Mysore, peopled assumes its woost form on the western coast of the profusula, or in the provinces of Molaliar advanced to maintain the existence of the authors of its being, authorized by nature to contract for its service until it is old enough to confirm or carred such compact. The rest of infidely congrered by the frithful; but its text a entirely ongosed to the nurchase of free children for the purpose of reducing them to a state of bondage; yet, in practice, compacts such as are described above, confer permanent rights on the Mahomedan purchaser; for, Busies the spirit of proselytsen which characterises the Missistmus faith, a male infant w so sooner purchased than it it is excounsised; and, whether male or female, it is invariably vocably excludes it from all return to its parants or relations. Bondss the nurchase of articles in Europe, than slavery of even she most qualified description. There can also be To doubt that children are scentimes kidnapped and sold as sixten, without the knowledge several such children to their parents, emongst the lowest and poorest of the Hindoos; and their ascirty to recover infants, whom they as all probability found it very difficult to rapport, would have done honour to the highest clause of European society. I may add, institutions of the Hindeo government have descended to our own times nearly enimpsired, forcibly carried her off to a distant province, where they were taken up, on account of cervest returns of the impulsions. In the fielding divides of the Cerkel Districts, where J. Appendix (X. first, bald that stricture), have already stated that no agreement series and the contract of the Cerkel Districts of the country, they amount to many thousands; but I seem, from nearer cast. In Carlos and Cerkel Districts of the country, they amount to many thousands; but I seem, from nearer (3. Lawrent of the country), they are considered to the country of the

they usually work from about sunrise until senset, with the intermission of a couple of hours for their meal, during the middle of the day. They are not exempted from work on any those fixed for consecrating implements, the new year and other great days. No perticular (6.) Answers of task-work is satigned to them daily; it is sufficient that the slave of each matter exact the Compton the work processry for the cultivation and irrigation of his lands. These slaves are also often employed in erecting temporary rooms or pendols, used by their masters on marriages or other festivale; and constitutily are called us, by socialition of the collector or magistrate, cound the villages or temples, to move which immense cables, dragged by many thousands, are recessary . In Tanker in particular, from the great number of the temples, and frequency of the festivals, this is a very oneson duty. The lash is never employed by the master against his slave in the Toral country, but it is in Malahar , and its lopality, under the Prized Paper

without incurring the penalty of murder. They are perfectly competent witnesses in all

cases, civil or original, whether against free men or others; but I do not think that the gyil magnitude has sufficient susuancy power to interfere for their due protection. 8. The view I take of agreetic slavery in the Tamil country, corresponds much with the relation stated in the question to have existed between villains and their masters, during the later period of villsinage in England. Thus a parish, the slave of his landlard, may, with overlienan as a servent (and many have done so without their permission), exercising all

that as recently all neis between him and strangers, he possesses the same rights as free

9. The agreetic slaves, in the territories under the Madres Postdenry, see not necessarily terreforable with the land itself; but in the Tamil country they are almost invariably inquiry, have been led to question the fact, which is notwithstending breadly stated by others; but I entertain mone of the general practice. On the western count, the slaves, on the motrary, me often disposed of independently of the land. The cause of this difference

10. Under the Madras territories, nearly all the domestic slaws are Mahomedans. In the

Hindoo festivals, and created a religious antiquisate heatility dangerous to the Government, which nearly broke out into open rebellion. Orders were therefore usued to course their attendance on recoil. I was connected the select any particular class of the slaves ce set their masters to send others in their stend; and that, at any rate, I should overlook which I should do only after proof of its ancient and established usage. On the wastern

indeed I doubt whether such slaves are legally transferable under the Mahtenedan law, Madras Presidency, seems the only code there applies his to them. But the sale of agreetic other hand, the name, except immediately on the sea coast, are no where congregated in from one estate to mother, however distant. I have long considered it desirable, as regards the slaves on the western coast, that the Government of Madras should pass enactments similar to those contained in the Bombov code, which provides that infants shall not be reparated from the mother until a contain age; and, I think, also prohibit the superation

of the wife from her hardward, it is period Government, under the Mallion Pronocessy, soldier (445.-L)

ON THE AFFAIRS OF THE EAST INDIA COMPANY.

14. After having admitted that incompresence may sometimes be experienced from the pertracted residence of the students in Calcotts, which is caused by the Collage, we are derives of suggesting that the evil is very much consterbalanced by the advantage wirely many of these derive from mixing is a large and a ell-regulated society, and from becoming countrily loows and appreciated by the manhers of the Gesterment and the necuna Hing high offices at the providency; we entertain no doubt that this nivermetance has had a very bracileial touckney to advance the interests of many meritorious individuals, and to 15. From all the considerations on which we have dwell above, we are satisfied that the

service in India 10000 profitably for themselves or the public service, thus at the College, It the whole body, because the institution may be abused and perverted, as it must be expected

16. In submitting these general views, we see however against to be understood as not ressing them with too mode rigour ; we are very somible, and indeed experience has shown, that when the errors of any student are not to be reclaimed by the adaptarities of his arperiors, his being sout to some retired situation distant from the presidency, mace opposibly if the head of office to whose he is attached should take any interest in his welfare, may be strayled with the happiest effects. We should accordingly wish this messure to be respried the greatest circumspection, it might be attended with the most subschierces consequences to be avoided only by making any individual supelled with strong and solumn censure, by rebefore the college officers, or (where the distance may render that made improprient) before morer persons accommend by the Right honournile the Visitor, the examenations prescribed to qualify the students for the public service, he should receive no promotion.

17. We proceed to the further point, of the state of the institution as to necessary learning, upon which the Hosograble Court require to be furnished with securate information. 18. Soon after we received the orders of Government to formish our suntingents on the queries of the Honourable Court, the Right honourable the Visitor, in his discourse at the dispatutions for the present year, expressed his spinion that the scale of triental knowledge

great expense, he preference be given to the versecular languages, before the Austic or Samerit,

In consistering the above suggestions, is will be convenient to take a collective view of all which relate to the re-establishment of personnery sowards, via Coutoin Lorbott's first

wherehe such must of Statute 23 of the data chapter, emeted in the 3d Jame 1814, as directed that a price of 1,000 siece rupees be correded at the public recruitations to every yieled that the Conneil of the College shall in future award, at the public conminutions, to or assistant professors in the College, and may arrient from the report of the constiners to

honour and a gold norded for each language, with a print of Oriental books equal in value to

To the best of my recollection, however, two reasons principally influenced the abelition of the prize of 1,000 supers for high peckgioney: military, who might attain high profisioner in any of the languages taught in the College, expenses of the institution, or contracting its relieve of utility by contraling the military

Secondly. The obvious objections to an invigious distinction between the civil and military stellents by decyling to the latter, however meritoriess in the presention of their stadies the reward given for smaller merit and necticiency to their fellow students in the civil

These metives still restrain me from recommending that the perminary rewards, discontinued in 1816, should be restored; unless it should be ultimately determined by the At the same time, with a view to encourage the study of Arabic and Scaserit by the

justor civil screents, after quitting the College for the public service, and particularly to indoor them to study original compositions upon the Makemedan and Hindoo laws, it appears to me highly expedient to adopt the first of Captain Lockett's suggestions above stated, with the substitution of "civil surrunts" for "civil student". I should indeed be to the attainment of so important an object, when it is considered that, besides the diligense and time required for becoming predicions in a difficult and environ harmon, no small

be incurved in the nonuisition. It is obviously impossible that the students of the Cellege of Fort William should, in color the Histocontribe or an European imprigo, to required to secure the charge of th hoyond what may be requisite for a grammatical and accounts knowledge of the Postan, Himloostance, or Bougulee, shall be considered optional;" and I must confine that I see no sufficient reason for endoavouring to promoto a more general study of the Sansorit language, " by a rovival of the reward formerly granted for proficiency," as suggested by Dector Carcy, if this suggestion he meant to croply to students estually attended to the

I shall only further severt, under this head, to Dooter Lumsday's suggestion for rewarding

At research the wided of the students attached to the Cellege of Fort William receive a monthly illowance of 300 regrees, besides apartments in the Writers-buildings; or whom these cannot be provided; from the brailings being under regals; or from there being green of class-broks, excepting grammars and dictionaries, which they are expected to provide

student

The only modification of the general allowance of 200 rapess per moneon which occurs College at this passidency, is, that an addition of 100 ranges per measure he granted to any

seadest who at a half-yearly public exemination may be found qualified for the public felency in the same languages, or to become proficient to any other language taught in the

This arrangement would place the student voluntarily remaining in the College for six will give an advantage to the surdent remaining in the College for the protection of his studies, it may be answered, that his adventage is but a satisful encouragement of the the first importance, and which calls for more immediate attention under the rule leady

To meet the small addition of expense which may result from the adontion of the propard artungement, and still more for the purpose of making a greater distinction than wint

chapter, before they can be appointed to any signation in the Political, Judicial, in Revenue department, with a salary exceeding 350 repres per measure. If this measure be approved, it can be adopted by an order of Government, under the

I proceed to the second of Captain Lockers's suggestions, via, that the students of the interpreted in books of Bindon and Malasannedas law, But after what I have already stated on the difficulty of presecuting an efficient usualy of Sumunit or Arabic, in the College, with

Centain Lockett's third supportion involve neveral material considerations, viz. first, whether it he advisable to construct or progue a suitable lanking for the College, instead of hiring a horse, as at present. Secondly, if so, whether it should, as proposed by the secretary, contain unariments for the superior officers, for the students, for a library, for the public exeminations; so should be calculated only to provide for the College library, the secretary's effect, lecture-cooks for the professors, and a room for the public examinations, which might be also used for the meetings of the College Council. I emprejy expone he opinion with Captain Lockret, that to obviate the inconvenience of

Were the Court of Sudder Desentes and Nisagent Adamint to be removed from Calcutta, offices, form an agerdiant College; or if any additional rooms were required, there is skinzvistace of source for the construction of them. If, however, these premises connect be the Chowringhan suburb of Colcutts would, under all circumstances, be the fittest place

107. It not bring easy to form a antifactory and perspisores abstract of the suggestions of the sellege countil, we shall here transcribe such of the observations as called for a decision or the part of Governmen, and subjoin the substance of our resolutions on the

writing points submitted to our consideration.

"It seems to be generally infinited that the young civil netwests who arrive in Collents, unspecified with funder or credit, must leavishfuly many dold in the vary enumeronement of their energy it has the highlighting of any period of that delet, see of the interna sociating upon it, cannot generally be looked for will the laddy-lead are in the results of diplare followands.

cellage are not more than sufficient, with produces and commany, to defray their current monthly expenses."

"The cellage counted would recommend that 10 or 19 sets of the writer's buildings to previded, at the public caprone, with those arrises of plain but not motional furniture which are required in the clamate. Antispicing the sustains of Government to this

arrangement, the college council have directed their secretary to prepare a list of the articles of fundame reprinted for each set of quarters, with an estimate of the probable expense; and

Infection communication on the subject will be shortly attained for the confidence of discretions.

"The understandated further is probabilisted, under the penalty of intending remain [and the confidence in the probabilisted, under the penalty of intending and from order (and the penalty of the confidence in the penalty of the penalty

"The motives of Government in exercising such control and in maintaining such discigling, are not likely to misconstruction, and such restriction can sourcely be feld by any young

man of proper principles, as unnecessarily savers and lamb.

"To enable the officers of the college and the college council to cofece them with effect, the restrictions must be precise and definite, and if the principle is approved by Government, the college council will submit a deaft of such rubes and instructions as appear to them sofficers.

"In connection with the foregoing irrangements, the college controll would propose the associated of a right to greener up suited in the recollege intered to the college beyond a probed of right another time the first entering it, except in instances in which this exists a probe of the problem of the

a They would also suggest the propriety of giving to the young mea on their first arrival, or at any subsequent persol before they are pronounced qualified for the public service, the option of prosecularly to a station to the interior of the country, and of decree qualifying themselves to pass are examination in the prescribed languages. It is probable that such an option would be materially asserted the season of the prescribed languages. It is probable that such an option would be materially asserted the season of the probable that such an option would be materially asserted the season of the probable that such an option would be materially asserted the season of the probable that such an option would be materially asserted the season of the probable that such an option would be a materially asserted the season of the probable that such as options are also as the probable that such as options are also as the probable that such as the probable that the probable tha

the Sozzerszy to the Bostley Government, duted 30 Sept. 1808. 3. I may the honour to acknowledge the receipt of your letter of the 19th July had, giving cover to the copy of one from the Secretary to the Supreme Gerenment at Fort Connection.
William, calling for information on the plan pursued by the Honourable the Gereenor in 90 September 1818.

languages, in order to compare it with that which prevails under the presidency of 2. When the civil servants of this presidency were so longer permitted to proceed to the College of Fort William, to acquire a knowledge of the Original languages, for the long-

period of 16 years, the stady of them here being rather options cann empany a sep-chal the numbers were comparatively few, who were prompted either by lare of learning or the comparative of the state of the second of the state of the second of the state purpose. Henourable Mountstown Elphinstone perceiving the ceils of such a system, shortly ofter Generalizat Geyears in the country, stating "that the Honzarable the Governor in Council has it in conguage will be made an indispensable qualification for official employment in all cases; and College is instituted, and sunner pass an examination in that language, will be removed from his appointment and sent to the College, until such time as he shall have accurred the acquisition of the Persian, Sanscrit, or Arable, in addition to the Hindcostance and the Gurserates, or Mahratta, cannot fail of strongthening the claims of a servent to the conside-mation of Government." The Hontorable the Court of Directors disapproving of the cons. See Court's Desblishment of the proposed College, the young gentlemen were nevertheless required to patch, Public Destudy privately, and pass an examination in two inspanyes; first in Hedeconstance, "as particular an independable qualification for official employment," and secondly, in either Mohentin date 11 June 185 or Guzzevattee, to become entitled "to promotion to the second step in any line." The derree of attainment recoired at those examinations, was never publicly positive to the students until the Court of Directors sanctioned the appointment of a permanent Committee

1826, and which are now in force, prescribe the following points for the first or klindon- and Court's Roply, " bst. Translation sied sees, and without premeditation, into English, from a prose anthor, and particularly from letters and petitions. *2d. Writton translations with premeditation, but without any kind of assistance, from

English, of a tale, or similar kind of narratory style, and of a letter, or petition, or section of a Government Regulation. "3d. Translations, misd year, from English, of a dislorme, or of emertions and snawers

"4th. Conversation: implying a comprehension of all that is addressed to the candidate

on all common commercial, revenue and judicial subjects, and a tolerable degree of fluency " 5th. A knowledge of the grammatical rules and principles to be shown, by convectly parting any passage which may be pointed out, or by answering any questions on the

unbject that may be proposed by the examiners. "And that the characters required to be known at this examination, are the printed Nurisk, and written Taleck: and the hooks to be read, such as the Ukhaya, Hindee, Bagiso Bular, Khind Afroj, Tota Kuhante, &c."

The points for examination in the second language, either Mohratta or Guaxerotce, are the same as those enumerated in the foregoing for Hindsontance, and "the characters required to be known are the Ballooth, both for Maheatte and Gusses-tee, and also the Meres and Guzzernice running hand. The hooks, such as the Singiasma Buttomian, Punchopakhyran, and Æsop's Fahles."

3. By a reference to the list of writers who have been required to pass from the 14th Jane 1830 up to this date, it will appear that the period within which qualification for official employment of any kind is ordinarily attained, and until which writers are emitted to no emoluments of office beyond their dewares allowances, is one year. The further quaoverlooked or dispussed with; but the ordinary period in which the prescribed acquisit-

APPENDIX TO REPORT FROM SELECT COMMITTEE

We are upwilling however to issue percuptory orders for this purpose, without 94. "We therefore notherize you, if you shall see sufficient sesson for differing from the

we should avail ourselves of the sanction allowed by the Honourable Court, to suspend their rotler for the abolition of the College; indeed a different conclusion would have our All my old prepossessions were strongly in layour of this institution, and these were not writers of the Modeos presidency who had been educated in the Colleges and with this agrerighty of acquirement was also combined a high and elevated tone of Scoling, and great real in the public service, qualities of more importance purhaps to the welfare as well as character

and amenon are the beast of the present day; even in Calcuts itself we have a Hindeo College composed, the worth of which are equally remarkable for their diligent and suscendid other are and solences, as well as for their exemplary conduct. Is it fitting and deoproes, that it shall appear to this enlightened society, that the English youth alone are incapable of education? that such is the idleness and extravograce of this selected class, that even hopes of instruction fruitless 3. Such most be the inference from the discontinuance of the College. But for myself, I cannot subscribe to the necessity of a conclusion so humilistant and so decomptery from the character and credit of our administration

the discipline of the College has fallen short of what it reacht to have been. I have taken great pains to make myself acquainted with the working of this machine, and I do not sesitate to my, that want of discipline and involvertination appear to me to be the sole cause of the induce of the institution, if it can be said to have failed, which I very much In agreeing with the Hangurable Court in this opinion, I do still more strongly in another,

so justly described in the last paragraph of their despatch : "Upon the whole, our opinion is, that you have the grand instruments of reform, the means of influencing the minds of you present of appointing or not appointing to the employments of editor?" (and then stating minry endomenments in the service negocally, they said t, " nor can we doubt, far lost applied, will be attended with the happy consequences witish it is one object to accure."

the authority of the Supreme Government, and have rendered unavailing all 11s efforts to secondlish this desired object. In the military service of the Contpany no such differing occur. Malkary has is no effectual here as closwhere. For the control of the civil services, be in peasemion of a good appointment, the minry of which he flatters himself will make good the losses of present idicress and dissipation. It is a carrious fact, that however group the house on prevent mentals are applied by the state of principle, there is not an amount of principle, there is not an amunos of expuision from the College rince its first e-tablishment; and well therefore has

Appendix (L.,

personal influence of the head of the Government, which he must always have so money of actual way. It is our happing formuse to be enabled to slevest our whole attention to the 27 December 1928. those benefits to the people to the extent which the analous desire of all the anthorities, both here and in England, has ever had in view, so one can dany; but the agency has norhans been still more inefficient than the system itself; and as there is no escape from guerance and inexpacity, where all places and appointments are a monopoly in the hands of a privileged few, it does become a most serious duty on the part of the State to vender

as complete as possible, the copacity for Government of those to whom for so more years. Before I proceed to state the very few alterations which I think necessary to give to the practical execution with militares and flemness of those already existing, which is really synting), I will take the liberty of adverting abortly to the only alternative left to us in India, if the College is to be the continued-a Mofusel education. It is admitted by all that excitements to fame and distinction, which emulation alone can generate. There may indeed be less extravegance in the country, though it by no means appeare clear, and the contrary is distinctly asserted, that the embarmasments of the civil service were quite as great before as since the establishment of the College. The same credit derived from the covisin anticipation of great aution with high salary, and the means of patronage, will produce the same effect both in town and country. Where the disposition exists, money respectable agent, receiving 10 per cent, interest, added to the charge of life insurance; and if a speculator on the fature distress and favour of hie debtor, a still more rainous con-That there will be more biscores in the Mofassil I verily believe. To my judglatter of parental interest instead either of no protection at all, or of that of a perfect strauger, who can have no interest in the welfare of the young man; and if his habits happen to be irregular, will probably feel him to be a sort of incubus imposed upon him, inportance to commencement of residence in Calcutta. I admit that there is a chance of evil; but the cell, great as it may be, may, in my opinion, be avered, while the good cannot otherwise be attained. The high oftens of Government and of the law are necesand precipally it is highly useful that the young men just from school, with no formed into proceeding it is signify includ that the young must just men section, with no ariman-ident upon public econdact, chould receive their first imprensions from the high-minded acc-tances whath I sinceroly believe very goornily to prevail. There is also this further arimanage, thus by the character developed at the College, the Government is enabled to gain the only certain knowledge of the real qualifications of all its younger screams. I will to accomplish the object in England by readering a knowledge of aposited in England as indispensable condition to eligibility for a writtening. There can be no reason why as great of Europe are found to be to the Hindoo and Mohemedan youth in Colcutta; the same England, with the writer, it precedes it; herein consists the whole segret of failure and

I see nothing in the different systems pressed at Madras and Beenlay which seems to surfice the study of that Impungs, thus puslying and rendering abortive all the anxious pains and expense as propolly bestowed upon it at Heriford College."

I have now to beg the attention of Conneil to the Paper marked (B), which shows the overage exposes of the education of each suiter, during the last three years, to be properly discontinued) of 4,600 rupees, or 4002, so each writer for outh, repsyable by retreasurates of the machanical discontinued and the contract of discontinued and the contract of the c without interest. 11. The College of Fort St. George is similarly superintended by a Board, consisting of a member of Cosneil as precisent, and of three other gentlamen selected from amongst these holding offices at the Presidency, attached to which are a secretary and associant-Sentember last, the translators to Government perform the daty of exemiters. The major 1 October 1829. account of the institution being Rs. 1,195. 8. per mement, or including contingencies.

12. At Madras, the allowance of junior civil servents on their first admission into the College is Rt. 175, which is increased progressively, on the attainment of prescribed degrees of professory, to Rt. 200 and Rt. 200. In addition to the ellowances above mentioned. farther remarked, that it is epitonal with the students either to parene their studies at the

13. One of the principal items of charge connected with the College at Calentia, which information we have obtained, it seems to us clear that, highly as the greateness who have goard to make the best use of their shilities, the benefit derivable from the instructions of the professors is more than counterbalanced by the loss of time involved in attending them, To the indelent and idle-disposed, the constant expervision and assistance of the professors is, we believe, calculated to be of some use; but under the present system, those students who do not evince a discoultion to avail themselves of the means of instruction afforded to them, and who would benefit most from the labours of the professors, are sent into the dges not appear to us to be sufficiently important to consterbalance the express surident

14. As the first establishment of the College, the learned natives attached to the preference leighty useful is niting them in the preparation of elementary and other works. and in training measurers for the propose of instructing the jump civil arrange. The firmer of these objects having been accomplained, and there being now no look of duly

15. That part of the establishment immediately under the scoretary does not appear to where there are 14, receive each 40 Rs. per merseus, whether there is employment for them or not; those of the latter description are employed only when their services are removed. and are read at the rate of 30 Rs. per surners, their salaries being included among the municipant charges. We do not consider the solution allowed to either class to be larged than they ought to be.

16. In considering what should be the future establishment of the College, our inquiries pursuing their studies at the College has screethers been as low as 17. The overage been 40, and the average rounder of young non reported qualified has been about 20

In theory this is not excellent plan, and ought to be easy of excention; but with the

The celly part of this plan really possessing a compelling power, and afterling my security for success, is the condition, that if the writer is not qualified within a certain period, he will law his, most valuable, excellengent. This, so dorbt, will correct in Eurland, as well as lower. But this one among will be good for nothing, unless the required confidentions are subsected to an importial stall rigid trial. I am disposed to piece no true as se examinates in the Molneyil, however the contractor may be composed, and I consider that there can be no security

I suspect that there will be found a strong practical obstacle to the execution of this ners of business, a retwork at my suggestion, was called for, of all the buildings at public me, the number at any station was very limited. I beg to refer the Members of Council to number of houseless; but this would demand both time and expense; and if made, what

progress of the further trial which they entherized to be made, is before these. A decision mostler, which, as far as it has been tried, appears to premise well. The knowledge of the

satisfactorily accountished. Comp. Hibrit paints Balchter (833.1% the University of Souther (signed) from Wildin Bentinables.

at Madras, 20 Nov. shall cease altogrober, proseed to state, "We conceive the most eligible mode of remarkements

8. A comparative view of the appointments which have taken place of late years, with the Oriental languages, by the mode of remuneration above described. But, succeithstanding the papedra for distriguished profesency in the studies pursued at the college may dump the

6. Many were how you alread since the Government, required of the provinced importance of a knowledge of the notive languages suggest their executive officers, larve hold out the previse of promotion, as an indecessors to the members of the civil service to apply in the year 1797, the civil servents on the combinishment, with very few exceptions were caset. Subsequently to that period, many have applied to this study, and by extraordinary bloar and constituting to this period, many steer repress to the stood, and of extraorassity theorem as considerable knowledge of these languages, mented, indeed, with respect to the Arabio, Poutan and Mindoostarce, by the facilities affected on the establishments of the College of Fort William, but necouraged principally by the hope of obtaining gither the reward uself or the distinction attending it. Nor is the number of persons on whom the reward has been accusily bestowed; by some of those known others also, olthough they never arrived at that proficiency which emitted there to make for proser, though they might not always be able to dispease with his aid,

10. On more ambitious motives the prospect of promotion, however distant, will no doubt to their sequirements will be a sufficient metive for exertion; but an institution like that of dispositions, may all have the same final tendency, and be productive, though in different dagrees, of the same effects.

11. Satisfied that the restraint necessarily attendant on systematic study is not congruid than the distant prospect of premation, or of the baseauty reward alone, were more sure taking general attention to the study of the languages peculiar to the South of India, we to oppose earthin immediate and progressive advantages to present constraint and inconto high profitiency in oriental philishops.

12. When a fair prospect has thus opened to the attainment of an object so essentially conductive to the happiness and welfare of the people, to the character of the Governmen strongly recommend to Government the expediency of a further reference to the honourable Creek, and, wetil the result of that reference he known, the ungency of medifying their coders,

constative ardour so happily excited among their juster civil servants upon the const 24. We are of opinion, however, that in continuing the reward, alterations might be made, which, while they safety the Court of Dercours that due attention has been paid to the spirit which the knowledge of the vormenlar languages has of late been so greatly extended among their servents of this establishment. We accordingly submit to the consideration of the

COLEMN SE BONDAY AND POONA. Para. 59. Tax instructions conveyed by your honormable Court in the 57th paragraph of (78.) Letter from

to take measures for the establishment of a college at this presidency; and as the subject meet, 29 Aug. medians to your honourable Court.

60. In pursuance of a proposition submitted to us by our President, in his Minute, dated 1810. Peb. in June 1820, we require the a committee, to frame regularious for the proposed eachlish- 7 June, fel. 833. ment, taking at their model the Code in force at Madma, and introducing such alterations 61. The instructions issued to the committee prescribed the acquisition of two languages,

Mahrutta or Guzzevanee; and while those were to be considered as essentials in the education of the civil services, encouragement was to be held out to the acquirement of Persian,

Sensorit, and Arabio, as advantageous additions.

62. Their attention was also drawn to the best means of proming teachers, the most Pai, Constrinkle courses of study, the maintaining orders, and the encouraging profitionary. The 11 Get, 1970, committee was subsequently farmined with a sloced of the continuous of the college of £6, 1970. Fort William, a a statement of the full units performed by the professors and counterous, and a 1661. list of the class books in use; and with a memorandum of the establishment at Madasa,

drawn up to the latest period. 68. On the 18th of November, the eccemittee submitted to us a plan of the college to be 1821, Pub. Com. established at Bembay, with a copy of the Code of regulations for its management, to which 17 Jan. 60. 69. we have the benour to refer your homourable Court.

65. The establishment was to be placed under a College Council, assisted by a secretary, who was also to be examiner and librarian.

66. In addition to the salary of the secretary of 1,000 rupes per month, the following 1821, Pob. Comsketch of the expense of the college comprehends the best estimate we can form of the 17 Jan. 60.112.

The College for instructing Europeans, calculated for from 30 to 40 Students:

I Native of Arabia, for Arabic -2 Natives of Persia, for Persias (who might also occasionally teach

Ambio, if qualified), at rupees 100, and rupees 80 10 Teachers of Hindoestance, average 60 -600

(The majority might be expected to be qualified to tusch Persins.) 5 Teachers of Mahrattas (also qualified to teach Sumerit), at

- 300 rupees 60, average -5 Tenchers of Guzurratton, qualified to touch Samurit - 300

Rupoes 1,480 72. With regard to the establishment of a college at Bombay on the plan thus submitted to your bonounble Court, we have been prevented from earrying the arrangement into

immediate effect, as your homograble Court have directed us to communicate to you the result of our proceedings connected with the instruction of the jenier civil servents in the entire languages; but we strongly recommend the adoption of it. 78. The only possible objection that appears in our minds is the expense, but the greater

ore from (20) - MY Lord, (20)

upon the various ports substituted for our opinions.

3. The first subject discussed was the plan for resasting the existing allowances of the
civil service, which has been substituted by Six 4-bits Maleidin, and appears to be strongly
project of Kr. 19th Machinenie, each may be characterized in a few words, as a yellow for
remining the salaries of the generality of the more highly pull offices to a minimum scale,
lower by short of 3 per cent then at greated, and giving to the intermalmenta a personal

toniessa according de their steining sino resistence.

3. The new scale is so cast, that other providing an increase for alreat 20 scalatants and others of large standing, it would, nevertheless, if applied to the Bonsley service in Represent distribution to the different offices, yield a saving to Government of 9 per cest, on the aggregate of civil allowances.

the greatest text and the measurement of the form of the present of the security of the securi

the Government at all.

T. We understand your Louiship to desire our opinion only on the projects of Sir John
Malerim and of Mr. Holt Mademark, and to these, therefore, we propose to conduct our

observations. The Proper explanatory of the science of 15, 1643 Medicardoser as at a lead, 15 of 18 th proper explanatory of the science of 15, 1644 Medicardoser as at a lead, 15 of 18 th proper science of 18 th proper sci

retrining to regimental pay and tests, and the native the half pay of retractions is to:

T. Upon the latter schows we big to remark, that we thin it is both; remeasurable and
expellent; we see no objection whitevers, but, on the contrary, much networkers in the
calculating the allowance of the circle seeving a reported by Mr. field Medicines, upon the
surposition, of course, that the calculation is fully mode, and the service at the simu to
whitemore solds, that is, without superconnecting anisotate waiting promotion, on more
whitemore solds, that is, without superconnecting anisotate waiting promotion, on more

8. We should even see advantage in applying the principle at the present time in Bengal proportively as situations fell vectors, provided the rates assumed in Mr. Mackennis's collaboratives when as the fisculation were taken as the fisculation were taken as the fisculation when considered and the provided of the p

13. Its secret to us that there are there objects which ought always to be kept distinct, vir.; First, the allectrant of its confizionant for affects in the country; secondly, the ability ment of a fitting number of servants to carry on the duties of administration under the system adopted or obtainable more, and, thirdly, the chirate to provide on these sent out to administrat the country under one system, in cose, through a change of system, their excitos are no longer required.

1.6. Then there translated are time quantities from the existence of a body of functional fix the circle translate of the there presidentees, and they all there require to be near-good for the contrast of the there presidentees are the contrast of the temperature of the contrast of

15. Ornisional meetly ma mode of paying servants, we think, no we have before stated, that the plan of division into servine-pay and offine-pay, has many pulpable advantages, and it not flable to any solid objections that we can sutdiried.
16. The power of white selection that it would confer on the Government, we estimate as inconsistently, but signed either so an advantage than the contrary; for the possibility of the showe of this power of the subsect of this power of the power of

scheme, is an argument against the allowance of any discretion in the selection of officers. But smally the resistincia by law to members of the civil service is abstraignest enough to the indition measurery for the conduct of great affairs. 17. There are two other points referred to in the Sceretary's letter above solmovabelged, on which our opinion is additional, and which were accordingly discussed at our meetings.

and, accountly, the best mode of employing the general terricors.

18. On the firm point, we find much difficulty in affixing any devided optains. Men the possession of high and advantageous offices, will only relinquish them voluntately when their views and wholes, in respect to final netwertenout, we fully satisfied. If the prospects of the acretion are such that other 85 or 30 years this point is not exclinately detailed in the district of the first make the prospects of the acretion are such, that other 85 or 30 years this point is not exclinately determine the dark-moving-light high practicing forther in wanting-figure-such thermorement.

some decree over-unid, for such I ecceptive the option and salt agencies to be, though the collectors who have to make artifements, and might with advantage be considered open to collectors in the Lower Provinces, as well as to officers in the Customs, Salt, and Oping

The Cuttack collectorship I have of course ranked with those best paid, and it has like to those, and indeed almost all the remaining offices, it may be sufficient to refer to the

The chief amistories in the territories to which the regulations do not extend, appear to have duties not less important and laborious than those of judges and collectors in the Western

less, it must be remembered that they have the combined duties of all departments

proper to place on the footing of the Boards of Revenue, in any permanent schools; teu-

The Current office stands on a level with that of a judge and magistrate; Aimes and Bhopaul I have ranked higher, with reference to the existing unlaries, rather then to say slow remontion of the propriety of what I suggest; and it would indeed be preporterous to bope that in a master turning so much on more questions of degree, I should have in all or even in the majority of once his upon what will be approved; it will be arough if the whole arhome be not rejected, which I trust it will not be without sectous consideration, merely

The secretaries to Government I have placed on the same feeting with the judges of the Sudder Court. In the highest class they will receive \$6,400, or 1,400 repeasabove what is now drawn by the chief secretary ; in the lowest class in which they are likely to be found,

on the more of more present confort, the first consideration is to have colleagues whom the service and community respect. Under an absolute rule in favour of the oldest who on principle avoid solicitation, and one ellent under the decision of Government, are

of one holding so high and confidential an office. I am tempted to take this opportunity of stating more distinctly than I have yet seen doze, the essential change which the extension of our empire, and other dreumstances, have wrought in the condition of the sometaries to Government; because I believe it is highly

I shall only therefore remark generally, that the circumstances must be regarded as folly apply to present insurfacets, but became by the time the decision of the Honourshie Court is likely to be obtained upon it, my connection with the country will be sently ANNUARA SERVICE by the University of Southwepter Library Digitisation Unit

ON THE AFFAIRS OF THE EAST INDIA COMPANY

I shall not extend this Note by going into any further detail in regard to particular offices; I request that, in judging of the plan, distinct reference may be had not only to the general abstract, but to the detailed list, and that the effect of the gradual morease in the the offices held by junite servents have been inexpediently curtailed.

I have not of course overlooked the objection that the averaged plan has not the advan-

tage which is supposed to attend the system of renumerating by commission on certain over-sated; and it is certainly very imperfectly scoured by the existing system, moler which commission is assigned indifferently on the whole collections, whether the amount is to be In lieu of that system I would propose, that besides the fixed salary of office, all collectors

man, selected by Government to introduce reform where things may have been ill-managed,

Further, if would, I think, he expedient to let it be generally known, that any one not shall, on his suggestion being adopted, be held to be entitled to a permany renumeration

I copped the absroomentioned exception, because the functionades in question should indge impartially of all schemes, with due consideration for the comfacts of the people and I have pursoedy excluded from considuration the offices in the Commercial desertment

not only because they do not form a charge on the territorial rawatus, but because in other respects they are quite distinct; and I faur that in proposing any plan regarding them I reference to the sums eliabamed by them, seems to me to be radically visious : for the trade ments adouted have not been always those best calculated to secure that important object.

It care occurred to me, that the commercial residents might advantageously be required to provide for sale in Coleutte a certain countity of the same goods as are purchased by then very properly be adjusted with reference to the profit accruing on the Calcutta sales;

It common, I imagine, he denied that no triffing evils are inseparable from the existence of derived from the present system; and if the scheme succeeds to any considerable extent it

object has been to maintain the average emoluments of the service as nearly as possible on their present scale ; and when it is observed that, after providing for gentlemen out of em-

ner to muce at the civil service cannot perfect."

18. Against the employment of justim siral servants on the adjudication of siril mits, it is sugged that they cannot posses the requisit qualifections and experience. It is assumed that their decrees me lad, and their sentropes in original cases unjost, and that they continct their unifold reverses on the antiropes in original cases unjost, and that they

coupler their publical Experience at the response of the statement of the statement of the latest forces of others. At Those have not a hover to be easilized to day presenting powerments, as a Regulations exerted during the last 60 years sufficiently evidence a rate land such interaction of the statement of the latest of the part of the indirect collections, it is presumed understand the statement of the latest latest of the latest

16. On this lead the Committee charge, a Our experience due as a faul as to the condition on that the electrics of registers under the system that has prevented for each dy-versus more least yet er recursous these those of the higher jointeel softener; and they exceed the registered courts (our skither) as perputar instactions, which if a since not lattle it done whether to have their excess decided by those effects or by maller nances, they would, a superior than the contraction of the contractions of the contractions of the contractions of the contractions. It is not to be a superior instaction of the contractions of the contractions

seniousy of service, many would be re-employed who are shally note to be entureted with

16. It is to be classred that the qualifications of a junior servant for the exercise of

the individual to his former condition of an assistant, while the judge would of course convex

17. As a better assurance of the qualifications of the junior sereman previously to their appointment to the exercise of judicial inactions, they might be required to undergo an examination as to the principles of law which have regulated the decisions of the Socider

18. In original cases, it has never been canomary to allow inexperienced junior arresponding

on the score of their youth and experience (although, as observed by the Committee, they and what probability exists that the indicial functions will be more ably and satisfactorily

discharged by those on whom they will benerfeeth dovolve 20. It was no doubt a wise and henevolest policy to employ natives more extensively in the civil administration of the country than has hitherto been the practice in officer for which they may be qualified; and it appeared but just to declare all notices of India, without distinction, eligible to such employment, including of comes all those who are been in India.

courts, or to have undergone that preliminary protestion, the want of which is supposed to Covernment, and not very well required with the general principles of jurispisalence on

22. There seems remon to believe however, that of the numerous condidates for the offices of Society Assess and principal Staller Amers, a very longs proportion are intiveand experience, which the two dimention members of the Committee empoder indispensible experience, indeed, they can have more; and the regulation does not declare what qualifica-

been vested in those edicors.

23. That persons of the class above adverted to, or indeed that any natives of India whose qualifications are confined chiefly to a knowledge of the active languages, should be downed. a view to their employment in the civil administration of our Indian territories, would appear Escapean education, who have been brought up from their inducy with a high sense of

British Government, but most in other respects wholly disappoint every expectation of 25. It has been argued that the confutences of the registrars' courts, or the employment original jurisdiction is civil anta, I can observe no sufficient reason why similar or more extended powers should not be entrusted to the junior civil servants, either as assistant

sion, that it will are long be found necessary to re-establish European courts of original inrisdiction, and to reduce the powers now vested in the usuive tribunarls. 20. A further treat important objection to the exclusion of the juncture servants from judicial employ is, that no other suitable menus of employment here been suggested whereby

they might either render useful service, or nequine that is newledge and experience necessary to qualify there for the higher judicial offices. 27. The most experienced judicial officers and regionly of the judges of the Sudder Devicing Advantat agree is opinion that the judice civil services content be surplayed with as that of furnishmer in English the substance of decrees possed by the notive judges, I should think it preferable to furnish then with during of the higher European courts, as being more likely to eccuye just notions of the principles of law than will probably be found (with very few exceptions) in the decisions of the unive judges, a large proportion of which will, I have no doubt, at least for many years to come, be found erremous, illegal, or alward a moreover, if this practice he useful as a means of instruction, there seems to be no reason why is should not form a part of those earlier exercises by which the justice servants are now required to prove their qualification for public employ. It has been suggested by the two members of the Committee who formed the minority, that the junior civil services every person who has held the office of a conglitrate in any district of those provinces start materially depend the state of the police, and that no long as the magistrate is responsible for its efficiency and for the good order of the dharlet committed to his charge, he could never 88. It is proposal, indeed, to employ some of the junior civil servents under the revenue

collectors and magnitudes, in the capacity of deputy collectors and Joint magistrates ; this effective and to their superiors, enters they be permitted to exercise independent invisitetion, subject only to an appeal from their acts or orders, or to a revision of those orders by their superiors when they may judge occurry. With exception of cours to appealed or revisely if the collector or megistrate shall be held responsible for the sets or collers passed by his subsidiants officer, he will derive little aid from his services, as few measure because new record for their official reputation would be disposed to transfer any distinct of importance to their attach to himself; and the Committee have, I think, very justly remarked, "the principal must be able to trainfer responsibility and he saved from the accessity of exercising his own judgment through the acts of his covenanted unintent, or he gets from him no relief, and the 23. It is at present a frequent cause of complaint by the juniors that they are not

infliciently employed by their superiors, and I am extidled that with comparatively few exceptions, the junior branches of the service do not require to be "coaxed into obedience, but that for the most part they are anxious to be actively and usefully employed, and that instead of caloining their superiors not to tolerate lifleness, it may rather be necessary to guard them against excess of seel and an over-naxious desire of amployment which is generally manifested by the lunior servants, and which should be tempered and restrained by the judgment and discretion of the superior until sufficient experience and knowledge of public business has been acopired.

80. I shall conclude these observations with the following extracts from the report of the Committee, congurate entirely in the sentiments therein expressed; "In answer to the question put to us by your Lordship's orders, the majority of us join many of the superconserury junior survents now in Bengul can be employed; that to take away this line of husiness from the service, in order to suck for others for them, is unseconsary, and cannot be desired by the people or advantageous to Government. We have said we'do not think sauments can be usufully employed unless placed in situations or wested

Thus by the abelition of the registrary courts a large maraber of servants will be deprived of my employment, and behin of idlenon will be encounged or created at a time of life

proposed will lead the jurior servants to despair of their prospects, to lack upon themselves proposed with and not remode, and finding nothing so call forth that: emergies they will sink. 16 December 1831. \$1. The Committee conclude their interesting report by extremity recommending that this branch of business by not taken away from the civil service.

SR. I shall said only a few words on the subject of the employment of the junior civil

SS. The recent establishment of a Sudder Revenue Board, to be ordinerally engineed at

Allahabad, in the Westorn Provinces, appears to present a favourable opportunity of affording which the artifements of the land revenue ought to be conducted, as may quelify them to render exential service to the collectors in the prosecution of that branch of their duties. I have understood that in Gorockpore the assistants employed in revenue dones have acquired under the instructions of the late Commissioner, Mr. R. M. Bird (recently appointed they are employed, to reader their services highly valuable. It might be very hourfleist to the public service if unistants intended for employment in the Revenue Department in the Western Provinces were, previously to entering upon their public duries, required to qualify themselves by service for a time as anistmas attached to the office of the Western Sudder Board, under whose instructions, and in the ducharge of such duties as the Board miche deem proper to assign to them, they might be expected sooner to acquire the requisite qualifications for employment in aid of the collectors in the daty of revising the settlements, and when sufficiently qualified they might be deputed, at the discretion of the Board so those districts where their services suight be must advantageously employed, some increased allowance being granted to them from the date that they may be so deputed, or may be reported by the Board qualified; and I would snaged the experiency of the Western Resease Roard being consulted (after Mr. Bird shall have joined the licent) as to the adventages which, in employment in the Revenue Department.

Although I have recreded the foregoing observations and suggestions in the Judicial

and Revenue Department. I have to request that a copy of this Manuals may be sent to the

General Department for transmission from themes, with the papers to which it has reference, to the Hanna shie Court of Directors. (signed)

W. Bhut.

(81.)-EXTRACT GENERAL MINUTE of Sir John Molcoles, dated 16th Nov. 1830. 275. A Governor of Bombay cannot in my opinion perform his duty without frequently visiting the provinces. Those visits have been, for causes stated in my Minute of the 29th matent, attended with considerable expense. This has been much diminsted however, and will be more so in future; but no cost that can be incurred will bear any comparison to the benefit produced by such circuits. They give life and animation to all closers; refer every thing to persons; they are slow to understand the abstract excellence of our presence. Besides these impressions upon the native population, the Governor becomes acquainted with the European public officers of the provinces. Removed from the acreeor collect the revenue of the various districts, from the feeling and sentiments of the people; he sees and remedies abuses on the spot, and judges in person of the value of proposed imand prevent under expenditure in every department. The extraordinary advances made in almost every bounch of the government by my predecessor, Mr. Elphontone, are much to I may averibe a great proportion of the reforms and reductions as well as improvements that have been effected slace my arrival, to the same cause. But above all, it is of importance to remark, that in countries albusted like many of those under Bombay, the public 276. There are objections which have been often arged to a Governor being for may period

absent from the seat of his government: and certainly, independent of the extra expense stitution of the Indian Government most undergo some change; and inquiry into this part (4462mlikel mage digitised by the Uhike Body of Southwagier, Library Digitisation 99ml

282. I am aware of the arguments that may be used, of this system enabling a Govern-

most to employ furious with rions facility, so the injusy of the senious; but in the premot state of the service, which is dull becoming most one of supervision mod carting, and the clutter consequency bearing most of supervision little states of the service of supervision for supervision most hands give a rich carting the state of the service state and supervision for the state of a section most be no advantage. Considering the nature of the civil service and its duting I have no identification for the civil service and its duting. I have no identification the civil service and the state of the state of the state of the service and the state of the service and the state of t

This is not spike that I are immediate to global for the other interference of East, and the Contraction of the Contraction of the Contraction of the Contraction part on a mediate by the Contraction of t

well as incompetence will be continued came of injury to Government. Such will will resile recent referms to much aggravated. These, by including a combination of the dation of several offices in one person, demand that those employed should person talent and energy,

284. I know no medium between the plan I have suggested and restoring offices which have been lately elicitehed, and indeed constituting others which men of good character, though different in qualities required for the higher and more responsible stations in the service. remedy that will sufficiently proceed the public interests, and these are in Inche singularly associated, so far as the employment of individuals is concerned with the pro-parity of our provinces and the happiness of the inhabitants. The change I have proposed atomit be gradually introduced. The claims of incurrients about the supecced, and its operation might be limited to the future, and to effect those only of a certain standing, periops 10 or 12 years, otherwise it might press hard upon men who, from long usage, deemed themselves entitled to cling to an office while they existed, and who had in this expectation been improvident of the future. The several effects of the arrangement suggested would be excellent, as it affected junior civil servants. These, knowing that their claims would terminate at the expiration of 22 years, unless so qualified as to be required on high relents they would be more careful than at present to provide the moure of reterning home at the period when their right to employment and their prospect of advance-

285 By this rule alone can the civil service of this presidency be placed upon a footing that will enable Government to introduce visions essential to combine an economical with an efficient administration. If it is adopted, still further reduction may be made without danger in European agency; if not, we shall soon have to increase instead of diminishing expense; for it seniority in standing is to continue a claim, as at present, for high employ, that can hardly be set seide, duties which are now united must again be subdivided, that may be more spited to the abilities or impaired constitutions of those to whom they are allotted

\$84. The greatest care and solicitude has been shown by the Court of Directors in the which there is more of intelligence, of honourable feeling, or of high qualifications; but their duties, always acduses, have of lose become much more to, for the transfers employed have been greatly reduced. The effect of late arrangements at this presidency, with the continued sertling out of spiters, has been such that we have now double the number of civil secretary to stations in which they can be placed; and making every admission for special duties. consisten, or for farloughs, there still remains a load of supernumeratios from which the service must in some mode or other be relieved.

267. A plan for accomplishing this object has been given me by a semible and well-informed civil orrest, and accompanied my Mirate of the 18th Scatember 1830. If the calculations in it are correct, the object desired might be adopted with profit instead of loss

2008. I have in the Minute already quoted observed, "It becomes my duty to bring to some remedy: for though it may be stated that the rise of the civil tervents at this presidency for the last 12 years has been considerable, it only aggravates the land consequences which must now be amileipated from the junior bounches becoming hopeless and discontented; and if the actual state of the service can be shown to be such that the most be the incrimble result of measures of reductions recently adopted, it is of importance to devise a remedy principal agents of administration, without which no plan of referm can be permanent or mecenful. This subject has long occupied my offendor: it is one of the most serious importance. I here no bestedon in stating it to be my opinion that all plans, the objects been adopted or are in progress, will full, if the civil service remains clogged as at present success of such plans, are not placed in a condition that gives them heart for their labours

289 As latimetely associated with success in the administration of India, I have given 25 Nevember 1800. De deme, I have given my sentiments in a very recent Minute i "I have much reason to be satisfied," I observe, "alone my arrival, with the conduct and progress made in attribing the

necessary qualifications for employment, of the junior civil servants. Many not above those assessmin. Few are in obt; but shough there is in this portular and in their application to business a considerable reform, still much is wanted. There is not yet that distribute and sense of obligation to perform the duties to which they are nominated, which the actual sendition of the evel service requires shoulth-be introduced (Duties and eften deemed

optional,

optional, and not prescribed and enforced in that strict manner they ought. The prospect to the public service, and then to individuals becoming life and eractiles. This and other evils must be corrected; many circumstances have combined to reasher the task of doing so againstity which belonged to them in a rigid manner, even when it was recessary; but that every local of a department finding full employment for his assistants; and in the revenue line the maintains, when they are qualified, should be departed with specific charmy to the elistricis, and the collector obliged to transmit a quarterly return of the work done by every I proposed in this Minute a Government order, which has been published, and which,

pass on exemination, and cannot produce most architectory proof of laving been prevented by illness from stady, will be recarted to the Court of Directors, who will no clouds take effectual measures to provent a service in which efficiency is so essentially required, being

cleaged with alle and suprofable public servants.

200. I have dwelt at much length upon the civil service, because I am meafied it must be depress a local service upon which our successful administration of India must so materially depend; but I am at the same time personded it never can be so elevated and supported, almost exclusive attention to seniority in this service can be safe; there remain few, if any, stations in which the public interests must not suffer. If the reasons filling them are not follow qualified to their duties. A wide field in opening to the ambition of the civil servents, by arrangements made and proposed, and indeed rendered necessary by the actual state of the former usons, or mistrant of those who exercise appreme power in India; but there will be, I hope, sufficient evidence to prove that the changes are as essential to the more interests and 201. In concluding my observations ment the civil service of this presidence, it is just to

every practices, have been precability at all hours, and inquired personally into every comwith which these theirs were performed by European experiors must generally recognited impured during the administration of my predecessor, Mr. Elphiastone, they received by the discharge of high and re-punsible duties, than will be found among the civil servants at (signed) John Makolm.

(12.)-LETTER from the Lord Bishop of Coleans to the Bengal Government

I may the honour to submit to the Government, n representation of the provent state of (12.) Letter from the Bengal ecclesiastical establishment, which appears to be very intelegante to the souritast the Bishau of wants of the European population under this presidency; the number of chaptains has now, Colomby the death of the Reverend Mr. Viscent, late joint chaplain at Cawapese, been reduced to 13 July 1818. 17, exclusive of my demonic chaplain: of which number the Reversal Mr. Profile is none to England on his private officers, and the Reverend Mr. Hustings is on the way to his amilion

duty, is only 15, and probably a higher rate of efficiency, if we advert to continguacies to

I have, therefore, to request, Sir, that you will bring the subject of this letter to the notice imprining children, to a distance of 150 miles; in a recent histonies, a thurshow went to Cuttack from Calcutts. It is obvious, however, that this can happen only when the parties so applying are coabled to offer an apple compensation : besides, that the inconvenient extenson of the limits of a cure is of use only in the essengencies specifical, and can have no having resident elergy. I make this application with the avester confidence, when I observe the very liberal increase

of the ecclesistical establishment which has taken place within the last two years, in other parts of my diocese. The number of displains in the archdecentry of Madras, being 22, and in that of Boulay eight, I ought, perhaps, to have beought this subject to the notice of Government at an earlier period, but I thought it not supposable from the circumstance now

address, that an augmentation of this establishment might already be contemplated.

(signed) T. R. Colentts.

PROPOSED STATIONS. The attribute advented to in the accompanying letter, as seeming to require that a displain

should be permanently appointed to each, are the following: Bazettly, the station of a circuit. Court; Allahabad, civil and military; Canack, civil and military; Chittagong, civil autoca, with some troops and meny European artificers; Kurasad, a principal military station; Muttre, a principal military station; Bhaugulpere, a civil station, with some troops, and especially as being central to a very large district in which there is no chaplain, including

To this list I would subjoin the two residencies of Delbi and Lucknow, where, heather the esidents, there are many Europeans constantly stationed, and where it seems essential to the benear of our religion, that it should be miletained by the regular performance of sliving

It may be proper to observe, that is girl list I have not adverted to the vacancy recently emiened at Cowapore, where two chaplains are allowed.

Nep. per men. (20.) Letter from

My Lord Wis propose in this address to bring the ecclesisation autobishments to the action of R*6,57,568, and in 1927-98 to R*6,98,962. We apprehend that, unless checked, it has not yet by any means attained its fall limits, as we are aware that, in the opinion of those blishment in still isodequate to the performance of the doties with which it is charged. In ought to be constituted and its extent determined.

2. In the first place, we believe that there is a peacerd concurrence of sentiment that the

grounds of expense, the countrol of a Bedsop for India and an architector for each of the all still street on a footing of high re-proteining, bring constituted on principles similar to a cheese in England. Such an arrangement for the discipline and government of the ecclesioned establishment unaventumly robes me provid crouge whom unover an arrange general, amount, but the advantage of the change in accuraing increased efficiency and respectability, 30 April 1830 3. We have stated, however, that we apprehend that she increase of expense, unless

(Si) Letter from

most is, its respectability would be as greet, although its osefuleers would not be equally extensive, whether it were confined to the three presidenties or were agreed from Cape incurred, ought properly to excrese preformant ufficance.

4. Under the view of the subject just taken, we begience to express our opinion that every remonstile decreased upon the Government would be satisfied by its natistaining such an establishment of elergymen of the class chool England to would soffice for the following First. Public worship ought of course to be celebrated without interruption at the

several churches of the three pravidencies, which see supported by Covernment; Secondly. At each mulies at which one or more fouropean regiments are collisingly quartered, such previous abould be usual for the spiritual varies of the soldlers and other European agreems of the Gosymmout as may obviste the risk of their being Tim'dly. All the other statistics at which there may be two or store public establish-ments under the authority of European officers should be visited by one of the tions all European Government officers should have the opportunity of obtaining the

services of a clerywhan for the celebration of the rites of marriage or baptism at a 5. We conceive that the ecclesisation establishment, if calculated to provide for the above objects, would stand on the highest scale to which in the present discumstances of India it ought to be allowed to rise; and in conjur to this conclusion, we have confully adverted to the several representations which have led to the successive additions made to the sumber of

6. We consider this to be the counts scale of enablishment which could be required, and we do not down it essential that this make should invariably be maintained. so many sussionaries in India (some of these entained as muniture of the Established Church), that it is easy at many stations to supply the want of a regular eksplain; and referring to the interesting report in which the lote Histor Heber destiled the result of his tour through the provinces subordinate to this profileacy, dated the 5th April 1825, we about that that of tlergymen to whose we alkale; and he obviously was of opinion that of Monghyr, Chemar and some other stemage the spiritual charge might be very advantageously settinated to them. but it may be prosupped that, if the ognision had veguised it, he would not have failed to give them a water scope; and although the measure of corpleying missistanties may not discenser, or Reence Catholic, or presons who, shough belonging to the church of England, tion of the fixed establishment may reader at shellrable to employ.

Appendix (

7. (41.)—LETTER from the Lord Subop of Calculus to the Governor-general in Council of Second, dated 18th June 1839.

(4h) Leitze from

My Lord,

I may the broom to acknowledge the receipt of m letter to my address, bearing date Foot

Catestra.

William, My 18th, 1880, 1800, steller the signature of your Lordship, together with those of two

Calcains, "William, May 18th, 1880, under the signature of your Lordning, together with those of a 16 June 1880. "Been Septeme Cornell." It gives me great pleasure to have the opportunity of effering to your Lordning in Counties expension of my best whink for this communication, and for the riblinging assertance the

every interaction plants institutely.

The conductive the conducti

possits ryose which the conclusions they have integral are it variance with what I conceive teight to be the principle of any arrangement to be proposed for the ecolosisadeal establishment in ladis.

My objections to the plan held down (for I lament to say the remarks I have to offer will assume the foun of objections) are there:

bit. This it will not accomplish the objects proposel, (via. a reduction and limitation of expositure) without array than a commensurate thinitation of the deserted efficiency.
3b. That if allapted, it would prove be its operation objected reminimentally; on the one side enforcement, the Government, by ploting it in a new and false position with respect to our units understood on the control of the property of of the property

on the pure of the reclesionisal authorities.

At That the principle upon which, as issualution, the whole recenture according atmits in one that control to manufact diffusion, and all

one that cannot for maintelined without concovering all ainmed throwing of legislation, and all the illustress of experience, real breaking through an enginesi and financamental regulation of the East India, Company's government.

I tecl descript the recognishite that must attack to the chilevation of cantalainer for recurrent

secreture like thee, let I are smelt consurped by the on easily that the stock I'm prepared to argo or lebited with done minimated by a large date of possion to fores, who by notibees, wight of claraters, handwidge of efficies, and station, must be regarded as garning a very inflamental parsion of the contensity.

Int. That the plus hid know will not occurreful intolgiests.

Or that part of the prepared relevation which affects the reinisises of the Soutish church,

use encourse will be very affice-epitable at brone to a large body of Christians, who will not lightly abunded what they are swarmated to consider their just claims; node that here is in Juswhere the west in so awarely field of individuals of chemeter, who can consumed leisure to

ON THE AFFAIRS OF THE EAST INDIA COMPANY. Presidency, so possilizely fitted for the duty, must be felt as a great inconvenience. I am aware one not the highest granula upon which this specific reduction may and will be

These

point). Convert to them may, making they come would my presume expensions.

The group well retrement of the provision for the church sun biblioness will, as a measure (41.) Letter from parases with the methodized and not with the orders concentrate in this department. The Colomb,

But the objections to the arrangement proposed go further than this; I would entreed your Lordship in Council to exceed to that it is the purpose of the committee to fix the number

The 2d pencion I make took to mointain was, " that the plan, if adopted, would prove in its operation oftogrelary unreasurable,"

It is proposed, if I understand this classe of the committee's recommendation origins, that time to time he found in India under the character of minimuries. To such persons it is galvised that recovers should be bad, when inconvenience is felt in convenience of the inalignacy of the more provided for the performance of ministerial duties at the several of the committee annother, might be raised against this recommendation; I will observe only that by it the Government would be embergesed at once with all the difficulties of the mesionary question; skey would become identified with all that is doing to attempted for this to India, except as engaged in the oursersion of the Heather, and of whose competency in an have no knowledge, and as their appointment must have been made in the first instance without reference to the authority of Government, and derived from sources of which there would be no cagainence, the strange neormaly would not unfrequently occur that Government might be supporting an individual after he had been separated from or discovered by the only nuthority which give him even the shadow of a claim to exercise these functions, for which he is to receive a salary. Those observations must be undended to apply to that class of missionaries to whom reference is made by the committee, as not being to communion with the Church of England. But in respect to all missionaries, both of our own and other pose which should be, and I rejoice to say often is, the characteristic of their preuling

Some remarks seem to be called for by certain expressions in this clause of the committee's letter, respective the savay expressed by the church in India, and the mode of increasing and securing the respectability of its clergy. For massif and my brethren, I would disclaim all degree that the Established Church should possess or exercise any away, except for the maintenance of public order, nar can I form an idea of sespectability attacking

In proceeding to speak to the points of the fid head of eigection, I would take have to submit to your Lordship in Council, that the principle so broadly stated by the committee, viz." That it is not incombent upon the ruling authorates in British India to make provision for the spiritual vents of their Christian sulfaces," appears to be at variance will every received theory of progressests a wise vents of rails will always be a system of discipling rather then of purishment, but there can be no discipline without sound morely, no wound merals without the assection of religion. I seed not surely add, that to a Government calling itself Christian, there is but one religion which ear he regarded as affording a sure foundation

I would desire to non-on the liquis of the most extended soleration, The Government of Inche has hitherto wively refer total from any direct interference with the a participation is those advantages so largely capped by Hindon and Mussalmans. A very different view was taken of this matter by the earlier framers of the Indian establishments; they held it an indispensable duty to make provision for the religious wants of all their native dependents; and it is clear that they intended this provision to be commensurate with the extent of their authority and influence. From this principle the Indian Government has never awarved; the application of it may have been modified from time to time in reference to existing circumstates, but as a principle it has never been who would arge considerations of a very questionable exceeding against adductions of the most (445.—1) much image algebraiches. It is a generative of Small-amples I desegrational and I are the consideration of the most of the consideration of the most of the consideration of the constant of the constant
